Dorota Dutsch, Santa Barbara, USA
Romana Bassi, Padova, Italy
Massimo Mazzotti, Berkeley, CA, USA

As the historical records prove, women have long been creating original contributions to philosophy. We have valuable writings from female philosophers from Antiquity and the Middle Ages, and a continuous tradition from the Renaissance to today. The history of women philosophers thus stretches back as far as the history of philosophy itself. The presence as well as the absence of women philosophers throughout the course of history parallels the history of philosophy as a whole.

Edith Stein, Hannah Arendt and Simone de Beauvoir, the most famous representatives of this tradition in the twentieth century, did not appear from nowhere. They stand, so to speak, on the shoulders of the female titans who came before them.

The series Women Philosophers and Scientists published by Springer is of interest not only to the international philosophy community, but also for scholars in history of science and mathematics, the history of ideas, and in women’s studies.
Knowledge, Mind and Reality: An Introduction by Early Twentieth-Century American Women Philosophers
To Joseph Berkovitz, Eric Olson and, especially, Christopher S. Hill, who made it possible for me to work as a philosopher.

—Joel Katzav

To Mary Ellen Waithè, Therese Boos Dykeman, and in memory of Sue Weinberg, who welcomed me to the world of women-in-philosophy.

—Dorothy Rogers

To Jaap Van Brakel, who introduced me to classical pragmatism, and thereby to the consolation of philosophy.

—Krist Vaesen
Series Foreword

Women Philosophers and Scientists

The history of women’s contributions to philosophy and the sciences dates back to the very beginnings of these disciplines. Theano, Hypatia, Du Châtelet, Agnesi, Germain, Lovelace, Stebbing, Curie, Stein are only a small selection of prominent women philosophers and scientists throughout history.

The Springer Series *Women Philosophers and Scientists* provides a platform for publishing cutting-edge scholarship on women’s contributions to the sciences, to philosophy, and to interdisciplinary academic areas. We therefore include in our scope women’s contributions to biology, physics, chemistry, and related sciences. The Series also encompasses the entire discipline of the history of philosophy since antiquity (including metaphysics, aesthetics, philosophy of religion, etc.). We welcome also work about women’s contributions to mathematics and to interdisciplinary areas such as philosophy of biology, philosophy of medicine, sociology, etc.

The research presented in this series serves to recover women’s contributions and to revise our knowledge of the development of philosophical and scientific disciplines, so as to present the full scope of their theoretical and methodological traditions. Supported by an advisory board of internationally esteemed scholars, the volumes offer a comprehensive, up-to-date source of reference for this field of growing relevance. See the listing of planned volumes.

The Springer Series *Women Philosophers and Scientists* will publish monographs, handbooks, collections, anthologies and dissertations.
