Anthropincentristic

Anthropincentric principle - see anthropincentricity.

Anthropocentricity - in Astronist Philosophy, an approach to existential understanding that prioritises and centralises humanity, especially when humanity is prioritised and centralised above The Cosmos, or any celestial.

Anthropocentrics - in Astronist Philosophy, collectively referring to all modes of behaviour, notions, positions, and concepts in support of anthropocentricity, typically used in a negative tone from the perspective of the Astronist Tradition.

Anthropocentrism - see anthropocentricity.

Derivatives

Anthropocentrist
Anthropocentristic

Anthropogenesis - in Astronist Philosophy, notions and theories relating to the creation and origination of humanity.

Derivatives

Anthropogeneses
Anthropogenetic
Anthropogenetically

Anthropological Cosmology - in spacial psychology, a type of cosmos that emphasises and is concerned with the role of humanity in the wider cosmical system as a factor in human psychological wellbeing and typically incorporates the Anthropic Principle, anthropocentrism, and others, in order to form The Anthropic Cosmos.

Anthroponym - in an Astronist contextualisation, the name of an Astronist character, such as Jesse Millette, or Ellena Chadwell.

Derivatives

Anthroponymic
Anthroponymity

Anthrozoology - an Astronist Subject dealing with the interactions between humans and animals, especially on another planet than The Earth.

Derivatives

Anthrozoologic
Anthrozoological
Anthrozoologically
Anthrozoologist

Antial - in Equational Philosophy, as part of the wider Astronist Philosophy, relating to either every element of an equation that comes before the equals sign, or relates to a integer that comes in front of an alphabetical letter denoting an instrument of study.

Derivatives

Antially

Anti-anthropicity - in Astronist Philosophy, the semistrument measuring the extent of humanity's irrelevance in cosmic affairs and existence and is aligned with the Anti-anthropic Principle and is applied to support the principle, and is to be applied within the subdiscipline of anti-anthropics.

Derivatives

Anti-anthropicities

Anti-anthropics - a subdiscipline of prophetics in Astronist Philosophy dealing with the Anti-anthropic Principle and the notions it addresses, and the consequences of its application both conceptually, and societally.

Derivatives

Anti-anthropicist

Anti-anthropicists

Anti-anthropicistic

Anti-anthropicistically

Anti-anthropocentric - in theory, philosophy, and worldview, the belief held that anthropocentrism is stagnating and negative on the progression of humanity, and even dangerous to the human psyche.

Derivatives

Anti-anthropocentrism

Anti-anthropocentricity

Anti-anthropocentrically

Anti-anthropocentricist

Antiastronism - an alternative term for antiAstronism.

Derivatives

Antiastronic

Antiastronical

Antiastronically

Antiastronicity

Anti-astronocentricity - in Astronist Philosophy, any opposition, or notions contrary to those of astronocentricity.

Derivatives

Anti-astronocentric

Anti-astronocentrically

Anti-astronocentrism

Anti-astronocentrist

Anticentre - in Astronist Philosophy, that which is furthest from the centre, or that which focuses on the periphery rather than the centre of something, either physically, or conceptually.

Derivatives

Anticentric
Anticentral
Anticentrically
Anticentricity
Anticentral
Anticentrality

Anticlastic - in Astronist Architecture, of a double-curved surface in which the two curvatures lie in opposite directions, and is typically cosmically ornamented.

Anticosmica - an alternative term for antiAstronism.

Anti-cosmocentricity - in Astronist Philosophy, any opposition, or notions contrary to those of cosmocentricity.

Derivatives

Anti-cosmocentric
Anti-cosmocentrically
Anti-cosmocentrism
Anti-cosmocentrist

Anti-Cosmos, The - of a person's views, or of a particular concept, the opposition to a cosmocentric outlook, or the ideological position holding that order and structure of The Universe are to be abolished, or do, or should not exist entirely.

Derivatives

Anti-Cosmic
Anti-Cosmica
Anti-Cosmosity

Anticrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as embodying destruction or anti-creation, especially in Astronist Art.

Anticreationism - in Astronist Philosophy, a branch of Creation Theory holding that there is no definite creation of either The Cosmos, The Universe, or The Divine, and so, leads onto other theories and concepts about their eternal existences, or the absolute incomprehension of their creations.

Derivatives

Anticreate
Anticreation
Anticreational
Anticreating
Anticreated
Anticreator
Anticreators

Anti-extraterrestrialism - in sentientology of Astronist Philosophy, one of the Four Orientations of Sentientology characterised by a disbelief and total disregard for the notion that there exists humans, humanoids, or any other intelligent life on planets other than The Earth, as is the belief held by the orientation of extraterrestrialism.

Derivatives

Anti-extraterrestrialist

Anti-extraterrestrialistic

Anti-extraterrestrialistically

Antiguan Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Antigua and Barbuda.
- the denomination of The Philosophy of Astronism mostly followed in Antigua and Barbuda, by the Antiguan and Barbudan peoples.

Anti-knowledge - in Astronist Philosophy, any people, set of ideas, or viewpoint orientations that are considered to be against philosophy, learning greater amounts of knowledge, or allowing people to learn about different ideas, even those which are not majoratively agreed upon, or believed. Essentially, to be anti-knowledge is to lack the sense of that which is known as the Philosophical Spirit in Astronist Philosophy.

Anti-learning - in Astronist Philosophy, any and all oppositions to the principle that learning ideas, whether they are new or traditional, or whether they are agreed upon by the majority of people or not, is the most important aspect of that which is known as the Philosophical Spirit.

Antilogy - in Astronist Philosophy, a statement, concept, or opinion that is knowingly contradictory, or is in opposition to logic.

Derivatives

Antilogic

Antilogical

Antilogicity

Antilogically

Antimentor - in Astronist Philosophy, that which is in opposition to something else, but nevertheless depends upon it.

Derivatives

Antimentory

Antimentorial

Antimentorially

Anti-militarism - in Astronist Propaganda, the view held that new propaganda should not be bound to its militaristic style of its past uses, but should be broadened in its uses, and be utilised for a variety of different things, and especially does not support the militarisation of a country through the use of propaganda as it was once used for.

AntiAstronistisation - the process of implementing the total opposition of any Astronist methodologies, ideologies, or philosophies.

AntiAstronistisationism - the belief that the total opposition of Astronist thought is the best way forward for either oneself, or one's nation.

AntiAstronistism - an alternative term for antiAstronism.

AntiAstronism

- also known as antiAstronism, antiastronism, or anticosmica, relating to any opposition to The Philosophy of Astronism, but may or may not be opposed to wider Astronist Philosophy, or other forms of Astronist Culture.
- in Astronist Philosophy, opposition to the use of the term Astronism, or any of its derivatives primarily including Astronism, due to the belief that the term is not cosmocentric and is rather Millettocentric, and therefore prefers the use of terms such as kosma, astronism, and cosmica to refer to The Philosophy.

Derivatives

AntiAstronist

AntiAstronistal

AntiAstronistally

AntiAstronistity

AntimultiAstronistisationism - the belief that openly and actively opposes the multiAstronistisation of two or more entities.

Antipathy - in an Astronist contextualisation, of an external group to the Company, holding deep seated negative opinions of the Company, especially due to personal reasons, or reasons unique to that individual.

Derivatives

Antipathic

Antipathically

Antipathicism

Antiphilosophy - opposition to philosophy of any kind, especially Organised Philosophy.

Derivatives

Antiphilosophical

Antiphilosophically

Anti-prosaicism - in Astronist Philosophy, one of the two approaches to the naming of astronomical objects and celestials characterised by the notion that astronomical objects and larger celestials should not be named numerically as is firmly held by the Astronist Tradition.

Derivatives

Anti-prosaicist

Anti-prosaicists

Anti-prosaicistic

Anti-prosaicistically

AntisocioAstronistisation - the opposition to the process of Astronistisation in one's own society.

Derivatives

AntisocioAstronistisationism

AntisuperAstronistisationism - the belief that superAstronistisationism is directly damaging the process of Astronistisation and considers superAstronistisation as a quasi or pseudo version of the Astronistisation process.

Antitechnology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical stance in opposition to technology, and typically align themselves with nature instead.

Derivatives

Antitechnologist

Antitechnologic

Antitechnological

Antitechnologically

Antithesis - in an Astronist contextualisation, an external individual, group, or organisation that is considered by the Company to be in total opposition in both their aims, philosophy, and in operational practices.

AntiultraAstronistisationism - the belief that the exact application of Astronistisation as originally outlined, is both damaging to the process and almost impossible to practically apply with some deviation and adaptation.

Àntony - derived from the Malagasy language, in Astronist Philosophy, a term relating to rationality, and reason in relation to philosophical concepts.

Antonym - a type of term that is in direct opposition to the meaning of another.

Derivatives

Antonymic

Antonymity

Apanage - in Astronist Philosophy, the privilege of knowledge proclaimed to exist in all philosophers, as opposed to the non-philosophers.

Apastron - in Astronist Philosophy, the point of maximum separation between two stars in a binary star system.

Derivatives

Apastronal

Apastronic

Apastronal Aphelion - another term for an apastron.

APC - see Asseverations of Philosophical Conception.

Aperiment - in Astronist Philosophy, the act and instance of uncovering a new philosophical concept within the Astronist philosophical tradition.

Derivatives

Aperer

Apertruss

Aperimenter

Aperimental

Aperimentally

Aperimentality

Aperturism - in introspectics of Astronist Philosophy, the school of thought and philosophical orientation holding that all philosophers should always be seeking to further improve and widen their mental, emotional, and philosophical apertures as the widening of this is considered to be in alignment with the Philosophical Spirit.

Derivatives

Aperturist

Aperturists

Aperturistic

Apex - in an Astronist contextualisation, the term referring to the top echelons of The People's Constitutional Company of Jesse Millette and The Governing Ministry, typically the Vice Chairman and Chairman, as well as those individuals whom sit on The Governing Council.

Derivatives

Apexial

Apexic

Apexical

Apexically

Apexity

Apexion - in Astronist Architecture, the absolute top point of an Astronist observatory.

Apgaismī - a follower of the Latvian denomination of The Philosophy of Astronism known as Apgaismībaism, or known as Kosmosāism.

Derivatives

Apgaismīs

Apgaismībaism - also known as Latvian Astronism, or as Kosmosāism, the denomination of The Philosophy of Astronism most predominantly adhered to in Latvia, as well as in some parts of Russia on the Latvian border.

Derivatives

Apgaismībaist

Aph - in Astronist Philosophy, the philophon for the discipline of aphnology.

Aphelionic - in Astronist Philosophy, relating to aphelions.

Derivatives

Aphelionical

Aphelionically

Aphelionity

Aphilosophicality - the extent to which an individual is indifferent or hostile to Organised Philosophy.

Aphilosophisation - the process of widespread philosophical and ideological change that results following the meeting between different philosophies.

Aphilosophy - indifferent or hostile to philosophy, especially Organised Philosophy.

Derivatives

Aphilosophical
Aphilosophically

Aphnology - in Astronist Philosophy, an area of study dealing with the philosophical study of wealth, and the concepts and theories involved with that.

Derivatives

Aphnologic
Aphnological
Aphnologically
Aphnologist

Apicality - in Astronist Philosophy, the instance in which a philosophy, school of thought, denomination, or concept/theory experiences its highest level of popularity in the history of its existence.

Derivatives

Apicalities

Apo - in Astronist Philosophy, the philophon for the discipline of apophatics.

Apoapsis - in Astronist Philosophy, relating to that which is neither furthest, nor closest to the star during its orbit; the median.

Derivatives

Apoapsides

Apogee - the point on a mission patch, or spacecraft emblem, which is furthest away from the centre.

Derivatives

Apogeian

Apogenesis - a term used in Astronist Cosmology, and Cosmic Philosophy, that which describes the ultimate fate of The Universe, especially when in contrast to The Universe's genesis in The Big Bang.

Derivatives

Apogeny

Apoheleic - in Astronist Philosophy, relating to an asteroid that is cosmical in naturity due to the fact that it is in orbit around a larger celestial, usually a moon, or a planet.

Derivatives

Apoheleicity

Apologia - in an Astronist contextualisation, the official and formal written documentation, typically from an executive in the Company, which defends their actions and opinions, or the actions of the department of which they are in charge, and is typically either addressed to the Chairman, or The Governing Council, or the public.

Derivatives

Apologium
Apologian

Apolunal - in Astronist Philosophy, relating to the apolune of a satellite or spacecraft.

Derivatives

Apolunic

Apolunical

Apolunically

Apolunicity

Apophatics - in Astronist Philosophy, as part of divinology, a pre-Astronist term relating to an approach to the study, perception, and understanding of that which is known as The Divine in the Astronist Cosmology that is characterised by attempting to notionise that which The Divine is not, rather than that which The Divine is, which is known as cataphatics.

Derivatives

Apophist

Apophistic

Apophistical

Apophistically

Apophisticity

Apothecary - in an Astronist contextualisation, in Astronist phrontisteries, the term for a registered pharmacist specialising in student care.

Derivatives

Apothecaries

Apotheosise - in Astronist Philosophy, Literature, Propaganda, Art, Culture, and Rendition, the act of representing an Astronist character, or writing about an Astronist character in such a way that depicts them in a particularly grand, exalted, and in rare and extreme cases, in a godly manner, though the latter of such representations is expressly discouraged by The People's Constitutional Company of Jesse Millette and its official organisations. However, grand and exalted imageries of the Astronist characters are considered to be at the core of Astronist art and depiction, and can be found in all art styles, renditions, and traditions.

Derivatives

Apotheosisation

Apotheosised

Apotheosis

Apotheosive

Apotheosively

Apotheosiser

Apparatus - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the second son of Damien and Ommenine, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Apparatusian

Apparatus - in Astronist Architecture, the collective noun for the various astronomical equipment found in Astronist building, the most common of which are telescopes, and orreries.

Apparement - in Astronist Philosophy, something that is seemingly, or apparently so, but in truth and reality, it is usually the opposite, or something other than seemingly perceived.

Appearancial - in Astronist Philosophy, relating to the real physical appearance of a celestial entity.

Appease - in an Astronist contextualisation, the pacification of an external group, typically in a political dispute, by acceding to their viewpoint, or demands.

Derivatives

Appeasement

Appeasal

Appeasor

Appeasee

Appellate - in Astronist Philosophy, to provide a concept, or a physical entity, especially a cosmic entity, with an official name.

Derivatives

Appellater

Appellatress

Appellated

Appellating

Appellation

- in an Astronist contextualisation, the official term for the process by which an individual's role within the Company is given a name.
- in Astronist Philosophy, a name that is ascribed to a particular concept, an example of which is The Will of The Cosmos.

Derivatives

Appellatory

Appellational

Appellatee

Appellative

Appellatology - a niche branch of study within Astronomy, referring to the study of the Astronist meanings associated with names.

Derivatives

Appellatologist

Appellatological

Appellatologically

Appellator - in Taylorianology, the title given to Brandon Taylorian because of The Appellation.

Appelliage - in Astronist Architecture, the view of an Astronist building from the front, especially in architectural design, and theory.

Appetency - in an Astronist contextualisation, the extent to which a business project or partnership is desired by the management team, especially after being briefed on the benefits of the project, or partnership.

Derivatives

Appetencies
Appetence

Application - the action of putting an idea into practice hypothetically.

Applicationism - a school of thought of The Philosophy of Astronism focusing on the importance of the application of philosophy to real world economics and policy rather than philosophy's traditionally abstract, and unpractical nature.

Derivatives

Applicationist
Applicationistic

Applicative Astronism - part of Divisionology, and the fourth sector of the four Levels of Astronism relating to the applications of the philosophy in one's personal life, in the society, in a group of people, or in the governance of a nation, and in an Astronist contextualisation, is most often manifested politically and socially by the philosophy of Astronarianism as a major branch of The Philosophy of Astronism.

Appodome - in Astronist Architecture, a small version of a dome atop a larger dome, especially found on an Astronist observatory.

Derivatives

Appodomes

Apportion - in an Astronist contextualisation, the official process by which a reward or bonus given to a department within the Company is divided up and shared out according to the extent to which each individual contributed to the success from that which the reward came.

Derivatives

Apportioner
Apportionment
Apportioneer
Apportionise
Apportionisation

Apportionism - a school of thought of The Philosophy of Astronism focusing on the idea that one's contribution to society should reflect the share of benefit and reward they receive from the society in which they live.

Derivatives

Apportionist
Apportionistic

Apposition - in an Astronist contextualisation, of products in an Astronist fashion or merchandise store, the positioning of certain products side by side in order to complement each other.

Derivatives

Appositionary
Appositional
Appositionally
Appositioned

Appentius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the first son of Jopten and Signia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Appentusian

Applied Philosophy - in an Astronist contextualisation, considered a position of period within The Philosophy of Astronism, but also holds its own autonomous view of philosophy, that centres on the idea that there are two aspects of philosophy (the other being Theoretical Philosophy), and Applied Philosophy is considered to be the physical manifestations of philosophical theory; the actual ways in which a philosophy is implemented into society, or into our daily lives and minds, as opposed to the idealised way in which a philosophy is to be applied as structured in Theoretical Philosophy.

Appraisal - a type of Astronist document, or essay that marks the official Astronist approach and interpretation, as well as followed by the critical discussion of a particular non-Astronist text, an example of which would be the *Astronist Appraisal of the Space Renaissance Manifesto*.

Derivatives

Appraisals

Appraise - in an Astronist contextualisation, the official assessment in worth, value, and contribution of a particular asset, brand, or methodology within the Company rather than the entire Company, or subsidiary itself.

Derivatives

Appraiser

Appraisee

Appraisement

Apprenant - in Astronist Philosophy, a learner, or student of a philosophical discipline.

Derivatives

Apprenants

Approbate - in an Astronist contextualisation, the official approval and subsequent sanctioning of an operation by The People's Constitutional Company of Jesse Millette.

Derivatives

Approbation

Approbator

Approbatee

Approbational

Approximate - in an Astronist contextualisation, the principle holding that when the Company makes a decision, the outcome, or return can never be exactly know, and so, it must be approximated.

Derivatives

Approximacy

Approximation

Approximational

Appulse - in Astronist Philosophy, the shortest distance between one celestial entity and another, as perceived from the perspective of a third entity.

Appurtenance

- in Astronist Ornamentation, any pattern added to an already existing pattern.
- in an Astronist contextualisation, referring collectively to the particular dress codes of The Chairman of The People's Constitutional Company of Jesse Millette in the setting of speech to denote the nature and content of the speech.
- in Astronist Philosophy, a philosophical orientation, or denomination that is associated with a particular style of living, dress, or eating habits.

Apsiš - a follower of the Lithuanian denomination of The Philosophy of Astronism known as Apsišvietimas'ism.

Derivatives

Apsišes

Apsišvietimas - the root term for Lithuanian Astronism.

Apsišvietimas'ism - also known as Lithuanian Astronism, and as Visataism, the denomination of The Philosophy of Astronism most predominantly adhered to in Lithuania, as well as in some parts of Russia near the Baltic region.

Derivatives

Apsišvietimas'ist

Apronym - a type of term relating to a Astronist character, typically in a children's book, whose name is amusingly appropriate to their occupation.

Derivatives

Apronymic

Apronymity

Aqartī - a follower of the Kazakh denomination of The Philosophy of Astronism known as Aqartizm.

Derivatives

Aqartīs

Aqartizm - also known as Kazakh Astronism, the denomination of The Philosophy of Astronism most commonly found across Kazakhstan, and in some parts of Russia on the Kazakh border.

Derivatives

Aqartizmist

Aqartizmistic

Aquasion - in Astronist Ornamentation, a type of croncretion and sculptural ornament which uses water to fill the indentations and depressions of the ornamental pattern.

Ara-batana - The School of Physicality of Astration as known in the Malagasy language.

Ara-panahy - The School of Spirituality of Astration as known in the Malagasy language.

Ara-tsaina - The School of Intellectuality of Astration as known in the Malagasy language.

Arbiter - in an Astronist contextualisation, the individual whom holds ultimate authority in a particular matter, or dispute.

Arab Astronism - the schools, branches, and denominations of The Philosophy of Astronism that are most prevalent in the Arab World.

AraboAstronistisation - the specific Astronistisation of Arab societies, either in a macro or micro form.

Derivatives

AraboAstronistisationism

Arcane - in Astronist Philosophy, collectively relating to all that is mysterious, or unknown within the Astronist philosophical tradition, and includes paradoxies, and the concept of chaosity.

Archaise - in an Astronist contextualisation, purposefully give old-fashioned characteristics and flavour to an Astronist documentation, or literature.

Derivatives

Archaisation

Archaisive

Archaisational

Aratonus - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the son of Aleece and Teodorin, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Aratonusian

Arboretum - in Astronist Architecture, as part of gardenry, a type of garden filled with a range of tree species and families.

Derivatives

Arboretums

Arca - in Astronist Rendition, a chest that is cosmically ornamented.

Derivatives

Arcas

Arcade - in some Astronist philosophical buildings, a succession of arches, typically proceeding the einetry or the ganzetry, and leading towards the arcadium.

Arcadia - in Astronist Ornamentation, part of Utopian art, the depiction of a pastoral scene, typically decorated by the presence of wildlife, flora, and at least one of The Five Astronist Characters.

Arcadium - in some Astronist philosophical buildings, a small courtyard proceeding an arcade with numerous entryways into other parts of the building, and acts as the central plaza with a decorated floor and most typically featuring at least one statue.

Derivatives

Arcadiums

Arcanum - in Astronist Alchemy, the secret of life, considered to be the extent of one's wonderment, interaction, knowledge, adoration, and laudation of The Cosmos.

Arcarium - collectively relating to all different types of boxes, chests, and trunks that are considered as part of Astronist Rendition due to their cosmical ornamentations.

Archcrest - in Astronist Architecture, a pavilion style structure atop an archway, especially one with cosmical ornamental decoration.

Derivatives

Archcrests

Archcrown - in Astronist Architecture, a type of decor at the tip of an archway featuring an Astronist crown ornamentation.

Derivatives

Archcrowns

Architecturalism - the principle that architecture should be at the centre of a society's culture, education, and philosophy, and advocates for the continual redefinition of the architectural landscape, as well as the restoration of architecture.

Derivatives

Architecturalist

Architecturalistic

Archology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of the governance of something, and the concepts and theories involved.

Derivatives

Archologic

Archological

Archologically

Archologist

Are - in Astronist Philosophy, the philophon for the discipline of areography.

Areography - in Astronist Philosophy, a subdiscipline of planetology dealing with the philosophical contemplation of all the geographical aspects of the classical planet of Mars.

Derivatives

Areographer

Areographic

Areographics

Areographical

Areographically

Areolabe - in Astronist Rendition, either a brass or plastic ornament featuring the classical planet of Mars and its two moons.

Derivatives

Areolabes

Aret - in Astronist Philosophy, the philophon for the discipline of Aretaics.

Aretaics - in Astronist Philosophy, the discipline of study dealing with the contemplation of virtue.

Derivatives

Aretaicist

Aretaicists

Aretaic

Aretaical

Aretaically

Aretology - in Astronist Philosophy, the same as aretaics, a discipline of study dealing with the philosophical study of virtue, and the surrounding concepts and theories.

Derivatives

Aretologic

Aristologist

Aṛivoḷi - a follower of the denomination of The Philosophy of Astronism known as Aṛivoḷi'ism.

Derivatives

Aṛivoḷis

Aṛivoḷi'ism - also known as Tamil Indian Astronism, and as Akilam, the denomination of The Philosophy of Astronism most predominantly adhered to in the southern Indian state of Tamil Nadu, as well as in some bordering Indian states, Sri Lanka and in parts of Tamil-speaking Malaysia.

Derivatives

Aṛivoḷi'ist

Aṛivut Tiraṇ - The School of Intellectuality in Astration as known in the Tamil language.

Arm - in Cosmic Art, as a derivation of Astronist Art, the region of a spiral galaxy that departs from the galactic concentricity, but not to be confused with a galactic tail.

Derivatives

Armic

Armial

Arma - in Astronist Rendition, a giant trunk that is cosmically ornamented.

Derivatives

Armas

Armamentarium - in an Astronist contextualisation, the extent of the resources available to an individual employee of the Company to conduct the operations required of them.

Derivatives

Armamentaria

Armarium - in Astronist Architecture, a type of small library within some planetariums, typically holding philosophical, cosmological, and astronomical books.

Derivatives

Armariums

Armenian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Armenia.

ArmenoAstronistisation - the specific Astronistisation of Armenian society, either in a macro or micro form.

Derivatives

ArmenoAstronistisationism

Arn - in Astronist Philosophy, the philophon for the discipline of arnonics.

Aromation - in Astronist Philosophy, a branch of Sensory Philosophy manifested by the approach to the philosophical concepts and theories through the sense of smell.

Derivatives

Aromational
Aromationally
Aromative
Aromatively

Arpa - in Astronist Rendition, a small box that is cosmically ornamented.

Derivatives

Arpas

Arrayal philosophy - in Astronist Philosophy, philosophical investigations conducted in a group rather than individually.

Arrayism - in Astronist Philosophy, an alternative approach to philosophical investigations and debates characterised by a focus on the group rather than the individual, as in conducting philosophical investigations with a group of other philosophers, as is practiced within arrayal philosophy.

Arrayist - in Astronist Philosophy, a person that conducts philosophical investigations collectively with others rather than individually.

Derivatives

Arrayists
Arrayistic
Arrayal

-ars - in Astronist Onomatology, a suffix used for Astronist names, in reference to the stars of The Cosmos.

Article

- in Constitutional Terminology, a major heading within The Grand Constitution, and acts as a divider of topics, and entails several sections within it.
- in Astronist Ornamentation, multiple ornaments compiled together, especially for the purpose of study.
- in Astronist philosophy, a section of writing within a disquisition of The Grand Centrality of The Philosophy of Astronism that focuses on a particular topic, or concept, and are typically segregated by titles.

Derivatives

Articles

Articularity - in Astronist Philosophy, the study and measurement of the articular structure of The Cosmos, especially in relation to The Metagalaxy.

Derivatives

Articularities

Articulatine - in Astronist Ornamentation, the joint between one pattern and another, especially in interlaccation, or between an appurtenance, and the original pattern.

Artpiece - a piece of art, whether it be conceptual, or physical.

Derivatives

Artpieces

Aruban Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Aruba.

Arx - in Astronist Architecture, an underground room, especially when used as a tomb for a prominent adherent of The Philosophy of Astronism

Derivatives

Arxium

Arxiums

Aryan - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Third Generation, and whose name connotes honour and being a warrior, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Aryanic

Ascendant - in an Astronist contextualisation, the term given to the individual one rank above another within the Company hierarchy.

Ascendation - in naology of Astronist Philosophy, the desire to get to the highest point in a building, especially a sopharium, in order to be closer to The Cosmos. Astronist philosophical buildings, also known as sophariums, are often built with ascendation in mind in order to provide areas for visitors the chance to achieve ascendation.

Derivatives

Ascendative

Ascendor

Ascendress

Ascendency - in Astronist Architecture, at least one set of steps beyond another, typically a term used in Architectural Theory.

Ascending Node - in kosmetrics of Astronist Philosophy, the appellation for a type of nodal contemplation relating to a node that faces upwards.

Ascension - in Astronist Ornamentation, any part of the ornamental pattern or motif which points upwards.

Ascertain - in an Astronist contextualisation, especially during the end phases of an open dispute, the discovery of true and verified facts appertaining to the subject at hand.

Derivatives

Ascertainment

Ascertainor
Ascertainee

Asgardia - a currently digital and hypothetical community of individuals that intend to be the first group to establish a fully-functioning and sovereign state in space independent of all other nations. Despite the present primitivity of such an organisation, Astronist Philosophy supports all such notions as they align with its own beliefs regarding the future of humanity. The Astronist philosophical tradition is expected to extend its support for all such enthusiastic communities and to assist them in any way with their developments.

Derivatives
Asgardian

Ashleen - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the fifth daughter of Aryan and Allene, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives
Ashleenian

Asian Jesse - the depictions of the Astronist character of Jesse that are most often portrayed for Asian audiences.

Asian Ellena - the depictions of the Astronist character of Ellena that are most often portrayed for Asian audiences.

Asian Oliver - the depictions of the Astronist character of Oliver that are most often portrayed for Asian audiences.

Asian Harriet - the depictions of the Astronist character of Harriet that are most often portrayed for Asian audiences.

Asian Zara - the depictions of the Astronist character of Zara that are most often portrayed for Asian audiences.

Āsimatenya - the most common demonym for a follower of The Philosophy of Astronism in the Amharic language.

Derivatives
Āsimatenyas

Asimilar - in Astronist Philosophy, that which is different or defined from something else.

Derivatives
Asimilarity
Asimilarities

Asinine - in an Astronist contextualisation, a term used to describe an individual's actions against the Company if such actions appertain aggressive, or hostile natures.

Derivatives
Asininity

Aspartame - in Astronist Propaganda, the addition of ornaments to a propaganda piece, adopted from Astronist Ornamentation.

Asper - in Astronist Philosophy, to look at, gaze upon, to behold something cosmical, especially the starry night sky, or a cosmic display, or light show.

Derivatives

Asperment

Asperition

Aspering

Aspered

Asperer

Aspertress

Asperse - in an Astronist contextualisation, of a individual, to attempt to attack the reputation and integrity of The People's Constitutional Company of Jesse Millette.

Aspersion

Aspersive

Asperser

Aspersee

Aspinatra - in Astronist Music, as part of the standard piece structure, the melody of an Astronist piece of music as preceded and proceeded by that which is known as the dematra which is the equivalent to the chorus of non-Astronist classical music pieces. The standard piece structure of Astronist musical pieces can be found outlined in *The Book of Tunology*.

Assainissement - in Astronist Philosophy, a technique of restoration and revival within philosophy that involves the purification of all illogicalities, and inconsistencies.

Assart - in an Astronist contextualisation, to turn forestland owned by the Company into building land, after governmental and legal approval.

Assemblance - in Astronist Architecture, the main auditorium of an eidouranium used for many purposes, and is typically heavily cosmically ornamented.

Derivatives

Assemblancy

Assemblances

Assent - in an Astronist contextualisation, the signs and expressions taken by The People's Constitutional Company of Jesse Millette towards making an agreement in a dispute, but not referring to the agreement itself.

Assetting - known officially as assettation, the management practice undertaken by a subsidiary of The People's Constitutional Company of Jesse Millette whereby its primary operational focus is the handling and general overseeing of the financial properties of its own subsidiaries as a collected group.

Derivatives

Assettation

Assettational
Assetter
Assettee

Asseverations of Philosophical Conception - in Astronist Philosophy, better known by its acronym APC, symbolising that any book with that acronym printed onto it demonstrates that an investigation, and symposium has taken place over the concepts that the book addresses, and asseverates that the concepts therein are in alignment with the official views of The Institution of The Philosophy of Astronism. Notably, the original transcript of The Omnidoxy does not bear the APC symbol.

Assignation - in an Astronist contextualisation, the appointment of an individual within the Company to a particular mission, especially one that is solely their own responsibility.

Associate - in an Astronist contextualisation, an external individual, group, or organisation to the Company whom isn't employed by the Company itself, but is trusted, typically by previous experience, to conduct an operation, or campaign on the Company's behalf.

Derivatives

Associative
Associatively

Associated - in Philosophical Demography, also known as Philosophical Demographics, one of the two main aspects of Philosophical Demography, the other being unassociation, or unassociated individuals, that measures peoples of a population that are associated with some kind of philosophical denomination, but on its own, does not distinguish by which philosophical denomination.

Derivatives

Association

Associated orientation - in Astronist Philosophy, a particular belief orientation that becomes typical of an Astronist character due to their depiction or representation of their adherence to it. From the Astronist Tradition's perspective, Jesse's associated orientation is Kosma; Ellena's associated orientation is materialism; Zara's associated orientation is environmentalism; Oliver's associated orientation is hedonism; finally, Harriet's associated orientation is feminism.

Associationism - a school of thought of The Philosophy of Astronism focusing on the similarities between two methodologies, theories, or philosophies, and the subsequent emphasis of these factors on the unification of ideas.

Derivatives

Associationist
Associationistic

Assortment - in Astronist Ornamentation, the critical analysis of the assortment of ornamental patterns and motifs on an ornamentation field.

Assumption - in an Astronist contextualisation, an event or operation that is considered by the Company to occur either in a particular time period, or indefinitely, especially without proof.

Assurity - in Astronist Philosophy, the instance in which something is assured, and the measurement of the extent of the assurance.

Derivatives

Assurities

-ast - in Astronist Onomatology, a suffix used for Astronist names, in reference to the stars of The Cosmos.

Ast- - in Astronist Onomatology, a prefix used for Astronist names, in reference to either astronomy, stars, asteroids, or any other celestial entity.

Ast - in Astronist Philosophy, the philophon for the discipline of Astrometrics.

Asterism - also known as astration, a branch of knowledge in The Philosophy of Astronism concerning the study of prominent patterns and groups of stars that are smaller than a full constellation.

Derivatives

Asteric

Asterical

Asterically

Astericity

Asterist

Asterisms

Astérispíti - derived from the Greek language and used in Greek denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Astérispítia

Asteroidal Formation - a branch of formatology dealing with the formations of asteroids from a purely philosophical perspective.

Asteroidary - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of March.

Asteroidonym - a type of term relating to an asteroid whose name has been appointed by an Astronist organisation.

Derivatives

Asteroidonymic

Asteroidonymity

Astor - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Third Generation, as the lover of Vincenzo, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Astorian

Astoric

Astr - in Astronist Philosophy, the philophon for the discipline of Astronomy.

Astra - in Astronist Architecture, a type of star ornamented finial used numerous times on Astronist buildings, and in some styles, the star itself is cosmically ornamented.

Derivatives

Astras

Astragal - in Astronist Architecture, a narrow and semicircular moulding found at the top and bottom of a column, door, or window frame.

Derivatives

Astragals

Astralcentrism - a branch of knowledge in The Philosophy of Astronism concerning the distinct centrality in study of a supposed non-physical realm of existence after death, most commonly and traditionally called heaven.

Derivatives

Astralcentric

Astralcentricity

Astralcentrist

Astralism - a branch of knowledge in The Philosophy of Astronism concerning the study of stars, and representation of stars in art, ornamentation, and literature, and holds stars to be directly connected to The Divine, as well as some of the greatest entities to unlock the cosmical mysteries.

Derivatives

Astralist

Astralic

Astralistic

Astralicity

Astrality - in Astronist Philosophy, denoting the instance, state, and characteristic of holding the ability to wonderment, as well as the extent to which one holds such an ability, the oppositism of which is inastrality.

Derivatives

Astralities

Astral Panorama - in Astronist Philosophy, an appellation for the entirety of the stars of The Cosmos.

Astral therapy - in occurrology of Astronist Philosophy, the practice of astronomical activities in order to make oneself feel more cheerful.

Astramic - in Astronist Architecture, a specific type of ceiling that is cosmically ornamented, with some styles stretching the ornamentation onto the walls of the room as well.

Derivatives

Astramics

Astrance - in Astronist Rendition, a type of heavily ornamented decorative floor stand, typically of waist height, found in some Astronist philosophical buildings that most traditionally displays a handcrafted celestial ornament atop of it.

Derivatives

Astrances

Astrancial

Astrarble - in Astronist Rendition, a marble used as either a toy or decoration depending upon its size and price inside which cosmic entities are inserted.

Derivatives

Astrarbles

Astration - in Astronist Philosophy, the practice of asterism.

Derivatives

Astrational

Astrationally

Astrarium - in Astronist Rendition, a metal astronomical clock, often golden with cosmic inlaid patterns.

Derivatives

Astrariums

Astrature - in Astronist Philosophy, the entirety of the night sky. Compare with viewscape which relates to the night sky that only one can visibly see.

Derivatives

Astratural

Astroarch - in Astronist Architecture, a type of archway that is completely ornamented with unique cosmical patterns and imagery.

Derivatives

Astroarches

Astrobase - in Astronist Architecture, the base of a column, or archway that is completely ornamented in cosmical patterns and imagery, exclusively found in Astronist buildings.

Derivatives

Astrobases

Astrobiology - in Astronist Philosophy, the discipline of philosophical contemplation dealing with life on planets other than The Earth.

Derivatives

Astrobiologist

Astrobiological

Astrobiologically

Astrocapital - in Astronist Architecture, a type of capital featuring a star atop of it, or more broadly, features an orrery atop of it.

Derivatives

Astrocapitals

Astroceanology - an Astronist Subject dealing with the study of oceans on planets and celestial bodies other than The Earth.

Derivatives

Astroceanologic
Astroceanological
Astroceanologically
Astroceanologist

Astrocening - in Astronist Ornamentation, the practice of inlaying different metals into on another to produce intricate patterns similar to niello.

Astrocener - in Astronist Ornamentation, the patterns created from the process of astrocening.

Astrocentration - in structurology of Astronist Philosophy, the instance and process of stars existing in a concentrated state; the opposite of astrodispersion.

Derivatives

Astrocentrative
Astrocentrationist
Astrocentrationists
Astrocentrist
Astrocentrists

Astrocentricity - in Astronist Philosophy, similar to a state of nocturcentricity, but specifically centred on the activities, appearances, and locations of stars and other celestial phenomena as applied to the organisation of a civilisation and the lives of its citizens.

Derivatives

Astrocentric
Astrocentrical
Astrocentrically

Astrocentrism - a branch of knowledge in The Philosophy of Astronism concerning the distinct centrality in study of a stars, celestial objects, and outer space in general, and typically involves many other branches of knowledge.

Derivatives

Astrocentrist

Astrochronometer - in Astronist Rendition, a clock, usually a digital clock, which can measure the Cosmic Year, the Galactical Year, or the standard Solar Year, and is most typically found in the observatories, and eidouraniums of towns and cities.

Astrociation - in Astronist Philosophy, the association of astronomical events, especially the positions of stars, with events in a person's life, usually manifested in a form of rendition, as is pioneered by such companies as Under Lucky Stars and The Night Sky.

Derivatives

Astrociative
Astrociatively
Astrociational

Astrociationally
Astrociator
Astrociators

Astrocide - in Astronist Philosophy, the act of destroying a cosmic entity, such as a planet, asteroid, or some other celestial.

Derivatives

Astrocidal
Astrocidality
Astrocidalities

Astrocinematography - in Astronist Philosophy, a branch of study pertaining to the art of the use of photography and camerawork on worlds other than The Earth, or in space itself.

Derivatives

Astrocinematographer
Astrocinematographic
Astrocinematographical
Astrocinematographically

Astroclimatology - in Astronist Philosophy, a discipline of philosophical contemplation dealing with the weather conditions prevailing in certain geographically areas and regions on worlds other than The Earth, or over long periods on worlds other than The Earth.

Derivatives

Astroclimatologist
Astroclimatological
Astroclimatologically

Astrocrafts - in occurrology of Astronist Philosophy, also known as cosmocrafts, the activity for children and sometimes adults of making crafts in the shapes of astronomical objects, or equipment, such as telescopes; this is considered to be just as much a philosophical activity as a creative hobby.

Derivatives

Astrocraft
Astrocrafting
Astrocrafter
Astrocrafters

Astrocrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as the guardian(s) of stars, especially in Astronist Art.

Astroculture - in Astronist Philosophy, a wide-ranging term for the entirety of all depictions, imageries, and concepts denoting, or in some way involving astronomical practices, or celestial entities.

Derivatives

Astrocultural
Astroculturally

Astrodicule - in Astronist Architecture, a type of aedicule; an architectural frame supported by two columns over which is an entablature with pediment, that is made distinct by it almost always being completely ornamented with cosmical imagery and patterns.

Derivatives

Astrodicules

Astrodicry - in Astronist Philosophy, the vindication of the existence of a well ordered and systemically functioning Cosmos due to the existence of progeny and the occurrence of phenomena.

Derivatives

Astrodicries

Astrodicean

Astrodispersion - in structurology of Astronist Philosophy, the instance and process of stars existing in a dispersed state; the opposite of astrocentration.

Derivatives

Astrodispersive

Astrodispersionist

Astrodispersionists

Astrodoeia - a humanoid creature of Astronist Mythology, with a Divine heart depicted by its open-chested upper body.

Astrodomina - a humanoid creature of Astronist Mythology, with an indivine heart depicted by its open-chested upper body.

Astroodium - in Astronist Architecture, the term given to the court adjoined to, or at the centre of an Astronist philosophical building, in which a garden, cosmodyals, telescopes, astrolabes, and other Astronist philosophical objects are present.

Derivatives

Astroodiums

Astrodynamics

- the small branch of study deriving from Astronist Philosophy dealing with the concept of forces in The Cosmos, and how these forces have affected cosmogony from a philosophical standpoint.
- a subdiscipline of formatology within Astronist Philosophy dealing with the formational dynamics of stars, and other stellar objects in The Cosmos.

Derivatives

Astrodynamicist

Astrodynamicists

Astrodynamicicist

Astrodynamicicists

Astrodynamicity

Astrodynamic

Astrodynamical

Astrodynamically

Astroecology - in Astronist Philosophy, a discipline of philosophical contemplation dealing with the differences in the ways in which organisms relate to one another and to their physical surroundings on worlds other than The Earth.

Derivatives

Astroecologist

Astroecological

Astroecologically

Astroexercise - in occurrology of Astronist Philosophy, scheduled activity requiring physical effort conducted outdoors at night time, especially when the sky is clear for the reason of dual benefit; both physically and philosophically.

Derivatives

Astroexercises

Astroexercising

Astroexercised

Astroexerciser

Astrofair - in occurrology of Astronist Philosophy, an organised event to display and sell astrocrafts, astronomical equipment and instruments, as well as other philosophically and astronomically themed or related products.

Derivatives

Astrofairs

Astrofairing

Astrofilming - in Astronist Philosophy, the branch of study dealing with the making, processing, and distributing of films of celestial entities, or of cosmical environments.

Derivatives

Astrofilmist

Astrofilmical

Astrogation - in Astronist Philosophy, the processes, practices, methods, technologies, and theories involved in navigations through space.

Derivatives

Astrogational

Astrogationally

Astrogater

Astrogatress

Astrogatrix

Astrogatrixes

Astrogative

Astrogatively

Astrogativity

Astrogeny - in Astronist Philosophy, specifically in Cosmic Philosophy, the theory, and study of the viewpoint taking that the stars, planets, and all other celestial entities hold natures beyond that of humanity, so much so that they are of a Divine and heavenly nature, even beyond that of The Cosmos itself, and is in great support of the beliefs and practices of astrolatry, but is often seen a

step beyond astrolatry, as it introduces a Divine element to the celestial entities of The Cosmos, of which astrolatry does not.

Astrographologist
Astrographic
Astrographical

Astrographically
Astrographer
Astrographers
Astrographics

Astroic - in Astronist Philosophy, a feeling of happiness, contentment, and an increased level of reflection due to their being no cloudcover in the night sky and the stars and other cosmic progeny and phenomena are therefore visible.

Derivatives

Astroical
Astroically
Astroicity

Astroige - in Astronist Ornamentation, a style of mosaic commonly used for floorings in Astronist philosophical buildings, characterised by cosmic and galactical patterns encrusted into the tile.

Astroism - a branch of knowledge in The Philosophy of Astronism concerning the study of stars, celestial objects, and outer space, especially when they are ascribed to theological, eschatological, as well as cosmological concepts of The Universe; it's beginning, and its end.

Derivatives

Astroist
Astroists

Astrolantern - also known as a *Fanala*, a brass wall-mounted hanging lantern, ornately decorated with astronomical icons and reliefs, and most commonly found in Astronist philosophical buildings.

Derivatives

Astrolanterns

Astrolatry - in Astronist Philosophy, a form of cosmolatry involving the worship of stars; extreme admiration, love, and reverence for stars and their place as the central hubs and providers of life in The Cosmos.

Derivatives

Astrolatries
Astrolatrist
Astrolatrous
Astrolater
Astrolatrim
Astrolatrist
Astrolatristic

Astrolisk - a type of monument or pillar similar to an obelisk, with a star at the top.

Derivatives

Astrolisks

Astromachy - in Astronist Philosophy, a depicted war between cosmic progeny through the occurrence of particularly violent cosmic phenomena, especially as depicted in art, or in a literary context.

Derivatives

Astromachies

Astroment - a style of statue featuring Astronist characters which is a visualisation of The Philosophy of Astronism, and are most typically found in the middle of squares, plazas, or open areas.

Derivatives

Astroments

Astrometeorology - in Astronist Philosophy, a discipline of contemplation dealing with the processes and phenomena of the atmospheres on worlds other than The Earth, as a means to predict the weather on those worlds.

Derivatives

Astrometeorologist

Astrometeorological

Astrometeorologically

Astrometrics - the subdiscipline of study within kosmetrics as a derivation of Astronist Philosophy dealing with the philosophical discussion over the measurement of celestial entities, and the measurement of The Cosmos, and The Universe.

Derivatives

Astrometrical

Astrometrist

Astrometrically

Astromuseology - an Astronist Subject dealing with either the management of a museum on The Earth about astronomy and cosmology, or the management of a museum on another planet, or celestial body, whether about astronomy and cosmology, or not.

Derivatives

Astromuseological

Astromuseologically

Astromuseologist

Astronautic - in Astronist Philosophy, resembling an astronaut, an alternative term for a cosmonaut.

Derivatives

Astronautical

Astronautically

Astronautic humanism - also known as astrohumanism, the philosophy expounded by the Space Renaissance movement, and its primary coordinator, Space Renaissance International. Astronautic humanism acts as a proponent for the galvanisation of humanity to become aware of the importance as well as invest the time and funds into the development of human civilisations beyond The Earth, known as Solar Civilisations. Astronautic humanism, despite not being part of the Astronist philosophical tradition, shares many of the same principles our traditions of philosophy and for this reason is provided with the title of being a cousin philosophy. See cousinship.

Derivatives

Astrohumanism

Astronautics - in Astronist Philosophy, an alternative term for cosmonautics.

Derivatives

Astronauticist

Astronaution - in Astronist Ornamentation, the specific depiction of an astronaut, typically alongside The Earth, a spacecraft, or an extraterrestrial colony.

Astronavigation - the branch of study within Astronology relating to both scientific theory and engineering dealing with the construction, designing, and manufacturing of spacecraft, and the navigation of spacecraft through space, and all that this entails.

Derivatives

Astronavigational

Astronavigationally

Astronavigative

Astronavigator

Astronavigatory

Astronavigational Law - a major Astronist Subject dealing with the wide-ranging set of laws surrounding the topic of navigation of ships and other space vehicles beyond The Earth.

Astronic movement - in appellatology, an appellation for early forms of The Philosophy of Astronism in a particular place, especially amongst an unorganised or uninstitutionalised group or community.

Astronise

- in Astronist Philosophy, an alternative term for Millettisation, to make Astronist or astronic in character, especially when used in conjunction to astronism.
- in Astronist Philosophy, specifically within tiritology, a person's commitment to or act of publicly speaking of Astronism or actively disseminating Astronism by spreading aware about its ideas, principles, and practices to as many people as possible. This is defined from promulgation which is organised and funded dissemination enacted by The Institution of The Philosophy of Astronism, yet astronisy or astronocism remain synonymous with the act of tirition.

Derivatives

Astronistic
Astronistical
Astronistically
Astronarian
Astronarianism

Astronocentricity - in Astronist Philosophy, the belief that astronomy, the practices of astronomy, and the philosophical aspects of astronomy should be central in one's life, as well as in the society, or civilisation in which one lives.

Derivatives

Astronocentric
Astronocentrically
Astronocentrism

Astronomation - the depiction of astronomic observation, equipment, and philosophy in patterns, and ornamentations, especially in Astronist Ornamentation.

Astronomical Revolution - see The Astronomic Revolution.

Astronomics - the branch of study within Astronology dealing with the financial management of economies beyond The Earth, the financial management of the overall space industries, and the nature of economies beyond The Earth.

Derivatives

Astronomicist

Astronomique - in Astronist Architecture, a large structure built onto the front of some Astronist buildings that displays a flurry of cosmical ornamental patterns, icons, and sculptures, and typically stretches from ground level above the entrance to the top, and is usually accompanied by windows on either side on each level.

Derivatives

Astronomiques

Astronomiquement - in Astronist Philosophy, all infusions of astronomy and a philosophical argumentation, especially when stargazing, or another type of astronomical activity takes place after, or before a philosophical argumentation.

Astronomism - a branch of knowledge in The Philosophy of Astronism concerning the centrality and study of astronomy in the education system, and champions it's greater role in societal governance, order, and culture overall, as well as the construction of observatories, planetariums, eidouraniums, and astronomical public statues.

Derivatives

Astronomist
Astronomistic
Astronomistically

Astronomology - in Astronist Cosmology, as well as Astronist Philosophy, specifically Cosmic Philosophy, also known as The Philosophy of Astronomy, the study and discussion of the role of astronomy, its practices in society, and the economical, financial, political, and commercial aspects of astronomical objects, processes, and entities, as well as the fundamental purpose, nature, and future of astronomy.

Derivatives

Astronomologic
Astronomological
Astronomologically
Astronomologist
Astronomologists

Astronomy tourism - in Astronist Philosophy, especially within occurrology, the industry developed around the demand for traveling to and staying at certain destinations that particularly well known for their astronomical significance for the purposes of better observation, or are the birthplace of astronomers.

Derivatives

Astronomical tourism

Astronophobia - dislike of or prejudice against Astronism (Astronism), Astronist Culture or Astronists, especially as a political or ideological force. See Millettophobia, kosmaphobia, and sophobia.

Astrophysicality - in orbanology of Astronist Philosophy, a subdiscipline addressing the nature of stars with the intention of drawing conclusions about their originations, functionalities, physical features, and the metaphorical qualities of stars.

Derivatives

Astrophysicalities

Astrophysics - the branch of study within Astronomy dealing with the philosophical nature of the physical aspects of stars, galaxies, and other celestial entities, and how these formative elements may have affected cosmogony.

Derivatives

Astrophysicist
Astrophysical
Astrophysically
Astrophysic

Astrophysiology - in orbanology of Astronist Philosophy, a branch of the subdiscipline of astrophysicality dealing with the nature of the relationship between sentient beings and the stars of The Cosmos and is largely philosophical and metaphorical.

Derivatives

Astrophysiologist
Astrophysiologic

Astrophysiological
Astrophysiologically

Astropic - in Astronist Philosophy, a colloquial and slang word for an astrophotograph.

Derivatives

Astropics

Astropodium - in Astronist Architecture, a unique type of podium which is cosmically ornamented and is used in many of the oration rooms and areas of Astronist buildings and their estates.

Derivatives

Astropodiums

Astroprom - in occurrology, a formal dance arranged by a school, college, or phrontistery for its students that is cosmically-themed for dress and involves stargazing, cosmic devotion, cosmic music, usually cometanic in style, and cosmically decorated.

Derivatives

Astropromming

Astroproms

Astrosa - in Astronist Philosophy, also known as The Astrosa, the whole community of people that identify as followers of The Philosophy of Astronism, or any one of its denominations or offshoots in order to unite the community together along the lines of philosophical alignment.

Derivatives

Astrosal

Astrosalism - in Astronist Philosophy, the belief orientation calling for the unity of all the followers of The Philosophy of Astronism under a singular jurisdiction, or nation state.

Derivatives

Astrosalist

Astrosalistic

Astrosalistical

Astrosalistically

Astrosality - in Astronist Philosophy, the extent to which a person identifies with or holds concern for the wider Astronist community.

Derivatives

Astrosalities

Astrosophy

- in Astronist Philosophy, relating to the practices, concepts, and beliefs of Cosmic Philosophy by involving a mixture of astronomical activities with philosophical contemplations, and rests at the heart of the Astronist philosophical tradition, especially in the context of Cosmic Philosophy.
- in appellatology, an alternative appellation for The Philosophy of Astronism that is closely associated with the primary appellation of Astronism.
- a term that is pre-Astronistally associated with the Astrosophy Research Center founded by Willi Sucher in 1985 which The Institution of The Philosophy of Astronism herein states to intend to develop parenic relations with to the similarity in theme between Sucher's Astrosophy and the Astronist use of the term Astrosophy. However, it must be said herein that the comparison

between Sucher's Astrosophy and Astronist Astrosophy remains without comparability for the former is an unorganised and largely primitively developed understanding and appreciation for space and humanity's future role within space and the latter is obviously a fully established organised philosophy that holds a much greater vastness and depth that remains simply unmatchable by Sucher's Astrosophy.

Astrosophicity

Astrosport - an Astronist Subject dealing with all the sports that have arisen since the beginning of humanity's exploration of The Cosmos, especially sports that can best be played offworld, or offearth.

Astrotrade - in Astronist Ornamentation, the particular style of railing supported by balusters featuring cosmic and celestially-inspired ornamental patterns and sculptures, and commonly found in Astronist philosophical buildings.

Astrosy - in Astronist Philosophy, particularly within occurrology, an event conducted in the name and spirit of practising astrony, the most prominent example of its usage as a term being in its use as an alternative appellation for the celebratory periods surrounding northern and southern starlight festivals, known as stellara and kintana respectively.

Derivatives

Astrosic
Astrosical
Astrosically
Astroser
Astrosess

Astrotapestry - part of Astronist Rendition, a type of tapestry featuring cosmic, celestial, and astronomic icons and symbolism.

Derivatives

Astrotapestries

Astrothanation - in Astronist Philosophy, also known as astrotransmigration, the metaphorical phenomena in which the memory or soul of a person or an animal transmigrates to the stars after their corporeal death, and it is from this that the popular saying arose.

Derivatives

Astrothanasia
Astrothanasian
Astrothanism
Astrothanist
Astrothanative

Astrotheism - a school of thought of The Philosophy of Astronism bordering onto becoming a branch of the philosophy, that focuses on the concept of the divinity of The Cosmos and its close relation to god as the most directly divine instrument of god.

Derivatives

Astrotheist

Astrotheistic

Astrotopography - in Astronist Philosophy, a discipline of philosophical contemplation dealing with the arrangement of the natural and artificial physical features in areas on worlds other than The Earth itself.

Derivatives

Astrotopographic

Astrotopographical

Astrotopographer

Astrotopographically

Astrotorch - in Astronist Rendition, a portable battery powered electric lamp that is defined from a regular torch as it illuminates a red light rather than a white light so that it may be used during astronomical events, and may or may not be ornately cosmically ornamented depending on its designer.

Derivatives

Astrotorches

Astrotourism - an Astronist Subject dealing with the entirety of tourism in space and all its many aspects.

Derivatives

Astrotourist

Astrotransmigration - an alternative term for astrothanation. See astrothanation.

Astrotranspiration - in introspectics of Astronist Philosophy, one of The Six Transpirations characterised by all new discoveries of stars.

Derivatives

Astrotranspirational

Derivatives

Çakrs

Çakrwāl

- in Astronist Ornamentation, specifically Astro-Thai Ornamentation, relates to the depiction of The Cosmos in ornaments, and the symbols, icons, and imageries associated with The Cosmos.
- another term for Thai Astronism, and Kārtraṣrū'ism.

Calamity - in an Astronist contextualisation, an event, or occurrence which is found by The People's Constitutional Company of Jesse Millette to be of greatest damage to the Company, especially with the closing down of a sector of the Company in response.

Derivatives

Calamities

Calefact - in Astronist Philosophy, relating to extreme temperatures, particularly on a cosmic scale.

Calendaration - in Astronist Philosophy, the process by which new calendars and systems of the organisation of time and society are considered to be inevitably developed by the discovery and civilisation of new worlds, and the Astronist Tradition emphasises the importance of this, and encourages its occurrence.

Derivatives

Calendarational

Calendarative

Calendarater

Calendaratress

Calendarise - in an Astronist contextualisation, the official process conducted by The People's Constitutional Company of Jesse Millette whereby The Astronist Calendar is integrated with both the ordinary calendar, the financial calendar, and the operations of the Company itself in the form of a documentation and calendar which are distributed throughout departments, and agencies of the Company.

Derivatives

Calendarising

Calendarised

Calendariser

Calendarisation

Calendarism - in Astronist Philosophy, the belief that the products of the process of calendaration as the development of new calendars for newly discovered worlds are true and correct according to the relativism of the sentient beings living upon such worlds.

Derivatives

Calendarist

Calendaristic

Calendarity - in Astronist Philosophy, an instrument of study addressing the deep consideration of time organisation according to sentient and humanic perception, and is dependent upon the factors of location, dominant culture, organised philosophical, and the extent of the cosmicity of the civilisation.

Derivatives

Calendarities

Calgatus - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the only son of Delicia and Uommen, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Calgatusian

Calibrate - in an Astronist contextualisation, the official and longwinded process conducted by The People's Constitutional Company of Jesse Millette wherein opinions, surveys, and other

informations gathered regarding the operations and philosophy of the Company for a particular country, area, or region, which is then compiled in a documentation, and is typically carried out every three years.

Derivatives

Calibrator

Calibration

Calibratee

Call Sign - the main, or central-most motif, symbol, or icon of a mission patch, or spacecraft emblem.

Calumniate - in an Astronist contextualisation, when an external hostility to The People's Constitutional Company of Jesse Millette makes false and defamatory statements about the Company.

Derivatives

Calumniation

Calumniator

Calumny

Cambodian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Kingdom of Cambodia.

Cameroonian Éclaircissement - the root term for Cameroonian Astronism.

Cameroonian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Cameroon.

Campana - in Astronist Architecture, any type of bell found in an Astronist philosophical building, structure, or depicted in art.

Derivatives

Campanas

Canadian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Canada.
- the denomination of The Philosophy of Astronism that is most prevalently adhered to in Canada.

Canalise - in an Astronist contextualisation, an official process undertaken by The People's Constitutional Company of Jesse Millette whereby a department, an agency, a subsidiary, or a project is given a new purpose, or direction.

Derivatives

Canalising

Canalised

Canalisation

Canalisational

Candate - in Astronist Philosophy, to contemplate and devote towards luminous entities in The Cosmos, and is the opposite to albedating.

Derivatives

Candation
Candated
Candating

Candidate - in an Astronist contextualisation, a person whom applies for a job within The People's Constitutional Company of Jesse Millette.

Derivatives

Candidacy
Candidature

Candour - in an Astronist contextualisation, an informal term for the principle of Transparencism held by The People's Constitutional Company of Jesse Millette.

Cannibalise - in an Astronist contextualisation, the official process sometimes undertaken by The People's Constitutional Company of Jesse Millette whereby a newly established subsidiary of the Company operates by selling similar products or services to a similar subsidiary to the point at which the original subsidiary is eventually resolved.

Derivatives

Cannibalisation
Cannibalisational
Cannibalised
Cannibalising
Cannibaliser
Cannibalisee

Canon - stories, characters, events and all else that has been officially canonised and is thus part of the Canonical Era of the Astronist Timeline.

Derivatives

Canonical
Canonical Era

Canonetox - a male expert and interpreter of The Grand Canon of Astronism.

Canonetrix - a female expert and interpreter of The Grand Canon of Astronism.

Canonism - a school of thought of The Philosophy of Astronism which focuses on the canonical characters and narrative of the Original Jesse Millette Series for the basis of its philosophical ideas, and typically generates all its theories, and ideas from the writings, and metaphorical inferences of fiction.

Derivatives

Canonist
Canonistic
Canonarian

Canopy - in an Astronist contextualisation, describing the upper echelons of The People's Constitutional Company of Jesse Millette just one level below the apex, and typically includes directors, senators, ambassadors, and representatives.

Canorous - describing a speech of an Astronist official, resonant, clear, and concise.

Cantonwide - in an Astronist contextualisation, relating to the operations of The People's Constitutional Company of Jesse Millette, and any one of its subsidiaries, especially in Switzerland, throughout a particular canton.

Canyonise - in an Astronist contextualisation, the official process sometimes undertaken by The People's Constitutional Company of Jesse Millette wherein the operations, activities, and business transactions of a subsidiary of the Company are temporarily suspended, or halted due to an unforeseen event, such as a technical breach, and is essentially conducted for the safety of the subsidiary and customers.

Capacitate - in an Astronist contextualisation, the official action of giving authority or training to an individual to conduct a certain procedure that would typically be beyond their capacity and authority, and typically done so by an executive, a director, a department manager.

Derivatives

Capacitation

Capacitator

Capacitatee

Capacitational

Capital

- in Astronist Architecture, a term for the tallest part of the building, typically a spire, dome, or pyramidal structure.
- in Astronist Architecture, the typically stone branching out section at the top of a column, which may be ornamented in a plethora of styles.

Capitalisation

- the process, in literary analysis, of deriving meaning or emphasis from certain letters or words that have been capitalised.
- in Astronist Philosophy, especially so in omnidoxicology, the common practice of capitalising words in The Grand Centrality, and especially in The Omnidoxy, in order to denote an emphasis of meaning, or an appellation.

Capitate - in an Astronist contextualisation, an action conducted by, or required signing from, an executive personnel within The People's Constitutional Company of Jesse Millette before it can be deemed officialised.

Derivatives

Capitator

Capitatee
Capitating
Capitated
Capitation

Capitonym - a type of term relating to Astronist word that differs in meaning if capitalised, such as Millette and millette.

Derivatives
Capitonymic
Capitonymity

Caprice - in an Astronist contextualisation, of a previously hostile entity, showing a change of mood and perspective towards its relations with The People's Constitutional Company of Jesse Millette.

Derivatives
Capricious
Capriciousness

Capricieusement - in Astronist Philosophy, the set of qualities and characteristics mostly associated with young philosophers including a whimsical view of philosophy as a subject of open knowledge and exploration, a rapid enthusiasm for concepts and ideas, and a distinct love of learning and discovering the details of a philosophical tradition.

Capsize - in an Astronist contextualisation, the termination, or ruination of a project, or campaign of The People's Constitutional Company of Jesse Millette, or one of its subsidiaries, especially when ruined by an external force.

Derivatives
Capsizement
Capsized
Capsizing
Capsizer
Capsizee
Capsition
Capsization

Capsulise - in an Astronist contextualisation, the official action undertaken by a department, or agency of The People's Constitutional Company of Jesse Millette wherein a project, or campaign is condensed, or reduce in size, and ambition due to external factors.

Derivatives
Capsulising
Capsulised
Capsuliser
Capsulisee
Capsulisation

Captionisation - in Astronist Propaganda, the title of the propaganda piece as distinct from the slogan, or any other writing or text, and is typically not placed on the piece itself, but typically in the description of the piece.

Captivant - in Astronist Philosophy, to be enthralled and fascinated by a philosophical branch, discipline, concept, or school of thought, or with a philosopher that one admires and looks up to.

Derivatives

Captivantly

Caputation - in Astronist Education, relating to funding for phrontisteries that is calculated per student, therefore, under this model of calculation, the higher the number of students for a phrontistery, the greater amount of funding they obtain.

Derivatives

Caputative

Caputatively

Caputational

Careo - in Astronist Philosophy, a person without any philosophical adherence, or lacking any interest in philosophy.

Derivatives

Careos

Carence - in Astronist Philosophy, the extent of the deficiency within a philosophical concept, theory, or tradition when applied to the instruments of logic, and reason.

Derivatives

Carency

Carnet - in Astronist Philosophy, any type of philosophical book that is brought into a philosophical argumentation with a debater in order to be quoted from during a debate as evidence.

Derivatives

Carnets

Carousel - in Astronist Architecture, a type of relief found in the pediment of some archways, and on walls, consisting of at least three Astronist, or cosmical images, not in a morphation process, but three or most distinctly different icons typically facing rightward.

Derivatives

Carousels

Carouselical

Carouselic

Carouselically

Cartement - in Astronist Philosophy, a type of small piece of card printed on both sides in order to promote a philosophical concept, and typically includes a definition of a relevant word in the Astronist philosophical context. It is most commonly used as a tiritological technique.

Derivatives

Cartements

Cartementation - in Astronist Philosophy, the tiritological process of distributing cartements to the public, especially as a business, or voluntary job.

Derivatives

Cartementer

Cartementers

Cartementing
Cartemental

Caryatide - in Astronist Architecture, a carved, straight standing figure of either Ellena, Harriet, or Zaran Astronist characters, typically consisting of the main structure of a column.

Derivatives

Caryatides

-cas - in Astronist Onomatology, a suffix used for Astronist names, in reference to The Cosmos.

Cas- - in Astronist Onomatology, a prefix used for Astronist names, in reference to The Cosmos.

Casa da estrela - derived from the Portuguese language and used in Portuguese denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Casas de estrelas

Casa d'estrelles - derived from the Catalan language and used in Catalan denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Casa d'estrelars

Casaestrela - derived from the Galician language and used in Galician denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Casaestrelas

Casa estrella - derived from the Spanish language and used in Spanish denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Casas de estrellas

Casastella - derived from the Italian language and used in Italian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Case a stella

Cascadation - in Astronist Architecture, a waterfall, or any time of apparatus involving the flow of water in any Astronist building, or in any estate of an Astronist building.

Casita - in Astronist Architecture, a small pavilion typically found at the centre of a symposium, and is often heavily ornamented with cosmical imagery.

Derivatives

Casitas

Casius - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Casian

Cassandra - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Third Generation, as the second daughter of Phoenix and Celestia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Cassandran

Cassandric

Cassiozia - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the second daughter of Azenzor and Annasophia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Cassiozian

Castigate - in an Astronist contextualisation, the official action undertaken a departmental manager, director, or executive of The People's Constitutional Company of Jesse Millette wherein they reprimand an employee severely for an act they have committed, especially by suspension of their employment, or firing them completely.

Derivatives

Castigator

Castigatee

Castigation

Castigatory

Casualise - in an Astronist contextualisation, the official action and process of reducing the intensity of an advertising and marketing campaign for a product, project, or service from The People's Constitutional Company of Jesse Millette, or one of its subsidiaries.

Derivatives

Casualisation

Casualiser

Casualisee

Casualised

Casualising

Cat - in Astronist Philosophy, the philophon for the discipline of Cataphatics.

Catalogetox - a male expert and interpreter of The Grand Catalogue of Celestants, Grand Laureates & People's Martyrs.

Catalogetrix - a female expert and interpreter of The Grand Catalogue of Celestans, Grand Laureates & People's Martyrs.

Catalyse - in an Astronist contextualisation, the official action and process of increasing the intensity of an advertising and marketing campaign for a product, project, or service from The People's Constitutional Company of Jesse Millette, or one of its subsidiaries.

Derivatives

Catalyser

Catalysee

Catalysation

Cataphatics - in Astronist Philosophy, as part of divinology, a pre-Astronist term relating to an approach to the study, perception, and understanding of that which is known as The Divine in the Astronist Cosmology that is characterised by attempting to notionise that which The Divine is, rather than that which The Divine is not, which is known as apophatics.

Derivatives

Cataphist

Cataphists

Cataphistic

Cataphistical

Cataphisticity

Catchment - in an Astronist contextualisation, the extent to which and the size of the population of which an advert, or marketing campaign from The People's Constitutional Company of Jesse Millette, or one of its subsidiaries, is seen, reachable, or influential upon.

Categoricalism - one of the three aspects of Astronist Philosophy collectively relating to works and projects conducted that directly involve Astronist Philosophy, usually in the effort of its promulgation and therefore defines itself from the other two aspects known as theoreticism, which pertains to the study of the Philosophy, and practicionism, which pertains to indirect works and projects from Astronist Philosophy. See theoreticism and practicionism.

Derivatives

Categoricalist

Categoricalists

Categoricalistic

Categoricalistically

Categorise - in an Astronist contextualisation, the official action and process undertaken by The People's Constitutional Company of Jesse Millette wherein subsidiaries of the Company are placed into categories according to industry, size, and geographical operations.

Derivatives

Categoriser

Categorisee

Categorisation

Categorisatory

Catena - in an Astronist contextualisation, a series of Astronist books which are somewhat connected, or related to one another, and typically relates either to The Grand Founding Works, or The Original Jesse Millette Series.

Derivatives

Catenas

Catenary - in Astronist Architecture, to ornament any architectural article with a chain-like form.

Catenationism - a school of thought of The Philosophy of Astronism relating to and focusing on the idea of a chain reaction from The Grand Centrality, and how certain circumstances are almost guaranteed to bring certain consequences.

Derivatives

Catenationist

Catenationistic

Caterva - in Astronist Architecture, an area in an Astronist philosophical building that is designed to be used by large crowds.

Derivatives

Caterval

Catervium

Cau - in Astronist Philosophy, the philophon for the discipline of Causology.

Caudal - in Equational Philosophy, as part of the wider Astronist Philosophy, relating to either every element of an equation that comes after the equals sign, or relates to a integer that comes after of an alphabetical letter denoting an instrument of study.

Derivatives

Caudally

Causological Philosophy - see causology.

Causology - the discipline of study deriving from Astronist Philosophy dealing with the concepts of causation, as well as cause and consequence in The Cosmos, and cosmogony from a philosophical viewpoint.

Derivatives

Causologist

Causologists

Causologic

Causological

Causologically

Caution - in an Astronist contextualisation, an official warning given to an employee of The People's Constitutional Company of Jesse Millette, or one of its subsidiaries, whom conducts a criminal, or hostile act and is typically the precursor to their castigation.

Derivatives

Cautionry

Cautionment

Cautionise

Cautionisation
Cautioner
Cautionee

Cavation - in Astronist Architecture, the rare construction of a catacomb below an Astronist building.

Cave Dweller Cosmology - in structurology of Astronist Philosophy, also known as Primitive Cosmology, the version, perception, and interpretation of The Cosmos that the first humans held and is an area of study for structurologists to consider in order to learn about the history of human astronomical and cosmological observation.

Cavity - in Astronist Philosophy, a philosophical concept that exists only in an abstract application rather than being applicable to a physical object or reality.

Caymanian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Cayman Islands.

Cease - in an Astronist contextualisation, of The People's Constitutional Company of Jesse Millette, to stop a project, an action, or a process either one of its own creation, or one by a second party.

Derivatives

Cessation
Cessational

Cecenture - in Astronist Architecture, the point of connection between a cosmosphere, or grand orrery and the roof, or ceiling.

-cele - in Astronist Onomatology, a suffix used for Astronist names, in reference to all celestial phenomena.

Cele- - in Astronist Onomatology, a prefix used for Astronist names, in reference to all celestial entities.

Celebratory Fashions - one of the three main branches of Astronist Attire, which itself is a major derivation of the subject of Astronist Fashion, and deals with the clothing, accessories, and footwear worn by Astronist Company officials, and celebrities wearing Astronist fashion items at balls, galas, and other celebratory events.

Celerity - in an Astronist contextualisation, of an objective, or requirement, swiftly accomplished, and with little obstacle, especially the extent which according to speed and cost.

Celesta - one of the alternative names for The Philosophy of Astronism, the associated demonym for which is a celestian.

Derivatives

Celestian
Celestians
Celestianism
Celestism

Celestist

Celestance - the instance or state of being celestant.

Celestancy - the extent to which a being is celestant.

Celestant - a supremely good, mystical, or divinely connected being that has been officially celestified by The Grand Council of Celestification.

Derivatives

Celestants (plural) - referring to all or a group of celestant beings.

Celestant Day - in the Astronist Calendar system, celebratory days for a particular celestant figure, as designated by The Grand Council of Celestification.

Celestia - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Celestian

Celestial Arm

- in firmamentology of Astronist Philosophy, the appellation for the filament of the luminous glow emitted from the arms of a spiral galaxy.
- in Astronist Philosophy, a type of celestial tattoo that one may get on their arm that features celestial entities, and is a sign of solemn cosmic devotion.

Celestialism - a branch of knowledge in The Philosophy of Astronism concerning the study of the observation of the sky and outer space, including constellations, shooting stars, and scintillations, as represented in art, ornamentation, and literature.

Derivatives

Celestialist

Celestialic

Celestialical

Celestialically

Celestialicity

Celestiality - in Astronist Philosophy, relating to the state and instance of being a celestial.

Derivatives

Celestialities

Celestial tattooing - in Astronist Philosophy, also known as cosmical tattooing, the cosmic devotional practice and expression involving the action of receiving a tattoo featuring celestial entities and cosmic philosophical messages.

Celestial Web - in Cosmic Art, as a derivation of Astronist Art, the depiction of a web-like structure of gas and dust within, or between celestial entities, especially during an explosion.

Celestiasa - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the first daughter of Aviance and Mulig, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Celestiasan

Celestific - showing celestant qualities, such as acting supremely good, or being mystical, or divinely connected.

Celestification - the process, carried out only by The Grand Council of Celestification, whereby a being, either fictional or real, is officially recognised as celestant.

Celestified - the instance of officially being recognised as celestant.

Celestium - in Astronist Architecture, a type of cosmical finial used often on Astronist buildings.

Celestocrator - the interchangeable title of either all or one of The Five Astronist Characters, represented as the guardian(s) of outer space, especially in Astronist Art.

Celestofret - in Astronist Architecture, a type of fret that features cosmical, and celestial imagery, and ornamentation.

Derivatives

Celestofrets

Celestology - the study of the lives of celestans and their hierarchy.

Derivatives

Celestologist

Celestological

Celestologically

Celestoon - in Astronist Architecture, a type of festoon featuring cosmical, and celestial imagery, and ornamentation.

Derivatives

Celestoons

Celetius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the husband of Cosima, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Celetiusian

Celetrium - the highest room in some Astronist philosophical buildings, in which celestial patterns and constellations are lit up through skylights to form a display, and from which the terracery is accessible.

Derivatives

Celetriums

Celette - in Astronist Ornamentation, a round, stylised celestially inspired design, used extensively in Astronist sculptural objects.

Celeworks - in Astronist Ornamentation, the collective patterns, works, and ornaments, either wholly or partly celestially inspired, and typically characterised by the depictions of cosmic utopia, other worlds, and The Divine.

Celine - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the third daughter of Zorianna and Xatius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Celinian

Cementise - in an Astronist contextualisation, the official action and process whereby an Astronist product, or service is overly marketing and advertised in order to concretely secure its position as the most popular product, brand, or service in comparison to its competitors.

Derivatives

Cementising

Cementised

Cementiser

Cementisee

Cementisation

Cementisational

Cen - in Astronist Philosophy, the philophon for the discipline of centrology.

Censura - in Astronist Philosophy, relating to all aspects, references, and inferences of judgement and the philosophical contemplations about the nature of judgement and those whom judge.

Censurament

Censuramental

Censuramentality

Censuramentally

Centerior - in Astronist Philosophy, that which is central, or takes central position in relation to the whole.

Derivatives

Centeriorly

Centeriority

Centort - in Cosmic Art, as a derivation of Astronist Art, the circular central region between the upport and the lowort of a cosmic art piece.

Derivatives

Centortial

Central African Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Central African Republic.

Centralence - in Astronist Philosophy, the state and instance of being central to something, and the extent to which something is central in comparison to other parts.

Derivatives

Centralency

Centralencial

Centraletox - a male expert and interpreter of The Grand Centrality of The Philosophy of Astronism.

Centraletrix - a female expert and interpreter of The Grand Centrality of The Philosophy of Astronism.

Centralisation - in Astronist Ornamentation, a type of clusteration and ornamental style whereby all pattern and design is concentrated to the centre of the ornamental field, typically leaving a large void between the pattern and the perimeter.

Centralitism

- a school of thought of The Philosophy of Astronism characterised by its emphasis on the direct teachings of The Grand Centrality, and typically takes a literal interpretation of the text, as well as valuing the entirety of the text rather than sections of it, which is a common factor of other schools of thought.
- as separate from the school of thought of the same name, the generally held belief that The Grand Centrality is superior over all other Astronist works of literature, especially above all the other Founding Works.

Derivatives

Centralitist

Centralitistic

Centralitology - see Centrality Studies.

Centralitologically

Centralitologicity

Centrality

- in Astronist Philosophy, a common part of the appellation of many rubrals in The Omnidoxy pertaining to an area of contemplation that is considered to be morally right, or philosophically important, an example of its usage is the rubral appellated as The Centrality of Big History, and the oppositism to which is an incentrality.
- the foremost aspect and foundational embodiment of something, especially of a philosophy, theory, or ideology.

- in Astronist Architecture, a term used in Architectural Theory to describe the exact centrepoint of an Astronist building, and may be used in a gardenry context to include the estate of the building as well, and typically atop of which stands an orrery.

Derivatives

Centralities

Centrality Exegesis - another term for the exegesis of The Grand Centrality of The Philosophy of Astronism.

Centrality Studies - also known as centralitology, and not to be confused with omnidoxicology, the specific study and discussion of the words, interpretations, and subsequent philosophical schools, denominations, branches, wings, and sampanas derived from The Grand Centrality of The Philosophy of Astronism.

Centralmost - in Astronist Philosophy, a commonly used adjective in The Omnidoxy relating to an abstract concept, or a physical entity this is located at the very centre, typically surrounded by others also considered to be central to the subject.

Central Qǐshì - a small denomination of Chinese Astronism most commonly adhered to in the regions of Ningxia, Shaanxi, and Shanxi in China.

Central Thoughts - in Astronist Philosophy, one of two segments of a cosmic metaphor relating to the thoughts or opportunities of an individual that are closest to whom they see themselves as, the counterparts of which are Peripheral Thoughts.

Centration - in Astronist Philosophy, one's tendency of focusing on the most prominent, or the most discussed aspects of a philosophy, concept, or theory rather than exploring other aspects.

Derivatives

Centrational

Centrationally

Centrationality

Centrearm - in Cosmic Art, as a derivation of Astronist Art, the middle section of a galactic arm.

Derivatives

Centrearmic

Centrearmial

Centrefold - in Astronist Philosophy, that which takes a central role in one's life.

Centrement - a term of Orrology, the part of an orrery relating to the stand upon which the sun is positioned, typically atop a corum.

Centrepoint - in kosmetrics of Astronist Philosophy, an alternative term for a corepoint. See corepoint.

Centricity - in an Astronist contextualisation, referring to the abstraction that certain parts of The People's Constitutional Company of Jesse Millette are closer to its core than others depending on

the categorisation lens through which this is viewed, such as culturally, financially, philosophically, operationally, and geographically, and many others.

Derivatives

Centricities

Centricitism

Centristic

Centristically

Centrine - in Astronist Ornamentation, the distinct centrepiece of an ornamentation, typically encompassed by a circularation.

Centrise - in an Astronist contextualisation, the official action and process undertaken by The People's Constitutional Company of Jesse Millette wherein a subsidiary, a department, an agency, or a project, or campaign is officially placed into a more prominent position within the Company, either in terms of funding, promotion, or by voting power in certain Astronist councils, especially within The Governing Ministry.

Centriment

Centrimental

Centrimentality

Centrecircle - in Astronist Architecture, the ornamented circle in the floor around the centrality of an Astronist building, and the diameter of which can vary.

Derivatives

Centrecircles

Centrefold - in Astronist Civicology, typically of a bird's eye view of a city or town, a thin strip of area circling the centrepiece of a civicological illustration.

Centrepiece - in Astronist Civicology, the central-most building, or area, of a city or town, as emphasised in a civicological illustration.

Centrepoint

- in Astronist Philosophy, relating to the location of a star in a system as dictating the positions, motions, and orbital functions over its planetary constituents. Compare with the Deisal Centre.
- in Astronist Civicology, the geographical centre of the city or town, as opposed to the architectural or cultural centre, and typically does not centre on a building, unless the building is precisely constructed over the centrepoint.

Centrestand - in Astronist Architecture, a stand in the centre of a room affixed to the flooring that is usually octagonal in its surface shape, and may be used for astronomical instruments to be placed upon it, and is typically heavily cosmically ornamented in the highcosma style.

Derivatives

Centrestands

Centrifugality - in Astronist Philosophy, the concept holding that when a celestial moves away from the centrality of its orbit, it is taking a course for which it intends to return to the centrality, which is also commonly applied to the context of human action and thought, and stands as the oppositism of centripetality.

Derivatives

Centrifugalities

Centrifugalism

Centripetality - in Astronist Philosophy, relating to the movement of a celestial back towards the centrality of its orbit, which also be applied to human action and thought, and stands as the oppositism to centrifugality for that relates to the movement of a celestial away from its orbital centrality.

Derivatives

Centripetalities

Centripetalism

Centrology - the study of the centre something either physically or abstractly including contemplation of its relevance, and the true accuracy of claims made about the centre of entities or concepts.

Derivatives

Centrologist

Centrologists

Centrologic

Centrological

Centrologically

Centrosome - in an Astronist contextualisation, the philosophies of The People's Constitutional Company of Jesse Millette as referred to collectively.

Centrum - in Astronist Ornamentation, an ornamental pattern typically found in documentations, and centralised on the page, with a distinct connection to plant life and floristry.

Centralum - a term of Orrology, relating to The Sun, or the star of an orrery.

-ceph - in Astronist Onomatology, a suffix used for Astronist names, in reference to cepheids.

Ceph- - in Astronist Onomatology, a prefix used for Astronist names, in reference to cepheids.

Cephalic - in an Astronist contextualisation, relating to the apex of The People's Constitutional Company of Jesse Millette.

Ceremonial Fashions - one of three main branches of Astronist Attire, of which itself is a major derivation of the subject of Astronist Fashion, and deals with the clothing, accessories, and footwear worn by Astronist Company officials at various different ceremonial and formal events, and typically has the colour scheme of purple, black, white, and golden.

Certainement - in Astronist Philosophy, another term for certainty.

Certificatory board - in Astronist Education, the organisation that officially awards students of a particular subject with the certification to demonstrate their completion of the course.

Certitude - also known as the certitude position, in an Astronist contextualisation, an official position on a matter undertaken by The People's Constitutional Company of Jesse Millette wherein the Company holds absolute certainty of its claims, stance, or beliefs, especially in the face of hostility.

Certocentricity - in Astronist Philosophy, especially in the branch of Cosmic Philosophy, the notion of the focus of The Cosmos on different centres which the dictation of the significance of particular matter is based upon according to the extent of its centricity, especially measured according to the gravitational push of celestial entities, however, this may be used in an anthropic and emotional context, or in other contexts whereby gravitation could be applied to different instances.

Derivatives

Certocentric
Certocentral
Certocentrically
Certocentrism

Certocentricism

Cerulean - in Cosmic Art, as a derivation of Astronist Art, a blue theme.

Cession - in an Astronist contextualisation, the formal giving up of property, or land by The People's Constitutional Company of Jesse Millette, especially when done as a result of reprimand, or reparation.

Derivatives

Cessional
Cessionally

Ceteri - in Astronist Philosophy, during a philosophical argumentation, relating to the winning philosophical concept over another concept.

Cha - in Astronist Philosophy, the philophon for the discipline of chaology.

Chadd - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Chaddic
Chaddian

Chadian Éclaircissement - the root French term for Chadian Astronism.

Chadian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Chad.

Chadian Tanwir - the root Arabic term for Chadian Astronism.

Chain of Acceleration - in omnology of Astronist Philosophy, the appellation for the notion that for one entity to accelerate, so must the elements within and closely surrounding that entity accelerate accordingly, thus creating a series of accelerations.

Chamber - in Astronist Architecture, a type of outbuilding consisting of a raised platform surrounded on all sides by steps, with the main building typically squared, pillared, singularly floored with a rooftop terrace and numerous cosmical ornamental decor, and typically featuring on each corner beside the steps, a fountain, or telescope. This building is most often related to the subject of Gardenry, mostly by its location, with its most common purpose to shelter those whom wish to conduct astronomy, especially during bad weather, but is also often used during Starlight Festivals.

Derivatives

Chambers

Chamberal

Champion - in an Astronist contextualisation, an individual whom has shown great advocacy and support for The People's Constitutional Company of Jesse Millette and has been officially recognised for doing so by the Company.

Derivatives

Championry

Championment

Championation

Championise - in an Astronist contextualisation, the official action, process, and ceremony wherein individuals are honoured with the title of champion for the advocacy for The People's Constitutional Company of Jesse Millette.

Derivatives

Championised

Championising

Championisation

Championiser

Championisee

Chancellor - in an Astronist contextualisation, the office and the individual whom are ultimately responsible for the analysis and submission of the finances of The People's Constitutional Company of Jesse Millette, the proper publication of such finances, and the public relations surrounding the finances of the Company, and works very closely with the Governor of The People's Astronist Central Bank, but is an employee of The People's Constitutional Company of Jesse Millette as a separate entity from the bank.

Derivatives

Chancellery

Chancelleries

Chancellorship

Channelise - in an Astronist contextualisation, the official action and process of positioning an unusually large amount of employees to work on some specific project, or in specific geographical region, especially due to high potentiality in such areas.

Channelisation

Channelised

Channelising

Channeliser

Channelisee

Chanson - in Astronist Philosophy, a philosophical expression in the form of a song.

Chaoism - a branch of knowledge in The Philosophy of Astronism concerning the study of everything in opposition to The Cosmos, also referred to as The Chaos in the Astronist Cosmology.

Derivatives

Chaoist

Chaoic

Chaoical

Chaoically

Chaology - in Astronist Philosophy, the discipline and Astronist Subject dealing with the philosophical study of The Chaos as part of Astronist Cosmology.

Derivatives

Chaologic

Chaological

Chaologically

Chaologist

Chaos - in Astronist Philosophy, one of the Nine Cosmical Elements pertaining to all that is disordered, or unknown in The Cosmos, or occurrences that do happen from unknown origins.

Derivatives

Chaotical

Chaosity - in Astronist Philosophy, an instrument of study concerning the nature, the functionalities, and the progenies of The Chaos.

Derivatives

Chaosities

Chaoticness

Chaos Over Cosmos - in Astronist Philosophy, the appellation for the concept and notion that The Chaos is both superior to, and in control of, The Cosmos.

Chaoticality - in Astronist Philosophy, the instrument of study measuring the chaosity of something, and relates to notion of The Chaos.

Derivatives

Chaoticalities

Chaotic Confliction - in Astronist Philosophy, an appellation for the idea and notion that The Chaos is the controller, the initiator, and the ultimator of conflict.

Chaotic Influence Problem - in Astronist Philosophy, within the inclusive discipline of compendology, the notion that the extent of the influence of The Chaos, both on the events, the phenomena, and the entities of The Cosmos, as well as The Universe itself, is ultimately unknown due to the unknownness of The Chaos, and is therefore left as an open problem by the Astronist Tradition.

Chaotic Revelation - in Astronist Philosophy, the appellation for the concept and notion that The Chaos is just as abundant with revelations about The Universe, The Divine, and The Cosmos; certain interpretations of this include the belief that The Chaos itself holds a greater abundance of revelations than anything else in existence.

Chaotic Universality - in Astronist Philosophy, the appellation for the concept and notion that The Chaos is actually The Universe itself, and is thus supported by the notion that black holes are gateways to The Universe, and by this interpretation, black holes would be gateways to The Chaos.

Chaperone - in an Astronist contextualisation, the individual responsible for the guiding and directing, and the overall care of executives, or the apex of the Company, especially during meetings, congressional sessions, or governmental councils.

Derivatives

Chaperonage

Chapterhouse - in Astronist Architecture, a small and private reading room in an eidouranium, typically branching from an athenium.

Derivatives

Chapterhouses

Characteral - in Astronist Philosophy, relating to the character of something and the components that impact upon the construction of character.

Characteration - in Astronist Ornamentation, the Astronist characters of an ornament regarded collectively.

Characterology - the study of the representations, depictions and interpretations of Astronist characters and consists of Jesseology, Ellenology, Zarology, Olivology, Harrietology, and Phoenixology.

Derivatives

Characterologist

Characterologists

Characterological

Characterologically

Character philosophy - in Astronist philosophy and characterology, a philosophical system based around one of The Five Astronist Characters that seeks to better understand the viewpoint of such a character according to the variety of their depictions in literature and art towards a particular topic. The main examples of character philosophies include Jessianism, Harrietarianism, Ellenianism, Zaranianism, and Oliverianism.

Derivatives

Characteral philosophy

Charactery

- in Astronist Philosophy, the expression of a philosophical message, especially one of a cosmical premise, through the depiction of a character, or some other symbol.
- in Astronist Literature, collectively relating the characters of a particular literary work, especially as a means to derive their overall representational nature and tone of the characters in that particular work.

Charactonym - a type of term relating to the name of an Astronist character that is given in order to reflect their personality traits, or some other characteristic of the person.

Derivatives

Charactonymic

Charactonymity

Chardanine - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the first daughter of Alexine and Gulgus, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Chardaninian

Charismatise - in an Astronist contextualisation, the abstract and unique process whereby an Astronist character, especially one of The Five Astronist Characters, is represented in such a way as to be a role model for others, or to inspire others to do something by using visual tactics such as beauty, masculinity, femininity, championry, saviourism, or the representation of a struggle against an evil, and is a common technique used in Astronist Propaganda.

Derivatives

Charismatised

Charismatising

Charismatiser

Charismatisee

Charismatisation

Charitable phrontistery - in Astronist Education, a type of phrontistery that has gained charitable status, and is therefore exempt from certain taxations.

Charlatan - in an Astronist contextualisation, an individual partaking in a disguised liking for The People's Constitutional Company of Jesse Millette, but they are found to be otherwise.

Derivatives

Charlataning

Charlatanry

Chartation - the action or process of charting an astronomical map of planets, star systems and other celestial and cosmic entities.

Chartetox - a male expert and interpreter of The Grand Charter.

Chartetrix - a female expert and interpreter of The Grand Charter.

Chart of Equivalents - in Astronist Philosophy, specifically in Equational Philosophy, the widely distributed and largely commercial guide to the identifying instruments of study in equations according to their alphabetical equivalents.

Chartology - the specific study of the astronomical positions of planets, star systems and other celestial and cosmic entities on charts.

Derivatives

Chartologist

Chartological

Chartologically

Chemicality - in Astronist Philosophy, as part of Cosmic Alchemy, relating to the chemicals that form The Cosmos, especially involving philosophical meaning and purpose.

Derivatives

Chemicalities

Cheminement - in Astronist Philosophy, relating to that which can be considered as part of progression and advancement, especially the progression and advancement of philosophy, humanity, or The Philosophy of Astronism itself.

Chénggōng - in Mandarin Chinese, the term given for the concept of success, and relates to either the successes of The People's Constitutional Company of Jesse Millette, and may relate to a philosophical, or ideological concept of success, and the subsequent depiction of this concept.

Chéngshì - in Mandarin Chinese, the term given to describe a city, particularly a city of Astronist influence.

Cheolhag - refers to the meaning of philosophy in Korean.

Cherishment - in Astronist Philosophy, to be in a state of loving protection for something special.

Chest - in Astronist Architecture, the area in front of the portrance of an Astronist building, typically heavily ornamented with cosmical imagery and pattern work.

Derivatives

Chests

Chidzi - a follower of the denomination of The Philosophy of Astronism, known as Chidziwitsoism.

Derivatives

Chidzis

Chidziwitsoism - the denomination of The Philosophy of Astronism most commonly found in Malawi, Zambia, Zimbabwe, and other Chichewa-speaking regions, and includes the derivations of Malawian, and Zimbabwean Astronism, and in Malawi, can be further divided into Northern Chidziwitso and Southern Chidziwitso.

Chidziwitsoan

Chidziwitso

Chidziwitsoic

Chilean Iluminación - the root term for Chilean Astronism.

Chilean Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Chile.

Chinese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the People's Republic of China.

Chisimba - The school of Physicality in Astration as known in the Shona language.

Chord - in Astronist Architecture, the area in front of the priorance of an Astronist building, typically heavily ornamented with cosmical imagery and pattern work.

Derivatives

Chords

Chouette - in Astronist Philosophy, something cosmically great, or grand, especially a galaxy in full perspective of its width, or a supernova after its explosion has occurred.

Chr - in Astronist Philosophy, the philophon for the discipline of chromatics.

Chrematonym - a type of term relating to an Astronist institution that encompasses a number of different areas, e.g. social, political, economic, and cultural.

Derivatives

Chrematonymic

Chrematonymity

Chresmology - in Astronist Philosophical, an Astronist Subject dealing with the philosophical study of prophecies, and the surrounding concepts and theories. It remains similar to prophetics but instead deals with a general contemplation of prophecies while the discipline of prophetics remains specific.

Derivatives

Chresmologist

Chresmological

Chresmologic

Chresmologically

Christabel - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Christabelian

Christian Adventist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Adventist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Anabaptist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Anabaptist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Anglican Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Anglican thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Baptist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Baptist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Catholic Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Catholic thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Calvinist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Calvinist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Eastern Orthodox Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Eastern Orthodox thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Esoteric Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Esoteric thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Jesuitical Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Jesuit thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Lutheran Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Lutheran thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Methodist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Methodist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Christian thought and faith with no denominational specification, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Mormon Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Mormon thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Oriental Orthodox Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Oriental Orthodox thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Pentecostal Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Pentecostal thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Presbyterian Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Presbyterian thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Protestant Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Protestant thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Quaker Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Quaker thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Salvationist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Salvationist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Science Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Christian Science thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Universalist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Christian Universalist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christian Waldensian Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Waldensian thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Christmas Star - addressed within Comparology, the star that lead the three wise men to Jesus; in Astronist Philosophy, this is interpreted as a major sign of importance and centrality to The Cosmos in Christianity, and this is used to support the idea that The Cosmos and all its progeny can be followed to lead to The Divine, and is thus related to Cosmic Divination.

ChristoAstronistisation - the specific Astronistisation of Christian societies, either in a macro or micro form.

Derivatives

ChristoAstronistisationism

Chromatics - a large subdiscipline of study within Astronist Philosophy as a derivation of Astronology dealing with two concepts within Cosmic Philosophy. The first dealing with the role of

colour in The Cosmos, and the second dealing with cosmic events that occur consecutively, or as a result of each other.

Derivatives

Chromaticist

Chromaticists

Chromatical

Chromatically

Chronic - in an Astronist contextualisation, of a problem against The People's Constitutional Company of Jesse Millette, persisting for a long time, or reoccurring.

Derivatives

Chronicity

Chronically

Chronitox - a male expert and interpreter of The Grand Chronicles of Astronist Mystology.

Chronitrix - a female expert and interpreter of The Grand Chronicles of Astronist Mystology.

Chronologisation - the ordering of mission patches and spacecraft emblems in the order in which they occurred, or where constructed.

Derivatives

Chronologisational

Chronologisationally

Chrysopoeia - in Astronist Philosophy, specifically within Cosmic Alchemy, the metaphorical notion of transforming humanity into gold, justified by the positivity surrounding the colour of gold in Astronist Symbology, and is derived and inspired by the spirit and traditions of alchemical processes.

Derivatives

Chrysopoeian

Chthonian Process - in Astronist Philosophy, also known as the Chthonic Process, the appellation for the instance in which a celestial entity is gradually eradicated by that which it is dependent upon, by that which created it, or by that which had sustained it during its existence.

Chthonic Process - see Chthonian Process.

Cicatrise - in an Astronist contextualisation, an official term relating to the resolution of an issue through the application of Astronist methodological problem solving policies.

Derivatives

Cicatrisation

Cicatrisher

Cicatrisional

Circularation - in Astronist Ornamentation, any type of circular, or partly circular pattern, especially one completely or partly encompassing another pattern.

Circulum - in Astronist Architecture, the thin strip around the bottom of the interior of a dome, either in an planetarium, or observatory.

Derivatives

Circulums

Circuit - in an Astronist contextualisation, an analytical term relating to the extent to which The People's Constitutional Company of Jesse Millette holds financial, social, political, philosophical, and commercial dominance in a country, or particular region of that country.

Derivatives

Circuitry

Circuitries

Cídiǎn - in Mandarin Chinese, the informal term given to The Grand Lexicon, or more broadly, a dictionary that includes Astronist terms.

Cintaṇaiyāḷar - the most common demonym for a follower of The Philosophy of Astronism in the Tamil language.

Derivatives

Cintaṇaiyāḷarkaḷ

Cintaka - the most common demonym for a follower of The Philosophy of Astronism in the Kannada language.

Derivatives

Cintakaru

Cintakas

Cintakan - the most common demonym for a follower of The Philosophy of Astronism in the Malayalam language.

Derivatives

Cintakar

Cintakayek - the most common demonym for a follower of The Philosophy of Astronism in the Sinhala language.

Derivatives

Cintakayin

Circonstance - in Astronist Philosophy, in a particular case, or to a certain extent.

Circulairement - in Astronist Philosophy, collectively relating to all circular shapes found in The Cosmos, as defined from spheric shapes and patterns, and the most prominent example of which is the concentric pattern.

Circulara - in Astronist Rendition, a digital circular ornament either attached to a wall, or secured in a stand, that depicts moving cosmic progeny, phenomena, or The Cosmos in its entirety on a screen which may also feature a stereo for playing music.

Derivatives

Circularas

Circulate - in an Astronist contextualisation, both the action and extent to which an Astronist book, documentation, or other literature is distributed.

Derivatives

Circulated

Circulating

Circulatory

Circulator

Circulatee

Circumambient - in an Astronist contextualisation, relating to the external factors surrounding and inevitably influencing the operations of The People's Constitutional Company of Jesse Millette.

Derivatives

Circumambiency

Circumambiently

Circumapplication - in Astronist Philosophy, specifically within the discipline of cosmoapplication, relating to a cosmoapplication that incorporates more than five different consistencies.

Derivatives

Circumapplicational

Circumbinary - in Astronist Philosophy, a planet that orbits two stars.

Derivatives

Circumbinarity

Circumcapation - in Astronist Philosophy, the most extreme form of pericapation that only an oblivionic singularity is able to reach; the inability of a person to mentally, or physically reach, to entirely understand, or to be able to associate another entity with it.

Derivatives

Circumcapative

Circumcapatively

Circumcapational

Circumcapativity

Circumdemonition - in Astronist Philosophy, the belief in the greater relevance of surrounding entities to an event or phenomena rather than the event itself and the elements directly involved in the triggering of the event or entity.

Derivatives

Circumdemonitional

Circumdemonitionally

Circumfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality holding that the elements and entities in any cosmical system or The Cosmos itself are more integral to the finality than the actual finality itself and even the predemonitional elements of the finality themselves.

Derivatives

Circumfinalism

Circumfinalist

Circumfinalities

Circumference - in an Astronist contextualisation, specifically in foreign relations, the point marking the end of either the responsibility or duty of a representative to an ambassador, and from an ambassador to a senator.

Derivatives

Circumferency
Circumferential

Circumgyrate - in Astronist Philosophy, especially within Cosmic Philosophy, relating to the functionality of a planet to both rotate and orbit simultaneously, as well as the completion of the orbit around a central point of gravitation; this term may also be used in a metaphorical context.

Derivatives

Circumgyrating
Circumgyrated
Circumgyration
Circumgyrational

Circumpolar - in an Astronist contextualisation, relating to the operations of The People's Constitutional Company of Jesse Millette in either the Antarctic, or Arctic regions of The Earth, or the poles of any other entity.

Derivatives

Circumpolarity

Circumscribe - in an Astronist contextualisation, the official action and process whereby an employee's authority is purposefully and knowingly restricted within certain limitations, and the circumscriber can be undertaken either the Company itself, or an individual whom occupies a higher role of authority than the circumscribee.

Derivatives

Circumscription
Circumscriptive
Circumscriber
Circumscribee

Circumstantiality - in Astronist Philosophy, a semistrument measuring the extent to which circumstance has an influence over the subject, or the event in question.

Derivatives

Circumstantialities

Circumstellar - in Astronist Philosophy, relating to the entirety of a star system rather than just one region, or entity within it.

Circursium - in Astronist Architecture, a type of structure, either affixed to a wall, or a structure in its own right, resembling the pattern of a big top of a circus tent, typically featuring many cosmical ornamentations.

Derivatives

Circursiums

Ciscosmos - see The Ciscosmos.

Derivatives

Ciscosmic
Ciscosmical
Ciscosmically
Ciscosmicality

Cisgalaxy - in Astronist Philosophy, relating to the galaxy in which one resides, the most common answer to which in our current exploratory circumstances is The Milky Way galaxy.

Derivatives

Cisgalactic
Cisgalactical

Cisspace - in Astronist Philosophy, one's individual unique perception of space, dimension, distance, and location.

Cistime - in Astronist Philosophy, one's individual and unique perception of time.

Cisuniverse - in Astronist Philosophy, The Universe in which one resides, typically in a metaphorical, mental, or conceptual sense.

Derivatives

Cisuniversal
Cisuniversally
Cisuniversality

Cistern - in Astronist Architecture, as part of gardenry, another term for a pond in the garden in the estate of an Astronist building.

Derivatives

Cisterns

Citakām - the most common demonym for a follower of The Philosophy of Astronism in the Punjabi language.

City History - in Astronist Civicology, the thorough commentary of a city's history, especially in relation to its planning, construction, and development, and is most typically found in an incunabulum.

City Illustration - in Astronist Civicology, the painting, drawing, or sketching of a cityscape and are most usually found in civicological atlases.

Citypeople - in Astronist Civicology, the type of staffage specifically depicted in the foreground of a city illustration.

City Planning - the design, attribution, and subsequent construction of a city.

Cityshape - in Astronist Civicology, the basic and early process conducted in the designing and planning stages of a city, town, or other development, that consists of the general shaping of the area to encompass certain geographical and artificial landmarks, and gives the developers the first look at the boundaries of the development.

Derivatives

Cityshaping

Civiology - the study and application of architectural, town planning, and city planning theory, as well as the illustration of such theories in townscape, and cityscape drawings.

Derivatives

Civiological

Civologically

Civilogist

Civilisation Planning - a major Astronist Subject dealing with the entirety of the planning, organisation, and establishment of civilisations of all different types on any celestial body or world beyond The Earth.

Derivatives

Civilisation Planner

Civilise

- in an Astronist contextualisation, of The People's Constitutional Company of Jesse Millette, to make an undeveloped area more orderly, socially organised, and economically prosperous through Astronist methodologies.
- in Astronist Philosophy, the process whereby humanity starts to inhabit and build new civilisations on a new planet.

Derivatives

Civilisation

Civilising

Civilised

Civilisee

Civiliser

Civilism - in Astronist Philosophy, of a planet or moon, to hold the ability, or the potential ability to host a civilisation, either human, or some other species.

Civitates - the title of the main atlas of Astronist Civiology.

Civocentric - in Astronist Philosophy, a philosophical denomination, school, or theory that is particularly focused on one's civic role, especially the application of a philosophy in the civilisation in which one resides as their civic duty.

Derivatives

Civocentricity

Civocentrically

Cixiù - in Mandarin Chinese, the term given in relation to the distinct embroidery style of Astronist Ornamentation.

Claim - in an Astronist contextualisation, of an executive of The People's Constitutional Company of Jesse Millette, or the Company itself, to make a formal assertion in a legal setting, especially when sworn under oath, and typically about an external hostile entity.

Derivatives

Claimant
Claimantee
Claimation
Claimational

Clairment - in Astronist Philosophy, of a philosophical concept, clear and understandable by the mass of people.

Claris - in Astronist Philosophy, the period of the night and the instance during which the stars are clearly visible, the colloquial term for which is simply 'clear'.

Derivatives

Clarity
Claristic
Claristical
Claristically
Clarisal

Clasement - in Astronist Philosophy, a philosophical concept in a particular classification of its size, theme, and popularity of usage.

Classical Moon - in Astronist Philosophy, especially in the derivation of Cosmic Philosophy, the term relating to the moons of The Solar System in differentiation of them from the moons of planets in systems beyond The Solar System.

Classical Planet - in Astronist Philosophy, especially in the derivation of Cosmic Philosophy, the term relating to the eight planets of The Solar System including Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune in order to differentiate them from the planets beyond our own solar system.

Classicals - in Astronist Philosophy, a shortened collective for the Classical Planets of The Solar System.

Classification - in Naology, a category of Astronist building, such as a planetarium, or an eidouranium.

Classify - in an Astronist contextualisation, the sealing of documentations of The People's Constitutional Company of Jesse Millette so as not to be opened again, unless done so by an individual holding the appropriate authority.

Derivatives

Classified
Classifier
Classiffee

Clastrum - in Astronist Architecture, a panel, either wooden, stone, or metal pierced with geometrical and cosmical patterns and imagery.

Derivatives

Clastrums

Clear skies - one of the main Astronist valedictions used in both colloquial and formal speech, as well as in emailing.

Clementine - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Third Generation, as the fifth daughter of Phoenix and Celestia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Clementinian

Clerisy - in an Astronist contextualisation, a colloquial term to describe collectively the group of people whom identify with the teachings of The Philosophy of Astronism, especially those of Cosmic Philosophy.

Climate - in an Astronist contextualisation, the overall financial, economic, and business environment external to The People's Constitutional Company of Jesse Millette at any one particular time.

Cloisonnement - in Astronist Philosophy, during a philosophical argumentation, the act of compartmentalising concepts of debate into different categories according to the time of their proposal, their themes, and the severity of their application.

Clone - in an Astronist contextualisation, a subsidiary of The People's Constitutional Company of Jesse Millette which shares the same products or services, brand and financial structure with another subsidiary of the Company, but is still a separate subsidiary from its counterpart.

Derivatives

Clonal

Clonality

Cloning

Cloned

Clonation

Clonology - in Astronist Philosophy, an Astronist Subject dealing with the study and philosophical understanding of cloning and clones, and the concepts and theories involved.

Clonologist

Clonologic

Clonological

Clonologically

Closed Infiniteness - in Astronist Philosophy, the oxymoronic appellation for one of the three dimensionalities of The Cosmos characterised by a closed infinity as The Cosmos has a naturity intrinsically linked to limitation.

Closed Universe - see The Closed Universe.

-clu - in Astronist Onomatology, a suffix used for Astronist names, in reference to a star, or galactical cluster.

Clu- - in Astronist Onomatology, a prefix used for Astronist names, in reference to star, or galactical clusters.

Cluster - in an Astronist contextualisation, usually in a small and confined geographical area like a city, the state in which there are multiple offices, or headquarters of subsidiaries of the Company, or offices of The People's Constitutional Company of Jesse Millette, are present.

Derivatives

Clustery

Clusterment

Clustered

Clustering

Clusteral

Clusteral Formation - a branch of formatology dealing with the formations of stellar or galactic clusters from a purely philosophical perspective.

Clusterial - in Astronist Philosophy, relating to clusters and superclusters of galaxies or stars.

Derivatives

Clusterially

Clusteral

Clusteriality

Clusterial Family - in familiology of Astronist Philosophy, one of The Seven Cosmical Families characterised by including all variations of clusters, such as standard star or galaxies clusters, or superclusters.

Clusteration

- the depiction of a cluster of star symbols on a mission patch or spacecraft emblem.
- in Astronist Ornamentation, the purposeful clustering of patterns towards one end or part of an ornamentation, typically leaving an empty space, and evoking the idea of isolation, abandonment, and rejection.

Derivatives

Clusterational

Clusterationally

Clusteration Season - in Astronist Philosophy, particularly within seasonology, one of the Formational Seasons pertaining to the instance in which elements of a celestial cluster together, but are not compacted together as is pertained to in the Compaction Season.

Clusterity - in Astronist Philosophy, the semistrument of study measuring the effects of clusteration on the behaviours of the celestial to which the semistrument is applied.

Derivatives

Clusterities

Clusternym - a type of term relating to the name of a star cluster as appointed by an Astronist organisation.

Derivatives

Clusternymic

Clusternymity

Coalition - in an Astronist contextualisation, the temporary state in which either two executives, or directors within The People's Constitutional Company of Jesse Millette, or The Governing Ministry, share their positions for a specified amount of time, especially whilst a replacement is found for the position.

Coapply - in Astronist Philosophy, to apply two instruments of study simultaneously to the same subject, especially in the same insentensation in The Omnidoxy.

Derivatives

Coapplication

Coapplicational

Coapplicative

Coapplicatively

Coapplying

Coapplied

Coaptation - also known as coaptation days, in an Astronist contextualisation, the corporate fun days arranged by the manager of a department for their employees to bond and adjust to one another.

Derivatives

Coaptational

Coaxial - in an Astronist contextualisation, of two or more subsidiaries of The People's Constitutional Company of Jesse Millette, following the same exact methodologies for similar business ventures.

Derivatives

Coaxiality

Cobranh - relating to a subject of study that spans across two distinct larger subjects, an example of which is Cosmic Mythology, which derives from both Astronist Mythology, and Mystology.

Co-constructed learning - in Astronist Education, the method of teaching whereby the teacher and the students are joined by a third party, usually a professional in the subject in question, and is used in order to further enhance the learning of the student.

Cocoon Star - in formatology of Astronist Philosophy, a type of star that exists within a larger cosmic entity for either its entire existence, or for one period in its lifespan, such as the existence of a star within a nebula, or within a galaxy, or within a globular cluster.

Cocreationism - in Astronist Philosophy, a branch of Creation Theory holding that The Cosmos and The Universe were created by two different and distinct entities, but diverges from biceationism in that these two entities are not considered to be equally measured in their creational contributions.

Cocreated
Cocreator
Cocreators

Codependence - in an Astronist contextualisation, two subsidiaries, departments, or agencies of The People's Constitutional Company of Jesse Millette which are dependent on one another in order to function, or prosper.

Derivatives
Codependent
Codependency

Codetox - a male expert and interpreter of The Grand Code of The Astronist Peacekeeping Order.

Codetrix - a female expert and interpreter of The Grand Code of The Astronist Peacekeeping Order.

Codor - another term for Codetox.

Coefficient

- in an Astronist contextualisation, two subsidiaries, department, or agencies of The People's Constitutional Company of Jesse Millette which are not dependent upon one another, but whose cooperation greatly increases their efficiencies.
- in Equational Philosophy, as part of wider Astronist Philosophy, the value that always comes before the alphabetical symbol for the instrument of study in an equation, and denotes the amount of entities involved in the equation.

Derivatives
Coefficiency
Coefficiency
Coefficiency

Coequal - in an Astronist contextualisation, of two or more employees of The People's Constitutional Company of Jesse Millette, holding equal authority, or rank.

Derivatives
Coequality

Coeval - in an Astronist contextualisation, of two or more elements of The People's Constitutional Company of Jesse Millette, or wider Millettaria which share the same date of origin, or are at least originated during the same period in Astronist history.

Derivatives
Coevality

Coexist - in an Astronist contextualisation, of two or more subsidiaries of The People's Constitutional Company of Jesse Millette conducting similar businesses within the same target market, or geographical region.

Derivatives
Coexistence
Coexistential
Coexistency
Coexisting

Coexisted

Cofinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that a finality may only occur by the cooperation between two or more elements; essentially, finality is multi-dimensional and multi-originate by its nature.

Derivatives

Cofinalism

Cofinalities

Cofinalist

Cognisance Era - part of The Standard Astronomical Calendar, the period of time after the initiation of human exploration of outer space, and another term for PEC, the Post Exploratory Commencement, which began after 1961.

Cognisate - in Astronist Philosophy, especially in association with The Grand Cognisation of prophetics, to explore new worlds and discover new species of plants and animals, to study their habitats, and to record this for the first time.

Derivatives

Cognisating

Cognisated

Cognisation

Cognisational

Cognisationally

Cognisator

Cognisater

Cognisatress

Cogniser

Cognisers

Cognitionism - a school of thought of The Philosophy of Astronism relating to the importance of the acquisition of knowledge above all else as the most necessary precursor to proper thought, experience, and understanding.

Derivatives

Cognitionist

Cognitionistic

Cognitology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of both the mind and behaviour and their interactions.

Derivatives

Cognitologic

Cognitological

Cognitologically

Cognitologist

Cohere - in an Astronist contextualisation, the gradual process, typically of natural origin, wherein two schools of The Philosophy of Astronism merge together to form a united whole.

Derivatives

Coherent

Coherency
Coherence
Cohesion
Cohesive

Coilage - in Astronist Architecture, the varied depictions of a stylised coil shape when described collectively, and especially when cosmically ornamented.

Derivatives
Coilages

Coldmost - in Astronist Philosophy, the planet in a star system that is furthest away from the star, and is therefore the coldest of all the planets of the system.

Collaborate - in an Astronist contextualisation, of The People's Constitutional Company of Jesse Millette and an external partner company, to work jointly in a business activity for symbiotic benefit.

Derivatives
Collaboration
Collaborator
Collaboratee
Collaborative

Collapsation - in Astronist Philosophy, the official term for the instance and process of a star collapsing in on itself in order to form a black hole.

Collateralise - in an Astronist contextualisation, to produce something as collateral for a loan from The People's Astronist Central Bank.

Derivatives
Collateralisation
Collateralised
Collateralising

Collectivement - in Astronist Philosophy, a collection of four or more philosophical concepts grouped together according to their theme.

Collectivism

- grouping entities together that share a commonality.
- a school of thought of The Philosophy of Astronism consisting of six distinct subschools, relating to the positioning, and ordering of figures to infer philosophical meaning.

Derivatives
Collectivist
Collectivistic

Collidiary - in Cosmic Art, as a derivation of Astronist Art, the depiction of two celestial entities colliding with one another, as distinct from the concept of mergence.

Derivatives
Collidiaries
Collidial

Collimatory - in introspectics of Astronist Philosophy, relating to collimations and their occurrences and inferences.

Collisional Cosmology - in Astronist Philosophy, a type of cosmos holding that all cosmical processes, functions, and orderities in the cosmical system are caused by collisions between celestial entities.

Collisional Mergence - in Astronist Philosophy, specifically within the discipline of mergenics, a type of mergence characterised by the collision of one celestial entity into another resulting in the formation of another celestial.

Collocation - in Astronist Ornamentation, the connection between different patterns of the same ornamentation, particularly in meaning, rather than in appearance.

Colombian Iluminación - the root term for Colombian Astronism.

Colombian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Colombia.

Colonette - in Astronist Architecture, a type of column embedded with ornamentations, and made distinct by its mushroom-like shape.

Derivatives

Colonettes

Colonisation Law - in branch of spaciology and Spacial law dealing with the ethics, the regulations, and the practical operations of colonisation, and outlines when a planet can or cannot be colonised.

Colonypeople - in Astronist Civicology, the type of staffage specifically depicted in the foreground of a space colony illustration.

Colophon - in Astronist Literature, a short piece of writing at the back of all official and properly registered Astronist books that outlines the legal statement of The People's Constitutional Company of Jesse Millette, the Company's emblem, and discusses the nature of the authorship of the particular book in question.

Colouration - in Astronist Ornamentation, the colours of an ornament regarded collectively.

Column - a definitive group or sect within *The Millë Order*, typically one holding reformist or unorthodox views, or one that follows rare practices.

Columned Court - in Astronist Architecture, a type of courtyard which is surrounded on at least two sides by a series of columns.

Columnery - in Astronist Architecture, a type of column that is characterised by an orrery atop of it.

Derivatives

Columneries

Columnine - in Astronist Architecture, a type of column featuring two pillars and is characterised by an entwined structure.

Derivatives

Columnines

Columnite - in Astronist Architecture, a type of column that is characterised by a statue atop of it.

Derivatives

Columnites

Columnobe - in Astronist Architecture, a type of column that is characterised by a globe atop of it.

Derivatives

Columnobes

Colural - in Astronist Philosophy, relating to colure circles on different planets and celestial structures.

Derivatives

Colurity

-com - in Astronist Onomatology, a suffix used for Astronist names, in reference to a comet.

Com- - in Astronist Onomatology, a prefix used for Astronist names, in reference to comets.

Com - in Astronist Philosophy, the philophon for the discipline of compendology.

Combinationism - in Astronist Philosophy, an alternative term for multidenominationalism. See Multidenominationalism.

Derivatives

Combinationist

Combinationistic

Combinationistically

Combinatories - in Equational Philosophy, as part of wider Astronist Philosophy, relating to the combinations found in a particular subment, especially when referred to collectively.

Combinatory Art - artworks that are purposefully designed to be touched and moved by the receiver in order to help them understand the artwork and to relate it to themselves.

Comedicism - the stance, or opinion held that the cosmological and astronomical community, before the introduction of the Astronist philosophical tradition, name certain astronomical processes and entities without enough seriousness, or attractiveness, and therefore, certain titles evoked comedy, or even derogatory tones, the most famous example of which is the so-called process of spaghettiification, which is known as oblivionment in the Astronist tradition.

Derivatives

Comedicist

Comedicistic

Comedicisms

Cometa - in Astronist Philosophy, a person that is on the path to achieving Cometanhood.

Cometan

- represented by a comet as the word from which it derives and is inspired by, the mononym of Brandon Taylorian encompassing the entirety of his philosophical, musical, poetic, lyricist, artistic, and playwright persona, as well as anytime he were to perform, such as in a philosophical debate. All instrumental pieces, songs, and melodies composed and produced by Brandon Taylorian will always be attributed to this mononym.
- in Astronist Philosophy, a person that has achieved a personal level of understanding of The Cosmos so that they see, know, and feel The Cosmos as it does truly exist and they therefore hold an extent of knowledge about the nature, functions, and elements of The Cosmos on a philosophical and spiritual level that only those whom have reached Cometanhood share.
- in Astronist mystology, characterology, and literature, the cosmic name of the Astronist character of Jesse.

Cometanic

- relating to the characteristics of instrumental pieces produced or composed by Brandon Taylorian, as well as all poems, song lyrics, plays, works of art, and musicals produced by him.
- in Astronist Philosophy, relating to the characteristics of a person whom has reached or is on the journey of reaching Cometanhood.

Derivatives

Cometanical

Cometantically

Cometanicity

Cometanic decree - in omnidoxicology, an order, belief, or statement directly given by Cometan in The Omnidoxy so as to provide the stipulation with a greater sense of importance or gravity for the purpose of its closer emphasis or contemplation.

Cometanic philosophy

- relating to the life works of the philosopher, Brandon Taylorian, mononymously known as Cometan.
- a major branch of Astronist Philosophy dealing with one's journey towards and attainment of Cometanhood, as is encapsulated by the belief orientation of cometanism, as is first outlined in The Omnidoxy.

Cometanism - in Astronist Philosophy, the belief that the attainment of Cometanhood should remain the central goal of those whom follow The Philosophy of Astronism, and is the belief orientation developed within Cometanic philosophy.

Derivatives

Cometanist

Cometanistic

Cometanistical

Cometanistically

Cometanhood - in Astronist Philosophy, a state of substantial knowlegde about the nature, functions, and elements of The Cosmos both philosophically and spiritually that remains achievable by all whom dedicate themselves to learning from others and teaching themselves as autodidacts.

Derivatives

Cometanship

Cometano- - the combining form relating to Cometan or the works of Cometan.

Cometan Symbol - in Astronist Symbology, the symbol associated with the persona of Cometan depicted as a “C” with a comet striking through its centre.

Cometary - in Astronist Architecture, a type of depiction of a comet typically placed atop a plinth or pedestal in the centre of a courtyard, or square, and can vary widely in its size, ornamentation, and orientation.

Derivatives

Cometaries

Cometary Formation - a branch of formatology dealing with the formations of comets from a purely philosophical perspective.

Comet Day - in The Grand Astronist Calendar, a day dedicated to commemorating and celebrating the cosmical phenomena of comets, usually through the organisation of lecture specifically discussing comets, children’s activities relating to comets, and comet themed decorations, as well as private and public astronomy sessions. This takes place on 71st Zaarine, which translates to the 20th January in the Gregorian calendar.

Cometial - in Astronist Philosophy, relating to comets.

Cometine

- in Astronist Ornamentation, the specific depiction of a comet, particularly atop the ornament and rising, with its tail forming borders for further ornamental patterns.
- part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of February.

Cometism - in Astronist Philosophy, an alternative term for cosmicism with the same definition and application.

Derivatives

Cometist

Cometistic

Cometress

Cometer

Cometor

Cometology - in Astronist Philosophy as part of Cosmic Philosophy, an Astronist Subject dealing with the philosophical study and approaches to the understanding of comets, especially in Astronist Cosmology.

Derivatives

Cometologist

Cometologic

Cometological

Cometologically

Cometonym - a type of term relating to the name of a comet when appointed by an Astronist organisation.

Derivatives

Cometonymic

Cometonymity

Cometox - in Astronist Music, the genre, style, and tradition of music initiated by Cometan that subsequently became Cometanic and Astronist in character and orientation with a focus on the creation of cosmic music.

Derivatives

Cometoxo

Cometoxies

Commensal Cosmology - in Astronist Philosophy, a type of cosmos holding that each and every interaction within The Cosmos is in some way commensal in its nature, either entirely or partly.

Commensurate - in an Astronist contextualisation, of a salary of an employee of The People's Constitutional Company of Jesse Millette, relative in size to their rank in their hierarchy of the Company.

Derivatives

Commensuration

Commensurative

Commensuratively

Commensurativity

Commercia

- in Astronist Civicology, the parts of a city, or town that most predominantly are used for commercial buildings and usage.
- in Astronist Architecture, a term used to describe collectively the Astronist buildings or the parts of them that are used solely for commercial purposes.

Commercial Law (Cosmos) - an Astronist Subject dealing with the laws of commerce on all celestial entities, planets, and worlds beyond The Earth.

Derivatives

Cosmic Commercial Law

Committology - an Astronist Subject dealing with the study of Astronist committees in government and their administrative roles.

Derivatives

Committologic

Committological

Committologically

Committologist

Common Logic - in Astronist Philosophy, the underpinning and overarching set of principles that all concepts follow, and although they are largely ill-defined, they do set out a framework for deciding that which is logic and that which is not, and must be set in accordance with reality, sequence, and consequence.

Commonmost - in Astronist Philosophy, a frequently used adjective in The Omnidoxy pertaining to that which is most regular in comparison to all others.

Commonpeople - in Astronist Philosophy, a term frequently used in The Omnidoxy relating to those whom do not actively study Astronist philosophy in-depth, but do still adhere to it, and hold some knowledge of it, and may be compared to the term of the masses.

Derivatives

Commonpeoples

Commonperson

Commonpersons

Commonplace - in Astronist Propaganda, the depiction of everyday occurrences, and domestic life in a propaganda piece, especially when exaggerated to look more utopian than their reality.

Commons - in Astronist Ornamentation, relating to the indistinct, or unnamed patterns or motifs created on an ornamentation.

Communicant - an individual whose role is to impart information to a team, especially during meetings.

Communications Law (Cosmos) - an Astronist Subject dealing with the law of communication between worlds, between the people of The Earth and the offworld, and the communications between space ships voyaging through The Cosmos, and draws upon questions of privacy.

Derivatives

Cosmic Communications Law

Comoran Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Union of the Comoros.

Comoran Tanwir - the root term for Comoran Astronism.

Compaction

- in Astronist Civicology, the type of planning theory and design that preferences a compact pattern for a city, or town.
- in Cosmic Art, as a derivation of Astronist Art, when a huge amount of stars are depicted in one cosmic art piece especially in an overlapping, or mesmerising way, and is the opposite to scatterance.

Derivatives

Compactality

Compactial

Compaction Season - in Astronist Philosophy, particularly within seasonology, one of the Formational Seasons, focusing on the earliest part of galactic formation wherein all the elements are compact into a relatively space region.

Company Philosophy - a company, the first of which is The People's Constitutional Company of Jesse Millette for The Philosophy of Astronism, that orientates its operations and worldview according to a specified and established philosophy.

Company-to-company Relations - the establishment of bilateral relations between The People's Constitutional Company of Jesse Millette and another corporate organisation, supposedly for mutual betterment.

Comparatrist - in Astronist Philosophy, a superspecialised philosopher of The Philosophy of Comparison.

Derivatives

Comparater

Comparatress

Comparator

Comparatorship

Comparatrists

Comparity - in Astronist Philosophy, an instrument of study measuring the nature of the comparisons between two or more entities.

Derivatives

Comparities

Comparology - in Astronist Philosophy, the major discipline of study dealing with the comparisons between Astronist philosophies and cosmologies and non-Astronist or pre-Astronist philosophies and cosmologies.

Derivatives

Comparologist

Comparologists

Comparological

Comparologically

Comparter - in Astronist Philosophy, of an instrument of study, that which measures something in the opposite way to its comparter, an example of which are the instrument of innemny and disinnemny, the former of which measures scientific assimilation of philosophical notions, while the latter measures scientific misalignment of philosophical notions.

Derivatives

Compartship

Comparters

Compartment - in Astronist Philosophy and Naology, a single, or a group of Astronist philosophical buildings, that are officially registered as being situated in a particular geographical region, county, or province of a nation state. Compare with non-compartment.

Derivatives

Compartmented

Compartmentism

Compartmentation

Compartmentational

Compassism - a school of thought of The Philosophy of Astronism relating to concepts of direction, destiny, and the knowledge and understanding of these concepts, and considers the instrument of the compass to be the central metaphorical icon of these concepts as a symbol for direction, talent, vision, and destiny.

Derivatives

Compassist

Compassistic

Compendia - in Astronist Civicology, the collection of civicological atlases and incunabula in one book.

Compendiumetox - a male expert and interpreter of The Grand Compendium.

Compendiumetrix - a female expert and interpreter of The Grand Compendium.

Compendology - in Astronist Philosophy, the inclusive discipline encompassing all philosophies, theories, disciplines, concepts, derivations, and schools of thought that address the nature, the order, the beauty, the functionality, and the existence of The Cosmos, or any one of its progeny either considered individually, or collectively as part of a group. Compendology exists in parallel to the disquisitional appellation of The Principles of The Aesthetic Cosmos. Compendology is the largest of all the inclusive disciplines, and the disquisition to which it is associated as part of The Omnidoxy is the largest segment of the entire document. Compendology is considered to exist as the most foundational of all the Astronist philosophical disciplines, as well as being the most widely encompassing discipline.

Derivatives

Compendologist

Compendologic

Compendological

Compendologically

Compendologicity

Competition Law (Cosmos) - an Astronist Subject dealing with the laws of business competition and competitiveness on worlds and celestial bodies other than The Earth.

Derivatives

Cosmic Competition Law

Competitive Sponsorship - the process by which a group of companies compete for a sponsorship opportunity by using a variety of means necessary to achieve it.

Compilation - in omnidoxicology and Astronist Philosophy, relating to The Compilation.

Compilationism - in omnidoxicology and Astronist Philosophy, the belief orientation characterised by the notion that Astronism and Astronarianism should be more proximately associated with each other than not, and usually advocates for occurrence of The Compilation itself. Compare with non-compilationism.

Derivatives

Compilationist

Compilationistic

Complementarity - in an Astronist contextualisation, the state in which two subsidiaries of The People's Constitutional Company of Jesse Millette conduct business operations that are complementary to each other, especially regarding their products, or service being complementary to one another.

Derivatives

Complementation

Complementational

Compleo - in Astronist Philosophy, during a philosophical argumentation, the instance of finishing one's philosophical statement.

Completers - in Astronist Philosophy, the plural for a completer.

Complexmost - in Astronist Philosophy, that which is most complex, either by its physical structure, or conceptual complexity.

Compliance - in an Astronist contextualisation, of an employee, a subsidiary, or The People's Constitutional Company of Jesse Millette itself, adhering to either an already existing, or new policy, or methodological principle.

Derivatives

Compliancy

Compliances

Compliant

Complicitism - in Taylorianology, the approach taken by Brandon Taylorian on the subject of genocide recognition, particularly of the Armenian Genocide for which Taylorian intends to continue to advocate in order to achieve its global recognition. This approach upholds that countries and parliaments that do not officially recognise genocides as such and name them as genocides are themselves also complicit and this remains true for both deniers and non-recognising neutral parties.

Derivatives

Complicitist

Complicity - in an Astronist contextualisation, of an employee, being involved with, or holding knowledge of an unlawful, immoral, or unconstitutional act that was committed by another employee.

Derivatives

Complicities

Compo - in Astronist Music, a colloquial term for a composition.

Compodoxy - in Astronist Music, a piece of music composed by a student of the musidoxic education system, either as part of an official examination, or as an avocational expression.

Derivatives

Compodoxic

Compodoxical

Compodoxically

Component - in an Astronist contextualisation, an element of something that helps it function, or achieve its purpose, or objective, especially in business operations.

Componental - in Astronist Philosophy, relating to a component part of something.

Derivatives

Componentally
Componentality

Componentise - in an Astronist contextualisation, the official action and process of raising an element of something to a state such that the subject would not be able to function, or achieve its objectives without the aforementioned raised element.

Derivatives

Componentising
Componentised
Componentisation
Componentisational
Componentiser
Componentisee

Composership - collectively relating to the composing career and composed musical works of Brandon Taylorian, mononymously known as Cometan in a compositional context.

Composite Cycles - in Astronist Philosophy, a notion within cyclometrics holding that cycles must be contemplated as their individual states rather than as part of a larger overall cycle, and thus emphasises the individuality and uniqueness of each and every cycle in occurrence in The Cosmos.

Compositionals - in Astronist Philosophy, a colloquial term for collectively referring to compositions.

Compositivity - in Astronist Philosophy, an instrument of study relating to the understanding of cosmical elements according to the parts that structure them and their functions, rather than taking a holistic approach.

Derivatives

Compositivities

Comprador - in an Astronist contextualisation, an individual whom acts as an agent for an external company, or organisation whom wish to become official partners with The People's Constitutional Company of Jesse Millette, or one of its subsidiaries.

Derivatives

Compradorship

Comprehensive Form - in Astronist Philosophy, a classification that collects geographically and practically related denominations of The Philosophy of Astronism together in order to form an umbrella of related denominations, examples of which including Saamism and Setarism as well as others. They may be referred to by adherents in order to group their denominational adherence with related forms, but are most often used by scholars as means to group many national denominations together during the study of philosophical demographics.

Compromettant - in Astronist Philosophy, during a philosophical argumentation, a debater that commits themselves to a philosophical argument, or concept so as to steadfastly align themselves with it throughout the debate.

Derivatives

Compromettants

Compromission - in Astronist Philosophy, a dishonest compromise during a philosophical argumentation.

Compulsation - in Astronist Philosophy, another term for a philosophical debate and argumentation.

Compunctionism - a school of thought of The Philosophy of Astronism relating to the concept of the moral nature, and the uncontrollable feeling of guilt when an immoral act is committed as the most accurate of all moral measurement, as opposed to the opinions of society, religion, and institution as the authorities of morality.

Derivatives

Compunctionist

Compunctionistic

Computer Law (Cosmos) - an Astronist Subject dealing with the law of computer construction, utilisation, and configuration, especially for use on worlds and celestial bodies beyond The Earth.

Derivatives

Cosmic Computer Law

Con - in Astronist Philosophy, the philophon for the discipline of concentritology.

Concatenation of Astronarianism - in astronomy of Astronist Philosophy, the appellation for the second stage of The Astronomic Revolution involving the mass establishment and institutionalisation of the previous two stages of The Astronomic Revolution known as the Reascension of Philosophy and the Integration of Cultural Astronomy.

Concatenatism - the distinctly Astronist, or Taylorian artistic style and approach involving the consideration of one's artistic journey as the central component of that which the artist is to speak of when regarding their art, and what to think of when they are creating their art. It is characterised by an artist creating something, but knowing that they will one day do better, and better still, but the artist is not to feel ashamed of this improvement or progression in the mastering of their art. Instead, concatenatistically, one actually focuses on that progression and improvement as an appendix and a meaningful element to the art they create as part of their artistic journey, which often falls parallel to their development as an individual.

Derivatives

Concatenatist

Concatenatistic

Concatenatistically

Concatenatisticity

Conceit - in Astronist Architecture, as part of gardenry, a type of ornamental bridge in a garden on the estate of some Astronist buildings, usually not walkable, and purely there for decorative purposes.

Derivatives

Conceits

Concentrationism - a school of thought of The Philosophy of Astronism characterised by the concept that focusing all one's attention on one ambition, by absorption and obsession, is the best way of channelling one's talents and skills.

Derivatives

Concentrationist

Concentrationistic

Concentrate - in an Astronist contextualisation, purposefully focus the attention of a subsidiary of The People's Constitutional Company of Jesse Millette to one region of a country, or one country itself.

Derivatives

Concentration

Concentrator

Concentrational

Concentre

Concentrality

Concentrative Cosmology - in Astronist Philosophy, a type of cosmos considering the concentrations of elements, entities, events, and other phenomena to be the most important and insightful into cosmical creation, order, nature, and function.

Concentricapital - in Astronist Architecture, a type of capital which depicts a concentric ornamentation, or design atop of it.

Derivatives

Concentricapitals

Concentricism - a branch of knowledge in The Philosophy of Astronism concerning the belief that the concentricity of planetary systems and galaxies possesses the fundamental components of the order of The Cosmos, and can thus lead to the understanding of the order and origins of the universe.

Derivatives

Concentricist

Concentricistic

Concentricistical

Concentricistically

Concentricity - in Astronist Philosophy, an instrument of study addressing the concentric shape of systems and entities in The Cosmos.

Derivatives

Concentricities

Concentricity of Architecture - in Astronist Architecture, the principle in Architectural Theory that in all astronomically and cosmically inspired styles of architecture, a concentric shape should be adopted in order to properly reflect the natural concentric shape of planetary systems, and galaxies.

Concentricity of City - in Astronist Civicology, relating to the planning theory and design of the concentric pattern of a city.

Concentristellar - in Cosmic Art, as a derivation of Astronist Art, a star formation and depiction whereby four stars surround perpendicular to each other a central star, typically one that is brighter and larger than those surrounding, and is a formation that has symbological meanings.

Derivatives

Concentristellarial

Concentritology - in Astronist Cosmology, and part of Astronist Philosophy, specifically Cosmic Philosophy, and closely related with Concentricism, the branch of study and philosophical discussion of the concentricity of celestial entities, and the purpose, logic, and meaning of this particular order in The Cosmos, and the discussion of the nature of concentricity.

Derivatives

Concentritological

Concentritologically

Concentritologist

Concentritologic

Conceptual Astronism - another term for Abstract Astronism.

Conceptuals - in Astronist Philosophy, collectively relating to concepts colloquially.

Concernment - in an Astronist contextualisation, a matter this is of importance, or of such significancy that the Vice Chairman, and Chairman of The People's Constitutional Company of Jesse Millette must know of its existence.

Concert - in Astronist Architecture, five columns most associated with Gardenry, which are arranged in four corners to create a square shape, and the fifth column is positioned in the centre, and can be arranged in any distance from one another.

Derivatives

Concerts

Concertation - in Astronist Philosophy, a philosophical argumentation that largely consists of a dialogue between just two debaters.

Concetta - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Third Generation, as the wife of Marius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Concettan

Concettic

Conciliar - in an Astronist contextualisation, relating to The Governing Council, its members, and the items on which they meet to discuss.

Derivatives

Conciliary

Conciliarism - in Astronist Philosophy, the belief that the documentations, approvals, and words published by The Institution of The Philosophy of Astronism are superior to The Grand Centrality of The Philosophy of Astronism.

Derivatives

Conciliarist

Conciliarists

Conciliarity

Concility - in Astronist Philosophy, an instrument of study measuring the extent to which something is unknown and the ways in which it is perceived to be unknown, as well as the nature of unknownness in a wider sense.

Derivatives

Concilities

Concinnity - in an Astronist contextualisation, of any type of Astronist artistic piece, skilfully and harmoniously created and arranged.

Concomitant - in an Astronist contextualisation, two or more items discussed during a meeting of any kind, but usually a congressional session, in which they are debated consecutively.

Derivatives

Concomitancy

Concomitancies

Concord - in an Astronist contextualisation, an agreement, especially during a meeting of The Governing Council, or during a congressional session, in which a majority of the parties of debate agree on an issue discussed, and so, the meeting on that topic is deemed a success.

Derivatives

Concordance

Concordancy

Concordant

Concordantly

Concordation - in Astronist Education, the central tenet held in the Astronist education system consisting of the principle that students of one phrontistery can study at all phrontisteries, if such a student requires the specialities of a phrontistery, and is usually a result of the process of particulation.

Derivatives

Concordism

Concordationism

Concordative

Concordatively

Concordational

Concorded - in Astronist Education, a phrontistery that participates in the principle of Astronist education structure known as concordism.

Concort - in Astronist Philosophy, of a philosopher, to actively interact with the community, society, or the wider civilisation in which one lives, especially in the realms of politics, business, education, or the arts, as the primary fulfiller of the role of the People's Philosopher as is expounded by the Astronist Tradition.

Derivatives

Concorting

Concorted

Concortion

Concortional

Concorter

Concortress

Concoursation - in Astronist Propaganda, the term used to describe the specific depiction of crowds in a propaganda piece.

Concourse

- in Astronist Civicology, the area at the entrance of a city, or town, typically characterised by a Philosophical Statement.
- in Astronist Architecture, as part of gardenry, the place in a garden on the estate of some Astronist buildings where more than two paths branch out to lead to other parts of the garden.
- in an Astronist contextualisation, the gathering of senators, ambassadors, and representatives for a meeting of The People's Astronist Congress.

Concretion - in Astronist Ornamentation, a type of ornamental design, or pattern embedded into a concrete surface.

Concretist - a person who realises an idea or concept.

Concurremment - in Astronist Philosophy, during a philosophical argumentation, the instance in which all debaters present are equally active during the debate.

Conductation - in Astronist Philosophy, conducting a philosophical investigation.

Conduction - in Astronist Ornamentation, the unique process of heating an ornamentation, either on canvas, or on a metal plate, in order to change, or distort the colouration.

Confabulate - in Astronist Philosophy, to speak colloquially, informally, or casually about philosophy, a concept, or theory.

Derivatives

Confabulation

Confabulative

Confabulatively

Confederationism - a major branch of Astronarianism, the political philosophy and system of government that advocates for the establishment of the newfound system of confederative

government under the auspices of Astronist political philosophy, and proclaims a revised and totally reformed version of confederative governmental organisation and societal structure, and is the premier political and governmental philosophy of Astronarianism.

Derivatives

Confederational

Confederationally

Confederationise - to reform the governing system and the structure of a nation, or specifically the governance of education, into a confederation.

Derivatives

Confederationisation

Confederationised

Confederationist - a person who advocates for the establishment of confederations, especially under the philosophy of confederationism, as a major derivation of Astronarianism.

Confederative model - in Astronist Education, the primary structure to the Astronist education system that is made up of a number of different confederations both for each nation state, but also across different nations, and it is these confederations that each phrontistery must be a member of if it is to be officially considered a functioning phrontistery. These confederations form the governing authority for the phrontisteries that are members and such phrontisteries, although they are held accountable by their confederative authorities, are largely autonomously governed, and the confederative model of global education was first outlined in The Astronist Education Methodology by Brandon Taylorian.

Conference - in an Astronist contextualisation, a type of gathering, or meeting that is to discuss only matters of business operation primarily.

Derivatives

Conferencial

Conferentially

Conferencity

Configuration - relating to a mission patch or spacecraft emblem as a whole, as opposed to one feature or section of the design.

Configuretox - a male expert and interpreter of The Grand Configuration of The Governing Ministry.

Configuretrix - a female expert and interpreter of The Grand Configuration of The Governing Ministry.

Confination - in Astronist Ornamentation, the ornamental style of distinctly restricting the space, and scope of an ornamental pattern, especially in a sudden way, and typically by the use of borders.

Conflate - in an Astronist contextualisation, a type of Astronist book including two or more Astronist texts within it, most typically used as a commercial tactic, and the books of which are usually from The Original Jesse Millette Series.

Derivatives

Conflation
Conflational
Conflative

Conflationism - a school of thought of The Philosophy of Astronism relating to the concept of two or more ideas converging into one.

Derivatives

Conflationist
Conflationistic

Confliction - in Astronist Philosophy, a conflict, especially one initiated by a natural cause, or intrinsic instinct.

Derivatives

Conflictions

Confluxion - in Astronist Civicology, the process of placing alongside one another the illustrations of two cities, or two towns onto one plate.

Confoundation - in Astronist Philosophy, that which is so immensely vast, complex, and grand that only those with a trained understanding can truly approach its comprehension with success, and is typically used to describe The Cosmos.

Derivatives

Confoundational
Confoundationally
Confoundative
Confoundatively

Confucianist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Confucian thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Congerent - in omnology of Astronist Philosophy, that which is proportional and stands in parallel to something.

Derivatives

Congerently
Congerence

Congenial - in an Astronist contextualisation, an external company, or organisation that is separate to The People's Constitutional Company of Jesse Millette, yet is considered to hold philosophies, principles, and methodologies similar to that of the Company.

Derivatives

Congeniality

Congo Éclaircissement - the root term for Congolese Astronism.

Congolese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Democratic Republic of the Congo, and in the Republic of the Congo.

Congruence - in an Astronist contextualisation, a state of relations between The People's Constitutional Company of Jesse Millette, and some external entities that have reached agreement and harmony, especially after a disputation.

Derivatives

Congruency

Conjoinment

- in Astronist Philosophy, the joining together of two distinct physical entities, or two distinct concepts, especially those that were previously opposed to one another.
- a term within the concept of mutuality involving the state in which two Astronist organisations, or subsidiaries are either bound to cooperating with one another, or must recognise their shared ownership or association with one another, under the auspices of The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Connaissance - in Astronist Philosophy, to hold a great amount of philosophical knowledge.

Connate - in an Astronist contextualisation, the parts of The People's Constitutional Company of Jesse Millette that have existed from its founding and constitutionalisation.

Derivatives

Connative

Connatively

Connativity

Conoscenism - in Astronist Philosophy, the popular term for Italian Astronism, also known as Illuminazione'ism, meaning to know, or to hold knowledge.

Derivatives

Conoscenist

Conoscenists

Conoscenistic

Conoscenistically

Conpunction - in Astronist Philosophy, a system, especially one that is well-ordered and functioning seamlessly, but is also in danger of being jeopardised, and usually references that which is chaotic and rogue in the cosmical system.

Consecretetox - a male expert and interpreter of The Grand Consecration.

Consecretetrix - a female expert and interpreter of The Grand Consecration.

Consecutive - in an Astronist contextualisation, of the parts of a process or action, or series of actions which are to be conducted one after the other.

Derivatives

Consecutivity

Consécutivement - in Astronist Philosophy, when one debater carries on a philosophical argument directly after another debater has finished speaking, typically in support.

Consequencism - a school of thought of The Philosophy of Astronism that emphasises the importance of the consequences of action in every foreseeable and relevant circumstance, and places most emphasis on the consequence being the greatest driver of the moral decision.

Derivatives

Consequencist

Consequencistic

Conservancy - in an Astronist contextualisation, the environment conservation methodologies, organisations, and initiatives that are part of, or associated in partnership with The People's Constitutional Company of Jesse Millette, especially when referred to collectively.

Conservationism - in Astronist Architecture, the principle holding that the conservation of architectural beauty, design, and ornamentation should be held with great importance, and insists that methods of architectural restoration should be taught in schools to continue to the conservation of the architectural culture of the world.

Derivatives

Conservationist

Conservationistic

Conservatism - a school of thought of The Philosophy of Astronism encompassing a large variety of theories and ideas all based on the preservation of traditional values and ideas, specifically the traditional ideas of Astronist thought and philosophy.

Derivatives

Conservatist

Conservatistic

Conservatory - in Astronist Architecture, as part of gardenry, another term for a greenhouse on the estate of an Astronist building, typically with extra ornamentations than a simple greenhouse.

Derivatives

Conservatories

Considerance

- in an Astronist contextualisation, the official term for when The Governing Council is in the middle of the discussion of a constitutional amendment, a proposed bill by the congress, or on another matter.
- in Astronist Philosophy, an alternative term for consideration.

Derivatives

Considerancy

Considerances

Consilience - in an Astronist contextualisation, the acceptance and integration of Astronology, or a part of Astronology, by another subject.

Derivatives

Consilient

Consiliency

Consiliently

Consistentism - in omnology of Astronist Philosophy, the orientation and school of thought characterised by the belief that The Cosmos is expanding at a constant rate, and so therefore stands in opposition to the orientations of accelerationism and decelerationism.

Derivatives

Consistentist

Consistentistic

Consociation

- in Equational Philosophy, as part of wider Astronist Philosophy, the ability for an equation to be rearranged while still producing a logical expression.
- in Astronist Philosophy, especially within Cosmic Philosophy, that which is associated with another, especially of celestials in the instance of mutual functionality.

Derivatives

Consociate

Consociative

Consociatively

Consonance - in an Astronist contextualisation, a state of relations between The People's Constitutional Company of Jesse Millette, and some external entity whereby a compatibility of values and opinions is found between the two, and is generally the precursor to a state of congruency.

Derivatives

Consonancy

Consort - in an Astronist contextualisation, the husband, or wife of either the Vice Chairman, or Chairman of The People's Constitutional Company of Jesse Millette.

Derivatives

Consortship

Conspectus - in an Astronist contextualisation, a summary, or overview of the subject of Astronology, especially in some sort of documentation.

Conspicutor - in Astronist Architecture, the part of an Astronist building that an individual notices first when approaching it, or the part of the building which an individual remembers most.

Derivatives

Conspicutorial

Constatation - in Astronist Philosophy, a notice put out to the public and all invited debaters which specifies the theme of a particular philosophical argumentation.

Constellate - in Astronist Philosophy, of a concept, or some cosmical entity, to come together and form into a cluster, or group.

Derivatives

Constellatory

Constellative

Constellation Day - in The Grand Astronist Calendar, also known as Constellations Day, a day of commemoration and celebration dedicated to the specific wondermentation, adoration, and

laudation of the constellations of The Cosmos, and is characterised by decorations of constellations, competitions, festivals, and special lectures and education events at Astronist philosophical buildings that focus on the subject of constellations. This always takes place on 63rd Ellenine, which translates to the 4th June in the Gregorian calendar.

Derivatives

Constellations Day

Constellationism - a branch of knowledge in The Philosophy of Astronism concerning the study and representation of constellations in art, ornamentation, literature, and wider culture, and typically opposes astrology, in which divinatory characteristics are given to the constellations. It must also be noted that this branch of knowledge does not deal with the Zodiac constellations, and only deals with Astronist Constellations.

Derivatives

Constellationist

Constellationary

Constellationistic

Constellationistically

Constellative - in Astronist Philosophy, relating to constellations.

Derivatives

Constellativity

Constellatively

Consteller - in Astronist Philosophy, a philosopher that is also a professional astronomer, or cosmologist.

Derivatives

Constellers

Constellor

Constellors

Constelletress

Constelletresses

Constellership

Constentate - in Astronist Philosophy, to contemplate or write in conclusive terms, especially as a means to end a discourse.

Derivatives

Constention

Constentating

Constentated

Constentive

Constentively

Constitutional Addition - the process of making an addition to The Grand Constitution.

Constitutional Amendment - the process of making an amendment to The Grand Constitution, so as to supersede an clause or article previously considered constitutional, though that clause or article can never be removed under constitutional law.

Constitutional Article - relating to any of the articles of The Grand Constitution.

Constitutional Clause - relating to the text within any Constitutional Article of The Grand Constitution.

Constitutional Company - a newfound category, founding, and structure of a company, the first of which being The People's Constitutional Company of Jesse Millette, upon which its founding is ascribed a constitution, and to which the company, depending on the nature of the constitution, is bound to in both philosophy, operation, governance, and in business vision, and to which employees, customers, and the leadership look towards for guidance in operational difficulties, and stands as the central guiding book for the company upon which it was founded.

Constitutionalise

- in an Astronist contextualisation, the official and unique action undertaken in simultaneity and intrinsicity with the founding of The People's Constitutional Company of Jesse Millette wherein The Grand Constitution of The People's Constitutional Company of Jesse Millette was written and established as to expound the founding principles of the Company.
- in an Astronist contextualisation, make something subject to The Grand Constitution of The People's Constitutional Company of Jesse Millette, and its policies, and principles.

Derivatives

Constitutionalised

Constitutionalising

Constitutionaliser

Constitutionalisee

Constitutionalisation

Constitutionality - in an Astronist contextualisation, the

Constitutional Law (Cosmos) - an Astronist Subject dealing with either the application of Astronist Constitutional Law to a cosmical context, or to the study of the constitutional law of governments, organisations, and companies beyond The Earth on all celestial bodies.

Derivatives

Cosmic Constitutional Law

Constitutional Leader - the third of the three official titles of Brandon Taylorian within The People's Constitutional Company of Jesse Millette, demonstrating Taylorian's authoritative role as the final interpreter and amender of The Grand Constitution during his office, and is the only title that is passed down to the next Chairman of the Company after Taylorian's exit from office.

Constitutionally Incorporated - an entity, whether it be an individual, a company, charity or government, that has been officially incorporated into and must therefore act in accordance with The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Constitutional Responsibility - a form of corporate self-regulation integrated into the entirety of a company's operations in order to stay in accordance with its constitution. The first company to conduct this was The People's Constitutional Company of Jesse Millette.

Constitutional Rotation - the constitutionally-bound process of a leader within The People's Constitutional Company of Jesse Millette, whereby they are moved from their position to one with less power typically occurring every three or four years depending on the person being rotated, and especially relates regarding the rotation of legateship, directorship, and governorship.

Constitutional Terminology - the group of terms used in, and relating to the formation of The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Constitutional Union - a union that is under the full obligation of The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Constitutionetox - a male expert and interpreter of The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Constitutionetrix - a female expert and interpreter of The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Constitutionism - a school of thought of The Philosophy of Astronism that dedicates its ideas and theories on The Grand Constitution as the forefront text, rather than The Grand Centrality, which is seen as secondary to The Grand Constitution.

Derivatives

Constitutionistic

Constitutionist - a writer of a constitution.

Constitution Theory - a major branch of Astronology dealing with the study of ideas about the nature of the constitutionality of The Grand Constitution of The People's Constitutional Company of Jesse Millette, its applications, its structures, and the procedures put in place by The Company to ensure its constitutional purity.

Constitution Trigger - the process of reminding, implementing, or enforcing any one of the Constitutional Clauses or Articles of The Grand Constitution.

Consortship - in Astronist Art, the particular representation of the Astronist characters, Jesse and Ellena, in unison, especially in matrimony.

-const - in Astronist Onomatology, a suffix used for Astronist names, in reference to a celestial constellation.

Const- - in Astronist Onomatology, a prefix used for Astronist names, in reference to celestial constellations.

Constant Motionalilty - in Astronist Philosophy, the appellation for that which moves at a constant speed, rather than an accelerating or decelerating speed, either physically, or conceptually.

Constellatine - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of September.

Constentiation - the official term for the constitutional policy of The People's Constitutional Company of Jesse Millette relating to the formal agreement, or disagreement of a country towards a bill passed relating to the operations of The People's Constitutional Company of Jesse Millette in their country, and holds that The People's Constitutional Company of Jesse Millette is bound to the laws of the country in which they operate first before the laws passed by The Astronist Congress. This means that when a law is passed by The Astronist Congress and this law affects the operations, or interactions between The Company, or one of its subsidiaries, or organisations, and a country, the government of that country reserves the right to either officially agree, or disagree with the passed bill, and The People's Constitutional Company of Jesse Millette is then obliged to act accordingly, in alignment with the national government's wishes in that particular country. Note that this does not change the application of the bill in other countries whom may agree with and allow its application.

Derivatives

Constentiational

Constentiationism

Constentiationally

Constentiationality

Constentiator

Constentiationist

Constitutione Concisum - one of the two official versions of The Grand Constitution of The People's Constitutional Company of Jesse Millette, that is shorter in length, mainly due to the exclusion of the Astronist philosophical buildings list, and other long and detailed sections that are present in the Totius Constitutionis.

Construction Law (Cosmos) - an Astronist Subject dealing with the wide-ranging stances on the laws of construction on any celestial body or planet beyond The Earth.

Derivatives

Cosmic Construction Law

Consubstantiation

- in Astronist Philosophy, also known as scientificism, relating to the relationship and the continual association and comparison between The Philosophy of Astronism, especially with regards to Cosmic Philosophy, with all updated and newly discovered and proven scientific concepts, theories, and hypotheses; essentially, the relationship and the interactivity between The Philosophy of Astronism and the discipline of science, and the individuals that practice scientific experiment and theory.
- in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the notion and concept of consubstantiation.

Derivatives

Consubstantiational

Consubstantiality

Consubstantial

Consubstantially

Consubstantiator

Consultative Board - in Astronist Education, similar to an advisory board, an organisation and body of staff whose sole purpose is to assist phrontisteries and their faculties in reaching certain standards outlined by the Astronist education system.

Consumercentrism - in Astronist Propaganda, the depiction of the consumer and the materialistic culture to be at the centre of modern society, especially over politics, the military, and religion.

Cont - in Astronist Philosophy, the philophon for the discipline of contology.

Containmentist - a person who advocates for the ideas of Containmentism.

Contemplative Method - see Philosophical Method.

Contemplatory - in Astronist Architecture, a room as part of either an Astronist philosophical building, or of a person's home that resembles a conservatory, but whose primary purpose is for the contemplation of philosophical concepts, debates amongst the public, or between family members and friends, and is properly kitted out for the observation of The Cosmos.

Derivatives

Contemplatories
Contemplatoire
Contemplatorial
Contemplatorially

Contemplature - a book, often commercial, and varied in both its format and length, in which Astronist philosophical contemplations and insentensations are printed, as a derivation of The Grand Centrality of The Philosophy of Astronism.

Derivatives

Contemplatural
Contemplaturally

Contental - in Astronist Philosophy, relating to the contents with which a planet forms, especially in relation to the differences between these planetary formations.

Derivatives

Contentality

Contental Cosmic Philosophy - see Contental Philosophy.

Contental Philosophy - in Astronist Philosophy, within Cosmic Philosophy, collectively relating to a group of three connected philosophies that explore the contemplations of planets, particularly their differences in formation, character, and structure, with the group consisting of terrestrialism, gasism, and alternatism.

Contigation - in Astronist Philosophy, a branch of Sensory Philosophy manifested by the approach to the philosophical concepts and theories through the sense of touch.

Derivatives

Contigate
Contigating
Contigated

Contigational
Contigationally
Contigative
Contigatively

Contiguous - in an Astronist contextualisation, when the subsidiaries of The People's Constitutional Company of Jesse Millette are listed by size, and refers to those which are next to each other.

Derivatives

Contiguity
Contiguousness

Continuance of Totality - in omnology of Astronist Philosophy, the appellation for the instance in which the achievement of a totality in The Expanding Cosmos is difficult due to its ever-expanding nature, and therefore a continuing totality must be settled upon, also known as being in a state of limbance.

Continuation - in Astronist Ornamentation, the use of repetitive patterns to form a continuous strip, either vertically, or horizontally.

Contour - in Astronist Ornamentation, a type border, or bordering that is curved as opposed to the traditional linear design.

Contouration - in Astronist Philosophy, especially in formatology, the physical dimensions, measurements, and proportions of celestial entities studied and contemplated in order to derive philosophical meaning about such entities by the way in which their dimensions have formed.

Derivatives

Contouration
Contourative
Contouratively
Contourativity

Contournement - in Astronist Philosophy, during a philosophical argumentation, a topic that is scheduled to be discussed, but due to difficulties with timing, is not able to be discussed, and is therefore automatically carried over to the proceeding philosophical debate.

Contraband - in an Astronist contextualisation, any Astronist product that is imported or exported illegally into a country.

Contracting Cosmology - in structurology of Astronist Philosophy, the appellation for the type of cosmos that all that exists within The Cosmos are inevitably destined to continue to exist within The Cosmos rather than to be taken out of The Cosmos by some form of extraction. This is also known as The Incubator Cosmos.

Contralaterality - in Astronist Philosophy, a concept, theory, or philosophical school of thought that is present on the opposite side of the orientation spectrum from that which it first originated.

Contrapplication - in Astronist Philosophy, specifically within the discipline of cosmoapplication, the instance whereby an application fails to draw significant consistencies between an entity of the natural world, and an entity of the cosmic world, and can also be called a failed application.

Derivatives

Contrapplicational

Contrapuntalism - in Astronist Ornamentation, the design style and practice holding that if a pattern does not notably contrast with the main pattern then that secondary pattern must not be included in the ornamentation, as only contrapuntal patterns should be exhibited.

Contrastation - in Astronist Philosophy, the official term for a contrast of something.

Derivatives

Contrastations

Contributionism - a school of thought of The Philosophy of Astronism relating to the ideology that all people in a society must add to that society in some way, and encourages those whom can see others whom do not add to the society to not treat them as outcasts, but to try and find their greater purpose in the society, and typically has a utopian, or idealistic endgame, with its central principle being for the betterment of the society.

Derivatives

Contributionist

Contributionistic

Controversialism - in Astronist Philosophy, of a theory, or philosophical orientation, holding controversy or being divisive.

Derivatives

Controversialistic

Contruntance - in Astronist Philosophy, the instance in which one holds a deep and personal devotional relationship with a deity in which they put their faith.

Derivatives

Contruntancy

Contruntancial

Contruntancially

Contrusion - in Astronist Philosophy, the distortion of something, especially of reality, or of the cosmical system and orderity rather than an individual object.

Derivatives

Contrusional

Contrusive

Contrusively

Contrusivity

Contumace - in Astronist Philosophy, of a recognised and invited debater, failure to attend the philosophical debate.

Derivatives

Contumacy

Contumely - in the context of diplomatic relations, insolent or insulting dialogue or treating from an external entity towards The People's Constitutional Company of Jesse Millette.

Derivatives

Contumelies

Convalesce - in an Astronist contextualisation, of The People's Constitutional Company of Jesse Millette, recovering its operations after a major trauma, or threat.

Derivatives

Convalescent

Convalescence

Conventionism - a school of thought of The Philosophy of Astronism that bases its ideas, theories, and practices from the official interpretation of The Grand Centrality, by The People's Constitutional Company of Jesse Millette.

Derivatives

Conventionist

Conventionistic

Conversionism - in kosmetrics of Astronist Philosophy, relating to the process by which celestials bring chaotic entities into cosmical orderity and procession.

Convocation - in an Astronist contextualisation, another term for an Astronist congressional session.

Derivatives

Convocational

Cooperationism - a school of thought of The Philosophy of Astronism focusing on the concept of two or more schools working together to the same end whilst still retaining their own theories, typically by emphasising the parts of the thought schools that work most well together.

Derivatives

Cooperationist

Cooperationistic

-copern - in Astronist Onomatology, a suffix used for Astronist names, in reference to the extolled astronomer, Nicolaus Copernicus.

Copern- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the extolled astronomer, Nicolaus Copernicus.

Copernicanism - a branch of knowledge in The Philosophy of Astronism concerning the study of the life, discoveries, and theories of Nicolaus Copernicus, especially the theory of heliocentrism.

Derivatives

Copernicanist

Copernicanistic

Copernicanic

Copernicanically

Cophilosophy - in Astronist Philosophy, relating to two philosophies that are frequently compared with one another, or two philosophies that are equally recognised, or adhered to in a particular nation state.

Derivatives

Cophilosophical

Cophilosophically

Cophilosophicality

Copine - in Astronist Art, Architecture, and Rendition, relating to the Astronist character of Ellena when depicted as the girlfriend of the Astronist character of Jesse, as distinct from being depicted as his wife, or friend.

Coppeatius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second son of Stasia and Moctius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Coppeatiusian

Coppoltius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the first son of Alexine and Gulgas, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Coppoltiusian

Coproprietorship - in proprietology, the instance in which two entities hold joint proprietorship, or ownership, over something, the first occurrence of which was the coproprietorship between the philosopher, Cometan, and The Institution of The Philosophy of Astronism over the ownership of the contents of The Grand Centrality, especially The Omnidoxy and its components parts.

Derivatives

Coproprietor

Coproprietors

Coquettement - in Astronist Art and Rendition, relating to the depiction of the Astronist character of Jesse in stylish and smart formal clothing, typically a suit, or tuxedo.

Corality - in Astronist Philosophy, an instrument of study relating to the physical cores of celestial entities.

Derivatives

Coralities

Coration - in Astronist Philosophy, as part of concentritology, the view that the core of the concentric segments is the most important in the concentric structure, and is thus superior to all other segments.

Derivatives

Corational

Corative

Corax - a raven-like bird of Astronist Mythology, said to have the darkest of all feathers and is the bird of the realm's night, but it is also legend that the bird's feathers can turn a vibrant array of colour when provoked, and is said to be the mythical embodiment of the element of darkness.

Corbel - in Astronist Architecture, a piece of stone, wood, or metal jutting out from a wall to support an superincumbent weight above it, and encompasses a vast range of ornamentation styles, though it is almost always cosmically ornamented.

Derivatives

Corbels

Cordendum

- in an Astronist congressional session, an Astronist book, documentation, or other literature other than The Grand Constitution that is referenced during the session by a member of the assembly, typically as reflection, or showcase of Astronist philosophy, morality, and worldview, especially in order to prove their opinion right.
- a piece of Astronist literature which an individual considers to be the most important to them and their personal growth and connection to Millettaria, or may refer to a nation, a group of peoples, a company, or an organisation that considers an Astronist literature in the same way.

Derivatives

Cordendia

Cordiality - in an Astronist contextualisation, relating to the relations between The People's Constitutional Company of Jesse Millette, and an external entity, especially good relations.

Derivatives

Cordialities

Cordiance - the extent to which relations between The People's Constitutional Company of Jesse Millette and an external entity are receptive and genial.

Derivatives

Cordial

Cordially

Cordiality

Core - in Cosmic Art, as a derivation of Astronist Art, the centre region of a galaxy.

Derivatives

Coric

Corial

Core City - in Astronist Civicology, the part of a city which resides at the centre and is typically varied in its distinction, but usually encompasses both the centrepiece, the centrefold, and perhaps a slightly larger piece of area encompassing these two subparts.

Coreless - in Astronist Philosophy, especially within Cosmic Philosophy, relating to a planetary body without a metallic core and remains only as a giant rocky mantle.

Coreliance - in omnidoxicology, the instance in which two or more insentensations of The Omnidoxy require to be read together so that their context can be understood.

Derivatives

Coreliant
Coreliantly

Coremost - in Astronist Philosophy, that which resides at the core of something, either physically or conceptually, above all other candidates.

Corepoint - in kosmetrics of Astronist Philosophy, the core of a Galactic Diameter, also known as a centrepoint.

Core subject - in Astronist Education, subject that is central and mandatory to the Astronist education system's curriculum, the primary examples of which are astronomy, cosmology, and philosophy.

Corine - in Astronist Architecture, in any Astronist building, the use of two or more sets of steps after each other, especially to create a grandiose view upward.

Derivatives

Corines
Corinal

-coro - in Astronist Onomatology, a suffix used for Astronist names, in reference to the coronas of stars.

Coro- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the coronas of stars.

Coronet - in Astronist Ornamentation, the part of an ornament at the very top.

Cornering - in Astronist Ornamentation, the use of corners in ornamental patterns.

Cornerpocket - in Astronist Architecture, also known as a bulb, the creation of small circular rooms on each corner of some Astronist buildings, on all levels, and are typically used as seating areas.

Derivatives

Cornerpockets

Cornersquare - in Astronist Architecture, a type of cornerpocket with its main distinct being the square shape of the room, as opposed to the traditional circular shape of most cornerpockets.

Derivatives

Cornersquares

Cornucopia - in an Astronist contextualisation, a type of product bundle found in Astronist merchandise stores which includes a variety of Astronist merchandise products.

Derivatives

Cornucopian

Coronet - in Astronist Architecture, the small flight of steps most commonly found surrounding giant orreries, and cosmospheres.

Derivatives

Coronets

Corporate Family - a family in which several members are involved in the corporate world, or whom are involved in the running of a company, especially one founded by a member of the same family.

Corporate Federalism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding the idea that corporations must be structured under a federal system, especially one on a global-to-national scale.

Corporate Founderism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the operations and governance of the corporation must be structured upon, and kept to the vision of the founder, even after their death.

Corporate Jurisprudence - the legal system of principles and policies forming the governance of a company.

Corporate Law (Cosmos) - an Astronist Subject dealing with laws presiding over the operations of corporations beyond The Earth and on other celestial bodies and planets.

Derivatives

Cosmic Corporate Law

Corporation (Cosmos) - an Astronist Subject dealing with the wide-ranging study of the operations, organisation, establishment, and institutionalisation of corporations that exist and operate beyond The Earth on other celestial bodies and planets.

Derivatives

Cosmic Corporation

Corroborate - in an Astronist contextualisation, the official action of The People's Constitutional Company of Jesse Millette confirming, or supporting a statement made by one of its employees.

Derivatives

Corroboration

Corroborative

Corroborator

Corroboratee

Corroborational

Corrody - in an Astronist contextualisation, a pension or provision for maintenance paid to those within an Astronist philosophical order.

Derivatives

Corrodies

Corrodial

Corrodially

Corum - a term of Orrology, the part of an orrery relating to its central stem from which which all the feederments branch out and upon which the centrement sits.

-cos - in Astronist Onomatology, a suffix used for Astronist names, in reference to The Cosmos.

Cos- - in Astronist Onomatology, a prefix used for Astronist names, in reference to The Cosmos.

Cos - in Astronist Philosophy, the philophon for the discipline of cosmology.

Cosdom - in Astronist Philosophy, an alternative for the term, Kosdom. See Kosdom.

Cosmechistic
Cosmechistically
Cosmechismal

Cosmecology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of The Earth in relation to cosmic phenomena, especially in relation to cosmocentricity and Astronist Cosmology.

Derivatives

Cosmecologist
Cosmecologic
Cosmecological

Cosmecologically

Cosmetics - in Astronist Cosmology, and as part of Astronist Philosophy, specifically Cosmic Philosophy, and also known as The Geometry of The Cosmos, and may be spelt as kosmetics, the study and philosophical discussion of the shape of The Cosmos, and the subsequent shape of The Universe, and how these interact with one another.

Derivatives

Cosmetic

Cosmetrical

Cosmetrist

Cosima - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the second daughter of Marius and Concetta, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Cosimanian

Cosmic

- the eighth and final era in Astronist Mystology, a collection of twenty short stories set in The Cosmos featuring The Five Astronist Characters and are considered part of the Astronist Universe, yet are not considered canonical.
- relating to a discipline of subject focusing on no particular planet, or interplanetary relationship, and is typically associated with media, cultural, and social studies with spacial backgrounds.

Derivatives

Cosmic Era

Cosmic (literary genre) - an Astronist literary or film genre concerned with setting of The Cosmos, and most typically involving a divine presence.

Cosmica - in Astronist Philosophy, one of the main alternative terms for The Philosophy of Astronism.

Derivatives

Cosmican

Cosmicano (Italian version)

Cosmicani (Spanish and Portuguese version)

Cosmicans

Cosmicanism

Cosmic Adoration - see adoration.

Cosmical Abundance - in Astronist Philosophy, as part of The Philosophy of Abundance, dealing with the abundance of The Cosmos as a whole rather than the abundance of its composite parts.

Cosmic Alchemy - in Astronist Philosophy, encompassed by the discipline of drentology, an area of philosophical contemplation, practice and study involving the incorporation of Astronist and cosmic philosophical concepts, as well as traditional pre-Astronist alchemic concepts and theories.

Derivatives

Cosmic Alchemist

Cosmical Bond - in Astronist Philosophy, the appellation for the instance in which a celestial entity holds a conceptual and metaphorical bond with another celestial that it depends upon.

Cosmical Cycles - in Astronist Philosophy, an alternative appellation for The Cycles of The Cosmos.

Cosmical Dependence - in Astronist Philosophy, the state, or fact of a celestial entity or event being dependent upon another celestial entity, or event.

Derivatives

Cosmical Dependencies

Cosmical Elements - see The Cosmical Elements.

Cosmicalise - in Astronist Philosophy, in the theory of Cosmic Philosophy, to category a once chaotic entity as a cosmical entity, typically due to a shift in understanding towards the entity in question.

Derivatives

Cosmicalising

Cosmicalised

Cosmicalisation

Cosmicalisational

Cosmicalism

Cosmicity

- in Astronist Ornamentation, the extent to which an ornamental pattern uses cosmically-inspired designs, symbols, and icons.
- in Astronist Philosophy, the instrument of study addressing the extent to which a celestial entity, an abstract concept, an object, or theory is considered to be cosmical in its nature, as is concluded by the philosopher as based upon the principles of what it means to be cosmical by the Astronist Tradition.
- in Astronist Philosophy, specifically in Cosmic Philosophy, the extent to which one feels a connection, or a certain abstract closeness with The Cosmos and the destinical impacts it has upon their lives.

Derivatives

Cosmicities

Cosmicalism

Cosmicness

Cosmical Journey - in Astronist Philosophy, a journey through The Cosmos in both a physical, a philosophical, and an emotional sense.

Cosmical Mirror - in Astronist Philosophy, an appellation for the instance in which a celestial falls in alignment with another celestial, especially in relation to its orbital course, as it evident by a trojan planet.

Cosmical Piano - a newfound style of piano playing, with close connection to Cosmism and The Philosophy of Astronism, and based upon a cosmical, celestial, and galactical theme, typically featuring a heavy use of the peddle, long and ambient piece, as well as loud beginnings and loud ends, and taking on a plethora of different sub-styles, the most common of which is Millettiana.

Cosmical Quintessence - in Astronist Philosophy, those particular celestials which are considered to be the greatest exemplars of cosmicality, the most common receiver such a description are stars.

Cosmical Relativity - in orbanology of Astronist Philosophy, a type of relativity referring only to cosmical entities and their functionalities, and attempts to draw upon comparisons for the creation of such is believed to influence the way in which a philosopher is to perceive a subject.

Cosmicals - in Astronist Philosophy, collectively referring to celestials, especially so with the attachment of philosophical contexts and meanings.

Cosmical Sphere - in introspectics of Astronist Philosophy, the appellation for the introspection classification denoting an introspection which is cosmical by its nature and context.

Cosmical System - in Astronist Philosophy, also termed as a cosmic system, relating to the general structures, systems, and procedures that are apparent in the study and philosophical contemplation of The Cosmos, both as a whole, and in microcosmic scenarios relating to individual progeny.

Cosmical tattooing - see Celestial tattooing.

Cosmical-Universal Incompatibility Principle - in obliviology of Astronist Philosophy, the appellation for the principle holding that a cosmical entity cannot exist outside of The Cosmos, therefore making cosmical entities incompatible with The Universe in the Astronist Cosmology.

Cosmical Wisps - in Astronist Music, the first entry in The Cosmicusy known as The Priscence, and precedes *The Grand Cosmos*.

Cosmic Archaeology - a discipline of study dealing with the many different ways that humanity have perceived, debated, and interacted either conceptually or physically with The Cosmos as entity itself, or any of its progeny through the history of humanity and through the different periods of human civilisation on The Earth.

Cosmic Architecture

- structures specially designed and constructed to withstand environments beyond the Earth's atmosphere, on other planets, and on other suitable celestial bodies.
- an Astronist Subject dealing with the art and practice of designing and constructing buildings and other structures on celestial entities other than The Earth, for a wide variety of usages.

Cosmic Art - as a derivation of Astronist Art, a far-reaching art style which is inherent and deeply intertwined with the wider Astronist Art style that encompasses the depictions of cosmical, celestial, and galactical entities, as well as astronomical practices, and instruments in art pieces, and typically draws upon Cosmic Philosophy for its inspiration, and may be seen throughout Astronist Architecture, Art, Literature, Culture, and Philosophy.

Cosmication - the depiction of cosmic and celestial objects, particularly stars, comets, planets, and others, in the creation of patterns and ornamentations, especially in Astronist Ornamentation.

Cosmic Awareness - in Astronist Philosophy, the appellation for the concept relating to human understanding and perception of The Cosmos, either collectively as a group, entirely as a species, or personally as an individual, and is something that is often referred to during Cosmic Devotion as such devotional practices are expected to raise one's Cosmic Awareness.

Cosmic Background Temperature - in introspectics of Astronist Philosophy, the general constant background temperature of The Cosmos, and is an aspect that is taken into consideration for the majority of introspections.

Cosmic Battle - see The Great Cosmic Battle.

Cosmic Cavity - in obliviology of Astronist Philosophy, also known as Intergalactic Cavities, the appellation for the holes that oblivions leave in gasfields and other large scale cosmic structures as part of their Trail of Destruction.

Cosmic Centre - a building, most usually one built or sponsored by The People's Constitutional Company of Jesse Millette, in which the public come to learn, take part in and discuss ideas about The Cosmos, cosmology and space exploration.

Cosmical Chest - in Astronist Philosophy, an appellation pertaining to the concept that The Cosmos and the exploration of The Cosmos is a metaphorical chest inside which many discovers, surprises, and challenges will await humanity.

Cosmic Civilisation Development - an Astronist Subject dealing with the entire development of a civilisation beyond The Earth.

Cosmic Collection & Preservation - an Astronist Subject dealing with the collection and preservation of materials and resources from beyond The Earth and the laws, regulations, and ethics involved.

Derivatives

Cosmic Collector

Cosmic Preserver

Cosmic Preservationist

Cosmic Colonialism - a branch of knowledge in The Philosophy of Astronism concerning the colonisation of planets, moons, and other celestial bodies, and the techniques, consequences, and circumstances associated with this.

Derivatives

Cosmic Colonist

Cosmic Community - an Astronist Subject dealing with the communal and social aspects of civilisations beyond The Earth and on other planets.

Cosmic Concentricity - in Cosmic Art, as a derivation of Astronist Art, the depiction of concentric shapes and patterns in cosmical scenes.

Cosmic Conflict - in Astronist Philosophy, the appellation for the idea and notion that conflict is one of the many driving forces of The Cosmos, like gravity, and is integral in the formation of the orderities of The Cosmos.

Cosmic Connections To The Natural World - in omnidoxiology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the discipline of study and practice of cosmoapplication.

Cosmic Criterion Principle - in Astronist Philosophy, the appellation for the criteria that an Astronist philosopher may use to identify the purposes of cosmic entities.

Cosmic Culture

- often referenced as an addition to Space Culture, refers to the widespread public interest in the cosmos, especially celestial bodies beyond our solar system. The extent of the influence of Cosmic Culture is demonstrated through the amount of artworks, literature and veneration of cosmic imagery.
- an Astronist Subject dealing with the entirety of the cultural aspects of all different civilisations on celestial bodies and planets beyond The Earth, and collectively refers to all culture relating to offearth and all culture originating offearth.

Cosmic Death - in Astronist Philosophy, the appellation collectively relating to either one way, or the many different ways in which a person may die as caused by a cosmic entity, or phenomena.

Cosmic Decoration - in Astronist Architecture, the collective term for all architectural articles that have been cosmically designed and ornamented.

Cosmic Devotion - in Astronist Philosophy, collectively relating to cosmic wonderment, adoration, and laudation, and is also known as Astronist Devotions.

Cosmic Dilution - in omnology of Astronist Philosophy, the concept and physical instance in which The Cosmos's expansion is in direct proportionality to its dilution.

Cosmic Disease - an Astronist Subject dealing with the outbreak of disease in civilisations beyond The Earth, the greater possibility of diseases beyond The Earth, and the development of new diseases not able to occur on The Earth.

Cosmic Divination - in Astronist Philosophy, relating to any connections made between The Cosmos, or any one of its progeny, as having a divinical connection, or leading to The Divine in some way, a non-Astronist example of which being the Christmas Star.

Cosmic Divinity - in Astronist Philosophy, the belief that The Cosmos is ultimately Divine in its nature and this divinity can be derived by its particularity.

Cosmic Drama & Entertainment - an Astronist Subject dealing with the various entertainments relating to being on other worlds, or generally being offearth, and also includes entertainments that originate from beyond The Earth.

Cosmic emblem - a symbol depicting a cosmic entity, or celestial that is picked by the population of a region, or country, or is assigned by the government of that area to represent the region, or country, and is a practiced that is considered to be of Astronist character and origin.

Cosmic Engineering - the unique techniques and tools used to build structures beyond the Earth's atmosphere and on other planets.

Cosmic Environment & Environmentalism - an Astronist Subject dealing with the impacts on worlds other than The Earth due to human civilisations and involves efforts to reduce these affects.

Derivatives

Cosmic Environmentalist

Cosmic Epochology - in Astronist Philosophy, one of the three main branches of the discipline of epochology dealing with the The Cosmos in relation to time.

Cosmic Evolution

- an Astronist Subject dealing with either the evolution of The Cosmos, or the evolution of worlds other than The Earth.
- in Astronist Philosophy, relating to the concept known as The Evolutionary Cosmos as part of evolutionism.

Cosmic Evolutionism - see Evolutionism.

Cosmic faith - in Astronist Philosophy, the notion that one can hold a similar sense of faith in The Cosmos as part of Astronist Cosmology, as people also hold faith in and devotion to Gods, saints, and icons in all various religious traditions; Cosmic Faith is, therefore, the philosophical and the Astronist version of religious faith.

Cosmic Family - a family, the first of which is considered to be the Taylorian Family, in which multiple members were or are involved in the space industry, or in space exploration, whether that be as an astronaut, an engineer, or as the owner or manager of a company directly involved in the space exploration industry.

Cosmic Fashion & Garmentry - an Astronist Subject dealing with the fashion styles of peoples on worlds other than The Earth, and also includes clothing required for space travel.

Cosmic Flora - in Astronist Ornamentation, an architectural ornament in the form of a flowerhead, inside which cosmic-inspired icons are engraved, most commonly stars.

Cosmic Folklore - in Astronology, a discipline dealing with either the folklore of cultures originating from other planets or celestial bodies, or folklore that relates to a cosmic background and context, and is typically closely related to Astronist Folklore.

Derivatives

Cosmic Folklorist

Cosmic Formation - a major branch of formatology dealing with the formations of The Cosmos from a purely philosophical perspective.

Cosmic Furniture, Decor & Interior Design - an Astronist Subject dealing with the various styles of interior decorating found in buildings offearth and on other celestial bodies and planets.

Cosmic Garden - in Astronist Architecture, as part of gardenry, a type of small garden in the estate of some Astronist buildings consisting of heavily ornamented astronomical instruments, as well as cosmically ornamented walls, and pathways.

Cosmic Health - an Astronist Subject dealing with the attainment of good health for people living beyond The Earth, either on space stations, spaceships, or on other planets where the environments are different to those of The Earth.

Cosmic Hierarchy - in Astronist Philosophy, the system of class by which The Cosmos is considered to be structured upon with scale in size as well as functionality dictating the position that a celestial or cosmic event takes in the hierarchy.

Cosmic Humanology - the scientific study of the ideas and theories forming the role of human society in The Cosmos and how this connects to Astronist ideology, theology, and philosophy.

Cosmic Inspiration - in Astronist Philosophy, the belief that people can gain an unprecedented and unrivalled level of inspiration from Cosmic Devotion, Cosmic Philosophy, and general cosmic enknowledge, with the most crucial part of this concept being that such inspiration cannot be found in anything else.

Cosmic Institutions - an Astronist Subject dealing with the various institutions involved in the regulation of space, and those institutions that were established with the purpose of control humanity's exploration of The Cosmos.

Cosmicism

- in Astronist Philosophy, a broad term relating to one or encompassing all denominations of The Philosophy of Astronism that do not primarily use the term Astronism to identify themselves, especially common as an alternative appellation for the denominations of Illuminationism, Illuminazione'ism, Illuminazionism, Iluminação'ism, Iluminismoism, Iluminism, Iluminismulism, Iluminizmitism, and Iluminaciónism.
- in Astronist Philosophy, an alternative term for Cosmic Philosophy.
- in Astronist Philosophy, relating to that which is universal, and is equivalent to the term catholic in religious traditions.

Derivatives

Cosmi

Cosmis

Cosmicismo

Cosmição

Cosmicio

Cosmicizmit

Cosmicizmul

Cosmicist

Cosmicistic

Cosmicistical

Cosmicistically

Cosmicity - in Astronist Philosophy, another term for cosmicity relating to cosmicness and The Cosmos.

Derivatives

Cosmicities

Cosmic Journalism - an Astronist Subject dealing with the writing of articles relating to spacial affairs, or may refer to journalism conducted on planets other than The Earth.

Derivatives

Cosmic Journalist

Cosmic Jurisdiction - in Astronist Philosophy, the appellation for the notion of the extent of the authority of The Cosmos, and typically reigns over all that which exists within The Cosmos.

Cosmic kiss - see cosmosculation.

Cosmic Laudation - see laudation.

Cosmic Literature - an Astronist Subject dealing with the literatures that arose just before and after humanity's exploration of The Cosmos and reference this exploration, or may also refer to the literatures of other civilisations on worlds other than The Earth.

Cosmic Man - in Astronist Ornamentation, the depiction of the Astronist characters of Jesse, Oliver, or Phoenix, in a cosmical setting, typically in a solitological, duological, or triological formation, surrounded by cosmic visual imagery, symbols, and motifs.

Cosmic Marketing & Advertising - an Astronist Subject dealing with the marketing and advertising of space travel, astrotourism, business in space, and generally life beyond The Earth, or on another planet.

Derivatives

Cosmic Marketer

Cosmic Advertiser

Cosmic Mechanism - in Astronist Philosophy, an area of contemplation relating to the functions, processes, and occurrences involving celestial entities and phenomena as mechanisms that form The Cosmos itself, including the cosmical system and orderity.

Derivatives

Cosmic Mechanisms

Cosmic Media - an Astronist Subject dealing with the entirety of all media beyond The Earth and on other specific planets, space stations, and celestial bodies.

Cosmic Meditation - in Astronist Philosophy and Astronist Mysticism, a branch of Philosophical Meditation that involves thinking of and centring oneself on The Cosmos by contemplating The Cosmos singularly during meditative sessions without distractions.

Cosmic metaphor - in Astronist Philosophy, to make a connection between the way that the human mind works and the way that The Cosmos works.

Cosmic Mindstep - see The Cosmic Mindstep.

Cosmic Music & Instruments - an Astronist Subject dealing with the music style that arose which identifies its style of being cosmical, and in relation to humanity's exploration of The Cosmos.

Cosmic Mythology - a newfound branch of Mythology stemming solely from the new Astronist philosophical traditions and cosmical worldview that encompasses the construction of a new mythological tradition focusing on the setting of The Cosmos, all things beyond The Earth, though not typically beyond humanity, and featuring new mythological elements never before created, and is heavily influenced by, and inherently tied to, The Philosophy of Astronism.

Cósmico - the widespread denomination of The Philosophy of Astronism that is most commonly associated with Portugal, and Portugal's previous colonies in South America, western and southern Africa, and in other small communities in Asia. There are seven generally accepted main derivations of Cósmico, including Angolan, Brazilian, Cabo Verdean, Mozambican, Portuguese, São Toméan, and Timorese Astronism. This makes Cósmico one of the most widespread and most highly adhered to forms of The Philosophy of Astronism.

Derivatives

Cósmicana

Cósmiconism

Cósmicho

Cósmico Angolana - the root term for Angolan Astronism.

Cósmico Brasileira - the root term for Brazilian Astronism.

Cósmico de São Tomé e Príncipe - the root term for São Toméan Astronism.

Cósmico Moçambicana - the root term for Mozambican Astronism

Cosmic Ornamentation - intrinsically connected with Astronist Ornamentation, the use of celestial, astronomical, and galactical patterns in the creation of an ornamentation.

Cosmic Pantheon - in Astronist Philosophy, the appellation relating to all celestial entities collectively in an ordered and categorised stratum, commonly depicted in Cosmic Art.

Cosmic Parallax - in parallaxics of Astronist Philosophy, one of the five types of parallax to be found involving The Cosmos as a whole, or some of its largest superstructures like superclusters.

Cosmic Philosophical Egg - in Astronist Alchemy, resembling The Cosmos as the egg itself in depictions and theories, and The Universe and The Divine are represented as existing beyond the egg itself.

Cosmic Philosophical Tree - in Astronist Alchemy, one of the two main components, the other being the Cosmic Philosophical Egg, relating to the processes of The Cosmos with the nine branches of the Cosmic Philosophical Tree represented as the Nine Cosmical Elements.

Cosmic Philosophy - also known as the philosophy of The Cosmos, or Cosmicism, a broad and far-reaching newfound branch of knowledge in The Philosophy of Astronism concerning the philosophy of The Cosmos in its entirety, and a branch of philosophy in its own right, and the specific objects within The Cosmos, and it can be argued that Cosmic Philosophy encompasses all philosophical discussion relating to The Cosmos, as well as its relationship with The Universe, humanity, and The Divine.

Cosmic Plan - in Astronist Philosophy, the appellation for the metaphorical concept that The Cosmos is part of a systemic plan devised by that which is known as The Divine in the Astronist Cosmology.

Cosmic Poeticism - poetry focusing on cosmic iconography.

Cosmic Publishing - an Astronist Subject dealing with the entirety of books and other published articles either referencing to spacial affairs, or originating from a planet other than The Earth.

Derivatives

Cosmic Publisher

Cosmic Purposity - in Astronist Philosophy, of a celestial entity, holding a purpose to, or in The Cosmos.

Cosmic Realism - in Astronist Philosophy, an alternative term for puristicism. See puristicism.

Cosmic Reality - a genre within Astronist literature denoting the existence and reality of human civilisations beyond the Earth.

Cosmic religion - in Astronist Philosophy, a cosmos-centred system of thought based on the enknowledge, and devotion of cosmic progeny and phenomena as well as The Cosmos itself, of which Astronism is considered to be the first example of. This type of religious grouping is considered to be an extension of the term Earth religion. This particular label of Astronism is generally not accepted by the Astronist Tradition due to its categorisation of The Philosophy of Astronism as a religion, which the entirety of Astronist Philosophy opposes.

Cosmic Religious Studies - an Astronist Subject that is an umbrella term for all the religions founded offearth, and thus, remains entirely distinct from Cosmic Philosophy.

Derivatives

Cosmic Religionist

Cosmic Social Groups & Structure - an Astronist Subjects dealing with the study of the sociological structure of civilisations and the societies on planets other than The Earth.

Cosmic Social Hierarchy & Class - an Astronist Subject dealing with the development of class in civilisations and societies beyond The Earth, and the subsequent effects of this.

Cosmic Social Order - an Astronist Subject dealing with the overall social order of a civilisation beyond The Earth, or of a society developed beyond The Earth.

Cosmic Social Policy - an Astronist Subject dealing with the study of the general policies of a state or society that involves sociological contexts and affects.

Cosmic Social Problems & Services - an Astronist Subject dealing with the overall social problems of a civilisation or society on a planet beyond The Earth, and the services provided by that society, or its government intended to combat such problems.

Cosmic Sociology - an Astronist Subject dealing with the overall sociological aspects of a society, or state beyond The Earth on another planet or celestial body.

Derivatives

Cosmic Sociologist

Cosmic symmetry - in structurology of Astronist Philosophy and Cosmic Art, the instance in which a celestial entity holds physical symmetry to another celestial, perhaps the most rare of all instances in The Cosmos, and is typically best and most commonly demonstrated in Cosmic Art.

Cosmic Time - in Astronist Philosophy, also known as Cosmical Time, the appellation for the type and perception of time that is considered and contemplated on a cosmic scale, rather than on an Earthly, or human scale, and typically constitutes timescales either millions, or billions of years.

Cosmic Union - in pneumovology of Astronist Philosophy, the appellation for an individual's personal relationship with The Cosmos, especially in a philosophical and devotional sense.

Cosmicusy, The - in Astronist Music, the first amassory created by Brandon Taylorian which founded the Astronist musical tradition which consists of cosmically themed piano pieces, the most notable of which is *The Grand Cosmos*.

Cosmic Waymarking - in Astronist Philosophy, a type of waymarking specific to cosmical entities and involves waymarkers adding waymarks to a digital waymarking system pinpointed upon different cosmical entities for the consideration of other waymarkers and philosophers. Also, see waymark.

Cosmic Woman - in Astronist Ornamentation, the depiction of the Astronist characters of Harriet, Zara, or Ellena, in a cosmical setting, typically in a solitological, duological, or triological formation, surrounded by cosmic visual imagery, symbols, and motifs.

Cosmic Wonderment - see wonderment.

Cosmism

- a branch of knowledge in The Philosophy of Astronism, as well as an art movement within Astronist and Cosmic Art, that is arguably inspired by Russian Cosmism, concerning the study of, and the advocacy for the depiction of The Cosmos in art, ornamentation, architecture, and design, and typically takes a distinct culture, and creative arts point of view for the implementation of Cosmic Philosophy.
- in the context of Astronist Propaganda, the specific depiction of a cosmic scene, especially one whereby The Cosmos, or a part of The Cosmos is the centrality, rather than humanity.

Derivatives

Cosmist

Cosmistic
Cosmistical
Cosmistically

Cosmism of Architecture - a subbranch of knowledge in The Philosophy of Astronism deriving from Cosmism, that focuses on the study of, and the advocacy for the depiction of The Cosmos in architecture.

Cosmism of Art - a subbranch of knowledge in The Philosophy of Astronism deriving from Cosmism, that focuses on the study of, and the advocacy for the depiction of The Cosmos in art.

Cosmism of Design - a subbranch of knowledge in The Philosophy of Astronism deriving from Cosmism, that focuses on the study of, and the advocacy for the depiction of The Cosmos in types of design.

Cosmism of Fashion - a subbranch of knowledge in The Philosophy of Astronism deriving from Cosmism, that focuses on the study of, and the advocacy for the depiction of The Cosmos in fashion.

Cosmism of Ornamentation - a subbranch of knowledge in The Philosophy of Astronism deriving from Cosmism, that focuses on the study of, and the advocacy for the depiction of The Cosmos in ornamentation.

-cosmo - in Astronist Onomatology, a suffix used for Astronist names, in reference to The Cosmos.

Cosmo- - in Astronist Onomatology, a prefix used for Astronist names, in reference to The Cosmos, or that which is cosmic in its nature, or that which existences within The Cosmos.

Cosmoalchemic - in Astronist Philosophy, relating to the practice and study of Cosmic Alchemy, or the perceptions of Cosmo-Alchemists.

Derivatives

Cosmoalchemical
Cosmoalchemically
Cosmoalchemicity

Cosmo-Alchemist - in Cosmic Alchemy, an alternative term for a Cosmic Alchemist.

Cosmoapplication - in Astronist Philosophy, a discipline of compendology and a major practice involving the application of cosmical entities to those of the natural world, and intends to draw connections between such entities in the categories of appearance, functionality, and their role in the system.

Derivatives

Cosmoapplicator
Cosmoapplicational
Cosmoapplicative
Cosmoapplicatress
Cosmoapplications

Cosmoboros - in Astronist Architecture, the circular symbol inspired by that of the ouroboros, but instead depicting The Cosmos in an endless cycle to represent wholeness, and order, and may also feature a black hole in the centre.

Derivatives

Cosmoborotic

Cosmoboroses

Cosmocade - in Astronist Ornamentation, the celestially-inspired raised patterns threaded onto brocades.

Cosmocapital - in Astronist Architecture, a type of capital depicting The Cosmos.

Derivatives

Cosmocapitals

Cosmocentric - in Astronist Philosophy, holding, representing, or believing The Cosmos to be at the centre of creation, imagination, and divine interventions, and is arguably the most central aspect of The Philosophy of Astronism.

Derivatives

Cosmocentricity

Cosmocentrical

Cosmocentrically

Cosmocentrism

- a branch of knowledge in The Philosophy of Astronism concerning the centrality and study of The Cosmos, especially implemented into national education system of country, or when the society structures rotates around the reverence of The Cosmos in The Universe.
- in the context of Astronist Propaganda, relates to the centrality of The Cosmos, and space exploration and discovery in general in a particular propaganda piece, especially when given the role of the signpost.

Derivatives

Cosmocentrist

Cosmocery - in Astronist Ornamentation, the stonework, or metalwork element that support the glass in a window, typically characterised by celestial, galactical, and cosmic patterns.

Cosmochemistry - in Astronist Philosophy, specifically within Cosmic Alchemy, a branch of study and a major contributor to Cosmic Alchemy by focusing on the chemicalities that form The Cosmos and applying these to cosmic alchemic ideas and theories.

Derivatives

Cosmochemist

Cosmochemistic

Cosmochronology - in Astronist Philosophy as part of Cosmic Philosophy, an Astronist Subject dealing with the philosophical study timescales of the objects and events of The Cosmos.

Derivatives

Cosmochronologic

Cosmochronological

Cosmochronologically

Cosmochronologist

Cosmocrafts - in occurrology of Astronist Philosophy, an alternative term for astrocrafts. See astrocrafts.

Derivatives

Cosmocraft

Cosmocrafting

Cosmocrafter

Cosmocrafters

Cosmocrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as the guardian(s) of The Cosmos, especially in Astronist Art, Astronist Ornamentation, or in Astronist Architecture.

Cosmocrux - the main relief associated with The Philosophy of Astronism, a representation of the five Astronist characters in complete quintinity, which is repeated in many different renditions, from trinkets, to ornaments, to figurines, as well as being featured on the Official Flag of The People's Constitutional Company of Jesse Millette.

Derivatives

Cosmocruxes

Cosmocruxic

Cosmocruxical

Cosmocruxically

Cosmocruxity

Cosmocture - in Astronist Architecture, the term almost exclusively used in Architectural Theory describing collectively all cosmically influenced buildings, architectural styles, and ornamental designs.

Cosmoculate - in Astronist Philosophy, specifically within devotology, also colloquially known as a cosmic kiss, the practice of air kissing towards the night sky or celestials in particular as an expression of cosmic devotion.

Derivatives

Cosmoculation

Cosmoculative

Cosmoculational

Cosmoculator

Cosmodial - in Gnomonics and Astronist Rendition, a type of dial similar to a sundial, but instead used for astronomical observation, and is often digital.

Cosmodom - in Astronist Philosophy, the notion of the existence of cosmic authority as manifested by Cosmic Jurisdiction, to which all that exists within The Cosmos is accountable.

Cosmodynamics - a subdiscipline of formatology within Astronist Philosophy dealing with the formational dynamics of The Cosmos itself, and other non-stellar objects.

Derivatives

Cosmodynamic

Cosmodynamist
Cosmodynamists
Cosmodynamicist
Cosmodynamicists
Cosmodynamical
Cosmodynamically
Cosmodynamicity

Cosmoform - in Astronist Architecture, a wing-shaped section of an Astronist building, which is usually cosmically ornamented.

Cosmogation - in Astronist Philosophy, an alternative term for astrogation, but may mean navigation in space beyond The Milky Way, or intergalactic spacial navigation.

Derivatives

Cosmogational
Cosmogationally
Cosmogator
Cosmogatress
Cosmogatrix
Cosmogatrixes

Cosmogesis - in Astronist Philosophy, the idea that The Cosmos is the most prominent entity when contemplating the nature of existence and the very existence of existence.

Derivatives

Cosmogetic
Cosmogetical

Cosmogonal - in Astronist Philosophy, relating either to cosmogonism, or cosmogony.

Cosmogonism - a branch of knowledge in The Philosophy of Astronism concerning and exploring the origin of the universe, the formation of planets, solar systems, and starbirth, and its subsequent representation in art, ornamentation, and architecture.

Cosmogosy - in Astronist Occurrology, a school, college, or university trip to a sopharium for the purposes of learning about astronomy and Astronist Philosophy.

Derivatives

Cosmogosies

Cosmography - a major branch of study in Astronist Philosophy, specific Cosmic Philosophy, within wider Astronology dealing with the general features of The Cosmos, such as planets, comets, asteroids, nebulae, and supernovae, and how these features affect the philosophical concepts of The Cosmos.

Derivatives

Cosmographer
Cosmographic
Cosmographics
Cosmographical
Cosmographically

Cosmogree - in Astronist Ornamentation, a type of ornamental pattern work of fine wire, typically gold or silver, used to form delicate tracery.

Cosmoism - a branch of knowledge in The Philosophy of Astronism concerning the study of the world, typically referring to The Earth, in relation to The Universe, and subsequent schools of thought, theories, and concepts which arise from this comparison of cosmic entities, and also explores the natures of both of these entities.

Derivatives

Cosmoist

Cosmoic

Cosmoical

Cosmoically

Cosmocket - in Astronist Ornamentation, a type of crocket featuring a distinct celestial or cosmic symbol or icon, typically found on Astronist philosophical buildings.

Cosmolatry - in Astronist Philosophy, the worship of cosmic progeny and phenomena, to the likes of which the Astronist Tradition is opposed although, notably, it does not proactively deter its adherents from engaging in such activities.

Derivatives

Cosmic worship

Cosmolatries

Cosmolatrist

Cosmolatrous

Cosmolater

Cosmolatrist

Cosmolatrist

Cosmolatristic

Cosmological Demographics - the branch of Philosophical Demographics dealing with the measure of a population's beliefs of cosmology, cosmogony, and the overall role of The Cosmos as categorised by different cosmological positions, whether Astronist cosmological stances or non-Astronist cosmological stances.

Derivatives

Cosmological Demography

Cosmological Demographer

Cosmological Trinity - in Astronist Philosophy, especially in Creation Theory, the instance in which a cosmology is primarily dependent and formed by three distinct entities.

Cosmologise

- analyse, or regard in philosophical cosmological terms.
- theorise, or contemplate concerning different cosmologies.

Derivatives

Cosmologisation

Cosmologised

Cosmologising

Cosmologiser
Cosmologises

Cosmology - in Astronist Philosophy, a theoretical and conceptual notion pertaining to the origins, nature, purpose, and finality of The Cosmos in The Universe.

Derivatives

Cosmologies
Cosmologer
Cosmologers

Cosmomaison - in Astronist Architecture, a house which is almost all cosmically ornamented on its exterior.

Derivatives

Cosmomaisons

Cosmonautic - in Astronist Philosophy, resembling a cosmonaut, an alternative term for an astronaut.

Derivatives

Cosmonautical
Cosmonautically

Cosmonautics - a minor discipline of study within Astronist Philosophy dealing with the philosophical study and contemplations of cosmonauts, an alternative title for which are astronauts.

Derivatives

Cosmonauticist

Cosmonaution - in Astronist Ornamentation, the specific depiction of a cosmonaut, typically alongside celestial objects, and deep space cosmic entities.

Cosmopathy - in Astronist Philosophy, especially within Cosmic Philosophy, the ability and practice to see and know an issue from the perspective of The Cosmos, not just from one's own individual perspective, or even from the perspective of humanity; essentially, putting one's perception in the position of The Cosmos.

Derivatives

Cosmopathic
Cosmopathical
Cosmopathically

Cosmophany - in Astronist Philosophy, also known as an astrophaney, the appearance of a cosmic progeny, or the occurrence of a cosmic phenomena before one's own eyes, considered to be a mystical, spiritual, and philosophical experience for the person to which the progeny, or phenomena appears or occurs, and which the person must be appreciative for.

Derivatives

Cosmophanies

Cosmophilia - in Astronist Philosophy, a distinct obsessive fondness for astronomy, The Cosmos, or cosmic philosophy, especially by exhibiting an obsession for activities and people connected with these topics, an alternative term for which is astrophilia.

Derivatives

Cosmophile
Cosmophiles
Cosmophilic

Cosmophobia

- in Astronist Philosophy, an extreme fear, or intentional ignorance directed towards The Cosmos as distinct entity, or anything to do with its observation, or its enknowledge, such as Cosmic Philosophy, the practices of astronomy, or Cosmic Devotion, an alternative term for which is astrophobia.
- dislike of or prejudice against Astronism (Cosmism), Astronist Culture or Kosmans, especially as a political or ideological force. See Millettophobia, astronophobia, kosmaphobia, and sophobia.

Derivatives

Cosmophobe
Cosmophobes
Cosmophobic

Cosmophoric - in Astronist Philosophy, to bear name of an astronomical term, or of a type of and an appellation of a cosmic progeny, or phenomena, either of a person, a concept, an event, or an object.

Derivatives

Cosmophorism
Cosmophoricity
Cosmophorical
Cosmophorically

Cosmopsychology - an Astronist Subject dealing with the wide-ranging psychological affairs and issues that arise within a society, or nation state on another planet or celestial body.

Derivatives

Cosmopsychologist
Cosmopsychological
Cosmopsychologically

Cosmopsychotherapy - an Astronist Subject dealing with the practice of psychotherapy in order to treat psychological issues that have originated from the individual beyond in space, or on another planet other than The Earth.

Derivatives

Cosmopsychotherapist

Cosmos - in Astronist Philosophy, one of the Nine Cosmical Elements relating to all the celestials, their processes, cosmical events in relation to the Astronist Cosmology, and stands as the oppositism to the element of chaos.

Cosmos Day - an important day of celebration in The Grand Astronist Calendar that takes place in the period of Jessine on the 19th Jessine, which translates to the 31st March in the Gregorian calendar, and on this day, people focus their thoughts and devotions and imaginations on the entity that is The Cosmos from the Astronist philosophical tradition. On this day, people are to celebrate

and devote to The Cosmos privately in their residences, and may have privately held philosophical debates and argumentations about subjects relating to The Cosmos.

Cosmosism - a branch of knowledge, and sometimes argued as a school of thought in The Philosophy of Astronism concerning all thought and philosophy that has extraterrestrial and celestial objects as its setting, focus or raises them to a divine status. One feels a distinct closeness to The Principles of Cosmic Exploration, and The Principles of Advancement from The Grand Centrality, and holds the idea that humans belong in the extraterrestrial and must explore the cosmic world to gain further knowledge of divine entities.

Derivatives

Cosmosistic

Cosmosistically

Cosmosium - in Astronist Rendition, a type of ten pillared pavilion either of full, or small scale, upon a decagonal shaped base, the sides of which are typically embedded with cosmical maps and illustrations, and the whole rendition is typically heavily cosmically ornamented in the high cosma style, and usually, atop of which a highly ornamented orrery is affixed.

Derivatives

Cosmosiums

Cosmosial

Cosmosially

Cosmosis - in Astronist Philosophy, the extent of an individual's personal relationship, interaction, knowledge, and awareness of The Cosmos, and its progeny, and this remains the central essence to one's Cosmical Journey, and may also be used as a measure for one's philosophy.

Cosmosist - a person who advocates for the ideas of Cosmosism.

Cosmosity - the state or quality of being in tune with or having a greater understanding of The Cosmos.

Cosmosphere - in Astronist Rendition, a giant, typically bronze, sculpture resembling an orrery, yet instead of displaying The Solar System, it displays The Cosmos, and can most often be found in front of Astronist buildings, in town or city squares, and sometimes inside Astronist buildings in large open lobbies and foyers.

Cosmostela - in Astronist Architecture, a carved, memorial stele bearing Astronist symbols and cosmically-themed ornamentations and motifs erected for the commemoration of an astronomical event, a person's life (though a person is not buried under it), or for the acknowledgement of a concept within The Philosophy of Astronism.

Derivatives

Cosmostele

Cosmostelas

Cosmostelic

Cosmotheism - another term for Astrotheism.

Derivatives

Cosmotheist

Cosmotheistic

Cosmotheology - not to be confused with Astrotheism and Cosmotheism, a branch of knowledge in The Philosophy of Astronism concerning a broad range of theological concepts in relation to those of The Cosmos, and typically encompasses a variety of theological positions, from theism to atheism, but most commonly argues that for one to see great wonderment in The Cosmos only furthers their religiosity and faith in the creator of The Cosmos in The Universe, and in this way, claims that Cosmic Philosophy in general elevates one's faith to an even higher level.

Derivatives

Cosmotheologist

Cosmotheological

Cosmotheologically

Cosmotheologic

Cosmos Theory - an important branch within Astronist Philosophy that collates and categorises all of the different cosmoses, as referred to in The Grand Centrality, and other cosmic philosophical literature of the Astronist Tradition.

Cosmotime - in Astronist Philosophy, connected with space, especially in relation to space travel, both short and long haul, and acts as an umbrella term for all other topics involved in travelling in space, one of which being astronautics.

Cosmotime Law - an Astronist Subject equivalent to Maritime Law, but deals with spacial trade and spacial naval matters.

Cosmotopiary - in Astronist Architecture, as part of gardenry, the creation of topiaries that resemble cosmical images, and symbols, or may also resemble one or more of the Astronist characters.

Derivatives

Cosmotopiaries

Cosmotopography - a discipline of study in Astronist Philosophy dealing with the natural physical features of celestial entities in The Cosmos and the different contemplations and conclusions made regarding the physical characteristics of such entities.

Derivatives

Cosmotopographer

Cosmotopographers

Cosmotopographic

Cosmotopographical

Cosmotopographically

Cosmotopology - the branch of study of Astronist Philosophy within Astronology dealing with the constituent parts of The Cosmos and how they are arranged and how they interrelate from a philosophical perspective.

Derivatives

Cosmotopologic

Cosmotopological

Cosmotopologically

Cosmotopologist

Cosmotranspiration - in introspectics of Astronist Philosophy, one of The Six Transpirations characterised by the discoveries, revelations, and unknowns about The Cosmos becoming known to an individual, or to wider humanity, and stands as the central process in the progression of Cosmic Philosophy.

Derivatives

Cosmotranspirational

Cosmotranspirative

Cosmotranspiratively

Cosmotranspire

Cosmotranspiring

Cosmotranspired

Cosmoswide - in Astronist Philosophy, throughout The Cosmos.

Cosmo-Universal Cyclometrics - in Astronist Philosophy, a branch of cyclometrics dealing with the consideration that cycles existent in The Cosmos and The Universe are as one with each other.

Cosmouniversalism - in Astronist Philosophy, a concept deriving from Creation Theory that places The Cosmos and The Universe on an equal footing by suggesting that they created one another equally, thus forming bicreational scenario.

Derivatives

Cosmouniversalist

Cosmouniversalistic

Cosmox - part of The Standard Astronomical Calendar, the alternative name for the Gregorian day of Wednesday.

Cosmoxy

- the transposition of a cosmic entity into a useable, playable, or interactive item, or product.
- relating to The Cosmoxy Company.

Derivatives

Cosmoxies

Cosmoxic

Cosmoxical

Cosmoxically

Cosmoxicity

Cosmoworks - in Astronist Ornamentation, the collective patterns, works, and ornaments, either wholly or partly cosmically inspired, and typically characterised by cosmic entities, galaxies, planetary systems, and nebulae.

Cosmozoism - in Astronist Philosophy, the belief holding that The Cosmos is alive and animate in its existence as is derived from the constant motionalities of The Cosmos, as well as by the death of The Cosmos.

Derivatives

Cosmozoic

Cosmozoical

Cosmozoically
Cosmozoicity

Cosmunculus - in Astronist Philosophy, specifically within Cosmic Alchemy, the depiction and study of The Cosmos in its infantile form as perceived by Cosmo-Alchemists.

Derivatives

Cosmuncular
Cosmuncularity

Cosmuster - in Astronist Ornamentation, the celestially-inspired ornamental patterns sculpted and encrusted onto balusters.

Cosociate - in Astronist Philosophy, relating to one instrument of study that is in close association with another instrument.

Derivatives

Cosociation
Cosociative
Cosociational
Cosociationally

Cosopathy - in introspectics of Astronist Philosophy, the instance in which one takes the perspective of the entity that is known as The Cosmos in the Astronist Cosmology towards something rather than their own individual perspective.

Derivatives

Cosopathic
Cosopathicity
Cosopathical
Cosopathically
Cosopathise
Cosopathising
Cosopathised
Cosopathisation

Costa Rican Iluminación - the root term for Costa Rican Astronism.

Costa Rican Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Costa Rica.

Cosula - in Astronist Architecture, a rounded dome forming or adorning a roof or ceiling of a sopharium similar in character to a cupola, but instead features cosmic ornamentations on the interior and exterior.

Derivatives

Cosuled
Cosula

Coterie - in an Astronist contextualisation, another term for The Governing Council, and its members.

Cotisant - in Astronist Philosophy, a public spectator of a philosophical argumentation that makes a special request to contribute.

Derivatives

Cotisation

Cottagegarden - in Astronist Architecture, as part of gardenry, a type of garden which is cultivated to blend mixtures of plants growing together, as if naturally.

Couch - in Astronist Ornamentation, the action and process of taking down an ornament from display, especially for restorative purposes.

Derivatives

Couching

Couched

Counciloral - relating to local council, especially the official relations between local council and The People's Constitutional Company of Jesse Millette, either citywide or county-wide relations.

Counselling (Cosmos) - an Astronist Subject dealing with practices of counselling on planets other than The Earth.

Derivatives

Cosmic Counselling

Countenate - in an Astronist contextualisation, the official action that can only be undertaken by the Chairman of The People's Constitutional Company of Jesse Millette wherein he or she provides approval and authorisation of a document or bill that needs to be passed.

Derivatives

Countenance

Countenancy

Countenancies

Countercreationism - in Astronist Philosophy, a branch of Creation Theory holding that during the creation of The Cosmos, or The Universe some external forces or entities were pushed against either The Cosmos, or The Universe in order for the creation to occur, and is a theory of creation inspired by the laws of gravity, and friction.

Derivatives

Countercreate

Countercreation

Countercreational

Countercreating

Countercreated

Countercreator

Countercreators

CounterdeAstronistisationism - openly and actively opposed to the deAstronistisation of an entity, especially a society, or a group.

Countermand - in an Astronist contextualisation, the official action that can only be undertaken by Chairman of The People's Constitutional Company of Jesse Millette wherein he or she revokes a previously approved document, or bill, and is the opposite of countenance.

Derivatives

Countermander

Countermandee

Countermanding

Countermanded

CounterAstronistisation - the process of openly and actively opposing the Astronistisation of any entity.

CounterAstronistisationism - the belief that the open and active opposition of Astronistisation is the only way to save one's nation and society.

Counterpseudomillettarinisationism - the belief that all versions of Astronistisation that are not supported or commissioned by The People's Constitutional Company of Jesse Millette should be discouraged, and perhaps even forbidden.

CounterreAstronistisation - the process of openly and actively opposing the reAstronistisation of any entity.

CounterreAstronistisationism - the belief that the open and active opposition of reAstronistisation is the only way to save one's nation and society.

Counterposition - also known as a counterproposal, in an Astronist contextualisation, especially during an Astronist congressional session, a direct oppositional point made against a previously proposed point.

Derivatives

Counterpositional

Counterpositer

Counterpositioned

Counterpositioning

Counterproposal - another term for counterpositioning in an Astronist congressional session.

CountersuperpseudoAstronistisationism - the belief that all Astronist super-pseudo ideas should be completely opposed and strictly forbidden due to their regressiveness and danger to the wider society, and their potential damage to the progressive process of Astronistisation.

CountersuperpseudoAstronistisationism is the longest word in The Grand Lexicon of Astronomy with forty letters in all and is the longest non-technical word in existence.

CountertransAstronistisationism - openly and actively opposed to the process of transAstronistisation, usually based upon a dislike of the nation or peoples with whom the Astronistisation process will be shared.

Countrywide - in an Astronist contextualisation, relating to the operations of The People's Constitutional Company of Jesse Millette, or any one of its subsidiaries throughout a particular country.

Courantation - in Astronist Ornamentation, the depiction of one or more Astronist characters running, especially in-line with the ideas of Formationism.

Cousinship - in Astronist Philosophy, the state and title provided to a philosophy that remains outside of the Astronist philosophical tradition, or is non-Astronist in its origination, by The Institution of The Philosophy of Astronism to demonstrate the analogous principles when such philosophies are compared to one another, the first example of which is when astronautic humanism was provided with this title.

Derivatives

Cousin philosophy

Coz- - in Astronist Onomatology, a prefix used for Astronist names, in reference to The Cosmos.

Cozima - also spelt as Cozyma, the major branch of Astronist Style including all uses of cosmical, and celestial related entities and symbols on Astronist clothing and other fashion and accessory products, and is typically characterised by a heavy cosmically ornamented style across all fashion items.

Cozmotius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the husband of Mariposine, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Cozmotusian

Cozonette - in Astronist Architecture, a type of column with an inverted bell shape at its peak.

Derivatives

Cozonettes

Cozyma - see Cozima.

-cra - in Astronist Onomatology, a suffix used for Astronist names, in reference to a crater.

Cra- - in Astronist Onomatology, a prefix used for Astronist names, in reference to lunar and planetary craters.

Cradle - a formational or introductory document structuring the foundations of a range of subjects, but most typically all linked by a distinct commonality, or theme, or by some overarching topic.

Derivatives

Cradlic

Cradlical

Cradlically

Cradletox - a male expert and interpreter of The Grand Cradle of Astronology.

Cradletrix - a female expert and interpreter of The Grand Cradle of Astronomy.

Crafracing - a form of motor, hovercraft and anti-gravity racing and is governed by The Grand Universal Authority of crafracing.

Cre - in Astronist Philosophy, the philophon for the discipline of Creation Theory.

Creationality - in Astronist Philosophy, relating to the instance in which something is created.

Creations of Destruction - in Astronist Philosophy, the appellation for the cosmic philosophical notion that The Cosmos and its progeny were all created from destructive occurrences and phenomena.

Creation Theory

- in Astronist Philosophy, a major branch of the discipline of epochology dealing with the various different approaches to the creation of The Cosmos.
- in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the discipline of study and philosophical applicational method of Creation Theory.

Creative Explanation - in Astronist Music, an alternative term for a creatory.

Creative Industry - in Astronist Propaganda, the specific depiction of creative industries as the central occupations of humanity, especially when also depicting the use of advanced technology for industrial and laborious work.

Creator-Creation Principle - in Astronist Philosophy, the theory and notion holding that the creator, as in The Divine in the Astronist Cosmology, and its creations can never meet.

Creatory - in Astronist Philosophy, a short piece of writing sometimes found at the beginning of Astronist musical compositions addressing the creative process and inspirations involved in the development of the musical piece, and typically resides alongside a theoretory.

Derivatives

Creatories

Creatorial

Crenellation - in Astronist Ornamentation, a repetitive ornamental pattern attached to the perimeter of the ornament.

Crest - in Astronist Ornamentation, the most central point of the ornamentation, surrounding by the cynosure.

Cresting - in Astronist Civicology, the drawing of the city or town's official crest on the civicological illustration.

Crestology - the branch of study as part of Logology within Astronomy dealing with the study of Astronist crests.

Derivatives

Crestologist

Crestological
Crestologic
Crestologically

Criminal Law (Cosmos) - an Astronist Subject dealing with the established laws and regulations of a government, or another authority, on a planet or celestial body other than The Earth to deal with the punishment of offenders.

Derivatives
Cosmic Criminal Law

Criss - a term often used by the Astronist character of Oliver, meaning smart and fashionable.

Criteriology - in Astronist Philosophy, an Astronist Subject dealing with both the philosophical establishment of criteria when dealing with logic, and the study of how philosophical conclusions can be made by a structured criteria.

Derivatives
Criteriologist
Criteriologic
Criteriological
Criteriologically

Criticalism - in Astronist Philosophy, an approach and framework to philosophical writing whose main principle consists of criticising one's own concepts and theories as one constructs them.

Derivatives
Criticalist
Criticalistic
Criticalistically

Criticality - in Astronist Philosophy, an instrument of study with two distinct applications; the first relating to the criticism of a philosophical work, and the second measuring the extent of the potentiality for a celestial entity, or a cosmic event to cause disaster and destruction.

Derivatives
Criticalities

Croatian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Croatia.

CroatoAstronistisation - the specific Astronistisation of Croatian society, either in a macro or micro form.

Derivatives
CroatoAstronistisationism

Croissance - in Astronist Philosophy, the process of developing a philosophical branch, discipline, or school of thought into a fully augmented and rich breadth of philosophical contribution to the wider Astronist philosophical tradition.

Derivatives
Croisser
Croissetress

Cross-advertising - using the advertising budget for one nation to pay for the cost of advertising in other, a practice which is discouraged within The People's Constitutional Company of Jesse Millette.

Cross-company - a policy, operational decision, or change impacting across two or more divisions of a company.

Crossette - in Astronist Architecture, a series of stone blocks shaped as sun rays, typically found above archways, windows, or doors, and are usually cosmically ornamented, and may at times overlap each other.

Derivatives

Crossettes

Crosshatching - in Astronist Ornamentation, the use of any type of crosshatched pattern, or design on an ornamentation.

Cross-philosophical Communication - a field of study that focuses on how people from differing philosophical beliefs and backgrounds communicate and interact, both formally and informally.

Cross-philosophy - the study of two or more philosophies in parallel, especially in reference to the pinpointing each philosophy's strengths, and weaknesses.

Croupissant - in Astronist Philosophy, a term used to describe a philosophical branch, discipline, denomination, or school of thought that receives little popularity, or usage, typically due to its own perceived stagnancy in the topic and theme that it addresses.

Crown - a logo or crest representing the head of an Astronist character, typically used in Astronist Architecture, Astronist Art, and in some official documentations.

Crowncapital - in Astronist Architecture, a type of capital ornamented by one or more crown designs which depict the face of an Astronist character.

Derivatives

Crowncapitals

Crownring - a ring with the head of one of the five Astronist characters on it, most usually encrusted by a ruby, or another precious stone.

Derivatives

Crownrings

Croyance - in Astronist Philosophy, to truly believe and hold faith in the correctness and rightness of The Philosophy of Astronism.

Derivatives

Croyancy

Croyant

Croyantly

Crozation - in Astronist Ornamentation, the use of a crozier design, either in vertication, or horizontation.

Cruxa - in Cosmic Art, as a derivation of Astronist Art, also known as the Cruxa Core, the region of the galaxy beyond the vergence, and is the most outer part of the galactic core.

Derivatives

Cruxial

Cruxic

Cryology - in Astronist Philosophy, an Astronist Subject of a Cosmic Philosophy origin dealing with the study of low temperatures and subsequent phenomena in relation to cosmical events, and entities.

Derivatives

Cryologist

Cryologic

Cryological

Cryologically

Cry - in Astronist Philosophy, the philophon for the discipline of cryonics.

Cryonics - the subdiscipline of Spacial Psychology addressing the Astronist approach and philosophy to understanding and justifying the practices and usages of cryonics.

Derivatives

Cryonicist

Cryonicists

Cryonicistic

Cryonicistically

Cryptogram - the official cryptogam of The Philosophy of Astronism is a compass.

Cryptonym - a type of term relating to a code word as used within an Astronist organisation, or within an Astronist philosophical order, or within The People's Constitutional Company of Jesse Millette.

Derivatives

Cryptonymic

Cryptonymity

Csillagosház - derived from the Hungarian language and used in Hungarian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Csillagosház

Cuban Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Cuba.

Cubine - in Astronist Ornamentation, the use of cubic shapes to create ornamental patterns.

Cuirass - in Astronist Attire, as derived from its historical equivalent, a metal breastplate and backplate that may or may not be cosmically ornamented, and is redesigned to fit with contemporary Astronist fashion outfits.

Cullin - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Cullinic

Cullinian

Culminal - in Astronist Philosophy, that which is the primary, or the deciding factor of something, especially in relation to its categorisation.

Cult Philosophy - a philosophy adhered to by a small group, especially one shrouded in secrecy, scandal, and isolation, and is largely unaccepted by the wider society.

Culturalcentrism - in Astronist Propaganda, the point argued that all propaganda should hold at its core the culture of the nation in which it is distributed, rather than multicultural, relativistic cultures, or rebellious cultures.

Cultural Constructionism - in Astronist Mysticism, another term for Societal Constructionism, but especially focusing on the cultural application of the theory. See Societal Constructionism.

Culturalist - a person who advocates for the importance of the maintenance of culture in society.

Cultural Philosophy - a widely acknowledged philosophy throughout a nation or region, which is distinct from religious practice, but does hold significant ideological influence throughout the cultural, economic and social attitudes of the people and it is The Philosophy of Astronism that is most commonly referred to as a Cultural Philosophy.

Culture Hero - the central figure, or figures, of a culture, and in Astronist culture, the Astronist character of Jesse is the Culture Hero, alongside the Astronist characters of Ellena, Oliver, Zara, and Harriet.

Curaçaoan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Curaçao.

Curator - the leader and manager of an Astronist athenium, and typically possesses academic qualifications, and considerable abilities in archiving, librarian, and museum work.

Derivatives

Curatorial

Current Epoch - in Astronist Philosophy, the appellation for the period of the present moment, or the period of time in which the term is referring to.

Current Knowledge - in Astronist Philosophy and omnidoxicology, a very broad appellation pertaining to the present understanding and knowledge that is considered to be grasped by humanity as a whole rather than by individuals, and it is from this that the broadness of the term is derived.

Curriculature - in Astronist Education, the range of subjects available to be studied at Astronist phrontisteries, as part of the Astronist education system's overall curriculum.

Curtail - in an Astronist contextualisation, of an Astronist book, to purposefully reduce in distribution in a certain country, or region within a country.

Derivatives

Curtailing

Curtailed

Curtailment

Curvance - in Astronist Architecture, the structure of bricks, or stones so as to create an upward curve effect, and typically wherever used, acts as the main foundation of the structure of the building, and is thus clearly visible from each side of the building.

Derivatives

Curvancy

Curvances

Curverculum - in Astronist Architecture, a giant picture frame usually found in the art galleries, or museums of Astronist buildings which is fixed into the floor and stands in curvature so as to give the impression of immersion into the painting, or illustration.

Derivatives

Curverculums

Customised Astronism - a type of Astronism in which the language has been changed in order to become more attractive to a certain nation, or demographic of people.

-cussy - in Astronist Terminology as part of wider Astronology, a suffix denoting either an unspoken action, an example of use as gesticussy, or a written work, such as a poem, a piece of music, or novel.

Derivatives

-cussies

Cyanicism - in Astronist Architecture, the style of Astronist building construction characterised by the use of many domes, as well as domes upon domes, and the cyanic colour that the domes are usually painted, and which derives the title of this style.

Derivatives

Cyanic

Cyanical

Cyanically

Cyber - the seventh era in Astronist Mystology, a collection of stories set in a futuristic world dominated by cybernetics and advanced technology and are part of the Astronist Universe, yet not considered canonical.

Derivatives

Cyber Era

Cyberlaw (Cosmos) - an Astronist Subject dealing with the wide-ranging aspects of digital laws on planets and celestial bodies other than on The Earth.

Derivatives

Cosmic Cyberlaw

Cyc - in Astronist Philosophy, the philophon for the discipline of cyclometrics, also known as cycleseology.

Cycles of The Cosmos - in Astronist Philosophy, the appellation for the notion that The Cosmos is entirely created and operative according to cycles and is studied and contemplated within the discipline of cyclometrics.

Cyclical Cosmology - in Astronist Philosophy, a type of cosmos emphasising and centralising on the cycles within The Cosmos as the sole initiators of cosmical function, order, and system.

Cyclicism - in Astronist Philosophy, the belief that cycles are central to all orders, natures, and functionalities in The Cosmos, including The Cosmos itself as a distinct entity.

Derivatives

Cyclicist

Cyclicistic

Cyclicistically

Cyclocentricity - in Astronist Philosophy, understands all cosmologies only according to the centrality of the cycles in occurrence within them.

Derivatives

Damien - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Third Generation, as the daughter of Aryan and Allene, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Damienic

Damnation - in an Astronist contextualisation, a severely hostile entity, especially of a nation towards The People's Constitutional Company of Jesse Millette.

Derivatives

Damnatorial

Danish Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and politics in the Kingdom of Denmark.

Danish Oplysning - the root term for Danish Astronism.

DanoAstronistisation - the specific Astronistisation of Danish society, either in a macro or micro form.

Derivatives

DanoAstronistisationism

Dà Qǐshì'ism - in Astronist Philosophy, a comprehensive form of The Philosophy of Astronism that translates as "Greater Qǐshì" and includes all the forms of Qǐshì'ism present in mainland China, as well as also encompassing those in Macau, Hong Kong, Taiwan, and Mongolia.

Dark Ages - in Astronist Philosophy, especially within epochology, the alternative appellation for the Tenebrian Epoch. See Tenebrian Epoch.

Dark Matter & Dark Energy Philosophical Understanding - in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the forces known as dark matter and dark energy and contemplations surrounding such unknown entities.

Darkmost - in Astronist Philosophy, an adjective used to describe a planet that is furthest away from the star in a star system, and is therefore the darkest of the planets in the system, and is typically paired with the adjective of coldest.

Darkness

- in Astronist Philosophy, one of the Nine Cosmical Elements relating to the occurrence and emissions of darkness in The Cosmos.
- in firmamentology of Astronist Philosophy, one of the three applied filaments, the other two being lightness and luminosity.

Darśana - refers to the meaning of philosophy in Nepali.

Darśanaya - refers to the meaning of philosophy in Sinhala.

Darshan - refers to the meaning of philosophy in Hindi.

Dàshǐ - in Mandarin Chinese, the term given to the ambassadors of The People's Constitutional Company of Jesse Millette.

Dàshǐguǎn - in Mandarin Chinese, the term given to the embassy of The People's Constitutional Company of Jesse Millette in China.

Dash Listing - in Constitutional Terminology, the use of dashes in The Grand Constitution in order to form listations.

Datation - in Astronist Philosophy, on a constatation, the date and time chosen for a philosophical argumentation to begin, and the location whereat it shall take place.

Dation - in Astronist Philosophy, any type of private donation provided to The Institution of The Philosophy of Astronism for its works in the furtherance of The Philosophy of Astronism, but also philosophy in general, as well as astronomy, cosmology, and education.

Daxilij - in Arabic, the term given to describe the domestic relations of The People's Constitutional Company of Jesse Millette.

Dà Xuéshēng - in Mandarin Chinese, the term given to the students of the Astronist Education System, or students attending an Astronist phrontistery.

Dawning - in an Astronist contextualisation, the point at which something first appears, or is realised, especially something unpleasant, or unwanted.

Derivatives

Derivation

- in Astronist Divisionology, the term for a further denomination of a denomination of The Philosophy of Astronism, such as Eastern Qīshì being a derivation of the denomination of Qīshì'ism.
- in Astronist Art, an art movement, or style whose origins, or influence that can be derived from the wider Astronist Art style, or from another movement within Astronist Art.

Derivatives

Derivated

Derivational Text - an appellation and term most commonly ascribed to that of The Grand Centrality in regards to the concept that The Grand Centrality is the central text of The Philosophy of Astronism, but by no means encompasses the entirety of the possibilities and scope of wider Astronist Thought and Philosophy, and therefore perceives The Grand Centrality as a text from which many other branches, schools, denominations, and thought systems and cultures can and shall derivate from, which stands in opposition to the idea that The Grand Centrality is a literal dogmatic work whereby its words are all-encompassing, and all-knowing, which is deemed an intrinsically unphilosophical notion.

Derivation theory - in Astronist Philosophy, the notion that all denominations and derivations of The Philosophy of Astronism hold significance in their interpretation of The Philosophy, even those denominations that are not in alignment with others, and is also known as Inclusive Astronism, the oppositism of which is Exclusive Astronism.

Derivition

- in Equational Philosophy, as part of wider Astronist Philosophy, a sequence of the same equation that is gradually separated into its most basic parts.

- in Astronist Philosophy, a concept, or argument that can be derived from the application of an instrument of study.
- in Astronist Philosophy, that which is derived or originated from something else, especially conceptually.

Derivatives

Derivitions

Derivitional

Déroutement - in Astronist Philosophy, the development of one's own philosophical career through the development of one's own philosophical ideas, theories, and schools.

Derrius - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Derrian

Des - in Astronist Philosophy, the philophon for the discipline of destinology.

Désaccoutumance - in Astronist Philosophy, losing the habit of learning about philosophy; losing the enthusiasm for one's philosophy.

Descendency - in Astronist Architecture, a series of columns in a concentric pattern in a discoidery in which each inward level is followed by a downward step, until the centre is reach where typically an ornate, and usually unique orrery is placed.

Descending Node - in kosmetrics of Astronist Philosophy, the appellation for a type of nodal contemplation relating to a node that faces downwards.

Descension

- the action of gradually lowering to a less important position or a lower level, especially a divine being sent on a mission by The Divine to interact with indivine beings.
- in Astronist Ornamentation, any part of the ornamental pattern or motif which points downwards.

Descriptor Board - in Astronist Civicology, a board found alongside an civicological illustration, typically on either side of the illustration on the terrarum, that holds a description of the illustrated development, and is typically very ornately decorated with Astronist ornamentals.

Desexualise - in an Astronist contextualisation, the extraction of all sexual inferences from an Astronist book, or more generally, an Astronist character representation, typically for cultural or religious assimilative reasons.

Detationists
Detationism
Detationistic
Detational
Detationally

Deterge - of a scholar, philosopher, or ideologist, to cleanse a concept, philosophy, or theory of all its perceived inaccuracies and inconsistencies.

Derivatives

Deterger
Detergee
Detergic
Detergative

Deterrent - in an Astronist contextualisation, a quality, factor, or consequence held by The People's Constitutional Company of Jesse Millette so as to reduce the risk of a hostile entity going ahead with their attempts of attack.

Derivatives

Deterrence
Deterrency
Deterrentive

Detotality - in Astronist Philosophy, especially within totology, a theory of totality holding that The Cosmos has never been in and shall never be in a Totality State due to its dictation by The Universe and its constantly limited naturity by the structure of the Astronist Cosmology.

Detrix - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the daughter of Xenia and Tyrainnius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Detrixian
Detrixic

Deuteragonist - in an Astronist contextualisation, relating to the Astronist character of Ellena as traditionally considered to be the second most important character out of The Five Astronist Characters, succeeding the Astronist character of Jesse as the protagonist.

Derivatives

Deuteragonistic
Deuteragonistical
Deuteragonistically

Deutsche Aufklärung - the root term for German Astronism.

Devant - a philosophy, or philosophical tradition that existed before the founding of The Philosophy of Astronism, and the subsequent Astronist philosophical tradition.

Devanture - collectively relating to all stores and shops that sell Astronist philosophical products, including books, renditions, artpieces, and other types of products.

Developmentation

- in Astronist Philosophy, relating to the entire process of the development of a planetary body.
- in Taylorianology, relating to The Developmentation. See The Developmentation.

Derivatives

Developmentational

Developmentationally

Devinette - in Astronist Architecture, Philosophy, and Rendition, a type of riddle, or puzzle that can take many different forms and variations that can be decrypted in order to reveal a hidden philosophical message, or a philosophical allegory, and is most commonly found embedded into renditions and architectural features.

Derivatives

Devinettes

Dévoiemnt - in Astronist Philosophy, during a philosophical argumentation, the action of leading the argument towards a particular theme or topic of discussion, especially one that was not part of the initial constatation.

Devolvement Season - in Astronist Philosophy, particularly within seasonology, one of the Formational Seasons relating to the instance in which a celestial, especially galaxies, begin to degenerate and degrade ending with its eventual collapse.

Devoter - in Astronist Philosophy, a person that conducts Cosmic Devotions.

Derivatives

Devoters

Devotership

Devotor

Devotors

Devotress

Devotresses

Devotionist

Devotionists

Devotionality - in Astronist Philosophy, a semistrument of study measuring the extent to which someone devotes cosmically, and involves an analysis of the ways in which an individual devotes.

Derivatives

Devotionalities

Devotive - in Astronist Philosophy, relating to the practice of devotion.

Derivatives

Devotively

Devotology - a subdiscipline of occurrology of Astronist Philosophy dealing with the various techniques, philosophies, and practices involved in Cosmic Devotion.

Derivatives

Devotologist

Devotologists

Devotological

Devouratively

Dexort - in Cosmic Art, as a derivation of Astronist Art, the right side of a cosmic art piece.

Derivatives

Dexortial

Dexortic

Dextral - in Astronist Ornamentation, the right side of the perimeter of an ornament.

Dextralised - in Astronist Music, of a piano piece, distinctly dominated and lead by movements in the right hand.

Derivatives

Dextralisation

Dextralism - another term for *Dextral Millë*.

Dextral Millë - in Millë'ism, one part of the binary concept that there exists both life and death, or more broadly existence and non-existence, and specifically relates to the side of life and existence, in direct opposition to death, and non-existence.

Dextral Pole - in kosmetrics of Astronist Philosophy, the appellation for one of the two Galactic Poles, specifically relating to the right extremity of a galaxy rather than the left extremity which is appellated as the Sinistral Pole.

D'hahni - relating to The School of Intellectuality, one of the three schools of Astration.

Dia - derived from the Malagasy language, in Astronist Philosophy, a term relating to either one's individual philosophical journey, or the philosophical development and journey of a group, organisation, or nation state.

Diadem - in Astronist Attire, a type of women's headband that may or may not be cosmically ornamented and is worn to symbolise her superiority, especially over men and other women in a particular meeting, or ceremony.

Diafótisi'ism - also known as Diafótism, the denomination of The Philosophy of Astronism most predominantly found in Cyprus and Greece, and includes the two derivations of Cypriot Astronism and Greek Astronism.

Derivatives

Diafótisi'ist

Diafótism - in Astronist Philosophy, another term for Diafótisi'ism.

Diafótsi - a follower of the Greek and Cypriot denomination of The Philosophy of Astronism, known as Diafótisi'ism.

Derivatives

Diafótses

Diagnosis - in an Astronist contextualisation, the most prominent issue causing business operational failure, or lack of efficiency within a subsidiary of The People's Constitutional Company of Jesse Millette as determined by an analyst.

Diagramology - The specific study of diagrams throughout Astronist visual arts in order to uncover further understandings.

Dialogic education - in Astronist Education, relating to all forms of learning conducted through dialogue, either between the teacher and the student, or between two or more students in dialogue with one another.

Diaphragmic - in introspectics of Astronist Philosophy, relating to the use of the diaphragm in philosophical investigations and contemplations.

Diavòlana - derived from the Malagasy language, in Astronist Philosophy, a term relating to the observance, or the philosophical interpretation and meaning of moonlight.

Diblumasij - in Arabic, the term given to diplomacy, especially the diplomacy conducted by The People's Constitutional Company of Jesse Millette.

Dichotomy - in an Astronist philosophical contextualisation, two or more a schools of thought, branches of knowledge, or denominations within The Philosophy of Astronism which are considered to be opposed, or entirely different from one another.

Derivatives

Dichotomous

Dichotomously

Dichotomic

Dichotomical

Dichotomically

Dichotomy of Will - in orbanology of Astronist Philosophy, the appellation for the notion that there exists two aspects to that of will; the portion of one's actions that are external to the will and the portion that are attributable to it.

Dictative - in Astronist Philosophy, that which holds control, or authority over an entity, or that which is bound to some other's authority.

Derivatives

Dictatively

Dictativity

Dictionarisation - the thorough, and tedious, process undertaken by Brandon Taylorian, to search throughout the dictionary to relate as many words to The People's Constitutional Company of Jesse Millette, and its operations, in order to expand Astronist lexicon, and to ensure that all relevant aspects of terminology, are related to the company, its operations, and the wider Astronist culture.

Didactic Function - in Astronist Propaganda, the belief that the central functionality of propaganda is to educate the people in alignment with the ideals of the implemented philosophy.

Didy - derived from the Malagasy language, in Astronist Philosophy, a term relating to the orderliness of The Cosmos.

Dieaya - in Arabic, the term given to the propaganda, typically the propaganda of The People's Constitutional Company of Jesse Millette.

Diffama - in Astronist Philosophy, to make a philosophy known in one's community and society, and the journey and process of this action.

Derivatives

Diffament

Diffamental

Diffamentality

Diffusionism - a school of thought of The Philosophy of Astronism holding that the importance of the widespread propagation of philosophy is utmost and forefront to philosophy.

Derivatives

Diffusionist

Diffusionistic

Digitalise - in an Astronist contextualisation, the conversion of an Astronist book, or other literatures in a digital format so as to be read, or storage on a digital device.

Derivatives

Digitalisation

Digitalise

Digitalised

Digitalising

Digitaliser

Digitalisee

Digital philosophy - a philosophy that is promulgated over digital platforms only, or exists in its majority in a digital sphere rather than physically, and is especially characteristic of a philosophy that is pre-inaugurated and is in the process of establishing itself.

Digital transmission - in Astronist Philosophy, relating to all of the processes and methods by The Philosophy of Astronism is transmitted via digital platforms.

Dignement - in Astronist Philosophy, relating to concepts of dignity and its many interpretations and applications.

Digressingly - in Astronist Philosophy, an adverb for digressing.

Dilatism - in sentientology of Astronist Philosophy, one of the Astronist Tradition's proposed solutions to the Fermi Paradox, and also known as The Last Civilisation Theory, standing as the opposite of preliminism, characterised by the notion that humanity exists long after the last sentient civilisation became extinct.

Derivatives

Dilatist

Dilatistic

Dilatistical

Dilatistically

Dilettant - in Astronist Philosophy, a person that doesn't regularly concern themselves with philosophical, or theological matters, or doesn't hold a large amount of knowledge about such topics; it may or may not be used as a derogatory term or to demonstrate inferiority.

Derivatives

Dilettantry

Dilettancy

Dilettante

Dilettantes

Dilettantism

Dilettantist

Dilettanti

Dilettantish

Dimensionality - in Astronist Philosophy, an instrument of study measuring and contemplating a dimension of existence but also relating to the three dimensions of The Cosmos known as zenithence, nadence, and infinence.

Derivatives

Dimensionalities

Dimensionisation - in Astronist Ornamentation, the creation of patterns in three-dimension with the use of shading.

Diminishment - in Astronist Philosophy, officially appellated as the Perimetrical Collapse, the process by which something diminishes, either physically, or conceptually, but especially in relation to the cosmical periphery.

Dimitto - in Astronist Philosophy, during a philosophical argumentation, the ending stage of the debate wherein the debaters break up and leave.

Dinorah - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Dinoran

Dinoranic

Diplomatism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that all conflicts and relations should be resolved and established respectively in an official and formal diplomatic setting, and that all diplomacy and negotiation should be championed as the forefront method of interrelation between corporations, and countries.

Diplomatology - an Astronist Subject dealing with the study of diplomats of The People's Constitutional Company of Jesse Millette.

Derivatives

Diplomatologist

Diplomatologic

Diplomatological

Diplomatologically

Dìqíú - in Mandarin Chinese, the term given to the concept of The Earth, especially in Chinese Astronist philosophy, and in Cosmic philosophy.

Directionalism - a school of thought of The Philosophy of Astronism that focuses itself on the importance of direction, especially in relation to progression, and orientation.

Derivatives

Directionalist

Directionalistic

Directionlessly - in Astronist Philosophy, to be directionless in action, or function, typically due to a lack of purpose.

Director - in an Astronist contextualisation, in The People's Constitutional Company of Jesse Millette, the rank of employee above a manager whom typically runs a subsidiary of the Company, and is the lowest rank of executive within the governing body of the Company, and should be present at all directorial summits.

Derivatives

Directorial

Directorship

Directorate

Dírén - in Mandarin Chinese, the term given to the concept of "Enemy of the Company", or a hostile entity towards The People's Constitutional Company of Jesse Millette.

Disacknowledgement - to knowingly disregard or ignore that which exists as the reality, especially of a person's dreams and ambitions, or their true intentions for something. Cometan coined this term in 2019 as he repeatedly encountered a range of different people whom he would tell his ambitions to yet they would completely his dreams.

Disacknowledged
Disacknowledger
Disacknowledging

Disarticulate - in Astronist Philosophy, the instance in which a debater interrupts the explanation of another debater's logical argument, especially with a logical counterargument.

Derivatives

Disarticulation
Disarticulating
Disarticulated
Disarticulative
Disarticulatively

Disassociate

- in an Astronist contextualisation, the official action and process wherein The People's Constitutional Company of Jesse Millette distances itself from, and avoids all contact with, an individual, an organisation, or a country due to some hostile, unconstitutional, or illegal behaviour.
- in Astronist Philosophy, of a celestial, to remove itself from the presence of or association with another celestial.

Derivatives

Disassociator
Disassociation
Disassociatee
Disassociative
Disassociatively

Disattachment - in Astronist Philosophy, to hold a distinct disassociation from something else, typically due to its negative affects upon the entity in question.

Disavow - in an Astronist contextualisation, an action undertaken by an executive, or by The People's Constitutional Company of Jesse Millette itself, wherein they deny any responsibility for an illegal action that has been committed, usually due to being unknown to the Company, or the executive.

Derivatives

Disavow
Disavowed
Disavowing
Disavower

Disband - in an Astronist contextualisation, the breaking up of an Astronist organisation, or charity.

Derivatives

Disbandment
Disbandation

Disciplinarian - in Astronist Philosophy, an individual that holds adequate knowledge on either all, or many of the disciplines of Astronist Philosophy, but doesn't hold that which can be described as an in-depth knowledge on any of the disciplines.

Disciplinarity - in Astronist Philosophy, the state and fact in which a concept, or group of concepts is organised into a discipline of study.

Derivatives

Disciplinarity

Disciplinise - in Astronist Philosophy, to form a discipline out of a topic, concept, or theory, an example of which is the formation of the discipline of sentientology from the concept of sentience.

Derivatives

Disciplinising

Disciplinised

Disciplination

Disciplinative

Disciplinational

Discipliniser

Disciplinism - a branch of study in Astronist Philosophy dealing with the study and contemplation of the various different disciplines and subdisciplines of The Philosophy of Astronism and the way in which they are organised.

Derivatives

Disciplinist

Discment - a term of Orrology, the part of an orrery pertaining to the rings most commonly built as the corum, and typically displays notions of astrology, alignment, or some other type of message.

Derivatives

Discments

Discoidery - in Astronist Architecture, a room in an Astronist building, typically a Grand Observatory, or an Eidouranium, in which a descendency can be found.

Derivatives

Discoideries

Disconjoin - in Astronist Philosophy, that which does not function when in association with or in proximation to something in particular.

Derivatives

Disconjoined

Disconjointed

Disconjointly

Disconjunction - in Astronist Philosophy, a distinct disassociation with something that is to be traditionally associated with, either physically or conceptually.

Disconnective - in Astronist Philosophy, that which is disconnected from another, especially in the context of one celestial and its relationship and interactivity with another celestial.

Derivatives

Disconnectively
Disconnectivity

Disconnexion

- in Astronist Philosophy, the term ascribed to the process by which a philosophical, or religious institution loses its identity, purpose, or relevancy due to a change in society, the prevalence of new laws, cultural shifts, or political revolutions.
- in Astronist Philosophy, in the context of individuals, the instance in which an individual loses their connection with their affiliated religious, or philosophical institutions due to the values, principles, philosophies, and addresses of the institution not aligning with the current stance of wider society, the current political climate, or the current cultural shift.

Derivatives

Disconnexionism

Disconnexions

Disconsociation - in Equational Philosophy, as part of wider Astronist Philosophy, the inability for an equation to be rearranged and still produce a logical expression.

Derivatives

Disconsociate

Disconsociative

Disconsociatively

Disconsociational

Discordance - in an Astronist contextualisation, the state in which no agreement has been made by the end of a congressional, counciloral, directorial, or managerial session, or meeting.

Derivatives

Discord

Discordancy

Discordation

Discourse - in Astronist philosophy, the short pieces of written that discuss one particular concept or theory, and are the most abundant elements within The Grand Centrality of The Philosophy of Astronism that structure articles and are typically distinguished by page breaks, or dashes.

Derivatives

Discourses

Discoursal

Discovery - in Astronist Education, a method of teaching whereby the educator constructs a lesson during which students are set on a course to discover knowledge and information for themselves, as opposed to being instructed and told of such knowledge by their teacher.

Discoverment - in Astronist Philosophy, the third of the three components of The Philosopher's Cosmos emphasising the importance of discovery, and is preceded by witnessment and experiment respectively.

Derivatives

Discoverments

Discrepancy - in an Astronist contextualisation, a type of disagreement in an Astronist congressional session wherein just two parties disagree, yet all others agree on a topic.

Derivatives

Discrepant

Disenthrall - in Astronist Literature, Philosophy, and Culture, to set someone or some idea, or concept, free.

Derivatives

Disenthrallment

Disenthraller

Disenthrallation

Disenthralling

Disentitise - in Equational Philosophy, as part of wider Astronist Philosophy, the ammentation of removing the reference of entities from a particular subment.

Disexangenosity

Disexist - in Astronist Philosophy, that which does not presently exist, but has the potentiality to exist.

Derivatives

Disexistent

Disexistence

Disflow - in Astronist Philosophy, that which is out of sync with the cosmical orderity and system.

Derivatives

Disflowness

Disfunctionality - in Astronist Philosophy, the instance or quality of being disfunctional, especially of a celestial entity.

Dishabituational - in Astronist Philosophy, the instance in which a new philosophical concept or theory is introduced, accepted, and disseminated but results in a portion of its adherents to become confused and to experience a diminishment of their association with the philosophy.

Derivatives

Dishabituational

Dishabituated

Disimnemnic - in Astronist Philosophy, of a philosophical concept or notion, that which does not align with current scientific or empirical knowledge.

Derivatives

Disimnemnic

Disimnemnicly

Disimnemnicity - in Astronist Philosophy, the comparative instrument of study to imnemnicity measuring the extent to which a philosophical concept or notion does not align with current scientific and empirical knowledge.

Derivatives

Disimnemnicities

Disimnemnicence

Disimnemnicency

Disincentivise - in an Astronist contextualisation, construct certain qualities so as to become unattractive to a certain individual, or group.

Derivatives

Disincentivisation

Disincentivisational

Disincentiviser

Disincentivisee

Disinclusive - a discipline of study within Astronist Philosophy that is not categorised within the umbrella of an inclusive discipline, typically due to the fact that the discipline is either so wide in breadth that it cannot be categorised within an inclusive discipline, or that no inclusive discipline specifically encompasses the subject that the disinclusive discipline addresses.

Derivatives

Disinclusivise

Disinclusivised

Disinclusivisation

Disinclusivising

Disinclusivity

Disincorporate - in an Astronist contextualisation, the official action and typically long and complex process of disentangling a subsidiary of The People's Constitutional Company of Jesse Millette, usually so that it can be sold on.

Derivatives

Disincorporation
Disincorporator
Disincorporatee
Disincorporational

Disinfer - in Astronist Philosophy, without need nor want to make an inference to something in particular; to avoid inferring something.

Derivatives

Disinferring
Disinferred
Disinference

Disinvest - in an Astronist contextualisation, the official action undertaken by The People's Constitutional Company of Jesse Millette wherein a subsidiary, or a certain project, or campaign loses its investment from the wider Company, typically due to falling sales, or it is found to be acting unconstitutionally.

Derivatives

Disinvestment
Disinvestor
Disinvestee

Disownity

Dispensation - in an Astronist contextualisation, of an executive, director, or manager of The People's Constitutional Company of Jesse Millette, being constitutionally exempt from certain rules, or usual requirements.

Derivatives

Dispensator

Dispensatee

Dispensational

Dispersion - in Astronist Civicology, the type of planning theory and design that preferences a dispersive pattern for a city, or town.

Dispersion Season - in Astronist Philosophy, particularly within seasonology, one of the Formational Seasons pertaining to the instance in which elements of a celestial disperse in order to begin to form its recognisable shape, an example of which is when star systems in a young galaxy disperse to create the galactic disc.

Dispersive Cosmology - in Astronist Philosophy, a type of cosmos that focuses on the dispersive natures and occurrences in The Cosmos, especially as a means to suggest their centrality in overall cosmical function, order, and nature.

Disphilosophical

- of an individual, especially in Philosophical Demography, not associative of any philosophy, either due to disinterest, or for some religious reason.
- in Astronist Philosophy, that which is considered to be anything opposite, or contrary to The Philosophy of Astronism, especially a concept, or theory.

Derivatives

Disphilosophy

Disphilosophically

Disphilosophicality

Dispositionism - a school of thought of The Philosophy of Astronism characterised by the belief in the tendency of humanity to yearn for progression, knowledge, and for the understanding of The Cosmos, and claims that this is the disposition of humanity.

Derivatives

Dispositionist

Dispositionistic

Disproxemia - in Spacial Psychology of Astronist Philosophy, the state in which a human being has neither lived on The Earth nor were born on The Earth.

Derivatives

Disproxemian

Disproxemians

Disproximate - in Astronist Philosophy, that which is furthest in relationship or interactivity; disconnected and disassociation either physically or conceptually.

Derivatives

Disproximity

Disproximated

Disproximately

Disproximation

Disproximational

Disputation - in an Astronist contextualisation, the formation of an civilised, well-balanced, and logical argument founded upon reason and evidence, made during an Astronist congressional session.

Derivatives

Disputational

Disputator

Disputatee

Disquisition

- in Astronist philosophy, relating to one of the twelve principles of The Philosophy of Astronism in their organised and written formats; these structure the entire Grand Centrality and within which consist of articles, and within articles, exist discourses.
- in an Astronist contextualisation, a long theoretical essay, usually only read by scholars, on a precise subject of Astronist origin, or relevance.

Derivatives

Disquisitional

Disquisitioner

Disseminable - in Astronist Philosophy, the quality of a philosophy being able to be easily disseminated.

Derivatives

Disseminability

Dissemination - in Astronist Education, the process of spreading and implementing a teaching method, or learning practice throughout a large amount of phrontisteries, especially after it has been proven to be an effective method.

Dissension - in an Astronist contextualisation, the point during a debate just preceding the discordation.

Dissertation - the official action whereby an individual publicly holds an expression, or opinion, especially so during an Astronist congressional session, that is at variance, or open opposition to the constitutionality of The People's Constitutional Company of Jesse Millette.

Derivatives

Dissentment

Dissentational

Dissenter

Dissever - in an Astronist contextualisation, during the breakdown of a subsidiary, or organisation of The People's Constitutional Company of Jesse Millette, the attempt of the Company to divide it up and save functioning parts before completely severed forever.

Derivatives

Disseverment

Disseveration

Disseverer

Disseveree

Disseverance

Distality - in Astronist Philosophy, the measurement of the extent to which a concept is proximate to being central to wider theory, but is not necessarily fundamental.

Derivatives

Distalities

Distance learning - in Astronist Education, studying in the Astronist education system, without physically attending a phrontistery, especially when conducted at home, or at a public place such as a library, and is usually undertaken because of the lack of a phrontistery in one's town, or city.

Distantiate - in an Astronist contextualisation, purposefully keeping something at a distance from The People's Constitutional Company of Jesse Millette due to its bad reputation.

Derivatives

Distantiation

Distantiator

Distantiatee

Distantiational

Distantmost - in Astronist Philosophy, in a physical sense, celestial entities which are considered distant in terms of cosmic distances, and in an abstract sense, a concept or theory that is furthest from established ideas, or the ideas of normality, or mass public knowledge, or adherence.

Distenism - in sentientology of Astronist Philosophy, one of the proposed solutions to the Fermi Paradox characterised by the notion that the expansion of a sentient civilisation will inevitably lead to its collapse, and is known as the Sustainability Solution outside of an Astronist context.

Derivatives

Distenist

Distenistic
Distenistically

Distinctful - in Astronist Philosophy, that which is distinguished, or recognisable in nature from something similar.

Derivatives

Distinctfully

Distinguishment - in Astronist Philosophy, to make a distinction about something.

Derivatives

Distinguishments

Distortive - in Astronist Philosophy, that which holds the tendency to distort something else.

Derivatives

Distortively

Distradition - in Astronist Philosophy, that which stands in opposition or as an obstacle to the principles, beliefs, prophecies, or concepts held within the Astronist Tradition, or in Astronist Orthodoxy.

Derivatives

Distraditional

Distraditionally

Distraditionality

Distraditionism - in Astronist Philosophy, the belief and school of thought pertaining that departing from the principles of a philosophy is the best way to challenge and eventually improve it when faced with actual opposition, and therefore supports notions of distradition towards the Astronist Tradition itself.

Derivatives

Distraditionist

Distraditionistic

Distraditionistically

Distrajecture - in Astronist Philosophy, the opposite to trajectory, the instance in which a concept holds no direction, or any particular route, or thoughtpath.

Disunion - in an Astronist contextualisation, the dissolving of a union between two subsidiaries, or groups of people.

Derivatives

Disunionise

Disunionisation

Disunionised

Disunionising

Dittology - in Astronist Philosophy, an Astronist Subject dealing with a twofold interpretation of an Astronist text, especially a philosophical text.

Derivatives

Dittologic

Dittological
Dittologically
Dittologist

Diur - in Astronist Philosophy, a person that is generally active during the date and rests at night, characteristic of the majority of human beings in comparison to those whom are nocts. Diurs whom do not spend time outside at night, especially in a cosmic devotional or observational context, are said to harbour a great ignorance of The Cosmos according to the Astronist Tradition.

Derivatives

Diurs
Diuric
Diurical
Diurically
Diuricity
Diurism

Diurnalism - in Astronist Propaganda, the depiction in a propaganda piece of daytime, or the background, signpost, or event occurring during the day, especially midday.

Derivatives

Diurnal

Diurocentric - in Astronist Philosophy, regarding daytime to be the most important time above that of nighttime and exists as the foundation to the lifestyle of diurism which the majority of human civilisation of The Earth adheres to, as well as existing as the basis for the orienting of society towards functioning more during the day than at nighttime. Contrast with nyctocentric.

Derivatives

Diurocentricity
Diurocentrical
Diurocentrically
Diurocentrism
Diurocentrist

Div - in Astronist Philosophy, the philophon for the discipline of divinology.

Divagate - in an Astronist contextualisation, straying or digressing from Astronist constitutionality.

Derivatives

Divagation
Divagator
Divagatee
Divagational

Divaricate - in an Astronist contextualisation, the distancing of a subsidiary from The People's Constitutional Company of Jesse Millette, especially during a public relations crisis, or may be due to the subsidiary's difference of opinion, or during a disputation between the Company and the subsidiary.

Derivatives

Divarication
Divaricational

Dive - in Astronist Philosophy, the philophon for the discipline of divergetology.

Divergetology - in Astronist Cosmology, and as part of Astronist Philosophy, specifically Cosmic Philosophy, and also known as The Divergency of Existence, the study and philosophical discussion of the theorised dimension in which everything that exists has its own unique origination, thus disregarding the homogeneity in origin from The Universe's beginning.

Derivatives

Divergetologist

Divergetological

Divergetologically

Diversement - in Astronist Philosophy, a philosophical concept that can be interpreted in a multitude of different ways.

Diversify - in an Astronist contextualisation, the process of a subsidiary, or another business of The People's Constitutional Company of Jesse Millette spreading into different areas of operations, or industries.

Derivatives

Diversification

Diversifier

Diversiffee

Diversity of Sentience - in sentientology of Astronist Philosophy, the appellation for the notion that there exists a much greater variety of sentient life than simply just human beings, and that both humanoid and non-humanoid species exist in The Cosmos.

Divertissement - collectively relating to the variety of rooms, activities, and practices available inside and outside Astronist philosophical buildings that are used as and considered to be forms of entertainment, the majority of which have an educational or philosophical theme.

Divine

- the degree to which an entity possesses a connection to the creator of The Universe.
- an entity which possesses an indefinite, yet existential, connection to The Divine.
- the all-encompassing quality of being all-knowing, all-creating, and all-seeing of all-time and all-space and all-existence in every dimension.
- in Astronist Philosophy, one of the Nine Cosmical Elements relating to all that exists beyond both cosmic and chaotic existences, and is therefore transcendent beyond all of the other Nine Cosmical Elements.

Divine (colour) - a radiant, and overwhelming colour of light, typically most whitest at its core and less bright on its outer edges, and is mostly associated with the element of Divine.

Divine Contomplance - in Astronist Philosophy, the appellation for the notion that all cycles hold some divinity in their naturities, but such divine qualities remain invisible for any entity that is less than divine in nature.

Divine Cycles - in Astronist Philosophy, a type of cycle propounded within cyclometrics relating to the cycles associated with The Divine.

Divine Day - in The Grand Astronist Calendar, a day of commemoration and celebration dedicated to the specific wonderment, adoration, and laudation of that which is known as The Divine in Astronist Philosophy, and is characterised by decorations of depictions of what The Divine could be like, and special lectures and education events at Astronist philosophical buildings that focus on the subject of The Divine from an Astronist philosophical perspective. This always takes place on 4th Ellenine, which translates to the 6th April in the Gregorian calendar.

Divine Ellena - the fictional character, Ellena Chadwell, represented in Divine form.

Divine End - in Astronist Philosophy, the concept in Creation Theory that if The Divine is responsible for the creation of The Cosmos and The Universe, then The Divine is equally responsible and capable of ending both The Cosmos and The Universe.

Divine Epochology - in Astronist Philosophy, one of the three main branches of the discipline of epochology dealing with The Divine in relation to time.

Divine Harriet - the fictional character, Harriet Millette, represented in Divine form.

Divine Inconnesence - in Astronist Philosophy, an appellation within the discipline of cyclometrics maintaining that all Divine Cycles are separate from those of a cosmical, or a universal nature and so much so that they have no direct interaction with cosmical, or universal cycles.

Divine Jesse - the fictional character, Jesse Millette, represented in Divine form.

Divine Jurisdiction - in Astronist Philosophy, the appellation for the notion of the extent of the authority of The Divine, and typically reigns over all of existence.

Divineless - in Astronist Philosophy, to be without any connection, or resemblance to The Divine.

Derivatives

Divinelessness

Divineliness - in Astronist Philosophy, to be as The Divine in nature, characteristic, or to have certainly originated from The Divine.

Divine Oliver - the fictional character, Oliver Mehler, represented in Divine form.

Divine Perimeter - in perimetrics of Astronist Philosophy, the appellation for the concept that the cosmical periphery holds a Divine naturity rather than that of a universal or cosmical one.

Divine Plan - in Astronist Philosophy, the appellation for the notion that there exists a distinct schema and schedule planned for The Cosmos and its progeny and even The Universe by that which is known as The Divine in the Astronist Cosmology.

Divine Product - in Astronist Philosophy, the appellation for the concept that everything in The Cosmos, including The Cosmos itself, is a product of The Divine, and that there is a hierarchy based

upon an entity's proximity to The Divine in this hierarchy, and is closely associated with the concept of The Hierarchy of The Cosmos.

Divine Ultimation - in Astronist Philosophy, the notion in epochology that The Divine will be directly involved in the ending sequences of both The Cosmos and The Universe.

Divine Will - in Astronist Philosophy, that which has been commanded to occur, or to form by Divine means, or from Divine origination, or a belief in the role that The Divine plays in the concept of destiny.

Divine Zara - the fictional character, Zara Litchford, represented in Divine form.

Divinical Fusionism - in Astronist Philosophy, an extension from Universal Fusionism including The Divine to that paradigm and thus holds that all three of these distinct entities are currently in separation from one another, but are inevitably going to form together as one.

Divinical Sphere - in introspectics of Astronist Philosophy, the appellation for the introspection classification denoting an introspection which is divine by its nature and context.

Divinical Studies - in Astronist Philosophy, a major branch of study, also known Theological Studies, dealing with the nature of The Divine in the Astronist Cosmology, and the nature of divinity.

Divinical Totality - in Astronist Philosophy, especially in totology, a type of cosmos focused on The Divine as the ultimate one totality.

Divinism - a branch of knowledge in The Philosophy of Astronism concerning the study of the nature, circumstance, and existence of The Divine, especially when placed in relation to The Cosmos, The Universe, and all the possibilities of The Universe, including multiverse, multiple dimensions, and the mysteries of certain celestial entities.

Ellenarian-Egyptian Character Representation - the specific representation of the Astronist character of Ellena in Egypt, including all its variations.

Ellenarian-Emirati Character Representation - the specific representation of the Astronist character of Ellena in the United Arab Emirates, including all its variations.

Ellenarian-Equatorial Guinean Character Representation - the specific representation of the Astronist character of Ellena in Equatorial Guinea, including all its variations.

Ellenarian-Eritrean Character Representation - the specific representation of the Astronist character of Ellena in Eritrea, including all its variations.

Ellenarian-Estonian Character Representation - the specific representation of the Astronist character of Ellena in Estonia, including all its variations.

Ellenarian-Ethiopian Character Representation - the specific representation of the Astronist character of Ellena in Ethiopia, including all its variations.

Ellenarian-Falkland Islands Character Representation - the specific representation of the Astronist character of Ellena in the Falkland Islands, including all its variations.

Ellenarian-Faroese Character Representation - the specific representation of the Astronist character of Ellena in the Faroe Islands, including all its variations.

Ellenarian-Fijian Character Representation - the specific representation of the Astronist character of Ellena in Fiji, including all its variations.

Ellenarian-Filipino Character Representation - the specific representation of the Astronist character of Ellena in the Philippines, including all its variations.

Ellenarian-Finnish Character Representation - the specific representation of the Astronist character of Ellena in Finland, including all its variations.

Ellenarian-French Guianese Character Representation - the specific representation of the Astronist character of Ellena in French Guiana, including all its variations.

Ellenarian-French Character Representation - the specific representation of the Astronist character of Ellena in France, including all its variations.

Ellenarian-French Polynesian Character Representation - the specific representation of the Astronist character of Ellena in French Polynesia, including all its variations.

Ellenarian-Gabonese Character Representation - the specific representation of the Astronist character of Ellena in Gabon, including all its variations.

Ellenarian-Gambian Character Representation - the specific representation of the Astronist character of Ellena in the Gambia, including all its variations.

Ellenarian-Georgian Character Representation - the specific representation of the Astronist character of Ellena in Georgia, including all its variations.

Ellenarian-German Character Representation - the specific representation of the Astronist character of Ellena in Germany, including all its variations.

Ellenarian-Ghanaian Character Representation - the specific representation of the Astronist character of Ellena in Ghana, including all its variations.

Ellenarian-Greek Character Representation - the specific representation of the Astronist character of Ellena in Greece, including all its variations.

Ellenarian-Greenlandic Character Representation - the specific representation of the Astronist character of Ellena in Greenland, including all its variations.

Ellenarian-Grenadian Character Representation - the specific representation of the Astronist character of Ellena in Grenada, including all its variations.

Ellenarian-Guamanian Character Representation - the specific representation of the Astronist character of Ellena in Guam, including all its variations.

Ellenarian-Guatemalan Character Representation - the specific representation of the Astronist character of Ellena in Guatemala, including all its variations.

Ellenarian-Guinean Character Representation - the specific representation of the Astronist character of Ellena in Guinea, including all its variations.

Ellenarian-Guyanese Character Representation - the specific representation of the Astronist character of Ellena in Guyana, including all its variations.

Ellenarian-Haitian Character Representation - the specific representation of the Astronist character of Ellena in Haiti, including all its variations.

Ellenarian-Honduran Character Representation - the specific representation of the Astronist character of Ellena in Honduras, including all its variations.

Ellenarian-Hong Kongese Character Representation - the specific representation of the Astronist character of Ellena in Hong Kong, including all its variations.

Ellenarian-Hungarian Character Representation - the specific representation of the Astronist character of Ellena in Hungary, including all its variations.

Ellenarian-Icelandic Character Representation - the specific representation of the Astronist character of Ellena in Iceland, including all its variations.

Ellenarian-Indian Character Representation - the specific representation of the Astronist character of Ellena in India, including all its variations.

Ellenarian-Indonesian Character Representation - the specific representation of the Astronist character of Ellena in Indonesia, including all its variations.

Ellenarian-Iranian Character Representation - the specific representation of the Astronist character of Ellena in Iran, including all its variations.

Ellenarian-Iraqi Character Representation - the specific representation of the Astronist character of Ellena in Iraq, including all its variations.

Ellenarian-Irish Character Representation - the specific representation of the Astronist character of Ellena in Ireland, including all its variations.

Ellenarian-Israeli Character Representation - the specific representation of the Astronist character of Ellena in Israel, including all its variations.

Ellenarian-Italian Character Representation - the specific representation of the Astronist character of Ellena in Italy, including all its variations.

Ellenarian-Ivorian Character Representation - the specific representation of the Astronist character of Ellena in the Ivory Coast, including all its variations.

Ellenarian-Jamaican Character Representation - the specific representation of the Astronist character of Ellena in Jamaica, including all its variations.

Ellenarian-Japanese Character Representation - the specific representation of the Astronist character of Ellena in Japan, including all its variations.

Ellenarian-Jordanian Character Representation - the specific representation of the Astronist character of Ellena in Jordan, including all its variations.

Ellenarian-Kazakh Character Representation - the specific representation of the Astronist character of Ellena in Kazakhstan, including all its variations.

Ellenarian-Kenyan Character Representation - the specific representation of the Astronist character of Ellena in Kenya, including all its variations.

Ellenarian-Kiribati Character Representation - the specific representation of the Astronist character of Ellena in Kiribati, including all its variations.

Ellenarian-Kittitian-Nevisian Character Representation - the specific representation of the Astronist character of Ellena in Saint Kitts and Nevis, including all its variations.

Ellenarian-Korean Character Representation - the specific representation of the Astronist character of Ellena in Korea, including all its variations.

Ellenarian-Kosovar Character Representation - the specific representation of the Astronist character of Ellena in Kosovo, including all its variations.

Ellenarian-Kurdish Character Representation - the specific representation of the Astronist character of Ellena in the Kurdish populated regions, including all its variations.

Ellenarian-Kuwaiti Character Representation - the specific representation of the Astronist character of Ellena in Kuwait, including all its variations.

Ellenarian-Kyrgyz Character Representation - the specific representation of the Astronist character of Ellena in Kyrgyzstan, including all its variations.

Ellenarian-Laotian Character Representation - the specific representation of the Astronist character of Ellena in Laos, including all its variations.

Ellenarian-Latvian Character Representation - the specific representation of the Astronist character of Ellena in Latvia, including all its variations.

Ellenarian-Lebanese Character Representation - the specific representation of the Astronist character of Ellena in Finland, including all its variations.

Ellenarian-Liberian Character Representation - the specific representation of the Astronist character of Ellena in Liberia, including all its variations.

Ellenarian-Libyan Character Representation - the specific representation of the Astronist character of Ellena in Libya, including all its variations.

Ellenarian-Liechtenstein Character Representation - the specific representation of the Astronist character of Ellena in Liechtenstein, including all its variations.

Ellenarian-Lithuanian Character Representation - the specific representation of the Astronist character of Ellena in Lithuania, including all its variations.

Ellenarian-Luxembourgish Character Representation - the specific representation of the Astronist character of Ellena in Luxembourg, including all its variations.

Ellenarian-Macanese Character Representation - the specific representation of the Astronist character of Ellena in Macau, including all its variations.

Ellenarian-Macedonian Character Representation - the specific representation of the Astronist character of Ellena in Macedonia, including all its variations.

Ellenarian-Malagasy Character Representation - the specific representation of the Astronist character of Ellena in Madagascar, including all its variations.

Ellenarian-Malawian Character Representation - the specific representation of the Astronist character of Ellena in Malawi, including all its variations.

Ellenarian-Malaysian Character Representation - the specific representation of the Astronist character of Ellena in Malaysia, including all its variations.

Ellenarian-Maldivian Character Representation - the specific representation of the Astronist character of Ellena in the Maldives, including all its variations.

Ellenarian-Malian Character Representation - the specific representation of the Astronist character of Ellena in Mali, including all its variations.

Ellenarian-Maltese Character Representation - the specific representation of the Astronist character of Ellena in Malta, including all its variations.

Ellenarian-Manx Character Representation - the specific representation of the Astronist character of Ellena on the Isle of Man, including all its variations.

Ellenarian-Marshallese Character Representation - the specific representation of the Astronist character of Ellena in the Marshall Islands, including all its variations.

Ellenarian-Martinican Character Representation - the specific representation of the Astronist character of Ellena in Martinique, including all its variations.

Ellenarian-Mauritanian Character Representation - the specific representation of the Astronist character of Ellena in Mauritania, including all its variations.

Ellenarian-Mauritian Character Representation - the specific representation of the Astronist character of Ellena in Mauritius, including all its variations.

Ellenarian-Mahoran Character Representation - the specific representation of the Astronist character of Ellena in Mayotte, including all its variations.

Ellenarian-Mexican Character Representation - the specific representation of the Astronist character of Ellena in Mexico, including all its variations.

Ellenarian-Micronesian Character Representation - the specific representation of the Astronist character of Ellena in Micronesia, including all its variations.

Ellenarian-Moldovan Character Representation - the specific representation of the Astronist character of Ellena in Moldova, including all its variations.

Ellenarian-Monacan Character Representation - the specific representation of the Astronist character of Ellena in Monaco, including all its variations.

Ellenarian-Mongolian Character Representation - the specific representation of the Astronist character of Ellena in Mongolia, including all its variations.

Ellenarian-Montenegrin Character Representation - the specific representation of the Astronist character of Ellena in Montenegro, including all its variations.

Ellenarian-Montserratian Character Representation - the specific representation of the Astronist character of Ellena in Montserrat, including all its variations.

Ellenarian-Moroccan Character Representation - the specific representation of the Astronist character of Ellena in Morocco, including all its variations.

Ellenarian-Mozambican Character Representation - the specific representation of the Astronist character of Ellena in Mozambique, including all its variations.

Ellenarian-Namibian Character Representation - the specific representation of the Astronist character of Ellena in Namibia, including all its variations.

Ellenarian-Nauruan Character Representation - the specific representation of the Astronist character of Ellena in Nauru, including all its variations.

Ellenarian-Nepalese Character Representation - the specific representation of the Astronist character of Ellena in Nepal, including all its variations.

Ellenarian-New Caledonian Character Representation - the specific representation of the Astronist character of Ellena in New Caledonia, including all its variations.

Ellenarian-New Zealand Character Representation - the specific representation of the Astronist character of Ellena in New Zealand, including all its variations.

Ellenarian-Nicaraguan Character Representation - the specific representation of the Astronist character of Ellena in Nicaragua, including all its variations.

Ellenarian-Nigerien Character Representation - the specific representation of the Astronist character of Ellena in Niger, including all its variations.

Ellenarian-Nigerian Character Representation - the specific representation of the Astronist character of Ellena in Nigeria, including all its variations.

Ellenarian-Niuean Character Representation - the specific representation of the Astronist character of Ellena in Niue, including all its variations.

Ellenarian-Norwegian Character Representation - the specific representation of the Astronist character of Ellena in Norway, including all its variations.

Ellenarian-Omani Character Representation - the specific representation of the Astronist character of Ellena in Oman, including all its variations.

Ellenarian-Pakistani Character Representation - the specific representation of the Astronist character of Ellena in Pakistan, including all its variations.

Ellenarian-Palauan Character Representation - the specific representation of the Astronist character of Ellena in Palau, including all its variations.

Ellenarian-Palestinian Character Representation - the specific representation of the Astronist character of Ellena in Palestine, including all its variations.

Ellenarian-Panamanian Character Representation - the specific representation of the Astronist character of Ellena in Panama, including all its variations.

Ellenarian-Papua New Guinean Character Representation - the specific representation of the Astronist character of Ellena in Papua New Guinea, including all its variations.

Ellenarian-Paraguayan Character Representation - the specific representation of the Astronist character of Ellena in Paraguay, including all its variations.

Ellenarian-Peruvian Character Representation - the specific representation of the Astronist character of Ellena in Peru, including all its variations.

Ellenarian-Polish Character Representation - the specific representation of the Astronist character of Ellena in Poland, including all its variations.

Ellenarian-Portuguese Character Representation - the specific representation of the Astronist character of Ellena in Portugal, including all its variations.

Ellenarian-Puerto Rican Character Representation - the specific representation of the Astronist character of Ellena in Puerto Rico, including all its variations.

Ellenarian-Qatari Character Representation - the specific representation of the Astronist character of Ellena in Qatar, including all its variations.

Ellenarian-Réunionese Character Representation - the specific representation of the Astronist character of Ellena in Réunion, including all its variations.

Ellenarian-Romanian Character Representation - the specific representation of the Astronist character of Ellena in Romania, including all its variations.

Ellenarian-Russian Character Representation - the specific representation of the Astronist character of Ellena in Russia, including all its variations.

Ellenarian-Rwandan Character Representation - the specific representation of the Astronist character of Ellena in Rwanda, including all its variations.

Ellenarian-Saint Helenian Character Representation - the specific representation of the Astronist character of Ellena in Saint Helena, including all its variations.

Ellenarian-Saint Lucian Character Representation - the specific representation of the Astronist character of Ellena in Saint Lucia, including all its variations.

Ellenarian-Saint Martinian Character Representation - the specific representation of the Astronist character of Ellena in Saint Martinique, including all its variations.

Ellenarian-Salvadoran Character Representation - the specific representation of the Astronist character of Ellena in El Salvador, including all its variations.

Ellenarian-Samoan Character Representation - the specific representation of the Astronist character of Ellena in Samoa, including all its variations.

Ellenarian-Sammarinese Character Representation - the specific representation of the Astronist character of Ellena in San Marino, including all its variations.

Ellenarian-São Toméan Character Representation - the specific representation of the Astronist character of Ellena in São Tomé and Príncipe, including all its variations.

Ellenarian-Saudi Arabian Character Representation - the specific representation of the Astronist character of Ellena in Saudi Arabia, including all its variations.

Ellenarian-Senegalese Character Representation - the specific representation of the Astronist character of Ellena in Senegal, including all its variations.

Ellenarian-Serbian Character Representation - the specific representation of the Astronist character of Ellena in Serbia, including all its variations.

Ellenarian-Seychellois Character Representation - the specific representation of the Astronist character of Ellena in the Seychelles, including all its variations.

Ellenarian-Sierra Leonean Character Representation -the specific representation of the Astronist character of Ellena in Sierra Leone, including all its variations.

Ellenarian-Singaporean Character Representation - the specific representation of the Astronist character of Ellena in Singapore, including all its variations.

Ellenarian-Sino Character Representation - the specific representation of the Astronist character of Ellena in China, including all its variations.

Ellenarian-Slovak Character Representation - the specific representation of the Astronist character of Ellena in Slovakia, including all its variations.

Ellenarian-Slovenian Character Representation - the specific representation of the Astronist character of Ellena in Slovenia, including all its variations.

Ellenarian-Solomon Islands Character Representation - the specific representation of the Astronist character of Ellena in the Solomon Islands, including all its variations.

Ellenarian-Somali Character Representation - the specific representation of the Astronist character of Ellena in Somalia, including all its variations.

Ellenarian-South African Character Representation - the specific representation of the Astronist character of Ellena in South Africa, including all its variations.

Ellenarian-South Ossetian Character Representation - the specific representation of the Astronist character of Ellena in South Ossetia, including all its variations.

Ellenarian-South Sudanese Character Representation - the specific representation of the Astronist character of Ellena in South Sudan, including all its variations.

Ellenarian-Spanish Character Representation - the specific representation of the Astronist character of Ellena in Spain, including all its variations.

Ellenarian-Sri Lankan Character Representation - the specific representation of the Astronist character of Ellena in Sri Lanka, including all its variations.

Ellenarian-Sint Maartener Character Representation - the specific representation of the Astronist character of Ellena in Sint Maarten, including all its variations.

Ellenarian-Sudanese Character Representation - the specific representation of the Astronist character of Ellena in Sudan, including all its variations.

Ellenarian-Surinamese Character Representation - the specific representation of the Astronist character of Ellena in Suriname, including all its variations.

Ellenarian-Swazi Character Representation - the specific representation of the Astronist character of Ellena in Swaziland, including all its variations.

Ellenarian-Swedish Character Representation - the specific representation of the Astronist character of Ellena in Sweden, including all its variations.

Ellenarian-Swiss Character Representation - the specific representation of the Astronist character of Ellena in Switzerland, including all its variations.

Ellenarian-Syrian Character Representation - the specific representation of the Astronist character of Ellena in Syria, including all its variations.

Ellenarian-Taiwanese Character Representation - the specific representation of the Astronist character of Ellena in Taiwan, including all its variations.

Ellenarian-Tajik Character Representation - the specific representation of the Astronist character of Ellena in Tajikistan, including all its variations.

Ellenarian-Tanzanian Character Representation - the specific representation of the Astronist character of Ellena in Tanzania, including all its variations.

Ellenarian-Timorese Character Representation - the specific representation of the Astronist character of Ellena in East Timor, including all its variations.

Ellenarian-Thai Character Representation - the specific representation of the Astronist character of Ellena in Thailand, including all its variations.

Ellenarian-Togolese Character Representation - the specific representation of the Astronist character of Ellena in Togo, including all its variations.

Ellenarian-Tongan Character Representation - the specific representation of the Astronist character of Ellena in Tonga, including all its variations.

Ellenarian-Trinidadian and Tobagonian Character Representation - the specific representation of the Astronist character of Ellena in Trinidad and Tobago, including all its variations.

Ellenarian-Tunisian Character Representation - the specific representation of the Astronist character of Ellena in Tunisia, including all its variations.

Ellenarian-Turkish Character Representation - the specific representation of the Astronist character of Ellena in Turkey, including all its variations.

Ellenarian-Turkmen Character Representation - the specific representation of the Astronist character of Ellena in Turkmenistan, including all its variations.

Ellenarian-Turks and Caicos Character Representation - the specific representation of the Astronist character of Ellena in the Turks and Caicos Islands, including all its variations.

Ellenarian-Tuvaluan Character Representation - the specific representation of the Astronist character of Ellena in Tuvalu, including all its variations.

Ellenarian-Ugandan Character Representation - the specific representation of the Astronist character of Ellena in Uganda, including all its variations.

Ellenarian-Ukrainian Character Representation - the specific representation of the Astronist character of Ellena in Ukraine, including all its variations.

Ellenarian-Uruguayan Character Representation - the specific representation of the Astronist character of Ellena in Uruguay, including all its variations.

Ellenarian-Uzbek Character Representation - the specific representation of the Astronist character of Ellena in Uzbekistan, including all its variations.

Ellenarian-Vanuatuan Character Representation - the specific representation of the Astronist character of Ellena in Vanuatu, including all its variations.

Ellenarian-Vatican (Catholic) Character Representation - the specific representation of the Astronist character of Ellena in Vatican City and the wider Catholic community, including all its variations.

Ellenarian-Venezuelan Character Representation - the specific representation of the Astronist character of Ellena in Venezuela, including all its variations.

Ellenarian-Vietnamese Character Representation - the specific representation of the Astronist character of Ellena in Vietnam, including all its variations.

Ellenarian-Vincentian Character Representation - the specific representation of the Astronist character of Ellena in Saint Vincent and the Grenadines, including all its variations.

Ellenarian-Wallisian and Futunan Character Representation - the specific representation of the Astronist character of Ellena in Wallis and Futuna, including all its variations.

Ellenarian-Yemeni Character Representation - the specific representation of the Astronist character of Ellena in Yemen, including all its variations.

Ellenarian-Zambian Character Representation - the specific representation of the Astronist character of Ellena in Zambia, including all its variations.

Ellenarian-Zimbabwean Character Representation - the specific representation of the Astronist character of Ellena in Zimbabwe, including all its variations.

Ellenarianisation - the act and process of turning something, especially a piece of art or propaganda, into being dominated by images of the Astronist character of Ellena.

Derivatives

Ellenarianise

Ellenarianised

Ellenarianisational

Ellenarianised Propaganda - in Astronist Propaganda, a particular propaganda piece, or a lunge of pieces that have the Astronist Character of Ellena as their central figure, or signpost, especially when other Astronist Characters are pictured in the background.

Ellenarianism

- a school of thought in The Philosophy of Astronism centring on the thoughts, beliefs, theories, and ideas distinctively held and associated with the Astronist character of Ellena, so as to interpret concepts from a strictly Ellenarian viewpoint.
- an art movement within Astronist Art that focuses all its art pieces on the Astronist character of Ellena as the central figure and subject.

Derivatives

Ellenarianist

Ellenarianistic

Ellena's Cosmos - in Astronist Art, Architecture, Rendition, and Media, a collection of similar depictions of The Cosmos in its entirety, or of just one or a multitude of cosmical progenies that solely feature the Astronist character of Ellena in the depiction.

Ellena's Theme - a short musical composition that is associated with the Astronist character of Ellena, and may be used in films, video games, advertisements and other digital media that involves the character.

Ellenaverse - the denotation of the entire fictional existence of Ellena Chadwell, especially in an informal sense.

Ellenine (noun)

- a time period on *The Astronist Calendar*, anchored by the birthday of the fictional character, *Ellena Chadwell*.
- in Astronist Ornamentation, the specific depiction of the Astronist character, Ellena.

Ellenism (noun)

- distinctive features, characteristics, traits or way of thinking relating to that of the fictional character, *Ellena Chadwell*.

Ellenist (adjective)

- a person whose characteristics or way of thinking relate to that of the fictional character, *Ellena Chadwell*.

Elleno- - the prefix often used for the Astronist character of Ellena.

Ellenology - the branch of Astronology solely relating to the study of the fictional character, Ellena Chadwell.

Derivatives

Ellenological

Ellenologist

Ellenologically

Ellenophilia - a distinct and obsessive fondness of, or deep laudation for, the Astronist character of Ellena.

Derivatives

Ellenophile

Ellenophiliac

Ellenophilic

Ellenophilous

Ellenophily

Ellenurial - refer to a symbol, piece of art or imagery denoting the fictional character, Jesse Millette.

Ellinikó Diafotismó - the root term for Greek Astronism.

Ellipsis - in Astronist Architecture, any part of an architectural design which is purposefully cut out to allow air to flow through.

Ellipsoidality - in kosmetrics of Astronist Philosophy, to apply the shape of elliptical galaxies, an alternative term for which is ellipticality.

Ellipticality - see ellipsoidality.

Elliptics - the subdiscipline of study within Astronist Philosophy, specifically Cosmic Philosophy, as part of the discipline of kosmetrics dealing with the philosophical perspective on the shape of the ellipse in The Cosmos, especially of elliptical galaxies, and how these may have affected cosmogony.

Derivatives

Ellipticist

Élogieusement - in Astronist Philosophy, of a philosopher, or debater, to speak very highly and favourably of another philosopher, or debater.

Elongate - in an Astronist contextualisation, the lengthening of a counciloral, or directorial meeting, or the lengthening of Astronist congressional session, typically because a concordance hasn't been raised.

Derivatives

Elongation

Eloqueology - a major branch of argumentology within Astronist Philosophy dealing with the techniques, skills, philosophies, and utilities of clarity, fluency, and persuasion in the practice of argumentation, especially in the context of speaking during a debate.

Derivatives

Eloqueologist

Eloqueologists

Eloqueological

Eloqueologically

Eluviation - in Astronist Philosophy, to be inundated with philosophical ideas and concepts; to have a strong philosophical imagination.

Eluviated

Emanationism - a school of thought in The Philosophy of Astronism that focuses on the study of the source from which a creation originates, and holds similar concepts to Attributionism.

Derivatives

Emanationist
Emanationistic

Emanscence - in Astronist Philosophy, that which occurs in The Cosmos for a very long time, the oppositism to ephemerence.

Emanscent - in Astronist Philosophy, cosmically grand in size and complexity.

Derivatives

Emanscently

Emblazonment - the official term for the creation of a mission patch, or spacecraft emblem.

Emasculate - in an Astronist contextualisation, the removal of a male Astronist character's masculinity.

Derivatives

Emasculation

Emballement - in Astronist Philosophy, relating to the rapid flight of enthusiasm sometimes experienced by newfounders to The Philosophy of Astronism, and is characterised by a sudden widespread interest in all aspects of the philosophy.

Embellishmentism - in Astronist Art, especially in Cosmic Art, the style of depicting cosmic progeny and phenomena of intentionally exaggerating the colours, sizes, abundances, proximities, and positions of such celestial entities in order to create an atmosphere of celestial prominence and inflation.

Derivatives

Embellishmentist

Embench - in Equational Philosophy, as part of wider Astronist Philosophy, to separate a subment into a less quanticated, or a less convoluted state, and is especially associated with fractionation.

Derivatives

Embenched
Embenching
Embenchment

Emblemology - a branch of study as part of Logology within Astronology dealing with the study of Astronist emblems.

Derivatives

Emblemologist
Emblemological
Emblemologically

Emboldenment - in Constitutional Terminology, the use of emboldened words, especially in article titles, in order to assert differentiation and emphasis.

Emend - in an Astronist contextualisation, to make corrections and revisions to an Astronist book, documentation, or another Astronist literature.

Derivatives

Emendment
Emendation

Émerveillement - in Astronist Philosophy, another term for the concept of wonderment in the Astronist Tradition, especially relating to its elevated definition and usage within the Astronist philosophical tradition.

emí - The School of Spirituality in Astration as known in the Yoruba language.

Eminence - in an Astronist contextualisation, the widely acknowledged superiority of experience and knowledge in a particular subject, or sphere of an employee of The People's Constitutional Company of Jesse Millette.

Emirati Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the United Arab Emirates.

Emirate - in Astronist Philosophy, to wonder at The Cosmos exceedingly, especially in comparison to other people's inferior wonderment of The Cosmos.

Derivatives

Emiror

Emirorator
Emirorative
Emiroratively

Emmalia - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Emmalian
Emmalic

Emmen - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the first son of Trezine and Halgus, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Emmenian

Emmenina - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the seventh daughter of Ur'iyā and Constantius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Emmeninan

Emmetropia - in Astronist Philosophy, the state at which one holds perfect vision of some concept, or some cosmical entity, thus understanding every aspect of something with full knowledge.

Derivatives

Emmetropian

Emmetropic

Emmetropicity

Emminatius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the third son of Alexine and Gulgas, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Emminatian

Emittance - in Astronist Philosophy, that which is emitted, especially by a celestial entity such as a star.

Derivatives

Emittances

Emmortius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second son of Mariposine and Cozmotius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Emmortian

Emotionalism - a school of thought in The Philosophy of Astronism that emphasises the importance of emotions to human knowledge, understanding, and morality, particularly the emotions considered to be centralities, as opposed to those considered incentralities.

Derivatives

Emotionalist

Emotionalistic

Emotionality - in Astronist Philosophy, especially within Astronist Ethics, an instrument of study measuring the characteristics of one's emotions, as well as the effects of one's emotions on one's actions, and generally, the extent to which one's emotions pervade one's mind, and influence one's thoughts, and beliefs, a common example of which is the association of fear and one's belief in an afterlife.

Derivatives

Emotionalities

Emotivistic - in Astronist Philosophy, relating to emotivism.

Derivatives

Emotivistically

Empen - in Astronist Philosophy, to write about something philosophically in an essay, book, or documentation.

Derivatives

Empenning

Empenned

Empennation

Empenner

Empentress

Emplacement - in an Astronist contextualisation, the structure in the centre of the Astronist congressional assembly room on which the podium is affixed on which the Vice Chairman or Chairman of The People's Constitutional Company of Jesse Millette stands.

Employability - in Astronist Education, the overall possibility of a student gaining employment, or some other means of income after their education has ended at a phrontistery, and is usually concluded in the form of an employability report which is written by a range of the student's teachers, lecturers, and educators, and may be used as a reference for employment.

Employment Law (Cosmos) - an Astronist Subject dealing with the laws of employment of governments and states on planets and celestial bodies other than on The Earth itself.

Derivatives

Cosmic Employment Law

Empular - in Astronist Philosophy, relating to the application or contemplation of something, especially in demonstrating the differences in utility.

Empularic

Empularical

Empularically

Empyric - in Astronist Philosophy, relating to a starry night sky.

Derivatives

Empyricity

Enaction - in Astronist Philosophy, relating to enacting an idea or notion.

Enactment - in an Astronist contextualisation, the passing of a bill during a congressional, counciloral, or directorial session.

Enamellation - in Astronist Ornamentation, the process of using of enamel to embellish the ornamentation, especially to make it look glossier.

Enamellist - in Astronist Ornamentation, an individual conducting, or specialising in enamellation.

Enapplicate - in Astronist Philosophy, to conduct a cosmoapplication.

Derivatives

Enapplication

Enapplicative

Enapplicated

Enapplicating

Encadrement - in Astronist Naology, the often lengthy process of choosing the site for an Astronist philosophical building to be built, and getting approval for this from the authorities.

Enchaînement - in Astronist Philosophy, collectively relating, as well as the process of outlining all the similarities and shared links between one philosophical concept, theory, discipline, or branch to another. This may also be applied to two different philosophical traditions in scholarly comparisons between the Astronist philosophical tradition, and another philosophical tradition.

Enchiridion - a major type of Astronist documentation, or book, that focuses on a specific area of Astronist Philosophy as derived from The Grand Centrality and discusses the subject in question in greater detail as an extension to the words of The Grand Centrality. Each enchiridion begins with the writings of The Grand Centrality that covers the subject in question. More broadly, enchiridions may simply relate to all Astronist philosophical works outside of The Grand Centrality of The Philosophy of Astronism itself.

Derivatives

Enchiridionic

Enchiridionical

Enchiridionically

Encirclement - occurs when the title, numeration, or other text in the manning of the mission patch or spacecraft emblem, is long enough to fully encircle the plate.

Enclavation - in Astronist Civicology, the part of the city that is distinctly apart or separate from the main city, and is not a suburb, but is still considered as part of the city.

Enclave - in Astronist Architecture, a term in gardenry relating to the part of an outside estate of an Astronist building which is separated by a palisade.

Derivatives

Enclaves

Enlancement - in Astronist Philosophy, the act of engaging with a philosophical concept in some way, whether that be contemplating it, debating it, or expressing it.

Encompasis - in Astronist Philosophy, the instance of encompassing something, either physically, or conceptually.

Derivatives

Encompases

Encompassism - a school of thought in The Philosophy of Astronism characterised by the concept that knowledge surrounds an individual and holds them up from within, and is thus, championed to be the most integral part of the human mind, body, and spirit is the knowledge that one possesses.

Derivatives

Encompassist

Encompassistic

Encompidoxy - in Astronist Philosophy, a chart that displays the different titles of disciplines within Astronist Philosophy inside circles, according to the topic they deal with in comparison to other subjects. This is demonstrated by the distance between each subject on the chart, the size of the circle represents the breadth of the discipline, the colour of the circle represents the general area of philosophy that it the discipline is mostly associated with, and the overlapping of circles generally means that they shared similar concepts with each other. Most importantly, however, the closeness between the circles and the centrepiece which is always entitled as Astronist Philosophy, represents the unquity of the discipline to Astronist Philosophy, so as to mean that a long-established philosophical discipline, such as Ontology, would be further away from the centre than that of Contology, which is of Astronist philosophical origin. An encompidoxy can either be a physical two-dimensional chart, or a three-dimensional digital chart.

Derivatives

Encompidoxies

Encompidoxic

Encompidoxical

Encounterment - in Astronist Philosophy, the instance of facing an entity, especially one with greater power or significance than your own.

Derivatives

Encounterments

Encrustation - a style of interior decoration on walls whereby parts of the wall protrude, often termed as encrusta, especially when embossed with an illustration.

Derivatives

Encrusta

Enculturation - in Astronist Philosophy, of a non-Astronist society, the gradual acquisition of the characteristics, styles, traditions, and practices of The Philosophy of Astronism, or one of its branches, and their integration into the society.

Enculturator - in Astronist Philosophy, the specific trigger for the process of enculturation.

Enculture - in Astronist Philosophy, to bring a culture to a place, or people, especially as a replacement for another culture, or to create a synthesis of cultures by allowing them to exist simultaneously amongst the same society.

Derivatives

Enculturing

Encultured

Enculturer

Endless Cosmos - in Astronist Philosophy, a type of cosmos in which The Cosmos does not ever end, and is a creation theory derived from autocreationism.

Endonym - a type of term relating to the name of a planetarium, or another Astronist philosophical building, according to the local residents whom live in proximation to the building.

Derivatives

Endonymic

Endonymity

Endorsement - in Astronist Ornamentation, the act of verifying an ornamentation for publication.

Endowment - in Astronist Ornamentation, the act of officially commissioning an ornamentist to construct an ornament.

Endtime - in Astronist Philosophy, especially within ultimatology, an alternative term for the ultimatum of something, also appellated as the Existential Periphery.

Endtimes - in Astronist Philosophy, sometimes appellated as The Endtimes, relating to the end of The Cosmos and the processes, occurrences, and consequences of this.

Endue - in an Astronist contextualisation, provide a subsidiary of The People's Constitutional Company of Jesse Millette, or a denomination of The Philosophy of Astronism with a certain quality, or ability so that it may better operate, or become more attractive to a certain market.

Derivatives

Enduation

Enduing

Endued

Endument

Energy Law (Cosmos) - an Astronist Subject dealing with the laws of energy utilisation on planets, and celestial bodies other than The Earth, and on space stations and spaceships.

Derivatives

Cosmic Energy Law

Enfantement - in Astronist Art, Architecture, and Rendition, the depiction of childbirth, especially the birth of the Astronist character of Phoenix.

Enfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that finality must always be caused by a trigger, and therefore upholds the idea that a finality must always have a causality.

Derivatives

Enfinalism

Enfinalities

Enfinalist

Enflamation - in Cosmic Art, as a derivation of Astronist Art, a red theme.

Derivatives

Enflamatial

Enflamatic

Enfoncé - in Astronist Philosophy, a philosophical concept that is deep-seated within a school of thought, or within the Astronist Tradition itself, so much so that it couldn't ever be removed due to its centrality.

Engouement - in Astronist Philosophy, a particular infatuation that someone may feel for a philosophical concept, school of thought, or discipline of philosophical study.

Engravation - in Astronist Philosophy, the process by which a philosophical concept or belief is engraved into the mind through memorisation, experience, and devotion.

Derivatives

Engravational

Engraving - in Astronist Ornamentation, in particular metalworks, the process of cutting and carving out a surface in order to form intricate patterns.

Enim - derived from Latin, in Astronist Philosophy, contemplations of the nature and character of truth and honesty.

Eniquoxy - also known as the eniquocy, the poem, or a version of the poem, that can be found at the front of most Astronist books, especially those from The Original Jesse Millette Series.

Derivatives

Derivatives

Epitayan

Epitius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the only son of Zema and Too'non, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Epitian

Epitomise - in an Astronist contextualisation, of an Astronist character, being a perfect example of the official, or traditional version of that character.

Derivatives

Epitomisation

Epitomisational

Epo - in Astronist Philosophy, the philophon for the discipline of epochology.

Epochology - a part of Astronist Cosmology, and Astronist Philosophy, specifically Cosmic Philosophy, the study of the age, and chronology of both The Universe, and The Cosmos.

Derivatives

Epochologic

Epochological

Epochologically

Epochologist

Eponine - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Eponinian

Eponinic

Eponym - in an Astronist contextualisation, a person, place, artwork, or celestial entity whose name derives from, or is directly named after an Astronist character.

Derivatives

Eponymous

Eponymic

Eponymity

Epuration - in Astronist Philosophy, to feast upon philosophical discussion; to enjoy philosophical discussion and argumentation, and to always be searching for it.

Derivatives

Epulor

Epulorment

Epulorer

Epulorative

Epuloratively

Equ - in Astronist Philosophy, the philophon for the discipline of equatology.

Equationality - in Equational Philosophy, as part of wider Astronist Philosophy, relating to a subment, or an equation especially in a broader sense, rather than refer to any particular subment.

Derivatives

Equationalities

Equational Philosophy - a major newfound branch of philosophy originating from within Astronist Philosophy, dealing with the expressions of philosophical instruments of study by strictly numerical and algebraic means, especially in the process of balancing an equation to derive inferences.

Equatology - a subdiscipline of study in Astronist Philosophy dealing with the nature of equators in all aspects and disciplines.

Derivatives

Equatologist

Equatologic

Equatological

Equatologically

Equatorial Guinean Iluminación - the root term for Equatorial Guinean Astronism.

Equatorial Guinean Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Equatorial Guinea.

Equatorium - in Astronist Architecture, a corridor in some Astronist philosophical buildings, especially in Africa, The Middle East and South Asia, that is ornately decorated and stretches across the width of the building and thus separates the anteroom from the posterior.

Derivatives

Equatoria

Equatoriums

Equi - in Astronist Philosophy, the philopon for the discipline of equitology.

Equidem - derived from Latin, in Astronist Philosophy, confirmation of a statement.

Equilibration - in Astronist Philosophy, the process of working towards an equilibrium between a dichotomy of concepts, the achievement of which is considered to be a signifier of great philosophical intelligence and wisdom.

Derivatives

Equibrational

Equibrationally

Equilibrarian - in orbanology of Astronist Philosophy, a philosopher that incessantly searches for a balance between concepts, entities, or another subject; essentially, they understand their philosophical purpose to find the equilibrium in all things.

Derivatives

Equilibrarianism

Equilibrarians

Equipoise - in an Astronist contextualisation, the state in an Astronist congressional session, or in a directorial, or counciloral meeting in which interests, and opinions are balanced in their quantity across the meeting members.

Equipollent - in an Astronist contextualisation, of two employees, or executives of The People's Constitutional Company of Jesse Millette, sharing equal power, and authority.

Derivatives

Equipollence

Era - a usually indefinite period of time within Astronist Mystology.

Era of Civilisation - in Astronist Philosophy, specifically within the discipline of epochology, the appellation denoting the period in which the first human civilisation emerged; note this relates only to the first known sentient human civilisation rather than other sentient civilisations, or those which remain unknown to our present knowledge.

Ergology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of work, and the subsequent concepts and theories involved.

Derivatives

Ergologist

Ergologic

Ergological

Ergologically

Ergonym - relating to The People's Constitutional Company of Jesse Millette in its entirety, especially when regarded as an institution of authority.

Derivatives

Ergonymic

Ergonymity

Ergospheric - in Astronist Philosophy, relating to the ergosphere of a black hole.

Eripiment - in Astronist Philosophy, to rescue and revive a philosophical concept, discipline, branch, or even an entire philosophical tradition from becoming obsolete.

Derivatives

Eripate

Eripational

Eripationally

Eripor

Eriptress

Eripitive

Eripitively

Eritrean Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the State of Eritrea.

Eritrean Tanwir - the root term for Eritrean Astronism.

Erosatus - a male creature of Astronist Mythology, said to be created by evil spirits to tempt female spirits towards fighting for the dominance of evil.

Errement - in Astronist Philosophy, a bad habit of a philosopher.

Errements - in Astronist Philosophy, collectively relating to the set of bad habits of a philosopher, most commonly including one's failure to understand a philosophical concept, one's laziness to understand a concept, and one's tendency become narrow of mind and knowledge.

Erudite - in an Astronist contextualisation, an individual that is widely known to possess great knowledge of a Millettological subject.

Derivatives

Erudition

Eruditionism - a school of thought in The Philosophy of Astronism that emphasises scholarship and encourages the display of great knowledge, and champions scholars to be the leaders of society.

Derivatives

Eruditionist

Eruditionistic

Eschatological Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Eschatological thought and ideas, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Eschaton - in an Astronist contextualisation, from an Astronist philosophical viewpoint, the event at the end of The Universe, or the end of The Cosmos.

Escutcheon - in Astronist Ornamentation, the part of an ornamentation bearing a shield with a coat of arms.

Esophorion - in Astronist Rendition, a very small and compacted version of either the entire Grand Centrality, or just one of its disquisitions, and has to be small enough to fit inside a triclinium, and is commonly manufactured for commercial purposes in order to provide people with a portable text that they can carry throughout their day.

Derivatives

Esophorions

Especial - in an Astronist contextualisation, an Astronist congressional session in which larger than usual amount of topics are debated and concordance.

Derivatives

Especiality

Espiritualidad - The School of Spirituality in Astration as known in the Spanish language.

Espiritualidade - The School of Spirituality in Astration as known in the Portuguese language.

Esporm - in pneumovology of Astronist Philosophy and Astronist Mysticism, to complete a personal transformation of one's individual identity after mystic, or devotional activities and contemplations.

Esprit - in Astronist Philosophy, relating to one human mind, or the entirety of the minds of humanity.

Essayship - collectively relating to the body of essays written by Brandon Taylorian, so as to form his essayist career.

Essential Hand - in Astronist Philosophy, forming one part of three in the Sibling-Sibling relationship as part of the Five Bonds of Society denoting the metaphor of a sibling's hand to be something onto which one can reach out to in times of hardship.

Essentiality - in Astronist Philosophy, an instrument of study concerned with contemplating that which is most necessary to the existence of an entity, or to the occurrence of an event.

Derivatives

Essentialities

Estatuary - another term for Gardenry.

Derivatives

Estatuarist

Estonian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Estonia.

Estrella Argentina - the root term for Argentine Astronism.

Estrella Boliviana - the root term for Bolivian Astronism.

Estrella Cubana - the root term for Cuban Astronism.

Estrella Española - the root term for Spanish Astronism.

Estrella Guatemalteca - the root term for Guatemalan Astronism.

Estrella Hondureña - the root term for Honduran Astronism.

Estrella Mexicana - the root term for Mexican Astronism.

Estrella Nicaragüense - the root term for Nicaraguan Astronism.

Estrella Panameña - the root term for Panamanian Astronism.

Estrella Paraguaya - the root term for Paraguayan Astronism.

Estrella Peruana - the root term for Peruvian Astronism.

Estrella Uruguaya - the root term for Uruguayan Astronism.

Estrella Venezolana - the root term for Venezuelan Astronism.

Estrellism - the vast denomination of The Philosophy of Astronism most typically associated with Spanish-speaking countries and the former colonies of Spain, and thus includes a plethora of nationalities, ethnicities, and schools as adherents to this denomination, and is thus, one of the largest and most widespread denominations of The Philosophy of Astronism.

Derivatives

Estrellist

Estrellistic

Estrelli

Estrellis

Étalement - in Astronist Philosophy, a movement within The Philosophy of Astronism that spreads rapidly and alters the philosophy somewhat, and is typically triggered by a new discovery relating to astronomy and The Cosmos.

Etenment - in Astronist Philosophy, meaning thus far, or so far as.

Derivatives

Etenmental

Etenmentally

Etenmentality

Eternal Cosmology - in Astronist Philosophy, an appellation for the type of cosmos in which time's infiniteness is predominant and the probability of an event occurring to be higher than zero.

Eternal Existence - in Astronist Philosophy, an appellation for the scenario in which an infinite amount of time, and realities are created, yet still hold their individualities.

Eternal Expansion - in perimetrics of Astronist Philosophy, the appellation for the concept that the periphery of The Cosmos is in constant eternal expansion and therefore there cannot be a periphery; there cannot be an edge to The Cosmos.

Eternalism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the systems of governance are eternal, and can and will always be referred back to no matter the amount of new systems which succeed them, and always holds that all new systems must have been inspired somewhat from those systems which preceded them.

Eternal Knot - in Astronist Ornamentation, the depiction of a crisscross pattern, most commonly forming the border of an ornamental design, and typically featuring cosmical influences.

Ethereal Purposity - in Astronist Philosophy, the appellation for the instance in which an entity's purpose is derived from anything other than solely its function, typically drawing upon spiritual or transcendental reasons for its purpose, and is the oppositism to Functional Purposity.

Ethical Decay - in Astronist Philosophy, an appellation denoting the often theoretical instance in which a society, or civilisation experiences a disregard and degradation in ethical and moral teaching, and institutionalism.

Ethnic philosophy - in Astronist Philosophy, a classification of a philosophy that relates to a philosophy that is identified with a particular ethnic group and does not seek followers outside of that ethnic group. Compare with universal philosophy.

Eternal Friend - in Astronist Philosophy, forming one part of three in the Sibling-Sibling relationship as part of the Five Bonds of Society denoting a sibling as the greatest friend that one shall ever know.

Ethiopian Megelet'i - the root term for Ethiopian Astronism.

Ethiopian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Federal Democratic Republic of Ethiopia.

Ethnical - relating to ethnic peoples and their traditions, beliefs and cultures.

Ethnicist - a person who advocates for the importance of the maintenance of ethnic peoples' place in society and their traditions, beliefs and culture.

Ethnomethodology - an Astronist Subject dealing with the study of the methods used for the establishment of a particular social order, typically relating to an Astronist Methodology of social structure.

Derivatives

Ethnomethodologic

Etiologists

Étoilum - in Astronist Architecture, a special type of star depiction typically having six points, with the north and south points being long than the two on either side, and may also resemble a north star, and can be most commonly found in the pediments above archways, or in flooring and ceiling designs and ornamentations.

Derivatives

Étoilums

Étonnamment - in Astronist Philosophy, a surprising and astonishing progeny of The Cosmos.

Eulea- in Astronist Philosophy, combining form relating to Euleara, or the embodiment of sentient goodness.

Euleara - in Astronist Philosophy, the appellation for the collectivity of actions, emotions, and beliefs that are an embodiment of that which is considered and perceived to be sentient goodness, namely that which causes the happiness, enhancement, and repair or rebirth of a sentient or non-sentient entity, either physically, conceptually, or hypothetically. Euleara forms the embodiment and collectivisation of goodness and is therefore opposed to Venatarat which is the embodiment and collectivisation of evility in order to form the Astronist version of a good-evil dichotomy.

Eulearic - in Astronist Philosophy, relating to characteristics of goodness that are conductible only by sentient beings.

Derivatives

Eulearical

Eulearically

Eulearicality

Eulearicly

Eulearicity

Eulearism - in Astronist Philosophy, the belief orientation holding that Euleara, or eulearic characteristics, are fundamental to the nature and identity of all sentient beings despite the influence that venatic characteristics hold over the actions, emotions, and thoughts of the majority of sentient beings, either consequentially or without consequence.

Derivatives

Eulearist

Eulearistic

Eulearistical

Eulearistically

Eulearology - in Astronist Philosophy, a discipline of study within the inclusive discipline of contology dealing with the study of the identity, nature, role, and function of Euleara, the Astronist version of the embodiment of sentient goodness, or upstanding morality. Eulearology is not to be confused with agathology which deals with the broader philosophical study and contemplation of what it means for something to be good and so eulearology can be considered an Astronist branch of agathology.

Derivatives

Eulearology

Eulearological

Eulearologically

Eulearologic

Eulocis - derived from The Eulocis Group as a commercial subsidiary of The People's Constitutional Company of Jesse Millette, the embracement of the ultra-feminine through a distinct natural elegance propelled by the actions of the women of history and the newly formed roles of women in relation to men; describing a person who shares this lifestyle and philosophy.

Euphemia - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the wife of Julius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Euphemian

Euplasticity - in Astronist Philosophy, the state of a philosophical school's quick revival or recovery after being made obscure.

Derivatives

Euplastic

Eurythmy - in an Astronist contextualisation, specifically of Astronist Architecture, relating to harmonious proportions in architectural design and construction.

Derivatives

Eurythmic

Eurythmical

Eurythmically

EuroAstronistisation - the specific Astronistisation of European societies, either in a macro or micro form.

Derivatives

Exocreationality

Exoday - in The Grand Astronist Calendar, also known in its hyphenated form as Exo-Day, a day of commemoration and celebration dedicated to the specific wondermentation, adoration, and laudation of exoplanets in The Cosmos, and is characterised by decorations of different exoplanets, competitions, parties, and special lectures and education events at Astronist philosophical buildings that focus on the subject of exoplanets, especially those which are named in the Astronist Tradition. This always takes place on 29th Zaarine, which translates to the 9th December in the Gregorian calendar.

Exogeneity - in Astronist Philosophy, the instance in which contemplations and concepts that have arisen from non-Astronist originations, but are nonetheless discussed by Astronist philosophers.

Exomoon - in Astronist Philosophy, moons residing outside of The Solar System in which The Earth resides.

Derivatives

Exomoons

Exonym - a type of term relating to a colloquial name for a denomination of The Philosophy of Astronism as appointed by the peoples of another denomination of the philosophy.

Derivatives

Exonymic

Exonymity

Exordia

- in general Astronist terms, the beginning part of an Astronist Founding Work, typically encompassing the introduction, a mission statement, and the first three chapters.
- in Astronist Philosophy, the first three insentensations of a discourse, article, or disquisition within The Grand Centrality of The Philosophy of Astronism, especially so within The Omnidoxy itself.

Derivatives

Exordium

Exorior - in Astronist Philosophy, the instance in which the popularity of a philosophical concept grows rapidly during a particular period of time in the history of the philosophy.

Exoteric - in an Astronist contextualisation, those Astronist books, and literatures which are widely publicly published, and are constructed so as to be understandable for the mass public.

Exotericism - in Astronist Philosophy, the belief orientation and area of contemplation dealing with and maintaining that the Astronist philosophical tradition, despite some hints of esoteric knowledge, is fundamentally and ultimately exoteric by its nature rather than esoteric due to it rely on gained knowledge from, observations made of, and conclusions drawn according to The Cosmos and its progeny and phenomena.

Derivatives

Exotericist

Exoterical

Exoterically

Exotericity

Exoticity - in Astronist Philosophy, the instance of a state of exogeneity, but particularly focusing on entire philosophies rather than schools of thought, concepts, and theories as is addressed in general exogeneity.

Derivatives

Exoticities

Exp - in Astronist Philosophy, the philophon for the discipline of Experimental Philosophy.

Expanded Lunation - in formatology of Astronist Philosophy, the appellation for the study and contemplation of the different phases of the existence of a celestial entity, as an extension of general lunation which relates to the phases of moons only.

Expansion - in Astronist Philosophy, particularly within Cosmic Alchemy, the tenth and the penultimate of The Eleven Cosmo-Alchemic Processes focusing on the concept of The Expanding Universe in which The Cosmos resides, as well as the infiniteness of The Universe, and cosmo-alchemical ideas, theories, practices, and contemplations associated with this.

Derivatives

Expansational

Expansationally

Expansive Totality - in Astronist Philosophy, a type of totality in which The Cosmos is existent at its widest scale in size.

Expascorate - in Astronist Philosophy, to discover the concepts of a philosophy independently and separately from any organised education institution, or system; essentially, autodidactic philosophical learning.

Derivatives

Extraconstitutionally

Extraconstitutionality

Extracosmozoism - in Astronist Philosophy, the belief stating that all things in The Cosmos are alive, even the most seemingly inanimate of entities, rather than just The Cosmos itself being alive, as is believed by cosmozoism.

Derivatives

Extracosmozoic

Extracosmozoical

Extracosmozoically

Extracosmozoicity

Extracting Cosmology - in structurology of Astronist Philosophy, the cosmology holding the removal of the entity that is known as The Cosmos from the entire cosmology, but also holds that all that exists within The Cosmos is destined to inevitably exit The Cosmos and it is also known as The Excubator Cosmos.

Extrafinality - in Astronist Philosophy, as part of Finality Theory, a type of finality holding that there is never a true finality of anything cosmical in nature, and supports the concept of continual recreation.

Derivatives

Extrafinalism

Extrafinalities

Extrafinalist

Extragalactical - relating to all existence beyond either The Milky Way, or all galaxies.

Extramission - in Astronist Philosophy, a twin concept associated with intromission relating to philosophical concepts and experiences that philosophers or dilettantes come across without actively seeking them, considered to be the most natural and destinical out of the two ways of philosophical enknowledge and experience.

Derivatives

Extramissional
Extramissionary
Extramissioner
Extramissioners

Extraneous - in an Astronist contextualisation, relating to a point, or opinion made during an Astronist congressional, directorial, or counciloral meeting which isn't relevant to the subject being discussed.

Derivatives

Extraneousness
Extraneously
Extraneousity

Extraphilosophy - in Astronist Philosophy, thinking beyond the bounds of a particular philosophy, or its beliefs.

Derivatives

Extraphilosophical
Extraphilosophically
Extraphilosophicality

Extraterrestrialism - in sentientology of Astronist Philosophy, one of the Four Orientations of Sentientology characterised by the belief in the existence of humans, humanoids, and other intelligent species beyond The Earth on other planets, and goes a step beyond standard sentientism.

Derivatives

Extraterrestrialist
Extraterrestrialistic
Extraterrestrialistically

Extremate - in Astronist Philosophy, to push the limitations and boundaries of something, especially in relation to a celestial entity and The Cosmos in which it resides, or may be applied conceptually to relate to one's concept's ability to push the boundaries of another.

Derivatives

Extremation
Extremational
Extremative
Extremator
Extremators

Extremum - also known as the extrema, in an Astronist contextualisation, the point at which a subsidiary of The People's Constitutional Company of Jesse Millette reaches its maximum point of optimum functionality.

Derivatives

Extrema

Extremus - derived from Latin, in Astronist Philosophy, the outermost concepts of a philosophy, or the most, or least known or most obscure concepts of The Philosophy of Astronism.

Extrigent - in Equational Philosophy, as part of wider Astronist Philosophy, relating to the instruments of study expressed in an equation.

Derivatives

Extringents

Extringentic

Extringential

Extringentially

Extrinsic Introspection - in introspectics of Astronist Philosophy, the appellation for the notion of that which is not naturally associated with an element to The Cosmos.

Extrinsicity - a branch of study as part of Astronist Philosophy, specifically Cosmic Philosophy, within Astronology dealing with the concepts of extrinsic origins of The Cosmos, usually The Divine as the creator of The Universe from outside it, and may also be broadened to the study of all things extrinsic to The Cosmos, or The Universe.

Derivatives

Extrinsicist

Extrinsical

Extrinsically

Extrinsium - in Astronist Architecture, a term commonly used in Architectural Theory to describe Astronist outbuildings collectively.

Extroversion - in Astronist Philosophy, a philosophy, school of thought, concept, or theory that concerns itself with concepts of actuality rather than abstract notions.

Derivatives

Extroversional

Extroversionally

Exuberate - in Astronist Philosophy, to be dedicated to the practice of one's philosophy, school of thought, or denomination through the actions of the individual, especially particularly tedious or strenuous practices.

Derivatives

Fianàrana - derived from the Malagasy language, in Astronist Philosophy, a term relating to the concept of phrontistery in human society, and civilisation.

Fiantombòhana - derived from the Malagasy language, in Astronist Philosophy, a term relating to the Inception Epoch, also known as The Big Bang, and is especially known by this in the African denominations of The Philosophy of Astronism.

Fictionalism - a school of thought in The Philosophy of Astronism centring on the argument that fictional characters can hold just as much powerful and metaphorical meaning than real figures, and specifically relates to the reverence of the Astronist characters.

Derivatives

Fictionalist

Fictionalistic

Fictionality - an overarching category of the Literary Classification system that includes all Astronist texts of fiction, or may refer more generally to Astronist fiction.

Derivatives

Fictionalities

Field - in Astronist Ornamentation, the extent of the size, material, and shape of the surface upon which an ornament is created.

Fifanekèna - derived from the Malagasy language, a term relating to an agreement made between The People's Constitutional Company of Jesse Millette and any external entity, especially in the context of diplomacy and foreign relations, and especially with a southern African country.

Fifth Generation - in Astronist Genealogy, the term used to describe the group of descendants fourth generations after Jesse Millette, whom belongs to the First Generation.

Figuration - in an Astronist contextualisation, the creation of ornamentations by the use of figures.

Derivatives

Figurational

Figurativism - a school of thought in The Philosophy of Astronism relating to the interpretation of Astronist texts by strictly non-literal means, and purely from a metaphorical perspective.

Derivatives

Figurativist

Figurativistic

Figurecrown - in Astronist Architecture, a type of column characterised by the sculpture, or figurine which supports it, and it is structured upon.

Derivatives

Figurecrowns

Fihavàna - derived from the Malagasy language, in Astronist Philosophy, a term relating to the concept of friendship, and the effect of friendship on an individual, or a group.

Fihaviana - derived from the Malagasy language, in Astronist Philosophy, a term relating to the origin of The Cosmos, especially in relation to the Inception Epoch as described in epochology of the Astronist Tradition.

Fijian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Fiji.
- the denomination of The Philosophy of Astronism that is most predominantly adhered to in Fiji, by the Fijian peoples.

Fikambanana - derived from the Malagasy language, in Astronist Philosophy, a term relating to the overall concept of human civilisation, and all the subsequent concepts, theories, and disciplines related to, and dealing with this.

Fikirer - the most common demonym for a follower of The Philosophy of Astronism in the Kurdish language amongst the Kurdish peoples.

Derivatives

Fikrên

Fikirers

Fikr - in Arabic, the colloquial term given to describe Astronist Thought.

Fikra - in Arabic, the term given to the concept of ideas, especially in Astro-Arab philosophy.

Fikrşinos - the most common demonym for a follower of The Philosophy of Astronism in the Tajik language.

Derivatives

Fikrhoi

Fil - in Astronist Philosophy, the philophon for the discipline of filamentology.

-fila - in Astronist Onomatology, a suffix used for Astronist names, in reference to the filaments of The Cosmos.

Fila- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the filaments of The Cosmos.

Filament - in filamentology of Astronist Philosophy, a large-scale structure of The Cosmos, typically a supercluster, a stellar stream, or some other element forming The Metagalaxy.

Derivatives

Filamental

Filamentality

Filamental Formation - a branch of formatology dealing with the formations of the filaments of The Metagalaxy from a purely philosophical perspective.

Filamentology - a discipline of study in Astronist Philosophy dealing with the largest structures, and superstructures of The Cosmos, and how and why their existences may create new concepts about the arrangement and order of The Cosmos in The Universe, and how celestial entities are related to The Cosmos as a well-ordered whole.

Derivatives

Filamentological

Filamentologist

Filamial - in Astronist Philosophy, relating to the filaments of The Cosmos.

Filamial Family - in familiology of Astronist Philosophy, one of The Seven Cosmical Families characterised by only including filaments, such as the entirety of The Metagalaxy.

Filazàna - derived from the Malagasy language, a term relating to an announcement made by an official of The People's Constitutional Company of Jesse Millette, especially in an African country.

Filiation - in an Astronist contextualisation, especially in Astronist Genealogy, the fact of being the child of an Astronist character.

Derivatives

Filiative
Filiatively

Filipino Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of the Philippines.

Filozofa - the second most common demonym after Mpandinika for a follower of The Philosophy of Astronism in the Malagasy language.

Derivatives

Filozofas

Filsuf - the most common demonym for a follower of The Philosophy of Astronism in the Sundanese language.

Derivatives

Filosof
Filsufs

Fin - in Astronist Philosophy, the philophon for the discipline of Finality Theory.

Finality

- in Astronist Philosophy, that which is final in a series or sequence of connected entities, or concepts.
- in an Astronist contextualisation, relating to the end stages of the breaking up of a subsidiary of The People's Constitutional Company of Jesse Millette.

Derivatives

Finalities

Finality Moment - in Astronist Philosophy, as part of Finality Theory, the appellation for the instance and point in which the finality occurs and relating to the occurrences at this moment.

Finality Theory - in Astronist Philosophy, a cross-disciplinary area of contemplation and philosophical study and investigation involving all variations of the ways in which each of The

Cosmos, The Universe, and The Divine will end, and how these endings will interact with one another, but also how they stand in comparison to one another.

Final Singularity - in introspectics of Astronist Philosophy, the appellation for the notion that The Cosmos will end as a singularity to mirror as it did begin.

Financial - wealth that originates from business revenues, business assets or an investor's funds.

Findability - the measure of the length of time, resources and labour needed for something to be found and obtained.

Finity - in Astronist Philosophy, an instrument of study dealing with the entities of The Cosmos that hold finite natures.

Derivatives

Finities

Finnish Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Finland.

Finnish Valistus - the root term for Finnish Astronism.

Firaisana - derived from the Malagasy language, a term relating to a student, teacher, or employer union of The People's Constitutional Company of Jesse Millette, especially one that is in operation in Africa.

Fire - in Astronist Philosophy, one of the Nine Cosmical Elements relating to all types of combustions.

Firenena - derived from the Malagasy language, in Astronist Philosophy, a term relating to the concept of the nation state, and is used interchangeably with the term, ambanivòhitra.

Firmament - in Astronist Philosophy, a fundamental essence of the cosmic reality, including lightness, darkness, and luminosity, as is addressed and studied in firmamentology.

Derivatives

Firmamentally

Firmamentality

Firmamentology - a discipline of study in Astronist Philosophy dealing with the nature of firmamental elements, the three most prominent of which being lightness, darkness, and luminosity.

Derivatives

Firmamentologist

Firmamentologists

Firmamentological

Firmamentologically

First Chairman - the second of the three official titles of Brandon Taylorian within The People's Constitutional Company of Jesse Millette, demonstrating his role as the initial chairman of the

Company, and along with the title of Founder, is a title unique to Taylorian in the context of the Company.

First Generation - in Astronist Genealogy, the term used to describe the generational group in which The Five Astronist Characters belong to, and from which all other generational groups descend.

Firstmost - in Astronist Philosophy, that which resides first in terms of relevance, or that the first wave of series of something is the most important and is therefore superior to its successors.

Derivatives

Firstmostness

First Wave - a cradial term relating to the primary subjects listed in The Grand Cradle of Astronology.

Fisicalidad - The School of Physicality in Astration as known in the Spanish language.

Fisicalidade - The School of Physicality in Astration as known in the Portuguese language.

Fisiese'aard - The School of Physicality in Astration as known in the Afrikaans language.

Fisik - The School of Physicality in Astration as known in the Javanese language.

Fisikal - The School of Physicality in Astration as known in the Igbo language.

Fisikitas - The School of Physicality in Astration as known in the Indonesian language.

Fitsipika - derived from the Malagasy language, in Astronist Philosophy, a term relating to one of the twelve principles forming The Philosophy of Astronism.

Fitondràñ-draharàha - derived from the Malagasy language, a term relating to the administrative operations and procedures undertaken by The People's Constitutional Company of Jesse Millette, or its governmental body for proper management of the Company.

Fivaròtana - derived from the Malagasy language, in Astronist Philosophy, a term relating to any type of Astronist store, especially one in operation in Madagascar.

Five Bonds of Society - in Astronist Philosophy, an appellation for the prominent group of ideas highlighting the five most essential types of relationships in a society.

Five Components of Comparison - in introspectics of Astronist Philosophy, the appellation collectively relating to the five essential elements of how a comparison should be conducted and which elements should be considered, including nature, appearance, function, character, and purpose.

Five Doings - in pneumovology of Astronist Philosophy and Astronist Mysticism, the five actions involved in the achievement of explication as one of The Five Mystical Pursuits involving the development, dissemination, disquisition, debatement, and dissection.

Fivoriana - derived from the Malagasy language, a term relating to an official assembly held by The People's Constitutional Company of Jesse Millette, especially in an African country.

Fixed In Time - in Astronist Propaganda, the phrase used to describe a propaganda piece that is clearly associated with a particular period of time due to the attire worn, the art style of the piece, and the central subject.

Fixity - in an Astronist contextualisation, in an Astronist congressional session, counciloral, or directorial meeting, the state of a discussed policy, or issue being unchanged by the end of the session.

Fizaràna - derived from the Malagasy language, a term relating to the distribution of Astronist products throughout a nation, especially an African nation.

Fizicheskiy - The School of Physicality in Astration as known in the Russian language.

Flagship - in an Astronist contextualisation, relating to an Astronist fashion store of a larger size than an average store, and may typically be found in the capital, or largest city of a country.

Flame Palmette - in Astronist Ornamentation, the depiction of a fan-shaped palm leaf, and in an Astronist context, usually features alongside it, cosmical and galactical patterns, and symbolism.

Flat Universe - the appellation for the notion that the universe is flat in shape and structure rather than spherical, or any other physical dimension, used in mainstream cosmology rather than in an Astronist philosophical context, in which it is known as The Flat Cosmos.

Fleur-de-lis - in Astronist Ornamentation, the depiction of a stylised lily used in ornamental decoration, and in an Astronist context, typically features alongside it, and atop of it, many cosmical and galactical patterns, and symbolisms.

Floccule - in Astronist Philosophy, the grouping of between three and five philosophical concepts together due to them sharing similarities in subject, aim, or origination.

Floracapital - in Astronist Architecture, a type of capital featuring the depiction of flora, and may also depict the Astronist character of Ellena.

Derivatives

Floracapitals

Floralation - in Astronist Propaganda, the specific depiction of flowers, and plant life in a propaganda piece, or in a lunge of pieces.

Florentine - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Third Generation, as the wife of Lucien, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Florentinian

Floriated - in an Astronist contextualisation, a piece of Astronist art, ornamentation, rendition, or architecture that is decorated with floral designs.

Derivatives

Floriative

Floriation

Floriatively

Fluctuance - in Astronist Philosophy, the instance of something fluctuating, and the extent of its fluctuation.

Derivatives

Fluctuancy

Flushance - in Cosmic Art, as a derivation of Astronist Art, a pink theme.

Derivatives

Flushancial

Flux

- in Cosmic Art, as a derivation of Astronist Art, a term for the depictions of the arms of nebulaic gas and dust that are separated by dark voids.
- in firmamentology of Astronist Philosophy, the application of one of three applied filaments of lightness, darkness, or luminosity to an entity in order to record the extent of the ability or inability of a filament to produce a similarity in association with a particular instrument of study when applied to a celestial entity.

Derivatives

Fluxity

Fluxial

Focality - in Astronist Philosophy, an instrument of study dealing with the measurement of the overall importance of something in a system, or as part of a larger series, and as based upon a conclusive judgement.

Derivatives

Focalities

Foisonnement - in Astronist Philosophy, a school of thought that has had many contributors.

Folio - in Astronist Education, a piece of work extending beyond the main work of the course, and is often only available to complete for students who have shown a considerable ability, talent, or enthusiasm for a particular subject.

Derivatives

Folios

Folk Philosophy - a group, or a single philosophy, which is expressive of a particular people group, especially of a minority group within a nation.

Fòmba - derived from the Malagasy language, a term relating to the traditions of The People's Constitutional Company of Jesse Millette.

Footer - in Astronist Ornamentation, the part of an ornament at the very bottom.

Foothold - in an Astronist contextualisation, another term for a stronghold in relation to the expansion of The Philosophy of Astronism.

For - in Astronist Philosophy, the philophon for the discipline of formatology.

Forearm - in Cosmic Art, as a derivation of Astronist Art, the part of a galactic arm joining it to the rest of the galaxy, and precedes the centrearm.

Derivatives

Forearmial

Forearmic

Forecastation - the process of forecasting policies, financial data and operational information.

Derivatives

Forecastment

Forecosmos - in Astronist Philosophy, of a philosophical concept, before The Cosmos has been taken into considered, or has been incorporated into the concept.

Forecourt - in Astronist Architecture, the term for a courtyard that directly precedes the main building, typically by a short flight of steps.

Derivatives

Forecourts

Forefend - in an Astronist contextualisation, measures undertaken in a precautionary way in order to protect the operations and functionality of The People's Constitutional Company of Jesse Millette.

Forefinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that the entirety of the occurrences and interactions involving an entity play a role in determining its ultimate finality.

Derivatives

Forefinalism

Forefinalities

Forefinalist

Foreground - in Astronist Ornamentation, the part of the ornament that is visually nearest to the observer, or the ornamental pattern of a superimposition that is visually atop of the other pattern.

Foreground Distortion - in Cosmic Art, as a derivation of Astronist Art, the depiction of stars in front of galaxies, or another celestial entity that is in reality much larger than a single star.

Foremost - in Astronist Philosophy and omnidoxicology, one of the most commonly used adverbs in The Omnidoxy relating to the subject's prominence in rank, importance, or position.

Derivatives

Foremostly

Forensis - in Astronist Philosophy, collectively relating to all references to legality in The Philosophy of Astronism.

Forephilosophy - in Astronist Philosophy, a period of time in a nation before the introduction of a philosophy, or before the process of philosophical ascension, or reascension has occurred.

Derivatives

Forephilosophical

Forephilosophically

Forephilosophicality

Forepoint - in Astronist Architecture, a term used in Architectural Theory to describe a point in a building which precedes another.

Derivatives

Forepoints

Foresighter - in Astronist Philosophy, an individual that makes a habit of prophesying about the future, or making claims of what they believe will happen, or should happen in the future, and is typically biased towards their own intentions and beliefs.

Derivatives

Foresighting

Foresighters

Foresummit - in Astronist Philosophy, the period of time before a philosopher achieves their highest understanding of a philosophical paradox, concept, or theory.

Foresymicity - in Astronist Philosophy, of celestial entity, to exist in front of another celestial so as to be closer to the star of the system, especially characteristic of a trojan planet.

Derivatives

Foresymicities

Foreverafter - in Astronist Philosophy, an adverb used in The Omnidoxy relating to that which is to exist from the present time to the end of time, or to the extent of one's ability to perceive time.

Forfaitairement - in Astronist Philosophy, a type of philosophical school of thought that includes all orientations on the theme addressed, rather than one approach to the theme addressed.

Formality - in an Astronist contextualisation, the various procedures in meetings and congressional sessions undertaken by the employees of The People's Constitutional Company of Jesse Millette as referred to collectively.

Derivatives

Formalities

Formational Seasons - in Astronist Philosophy, particularly in seasonology, collectively relating to five seasons identified to occur in all celestial formations.

Formation Garden - in Astronist Architecture, as part of a gardenry, a type of garden of an Astronist building's estate characterised by its terraced levels.

Formationism

- the specific study of Astronist characters by the positions, and the order in which they are placed, especially in Astronist Art and in other types of depictions.
- in Astronist Philosophy, specifically known as Planetary Formationism, deals with the contemplations surrounding the general formations of planets and centralises the formations of planets in the overall cosmical system.

Derivatives

Formationist
Formationistic

Formationism & Evolutionism - in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the two philosophies of formationism and evolutionism, the former of which contemplates the formations of celestials in connection to formatology while the latter contemplates the evolutionary structures and procedures of celestial entities.

Formatology - in Astronist Philosophy, the discipline of study and philosophical discussion of the formational chronology and structure of celestial entities in The Cosmos.

Derivatives

Formatologist
Formatologists
Formatological
Formatologically

Formity - in Astronist Philosophy, an instrument of study dealing with the contemplations of the formations of different celestial entities.

Derivatives

Formities

Formulae - in Astronist Ornamentation, the recipe of colour palettes, design styles, and ornamental patterns used in an ornamentation, especially regarded collectively.

Fortement - in Astronist Philosophy, holding steadfastly to one's orientation towards a philosophical concept, or theory.

Fortification - in Astronist Civicology, in some developments, the planning and design of forts and other defensive structures, either to protect the city or town from natural disasters, or to defend against any other type of potential hostility, or damage.

Forum - in Astronist Architecture, as a part of gardenry, the portion of an Astronist building's estate characterised by a square featuring a column in the centre.

Derivatives

Forums

Fouillé - in Astronist Philosophy, used to describe a thorough philosophical contemplation and analysis.

Foundate - in Astronist Philosophy, to establish the foundations of something, either physically, or conceptually, or whether abstractly, or literally.

Derivatives

Foundative
Foundatively
Foundativity
Foundating
Founded

Foundationalism - a school of thought in The Philosophy of Astronism is a type of philosophical school similar to Restorationist Philosophy, whereby it is attempted to redirect, or reorientate the philosophy back to the foundational ideas, concepts, and principles upon which it was originally founded.

Derivatives
Foundationalist
Foundationalistic

Foundationally - in Astronist Philosophy and omnidoxicology, an adverb pertaining to that which is considered foundational.

Founder - one of the three official titles of Brandon Taylorian within The People's Constitutional Company of Jesse Millette, demonstrating his first and foremost role as the establisher of the Company.

Founding - in an Astronist contextualisation, relating to the time period, the literatures, people, events, businesses, and philosophies existing around the time of the founding of The People's Constitutional Company of Jesse Millette.

Founding Myth - a mythological text that inspired the development of a particular culture, philosophy, or idea, and in an Astronist context, the Founding Myth is The Grand Chronicles of Astronist Mystology.

Founding of The Philosophy of Astronism - in Astronology, referring to the event of when The Philosophy of Astronism was founded in the year of two thousand and thirteen by Brandon Taylorian, and marks the point between that which is considered pre-Astronist and that which is considered post-Astronist.

Four Orientations of Sentientology - in sentientology of Astronist Philosophy, the appellation collectively relating to four distinct approaches contemplations and theories within sentientology.

Fourth Generation - in Astronist Genealogy, the term used to describe the group of Astronist descendants three generations after Jesse Millette, whom belongs to the First Generation.

Fractionalism - a school of thought in The Philosophy of Astronism that emphasises the importance of individual parts of philosophical concepts, rather than the philosophy as a whole, and so, would rather speak of specific philosophical ideas and theories rather than speak of the philosophy generally.

Derivatives
Fractionalist
Fractionalistic

Fractionated Equationality - in Equational Philosophy, as part of wider Astronist Philosophy, a version of a subment that has been broken down into separated parts so as to express the most basic amounts of each entity and each extringent.

Fractionation

- in Equational Philosophy, as part of wider Astronist Philosophy, is the ammentation whereby the subment is simplified to the point at which each entity and each extringent is explicitly expressed in the equation.
- in Astronist Philosophy, the process of breaking down a philosophical concept, notion, or theory into its component parts so as to better contemplate and apply it.

Derivatives

Fractionate

Fractionating

Fractionatory

Fractionational

Fractionationally

Fractionative

Fractionatively

Fractionated

Fraîchement - in Astronist Philosophy, a philosophical concept that is newly introduced into a school of thought of the Astronist philosophical tradition.

Framentry - in Astronist Architecture, a type of window frame, or the frame of an astronomique that features cosmical ornamentation patterns.

Derivatives

Framentries

Framing - in Astronist Ornamentation, the process of framing an ornamentation, typically an illustrative ornamentation, but may also refer to the encasing of an ornamental relief.

Franchement - in Astronist Philosophy, relating openness and frankness during a philosophical argumentation as opposed to speaking in riddles, allegories, and analogies.

FrancoAstronistisation - the specific Astronistisation of French society, either in a macro or micro form.

Derivatives

FrancoAstronistisationism

Francophone - in Astronist Philosophy, relating to philosophical argumentations that take place in the French language.

Fraser - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Fraserian

Fraseric

Fratie - in Astronist Art, Architecture, Rendition, Philosophy, and Literature, relating to any representation, depiction, or reference to siblings, and the relationship between siblings.

Freedom of Philosophy - the right to associate oneself with whichever philosophy one chooses.

Freespace - regions of space that are not occupied, and are not considered to be sovereign territories of any political organisation, or group.

Derivatives

Freespatial

Freethought Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Freethought ideas, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Freevision - the concept branching from Astronist Philosophy holding that firstly, the ambitions of people in the form of visions for the progressive future should be held in the highest regard as they are the innovators pushing societies toward a more prosperous future. Secondly, the concept stipulates that the knowledge of the cosmos and all entities beyond Earth should be of central focus and it is the strengthening, widening and deepening of humanity's vision of the universe that will lead to the greatest advancements in knowledge, technology and divine understanding.

Derivatives

Freevisionist

Freevisionistic

French Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and politics in the French Republic.

French Guianese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in French Guiana.

French Polynesian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in French Polynesia.

Frequency - in an Astronist contextualisation, the rate at which a particular meeting, event, or procedure occurs.

Frequential - in Astronist Philosophy, the instance, fact, or characteristic of being frequent, either physically, conceptually, or metaphorically.

Derivatives

Frequentially

Frequentiality

Frettition - in Astronist Ornamentation, a repeating ornamental design of vertical or horizontal direction.

Friendly Space - regions of space that are occupied territories of an organisation, or group with which the speaker is considered to be in good relations.

Frisitius - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second son of Zorianna and Xatius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Frisitian

Front-facing - used in an Astronist commercial and digital context, relating to a website, or web-based application, especially a directory or an archive, that is totally accessible and navigable by the public, as opposed to an inward-facing web-based application whereby only members, or authorised individuals can access the entire database.

Frontispiece - in Astronist Ornamentation, a type of ornamentation typically found above, or around the entrance to an Astronist philosophical building of any kind.

Fru mentum - in Astronist Philosophy, relating to any one single word within The Grand Centrality of The Philosophy of Astronism.

Derivatives

Fru mentums

Fulciate - in Astronist Philosophy, to strengthen and defend a philosophical concept, or an entire philosophical tradition, especially in the face of repeated attacks with the intention of making the philosophical tradition, or concept obsolete.

Derivatives

Fulciated

Fulciating

Fulciator

Fulciatress

Fulciative

Fulciatively

Full Dispersion - in Astronist Philosophy, a concept within heliology denoting the point at which a star reaches its fullest physical extent after rapid physical expansion, before retracting and collapsing, and eventually creating a supernova.

Fullest physical extent - in Astronist Philosophy, a concept derived from the discipline of heliology denoting the point at which a celestial entity reaches its largest physicality and is typically followed by some form of retraction and collapse.

Functional constituent - an governmental organisation, non-profit organisation, or corporation granted senatorial or representative rights to hold a place in The Astronist Congress.

Functionalist Philosophy - a school of thought in The Philosophy of Astronism holding that philosophy should be in all its aspects functional and applicable to the real world, and should not be characterised by ostentatiousness or overly distinct architectural, artistic, or cultural movements, and would be the antithesis to Beautificationism.

Derivatives

Functionalism

Functionalistic

Functionality

- in Astronist Philosophy, one of the central components and instruments of study to Cosmic Philosophy, as a derivation of The Philosophy of Astronism, holding that celestial entities, as well as The Cosmos, and The Universe themselves all have specific functions, and ways in which they conduct these functions, and explores these functions through the incorporation of the purpose, nature, and origin of the entity in question.
- a large branch of study in Astronist Philosophy within the wider Astronomy dealing with the way in which something functions, and how this may affect the nature of the entity in question.

Derivatives

Functionalities

Functionist

Functional Purposity - in Astronist Philosophy, the appellation for the instance in which an entity's purpose is derived directly and solely from its functionality, and is the oppositism to Ethereal Purposity.

Functionative - in Astronist Philosophy, relating to cosmical function, and the ability of a celestial to be functional in alignment with the cosmical system and order.

Derivatives

Functionatively

Fundamentality - in Astronist Philosophy, a prominent instrument of study addressing and contemplating the most foundational and necessary aspects to a celestial entity, or a cosmical event.

Derivatives

Fundamentalities

Fundamentary - in Astronist Philosophy, often titled as The Fundamental, collectively relating to that which The Institution of The Philosophy of Astronism considers to be the most fundamental tenets and beliefs of The Philosophy of Astronism rather than relating to the peripheral aspects of The Philosophy.

Furcate - in an Astronist contextualisation, a philosophical denomination, or school of The Philosophy of Astronism, relating the process of such splitting into two branches, typically because of differing views.

Derivatives

Furcative

Furcation

Furtherafter - in Astronist Philosophy and omnidoxicology, a popular term denoting that which occurs or exists for a long period of time after something else.

Furthererso - in Astronist Philosophy and omnidoxicology, as an addition to a notion, and is a popular adverb used in The Omnidoxo.

Furthestmost - in Astronist Philosophy, a frequently used adjective in The Omnidoxo relating to that which is furthest away from something, either physically, or conceptually.

Furva - in Astronist Architecture, a type of fence directly associated with a pellenium that is almost always cosmically ornamented, and is typically found on just one side of the pellenium structure and is typically white in colour.

Derivatives

Furvas

Furval

Fusionalism - a school of thought in The Philosophy of Astronism holding that when two or more schools, or branches of the philosophy are conjoined together, then that is when the greatest applications, knowledges, and practical integrations of the philosophy can be realised, and thus, is the antithesis to Seclusionism.

Derivatives

Fusionalist

Fusionalistic

Fusionist Cosmology - in Astronist Philosophy, a type of cosmos holding that all that does exist within The Cosmos, does so according to a fusion of elements, entities, events, and destinies.

Fusionality - a prominent instrument of study in Astronist Philosophy, specifically Cosmic Philosophy, dealing with the nature and process of celestial entities fusing together, and what this process may infer about cosmogony and the nature of galaxies, other celestial entities, and The Cosmos as a whole.

Derivatives

Fusionalities

Fusionism - in Astronist Philosophy, an approach to understanding The Cosmos only as a mixture of celestial elements to form one entity of The Cosmos.

Derivatives

Fusionist

Fusionnement - in Astronist Philosophy, the act of fusing two or more philosophical concepts, schools, or disciplines together to form a new entity.

Futural - in Astronist Philosophy, referring to future times in relation to the present time of its application.

Derivatives

Futurally

Futurial

Futurially

Futureview - a particular type of worldview focusing on the future, and a certain philosophy, or religion's views of the future of humanity and how to attain such a future, and is a concept that is closely associated with The Philosophy of Astronism.

Futurity - in an Astronist contextualisation, relating to a future event, or occurrence that is certain to happen, or may relate to the future of something and its predicted path.

Derivatives

Futurities

Futurity Epoch - in Astronist Philosophy, a period in epochology characterised by the future of The Cosmos in relation to the Present Epoch and is characterised by the three appellated occurrences: The Humanic Exploration of The Cosmos, The Maturity of Progeny, and The Ultimiation of The Cosmos and The Universe.

Futurocentric - in Astronist Philosophy, of a philosophical orientation, school of thought, or concept, to be centred on the future generally and the events of the future, as the Astronist Tradition considers itself, rather than those events of the past, or those in a mythical or historical context.

Derivatives

Futurocentricity

Futurocentrically

Fyodor - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the nineteenth and final offspring of Julius and Euphemia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Fyodorian

Fytapheen - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the daughter of Sicilia and Gornen, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Fytapheeanian

370 terms

Gabonese Éclaircissement - the root term for Gabonese Astronism.

Gabonese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Gabonese Republic.

Gagarin Year - in The Standard Astronomical Calendar, the year of 1961 when relating to the moment in which Yuri Alekseyevich Gagarin was the first human being to travel into outer space, and is another term for the Exploratory Commencement, or EC, and may also go by the names of Year Zero, or Year Infinitum.

Gaillard - in Astronist Philosophy, to have strength in one's philosophical argument during an argumentation.

Gamberge - in Astronist Philosophy, of a debater and philosopher, to be hard-thinking and brooding during a philosophical argumentation, rather than active and talkative.

Gamonym - a type of term bestowed upon an Astronist character due to marriage, an example of which would be Ellena Millette, instead of Ellena Chadwell, after the canonical marriage of the Astronist characters of Ellena and Jesse.

Derivatives

Gamonymic

Gamonymity

-gal - in Astronist Onomatology, a suffix used for Astronist names, in reference to the galaxies of The Cosmos.

Gal- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the galaxies of The Cosmos.

-gala - in Astronist Onomatology, a suffix used for Astronist names, in reference to the galaxies of The Cosmos.

Gala- - in Astronist Onomatology, a prefix used for Astronist names, in reference to galaxies.

Galacapital - in Astronist Architecture, a type of capital with a galactical ornamentation.

Derivatives

Galacapitals

Galactical - in Astronist Philosophy, resembling a galaxy either in size, order or complexity.

Derivatives

Galacticality

Galactically

Galacticity

Galactication - the depiction of galaxies, planetary systems, and larger cosmic entities in the creation of patterns and ornamentations, especially in Astronist Ornamentation.

Galactic Cannibalism - in kosmetrics of Astronist Philosophy, the appellation for the instance in which a larger galaxy overwhelms and consumes a smaller galaxy.

Galactic Coordination - in cosmotopography of Astronist Philosophy, the process and practice of finding, contemplating, and structuring the coordinates of firstly, The Milky Way galaxy, and afterwards, all the other galaxies of The Cosmos for the purposes of galactic navigation.

Galactic Core - in kosmetrics of Astronist Philosophy, the appellation for the centre portion of a galaxy, inside which the Galactic Nucleus resides.

Galactic Death - in kosmetrics of Astronist Philosophy, the appellation for the third stage of the galactical process of Galactic Evolution involving galaxy death and the occurrences involved during such a process.

Galactic Diameter - in kosmetrics of Astronist Philosophy, the appellation for the full diameter of a particular galaxy.

Galactic Encounter - in kosmetrics of Astronist Philosophy, the appellation for the instance in which two galaxies collide with one another, typically resulting in them merging together.

Galactic Equator - in kosmetrics of Astronist Philosophy, the appellation for the equator of a particular galaxy.

Galactic Evolution - in kosmetrics of Astronist Philosophy, a galactical process relating to the way in which a galaxy develops, and involves Galactic Formation, Galactic Mergence, and Galactic Death.

Galactic Formation

- in kosmetrics of Astronist Philosophy, the appellation for the first stage of the galactical process of Galactic Evolution involving the occurrences during the initial existence of a galaxy.
- a major branch of formatology dealing with the formations of galaxies from a purely philosophical perspective.

Galactic Halo - in Astronist Philosophy, a glow emitted from a galaxy, considered an important subject of Cosmic Devotion by some.

Galacticism - a branch of knowledge in The Philosophy of Astronism concerning the study of galaxies specifically, and places all centrality on galactical formation, structure, and destruction.

Derivatives

Galacticist

Galacticistic

Galacticistical

Galacticistically

Galactic Mergence - in kosmetrics of Astronist Philosophy, the appellation for the second stage of the galactical process of Galactic Evolution involving the instance in which galaxies merge together to form supergalaxies and then superclusters of galaxies.

Galactic Mergenics - in Astronist Philosophy, a branch of mergenics dealing with the instances and processes in which galaxies merge together.

Galactico - in Astronist Art, the act of painting one's face, or someone else painting one's face, to form a series of galactical and cosmical patterns across the face and body.

Galactic Nucleus - in kosmetrics of Astronist Philosophy, the appellation for the deep core of a galaxy, typically a supermassive black hole, and sits within the Galactic Core.

Galactic Parallax - in parallactics of Astronist Philosophy, one of the five types of parallax to be found involving galaxies, supergalaxies, and globulars.

Galactic Plane - in kosmetrics of Astronist Philosophy, the appellation for the dimensional plane upon which a galaxy is structured and shaped.

Galactic Poles - in kosmetrics of Astronist Philosophy, the collective appellation for the two poles of a galaxy, including the Dextral Pole, and the Sinistral Pole.

Galactic Radius - in kosmetrics of Astronist Philosophy, the appellation for the radius of a particular galaxy.

Galactox - part of The Standard Astronomical Calendar, the alternative name for the Gregorian day of Sunday

-galax - in Astronist Onomatology, a suffix used for Astronist names, in reference to the galaxies of The Cosmos.

Galax- - in Astronist Onomatology, a prefix used for Astronist names, in reference to galaxies.

Galaxation - in Astronist Philosophy, particularly within Cosmic Alchemy, the third of The Eleven Cosmo-Alchemic Processes involving the processes, chemical practices, and alchemical theories involving galaxies in general, but particularly The Milky Way.

Derivatives

Galaxational

Galaxationally

Galaxine

- in Astronist Ornamentation, the specific depiction of a galaxy, particularly with its arms and overall size exaggerated and particularly when depicted alongside other spiral galaxies.
- part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of October.

Galaxism - a branch of knowledge in The Philosophy of Astronism concerning the study and centrality on intergalactic entities, and holds the concept that galaxies hold the ultimate answers to the mysteries of The Universe.

Derivatives

Galaxic

Galaxical
Galaxist
Galaxically

Galaxometrics - also known as galaxometry, a subdiscipline of kosmetrics in Astronist Philosophy dealing with the positions, motions, shapings, and magnitudes of galaxies in a similar way to the branch of astrometry and planetometry.

Derivatives

Galaxometry
Galaxometrist
Galaxometrists
Galaxometric
Galaxometrical
Galaxometrically
Galaxometricity

Galaxonym - a type of term relating to the name of a galaxy as appointed by an Astronist organisation.

Derivatives

Galaxonymic
Galaxonymity

Galaxy Day - in The Grand Astronist Calendar, also known as Galaxies Day, a day of commemoration and celebration dedicated to the specific wondermentation, adoration, and laudation of the galaxies of The Cosmos, as distinct from The Milky Way itself, and is characterised by decorations of galaxies, competitions, festivals, and special lectures and education events at Astronist philosophical buildings that focus on the subject of galaxies. This always takes place on 83rd Oliverine, which translates to the 27th September in the Gregorian calendar.

Derivatives

Galaxies Day

-galil - in Astronist Onomatology, a suffix used for Astronist names, in reference to the extolled astronomer, Galileo Galilei.

Galil- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the extolled astronomer, Galileo Galilei.

Galine - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the fifteenth offspring of Julius and Euphemia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Galinian

Gallantry - in an Astronist contextualisation, relating to the undisputed respect that must be given to women within The People's Constitutional Company of Jesse Millette, and is most commonly displayed by allowing all female members of a meeting into the meeting room before the male members.

Derivatives

Gallantries

Gallery - in Astronist Architecture, a type of corridor within an Astronist building that is structured by at least twenty columns on either side of the corridor.

Derivatives

Galleries

Gallery Garden - in Astronist Architecture, as part of gardenry, a type of garden which is looked down upon from a gallery.

Galvin - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Galvinic

Galvinian

Gambian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Islamic Republic of the Gambia.
- the denomination of The Philosophy of Astronism that is most widely followed in The Gambia, by the Gambian peoples.

Gânditor - the most common demonym for a follower of The Philosophy of Astronism in the Romanian language.

Derivatives

Gânditori

Gânditors

Ganman - a follower of the Georgian denomination of The Philosophy of Astronism, known as Ganmanat'lebloba'ism.

Derivatives

Ganmans

Ganmanat'lebloba'ism - also known as Georgian Astronism, and as Kosmosshi, the denomination of The Philosophy of Astronism predominantly adhered to in the nation of Georgia, and those speaking the language of Georgian.

Derivatives

Ganmanat'lebloba'ist

Ganzetry - a type of entryway to an Astronist philosophical building, characterised by a wide width resembling a semicircular shape, and acts as the opposite to an einetry.

Derivatives

Ganzetries

Gara'sho - The School of Intellectuality in Astration as known in the Somali language.

Gardenia - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Gardenian

Gardenic

Gardenry - in Astronist Architecture, also known as Demesnery, and Estatuary, the practical application, and study of garden landscaping, outbuilding architecture, and garden structures in the estates of Astronist buildings, and is subsequently followed by the essaying of the theory of such architectures.

Derivatives

Gardenist

Gargantial - in Astronist Philosophy, relating to a celestial larger than a planet, or a single star system.

Gargantial Family - in familiology of Astronist Philosophy, one of The Seven Cosmical Families including large scale celestials, such as galaxies, stellar streams, black holes, and quasars, the familiarch of which are galaxies.

Gargantua - in Astronist Philosophy, the appellation pertaining to the black hole at the centre of The Milky Way galaxy.

Gargantuance - in Astronist Philosophy, that which is of extremely enormous size, even on a cosmic scale, typically only used to describe a supermassive black hole.

Derivatives

Gargantuancy

Gargantuate - in Astronist Philosophy, to either physically plan and construct, or to imagine the construction and establishment of planetwide civilisations on worlds other than The Earth.

Derivatives

Gargantuation

Gargantuational

Gargantuative

Gargantuatively

Gargantuating

Gargantuated

Gargantuater

Gargantuaters

Garland - in Astronist Ornamentation, the part of an ornament resembling a wreath of flowers and leaves along the coronet of the ornament, or the along the footer of the ornament.

Garmenture - in Astronist Literature, the overall clothing style of a particular Astronist character.

Derivatives

Garmentural

Garmenturally

Garniture - in Astronist Naology, collectively relating to the interiors and furnishings of Astronist philosophical buildings.

Gasfield - in Astronist Philosophy, an alternative appellation for a nebula, especially those on large scales.

Derivatives

Gasfields

Gasism - in Astronist Philosophy, one of the three philosophies within Contental Philosophy focusing on the formations, structures, and natures of gaseous planets.

Derivatives

Gasist

Gasists

Gasity - in structurology of Astronist Philosophy, the measurement and contemplation of the state of matter of gas.

Derivatives

Gasities

Gatekeeper - in an Astronist contextualisation, the individuals appointed to guard the room in which the original Founding Works are stored in the headquarters of The People's Constitutional Company of Jesse Millette.

Derivatives

Gatekeepership

Gateway - the part of any patch or emblem which protrudes both the plate, the manning, if applicable, and the trajectory, and thus forms an irregular perimeter.

Gauchir - in Astronist Art, and Rendition, of an artist or renderer, to distort or misrepresent an Astronist character, especially in such a way that is unconstitutional.

Gaudium - in Astronist Philosophy, the combination of the feelings of joy, delight, and happiness about one's adherence to The Philosophy of Astronism.

Gauntfield - in Astronist Civicology, the thin and sometimes indistinct line of boundary of the edge of a city or town.

Gedeon - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Gedeonian

Gedeonic

Gegeer - a follower of the Mongolian denomination of The Philosophy of Astronism, known as Gegeerelism.

Derivatives

Gegeers

Gegeerel - the root term for Mongolian Astronism.

Gegeerelism - also known as Mongolian Astronism, the denomination of The Philosophy of Astronism most predominantly found in Mongolia, and in the Mongol populations in neighbouring countries, as well as in Mongol diasporas globally, especially in those whom still affiliate themselves with the nation of Mongolia.

Derivatives

Gegeerelist

Genavieve - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Genavievean

Genavievic

Gender (Cosmos) - an Astronist Subject dealing with topics of gender identity in societies offearth, especially when in relation to the laws laid down by the governments of such societies.

Derivatives

Cosmic Gender

Genderlessness - the state of being without a gender identity.

Genealogical Tree - in an Astronist contextualisation, specifically in Astronist Genealogy, a type of chart displaying an inverted branching tree which shows the lines of descent from a particular Astronist character.

General Cosmical Principles - an Astronist Subject dealing with the general principles of the exploration of The Cosmos and of life in The Cosmos on another planet, celestial body, space station, or spaceship, and greatly contributes to the overall Cosmic Philosophy.

Generality - in an Astronist contextualisation, a type of speech made which does not specify in its meaning, or message.

General Philosophy - in Astronist Philosophy, the appellation referring to all non-Astronist branches of philosophy and philosophical discourse and study from the perspective of the Astronist Tradition.

Genesis Theory - in Astronist Philosophy, a branch of study dealing with the nature and differences between various geneses, two of which include regeneration and degeneration.

Gentiment - in Astronist Philosophy, during a philosophical argumentation, to remain polite, composed, and gentlemanly, or ladylike, especially when faced with disagreement and dispute.

Derivatives

Gentimental

Gentimentally

Gentimentality

Genuinity - the state or fact of being true to what one claims, especially when verified to be as such by an authenticator.

Derivatives

Genuinity

Genuinities

Geocentricity - in Astronist Philosophy, to live, to think, and to act in terms of The Earth, or in relation to The Earth alone, especially when in opposition to thinking, living, and acting in terms of The Cosmos which is defined as cosmocentricity; geocentricity is considered to be a notion and orientation of narrowness according to the Astronist Tradition.

Derivatives

Geocentrics

Geocentrist

Geocentricist

Geocentricistic

Geocentricistic

Geodemography

- the study of the selection, evolution and success of settlements and civilisations, especially those most influenced by the surrounding geography of the region.
- the application of geographical and demographical information for business, research, and governmental usage, especially when searching for information of population clusterings due to the geography of the surrounding of the region.

Derivatives

Geodemographic

Geodemographical

Geometric Flooring - in Astronist Architecture, a style of flooring within some rooms of Astronist buildings which involves a vast range of geometrical patterns, typically of a cosmical theme, and separated into different sections, or quadrants.

GeoNomono - a gigantic tortoise beast of Astronist Mythology, that roams the grasslands and jungles of the mythical realm and is said to hold high wisdom of The Cosmos.

Geonym - a type of term relating to the name of a geographic feature of a celestial entity as appointed by an Astronist organisation.

Derivatives

Geonymic

Geonymity

Georgian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Georgia.

Georgic - in an Astronist contextualisation, relating to a type of Astronist book that holds a pastoral, or rural setting for the majority of its narrative.

Geostrategy - in an Astronist contextualisation, the plans devised by The People's Constitutional Company of Jesse Millette, and its Ministry of Foreign Relations in order to tackle certain geopolitical issues the Company faces.

Derivatives

Geostrategist
Geostrategic
Geostrategically

Generalism - a school of thought in The Philosophy of Astronism that relates to the concept of philosophy affecting and concerning all parts of every subject, and thus argues for the reinstatement of philosophy in culture, government, and its generally much broader promotion, and understanding as the subject of all subjects.

Derivatives
Generalarian
Generalistic

Generationalism - a school of thought in The Philosophy of Astronism focusing on the differences between one generation's interpretations, applications, and consequences of the philosophy, and another generation's, and typically holds the viewpoint that with each generation passing, the philosophy and its interpretations, applications, and consequences will only get clearer, more efficient, and more beneficial.

Derivatives
Generationalist
Generationalistic

Harrietarian-Czech Character Representation - the specific representation of the Astronist character of Harriet in Czechia, including all its variations.

Harrietarian-Danish Character Representation - the specific representation of the Astronist character of Harriet in Denmark, including all its variations.

Harrietarian-Djiboutian Character Representation - the specific representation of the Astronist character of Harriet in Djibouti, including all its variations.

Harrietarian-Dominican Character Representation - the specific representation of the Astronist character of Harriet in both the Dominican Republic, and in Dominica, including all its variations.

Harrietarian-Dutch Character Representation - the specific representation of the Astronist character of Harriet in the Netherlands, including all its variations.

Harrietarian-Ecuadoran Character Representation - the specific representation of the Astronist character of Harriet in Ecuador, including all its variations.

Harrietarian-Egyptian Character Representation - the specific representation of the Astronist character of Harriet in Egypt, including all its variations.

Harrietarian-Emirati Character Representation - the specific representation of the Astronist character of Harriet in the United Arab Emirates, including all its variations.

Harrietarian-Equatorial Guinean Character Representation - the specific representation of the Astronist character of Harriet in Equatorial Guinea, including all its variations.

Harrietarian-Eritrean Character Representation - the specific representation of the Astronist character of Harriet in Eritrea, including all its variations.

Harrietarian-Estonian Character Representation - the specific representation of the Astronist character of Harriet in Estonia, including all its variations.

Harrietarian-Ethiopian Character Representation - the specific representation of the Astronist character of Harriet in Ethiopia, including all its variations.

Harrietarian-Falkland Islands Character Representation - the specific representation of the Astronist character of Harriet in the Falkland Islands, including all its variations.

Harrietarian-Faroese Character Representation - the specific representation of the Astronist character of Harriet in the Faroe Islands, including all its variations.

Harrietarian-Fijian Character Representation - the specific representation of the Astronist character of Harriet in Fiji, including all its variations.

Harrietarian-Filipino Character Representation - the specific representation of the Astronist character of Harriet in the Philippines, including all its variations.

Harrietarian-Finnish Character Representation - the specific representation of the Astronist character of Harriet in Finland, including all its variations.

Harrietarian-French Guianese Character Representation - the specific representation of the Astronist character of Harriet in French Guiana, including all its variations.

Harrietarian-French Character Representation - the specific representation of the Astronist character of Harriet in France, including all its variations.

Harrietarian-French Polynesian Character Representation - the specific representation of the Astronist character of Harriet in French Polynesia, including all its variations.

Harrietarian-Gabonese Character Representation - the specific representation of the Astronist character of Harriet in Gabon, including all its variations.

Harrietarian-Gambian Character Representation - the specific representation of the Astronist character of Harriet in the Gambia, including all its variations.

Harrietarian-Georgian Character Representation - the specific representation of the Astronist character of Harriet in Georgia, including all its variations.

Harrietarian-German Character Representation - the specific representation of the Astronist character of Harriet in Germany, including all its variations.

Harrietarian-Ghanaian Character Representation - the specific representation of the Astronist character of Harriet in Ghana, including all its variations.

Harrietarian-Greek Character Representation - the specific representation of the Astronist character of Harriet in Greece, including all its variations.

Harrietarian-Greenlandic Character Representation - the specific representation of the Astronist character of Harriet in Greenland, including all its variations.

Harrietarian-Grenadian Character Representation - the specific representation of the Astronist character of Harriet in Grenada, including all its variations.

Harrietarian-Guamanian Character Representation - the specific representation of the Astronist character of Harriet in Guam, including all its variations.

Harrietarian-Guatemalan Character Representation - the specific representation of the Astronist character of Harriet in Guatemala, including all its variations.

Harrietarian-Guinean Character Representation - the specific representation of the Astronist character of Harriet in Guinea, including all its variations.

Harrietarian-Guyanese Character Representation - the specific representation of the Astronist character of Harriet in Guyana, including all its variations.

Harrietarian-Haitian Character Representation - the specific representation of the Astronist character of Harriet in Haiti, including all its variations.

Harrietarian-Honduran Character Representation - the specific representation of the Astronist character of Harriet in Honduras, including all its variations.

Harrietarian-Hong Kongese Character Representation - the specific representation of the Astronist character of Harriet in Hong Kong, including all its variations.

Harrietarian-Hungarian Character Representation - the specific representation of the Astronist character of Harriet in Hungary, including all its variations.

Harrietarian-Icelandic Character Representation - the specific representation of the Astronist character of Harriet in Iceland, including all its variations.

Harrietarian-Indian Character Representation - the specific representation of the Astronist character of Harriet in India, including all its variations.

Harrietarian-Indonesian Character Representation - the specific representation of the Astronist character of Harriet in Indonesia, including all its variations.

Harrietarian-Iranian Character Representation - the specific representation of the Astronist character of Harriet in Iran, including all its variations.

Harrietarian-Iraqi Character Representation - the specific representation of the Astronist character of Harriet in Iraq, including all its variations.

Harrietarian-Irish Character Representation - the specific representation of the Astronist character of Harriet in Ireland, including all its variations.

Harrietarian-Israeli Character Representation - the specific representation of the Astronist character of Harriet in Israel, including all its variations.

Harrietarian-Italian Character Representation - the specific representation of the Astronist character of Harriet in Italy, including all its variations.

Harrietarian-Ivorian Character Representation - the specific representation of the Astronist character of Harriet in the Ivory Coast, including all its variations.

Harrietarian-Jamaican Character Representation - the specific representation of the Astronist character of Harriet in Jamaica, including all its variations.

Harrietarian-Japanese Character Representation - the specific representation of the Astronist character of Harriet in Japan, including all its variations.

Harrietarian-Jordanian Character Representation - the specific representation of the Astronist character of Harriet in Jordan, including all its variations.

Harrietarian-Kazakh Character Representation - the specific representation of the Astronist character of Harriet in Kazakhstan, including all its variations.

Harrietarian-Kenyan Character Representation - the specific representation of the Astronist character of Harriet in Kenya, including all its variations.

Harrietarian-Kiribati Character Representation - the specific representation of the Astronist character of Harriet in Kiribati, including all its variations.

Harrietarian-Kittitian-Nevisian Character Representation - the specific representation of the Astronist character of Harriet in Saint Kitts and Nevis, including all its variations.

Harrietarian-Korean Character Representation - the specific representation of the Astronist character of Harriet in Korea, including all its variations.

Harrietarian-Kosovar Character Representation - the specific representation of the Astronist character of Harriet in Kosovo, including all its variations.

Harrietarian-Kurdish Character Representation - the specific representation of the Astronist character of Harriet in the Kurdish populated regions, including all its variations.

Harrietarian-Kuwaiti Character Representation - the specific representation of the Astronist character of Harriet in Kuwait, including all its variations.

Harrietarian-Kyrgyz Character Representation - the specific representation of the Astronist character of Harriet in Kyrgyzstan, including all its variations.

Harrietarian-Laotian Character Representation - the specific representation of the Astronist character of Harriet in Laos, including all its variations.

Harrietarian-Latvian Character Representation - the specific representation of the Astronist character of Harriet in Latvia, including all its variations.

Harrietarian-Lebanese Character Representation - the specific representation of the Astronist character of Harriet in Lebanon, including all its variations.

Harrietarian-Liberian Character Representation - the specific representation of the Astronist character of Harriet in Liberia, including all its variations.

Harrietarian-Libyan Character Representation - the specific representation of the Astronist character of Harriet in Libya, including all its variations.

Harrietarian-Liechtenstein Character Representation - the specific representation of the Astronist character of Harriet in Liechtenstein, including all its variations.

Harrietarian-Lithuanian Character Representation - the specific representation of the Astronist character of Harriet in Lithuania, including all its variations.

Harrietarian-Luxembourgish Character Representation - the specific representation of the Astronist character of Harriet in Luxembourg, including all its variations.

Harrietarian-Macanese Character Representation - the specific representation of the Astronist character of Harriet in Macau, including all its variations.

Harrietarian-Macedonian Character Representation - the specific representation of the Astronist character of Harriet in Macedonia, including all its variations.

Harrietarian-Malagasy Character Representation - the specific representation of the Astronist character of Harriet in Madagascar, including all its variations.

Harrietarian-Malawian Character Representation - the specific representation of the Astronist character of Harriet in Malawi, including all its variations.

Harrietarian-Malaysian Character Representation - the specific representation of the Astronist character of Harriet in Malaysia, including all its variations.

Harrietarian-Maldivian Character Representation - the specific representation of the Astronist character of Harriet in the Maldives, including all its variations.

Harrietarian-Malian Character Representation - the specific representation of the Astronist character of Harriet in Mali, including all its variations.

Harrietarian-Maltese Character Representation - the specific representation of the Astronist character of Harriet in Malta, including all its variations.

Harrietarian-Manx Character Representation - the specific representation of the Astronist character of Harriet on the Isle of Man, including all its variations.

Harrietarian-Marshallese Character Representation - the specific representation of the Astronist character of Harriet in the Marshall Islands, including all its variations.

Harrietarian-Martinican Character Representation - the specific representation of the Astronist character of Harriet in Martinique, including all its variations.

Harrietarian-Mauritanian Character Representation - the specific representation of the Astronist character of Harriet in Mauritania, including all its variations.

Harrietarian-Mauritian Character Representation - the specific representation of the Astronist character of Harriet in Mauritius, including all its variations.

Harrietarian-Mahoran Character Representation - the specific representation of the Astronist character of Harriet in Mayotte, including all its variations.

Harrietarian-Mexican Character Representation - the specific representation of the Astronist character of Harriet in Mexico, including all its variations.

Harrietarian-Micronesian Character Representation - the specific representation of the Astronist character of Harriet in Micronesia, including all its variations.

Harrietarian-Moldovan Character Representation - the specific representation of the Astronist character of Harriet in Moldova, including all its variations.

Harrietarian-Monacan Character Representation - the specific representation of the Astronist character of Harriet in Monaco, including all its variations.

Harrietarian-Mongolian Character Representation - the specific representation of the Astronist character of Harriet in Mongolia, including all its variations.

Harrietarian-Montenegrin Character Representation - the specific representation of the Astronist character of Harriet in Montenegro, including all its variations.

Harrietarian-Montserratian Character Representation - the specific representation of the Astronist character of Harriet in Montserrat, including all its variations.

Harrietarian-Moroccan Character Representation - the specific representation of the Astronist character of Harriet in Morocco, including all its variations.

Harrietarian-Mozambican Character Representation - the specific representation of the Astronist character of Harriet in Mozambique, including all its variations.

Harrietarian-Namibian Character Representation - the specific representation of the Astronist character of Harriet in Namibia, including all its variations.

Harrietarian-Nauruan Character Representation - the specific representation of the Astronist character of Harriet in Nauru, including all its variations.

Harrietarian-Nepalese Character Representation - the specific representation of the Astronist character of Harriet in Nepal, including all its variations.

Harrietarian-New Caledonian Character Representation - the specific representation of the Astronist character of Harriet in New Caledonia, including all its variations.

Harrietarian-New Zealand Character Representation - the specific representation of the Astronist character of Harriet in New Zealand, including all its variations.

Harrietarian-Nicaraguan Character Representation - the specific representation of the Astronist character of Harriet in Nicaragua, including all its variations.

Harrietarian-Nigerien Character Representation - the specific representation of the Astronist character of Harriet in Niger, including all its variations.

Harrietarian-Nigerian Character Representation - the specific representation of the Astronist character of Harriet in Nigeria, including all its variations.

Harrietarian-Niuean Character Representation - the specific representation of the Astronist character of Harriet in Niue, including all its variations.

Harrietarian-Norwegian Character Representation - the specific representation of the Astronist character of Harriet in Norway, including all its variations.

Harrietarian-Omani Character Representation - the specific representation of the Astronist character of Harriet in Oman, including all its variations.

Harrietarian-Pakistani Character Representation - the specific representation of the Astronist character of Harriet in Pakistan, including all its variations.

Harrietarian-Palauan Character Representation - the specific representation of the Astronist character of Harriet in Palau, including all its variations.

Harrietarian-Palestinian Character Representation - the specific representation of the Astronist character of Harriet in Palestine, including all its variations.

Harrietarian-Panamanian Character Representation - the specific representation of the Astronist character of Harriet in Panama, including all its variations.

Harrietarian-Papua New Guinean Character Representation - the specific representation of the Astronist character of Harriet in Papua New Guinea, including all its variations.

Harrietarian-Paraguayan Character Representation - the specific representation of the Astronist character of Harriet in Paraguay, including all its variations.

Harrietarian-Peruvian Character Representation - the specific representation of the Astronist character of Harriet in Peru, including all its variations.

Harrietarian-Polish Character Representation - the specific representation of the Astronist character of Harriet in Poland, including all its variations.

Harrietarian-Portuguese Character Representation - the specific representation of the Astronist character of Harriet in Portugal, including all its variations.

Harrietarian-Puerto Rican Character Representation - the specific representation of the Astronist character of Harriet in Puerto Rico, including all its variations.

Harrietarian-Qatari Character Representation - the specific representation of the Astronist character of Harriet in Qatar, including all its variations.

Harrietarian-Réunionese Character Representation - the specific representation of the Astronist character of Harriet in Réunion, including all its variations.

Harrietarian-Romanian Character Representation - the specific representation of the Astronist character of Harriet in Romania, including all its variations.

Harrietarian-Russian Character Representation - the specific representation of the Astronist character of Harriet in Russia, including all its variations.

Harrietarian-Rwandan Character Representation - the specific representation of the Astronist character of Harriet in Rwanda, including all its variations.

Harrietarian-Saint Helenian Character Representation - the specific representation of the Astronist character of Harriet in Saint Helena, including all its variations.

Harrietarian-Saint Lucian Character Representation - the specific representation of the Astronist character of Harriet in Saint Lucia, including all its variations.

Harrietarian-Saint Martinois Character Representation - the specific representation of the Astronist character of Harriet in Saint Martinique, including all its variations.

Harrietarian-Salvadoran Character Representation - the specific representation of the Astronist character of Harriet in El Salvador, including all its variations.

Harrietarian-Samoan Character Representation - the specific representation of the Astronist character of Harriet in Samoa, including all its variations.

Harrietarian-Sammarinese Character Representation - the specific representation of the Astronist character of Harriet in San Marino, including all its variations.

Harrietarian-São Toméan Character Representation - the specific representation of the Astronist character of Harriet in São Tomé and Príncipe, including all its variations.

Harrietarian-Saudi Arabian Character Representation - the specific representation of the Astronist character of Harriet in Saudi Arabia, including all its variations.

Harrietarian-Senegalese Character Representation - the specific representation of the Astronist character of Harriet in Senegal, including all its variations.

Harrietarian-Serbian Character Representation - the specific representation of the Astronist character of Harriet in Serbia, including all its variations.

Harrietarian-Seychellois Character Representation - the specific representation of the Astronist character of Harriet in the Seychelles, including all its variations.

Harrietarian-Sierra Leonean Character Representation - the specific representation of the Astronist character of Harriet in Sierra Leone, including all its variations.

Harrietarian-Singaporean Character Representation - the specific representation of the Astronist character of Harriet in Singapore, including all its variations.

Harrietarian-Sino Character Representation - the specific representation of the Astronist character of Harriet in China, including all its variations.

Harrietarian-Slovak Character Representation - the specific representation of the Astronist character of Harriet in Slovakia, including all its variations.

Harrietarian-Slovenian Character Representation - the specific representation of the Astronist character of Harriet in Slovenia, including all its variations.

Harrietarian-Solomon Islands Character Representation - the specific representation of the Astronist character of Harriet in the Solomon Islands, including all its variations.

Harrietarian-Somali Character Representation - the specific representation of the Astronist character of Harriet in Somalia, including all its variations.

Harrietarian-South African Character Representation - the specific representation of the Astronist character of Harriet in South Africa, including all its variations.

Harrietarian-South Ossetian Character Representation - the specific representation of the Astronist character of Harriet in South Ossetia, including all its variations.

Harrietarian-South Sudanese Character Representation - the specific representation of the Astronist character of Harriet in South Sudan, including all its variations.

Harrietarian-Spanish Character Representation - the specific representation of the Astronist character of Harriet in Spain, including all its variations.

Harrietarian-Sri Lankan Character Representation - the specific representation of the Astronist character of Harriet in Sri Lanka, including all its variations.

Harrietarian-Sint Maartener Character Representation - the specific representation of the Astronist character of Harriet in Sint Maarten, including all its variations.

Harrietarian-Sudanese Character Representation - the specific representation of the Astronist character of Harriet in Sudan, including all its variations.

Harrietarian-Surinamese Character Representation - the specific representation of the Astronist character of Harriet in Suriname, including all its variations.

Harrietarian-Swazi Character Representation - the specific representation of the Astronist character of Harriet in Swaziland, including all its variations.

Harrietarian-Swedish Character Representation - the specific representation of the Astronist character of Harriet in Sweden, including all its variations.

Harrietarian-Swiss Character Representation - the specific representation of the Astronist character of Harriet in Switzerland, including all its variations.

Harrietarian-Syrian Character Representation - the specific representation of the Astronist character of Harriet in Syria, including all its variations.

Harrietarian-Taiwanese Character Representation - the specific representation of the Astronist character of Harriet in Taiwan, including all its variations.

Harrietarian-Tajik Character Representation -the specific representation of the Astronist character of Harriet in Tajikistan, including all its variations.

Harrietarian-Tanzanian Character Representation - the specific representation of the Astronist character of Harriet in Tanzania, including all its variations.

Harrietarian-Timorese Character Representation - the specific representation of the Astronist character of Harriet in East Timor, including all its variations.

Harrietarian-Thai Character Representation - the specific representation of the Astronist character of Harriet in Thailand, including all its variations.

Harrietarian-Togolese Character Representation - the specific representation of the Astronist character of Harriet in Togo, including all its variations.

Harrietarian-Tongan Character Representation - the specific representation of the Astronist character of Harriet in Tonga, including all its variations.

Harrietarian-Trinidadian and Tobagonian Character Representation - the specific representation of the Astronist character of Harriet in Trinidad and Tobago, including all its variations.

Hibernal - in an Astronist contextualisation, relating to the events of The People's Constitutional Company of Jesse Millette, and wider Millettaria, traditionally carried out in the winter months.

Derivatives

Hibernality

Hibernalties

Hibernally

HibernoAstronistisation - the specific Astronistisation of Irish society, either in a macro or micro form.

Derivatives

HibernoAstronistisationism

Hidaruh - in Arabic, the overarching term given for culture, specifically Astronist Culture, and all its various disciplines, and versions.

Hierarchical Cosmology - in Astronist Philosophy, the appellation for the type of cosmos considering all the entities and elements of The Cosmos, including The Cosmos itself, according to a system of rank whereby size, gravity, location, and other physical features determine one's position in the hierarchy.

Hierarchical Ultimation - in Astronist Philosophy, the concept within Hierarchical Cosmology relating the highest level of the hierarchy, and is typically taken up either by The Universe, or The Divine, usually dependent upon one's theological orientation.

Hierarchy - in an Astronist contextualisation, the entire system of structure and ranking of employees according to their role within The People's Constitutional Company of Jesse Millette, typically divided into several sections, one of which is the apex, the highest level within the hierarchy.

Derivatives

Hierarchical

Hierarchisation

Hierarchy of Physicality - in Astronist Philosophy, the appellation for one of the two principle agents of the Hierarchical Cosmology holding that entities should be considered and measured only according to their current physical states rather than their potential physical states in some future time period.

Hierarchy of Potentiality - in Astronist Philosophy, the appellation for one of the two principle agents of the Hierarchical Cosmology, and relates to the notion that hierarchy should be understood according to the capacities and abilities of the entities in question to further develop in the future so as to increase their hierarchical standing.

High Compaction - in Cosmic Art, as a derivation of Astronist Art, the level of compaction featuring very little space between stars, and holds a large amount of star clusters in the art piece.

High Concept - in an Astronist contextualisation, of a philosophical school, and its ideas, being easily communicable to the masses.

Highcosma - in Astronist Architecture, a term used in Architectural Theory to describe an especially ornate version of the Cosma style, typically characterised by its richly golden theme, the size of the canvas on which it is set, and the large size of the subject of the illustration, or painting ornamentation.

Derivatives

Highcosmal

Highers - in Astronist Philosophy, collectively referring to a celestial hierarchy that exists above another in comparison, the hierarchy of which is between moons, planets, stars, and galaxies, and this series demonstrates highership respectively which is characterised by a greater physical size, influence, and centrality in the overall cosmical system.

Derivatives

Highership

Higherhood

Highgarden - in Astronist Architecture, as part of gardenry, and used as a term in Architectural Theory, to describe a version of gardenry that is characterised by a richly golden theme of ornamentation, and ornately decorated outdoor structures.

High Level - in an Astronist contextualisation, relating to those individuals at the top of the hierarchical structure of The People's Constitutional Company of Jesse Millette.

High-minded - in an Astronist contextualisation, relating to those individuals whom adhere more closely to the principles of The Philosophy of Astronism, or The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Highmost - in Astronist Philosophy, a commonly used adjective in The Omnidoxy pertaining to that which holds the most prominent position above all others in a series, or group, especially in a conceptual context.

Derivatives

Highestmost

High Philosophy - the philosophical products of aesthetic value, usually architecture, literature, paintings, and music, which a society collectively esteems as art.

High phrontistery - in Astronist Education, collectively relating to the students of a phrontistery above the age of eleven.

High Scatterance - in Cosmic Art, as a derivation of Astronist Art, the level of scatterance featuring huge amounts of space between stars, almost to the point where only half a dozen stars are depicted.

Hindu Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Hindu thought and faith with no denominational specification, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Hinging - in Astronist Ornamentation, the part of the ornamental pattern which is cut off by a border, or bordering.

HispanoAstronistisation - the specific Astronistisation of Spanish society, either in a macro or micro form.

Derivatives

HispanoAstronistisationism

Historism - in Astronist Philosophy, the notion derived from productism holding that histories are naturally interconnected and dependent upon one another, thus forming a single history.

Derivatives

Historist

Historistic

Historistically

Historologer - as distinct from a historiologist, an individual responsible for either the management, preservation, restoration, or organisation of an historic house, or stately home.

Historologist - a scholar engaged in the study of the management, preservation, restoration, and organisation of historic houses, and stately homes, typically in a particular country, or of an area within a country.

Historology - the study of the management, preservation, restoration, and organisation of an historic house, or stately home.

Derivatives

Historological

Historologically

Hod - in Astronist Philosophy, the philophon for the discipline of hodology.

Hodiernal - in an Astronist contextualisation, relating to the present day's items of discussion during an Astronist congressional session.

Derivatives

Holianymous

Holianymity

Holographics - in Astronist Philosophy, relating to the systems, technologies, and usages of holograms, as well as the study of holograms as a discipline.

Derivatives

Holographical

Holographically

Holographer

Holography

Holonym - a type of term relating to Astronist a philosophical building, such as a planetarium, or an eidouranium.

Derivatives

Holonymic

Holonymity

Hom - in Astronist Philosophy, the philophon for the discipline of homogenology.

Homage - in an Astronist contextualisation, during a celebratory ceremony, or commemoration ceremony, paying special honour to an individual, or group for a certain act.

Homaloidal - in Astronist Philosophy, especially within Cosmic Philosophy, relating to the plane upon which cosmic entities exist; a plane that is flat by its nature but is fluxed by different pockets of gravity.

Derivatives

Homaloida

Homaloidality

Homogenaic Fact - in Astronist Philosophy, the approach that supports a completely homogenous understanding of celestials and cosmical events.

Homogenisation - in an Astronist contextualisation, the process of branding products, and subsidiary companies of The People's Constitutional Company of Jesse Millette with the same logo, most typically the Jesse Millette Sigil, in order to make them uniform and similar.

Derivatives

Homogenary

Homogenisational

Homogenisationally

Homogenology - in Astronist Philosophy, a discipline of study and philosophical discussion of the dimension in which all existence came from one origin, and the ability for one to explore every parallel chronology due to each chronology originating from the same coordinates.

Derivatives

Homogenologist

Homogenological

Homogenologically

Homogenous Flux - in firmamentology of Astronist Philosophy, the appellation for the instance in which an applied filament to an entity results in at least a similar instrumental effect.

Homologate - in an Astronist contextualisation, the expression of approval, or agreement of a congressperson during an Astronist congressional session of a proposed point of discussion.

Derivatives

Homologation

Homologative

Homologator

Homophilosophy - in Astronist Philosophy, two philosophies that are considered to hold majoratively the same ideas with only minor differences between the two.

Derivatives

Homophilosophical

Homophilosophically

Homophilosophicality

Homoscedasticity - in Astronist Philosophy, relating to a lower variation between two philosophies when compared using the instrument scedasticity. Compare with heteroscedasticity.

Derivatives

Homoscedastic

Homoscedastical

Homoscedastically

Honduran Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Honduras.

Hong Kongese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Hong Kong Special Administrative Region of the People's Republic of China.

Horizontation - in Astronist Ornamentation, the creation of patterns in a distinctly horizontal direction, especially if the rest of the ornamentation follows a vertical direction.

Horn - in Astronist Architecture, a projection at each corner of a capital, usually an Astronist character.

Hospitality (Cosmos) - an Astronist Subject dealing with the entertainment and general reception of guests and how this reflects the cultures and philosophies of the hosts, and specifically relates to this in an offearth context.

Derivatives

Cosmic Hospitality

Hostile - in an Astronist contextualisation, of an external entity to the Company, holding distorted, negative, or open opposition to the values, operations, and philosophies of The People's Constitutional Company of Jesse Millette.

Derivatives

Hostility

Hostilities

Hudud - in Arabic, the term given for the word, frontier, and most commonly relates to The Frontier region of The Milky Way Galaxy in The Astronist Astronomic, Cosmographic, Cosmological & Astrographic Methodology.

Hue - in an Astronist contextualisation, the range of versions of an Astronist characters as referred to collectively.

Hugsuður - the most common demonym for a follower of The Philosophy of Astronism in the Icelandic language.

Derivatives

Hugsuðir

Hukuma - in Arabic, the term given for government, and most often relates to the government of The People's Constitutional Company of Jesse Millette, or the ministries of The People's Constitutional Company of Jesse Millette.

Humanation - in Astronist Ornamentation, the addition of humans to an ornamentation, or pattern, especially one or more of the five Astronist characters.

Humanic - in Astronist Philosophy, relating to the human species.

Derivatives

Humanical

Humanically

Humanic Colonisation of The Cosmos - in Astronist Philosophy, the appellation for the concept considered to be an extension and successor to the Humanic Exploration of The Cosmos and involves the large scale process of humans colonisations many different habitable worlds of The Cosmos.

Humanic Exploration of The Cosmos - in Astronist Philosophy, one of the most prominent and most frequently referenced concepts in The Omnidoxy relating to the period of the history of humanity wherein there exists a collective effort to explore The Cosmos, typically referring to the initial stages of humanity's ventures beyond The Earth, and is typically reserved a term to relate to the Astronist Tradition stance on cosmic exploration.

Humanicism - in Astronist Philosophy, the doctrine holding that humanity does have a definite destiny and purpose in The Cosmos.

Derivatives

Humanicist

Humanicistic

Humanicists

Humanic Law - an Astronist Subject dealing with the laws of human interaction with non-human sentient beings.

Humanism - in Astronist Propaganda, the argued point that due to the lack of theological or religious prominence portrayed within propaganda styles, a conclusion is made that Astronist Propaganda advocates for the concepts of humanism, anthropocentrism, and a non-religious society.

Humanist - in Astronist Education, a school of thought of education theory and practice that views the individual and their potential for personal development as the central essence, purpose, and origination of one's learning and education, and believes that subjects that are best positioned to assist humanitarian problems, or the wide scale problems of the world should be prioritised for students to study.

Humanistic Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Humanist thought and ideas, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Humanity's Cosmos - in Astronist Philosophy, a type of cosmos consisting only of what humanity knows for certain to exist within The Cosmos.

Humanology

- the study of human civilisations, especially those beyond the Earth, and the potential challenges, evolutions, and advancements that humans will have to overcome and undertake in order to secure the expansion of human civilisation.
- a branch of study within Astronology dealing with the scientific study of the ideas and theories forming the role of human society under Astronist ideology, theology, methodology, and philosophy.

Derivatives

Humanological

Humanologic

Humanologically

Humanologist

Human philosophy - also known as Earth philosophy, a term first promoted by Brandon Taylorian in the development of the Astronist philosophical tradition in an attempt to define a new organisation and categorisation to the various different philosophical traditions of the future, with The Philosophy of Astronism being the first of these new philosophies. Essentially, it is held that due to the course of human history, many of the philosophical traditions developed and established themselves in isolation to one another, and they formed in either regional, ethnic, or national categories and associations. However, human philosophy, of which The Philosophy of Astronism is considered the progenitor, is a grouping of philosophies that take into consideration humanity as a whole, and developed on a human-wide and a worldwide scale, rather than in geographical, or ethnical isolation like the philosophical traditions founded prior. Human philosophy heralds a new era in the development and history of philosophy and the categorisation of new traditions that have developed without any particular association with any one people group, or any one geographic region, or nation state. It is, however, firmly held that it is only in the 21st century that the establishment and development of the category of human philosophy could take place due to the course of history, and from the effects of globalisation.

Humphrey - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Humphrian

Hundred Principle - in spaciology, the method of star system organisation holding that each galactic sector must have exactly one hundred thousand star systems within them for geographical purposes, and just one hundred star systems within them for political representational purposes. For galactic regions, the principle holds that each galactic region should have one hundred million star systems within it and should therefore also one thousand galactic sectors.

Hungarian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and politics in Hungary.

HungaroAstronistisation - the specific Astronistisation of Hungarian society, either in a macro or micro form.

Derivatives

HungaroAstronistisationism

Huǒjiàn - in Mandarin Chinese, the term given to the word, rocket, and is typically associated with Astronist and Cosmic philosophy.

Huriya - in Arabic, the term given for the concept of freedom, especially when related to Astro-Arab philosophy.

Huwijja - in Arabic, the term given for the concept of identity, especially when related to Astro-Arab philosophy.

Hviezdičkový dom - derived from the Slovak language and used in Slovakian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Hydee - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Third Generation, as the wife of Quinto, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Hydean

Hybrid - in an Astronist contextualisation, a version of an Astronist character, or a philosophical denomination, or school, that is created from combining two already existing versions.

Derivatives

Hybridise

Hybridisation

Hybridism - in Astronist Philosophy, a philosophy, or school of thought that is a combination of two or more other philosophies, or schools of thought, either Astronist-originative or non-Astronist in their origins, and are the opposite to ordinarian philosophies and schools of thought. See ordinarianism.

Iluminismo Vaticano - the root term for Vatican Astronism and Astronism according to the Roman Catholic Church.

Iluminismu - a follower of the Moldovan denomination of The Philosophy of Astronism, known as Iluminismulism.

Derivatives

Iluminismus

Iluminismulism - the denomination of The Philosophy of Astronism that is most predominantly followed in Moldova, and amongst the Moldovan peoples, and is thus one of the smaller denominations of The Philosophy of Astronism, yet too, one of the most unique.

Derivatives

Iluminismulist

Iluminismulan

Iluminismulic

Iluminismul din Moldova - the root term for Moldovan Astronism.

Iluminiz - a follower of the Albanian denomination of The Philosophy of Astronism, known as Iluminizmitism.

Derivatives

Iluminizs

Iluminizmitism - the denomination of The Philosophy of Astronism that is most predominantly followed in Albania, and amongst the Albanian peoples, and is thus one of the smaller denominations of The Philosophy of Astronism, yet too, one of the most unique.

Derivatives

Iluminizmitist

Iluminizmitistic

Iluminizmitian

Iluminizmit Shqiptar - the root term for Albanian Astronism.

Imagewear (noun) - distinguishing clothing or accessories used in or by a particular society, nation, or individual, but most especially, by a particular occupation.

Imagicentrism - a subschool of Imaginism in The Philosophy of Astronism taking the stance that imagination is the one and only pure connection between humanity and The Divine, and also positions imagination at the centre of all human activity, morality, and philosophy, and interprets all Astronist philosophy from the viewpoint of the imagination.

Derivatives

Imagicentricity

Imagicentric

Imagicentrist

Imaginarium - the main room within an Astronist planetarium laid out as an auditorium in which the public sit and enjoy video presentations, documentaries, specially created films, and other interactive digital activities on a screen filling the entire ceiling, all with a philosophical context.

Derivatives

Imaginariums

Imaginism

- a school of thought in The Philosophy of Astronism focusing on the centrality and importance of imagination, specifically its philosophy, and its relationship with idea, thought, understanding, destiny, and divinity, and typically holds imagination to be of Divine source.
- in Cosmic Art, as a derivation of Astronist Art, an artistic style depicting artificial, or imagined celestial entities, and scenes, rather than natural, or actual celestial entities, such as those seen in astrophotography.

Derivatives

Imaginist

Imaginistic

Imaginement - in Astronist Philosophy, the act of imagining.

Imah béntang - derived from the Sundanese language and used in some Javanese denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Imbrication - in Astronist Philosophy, relating to two or more philosophical concepts, schools, disciplines, or theories that overlap in their themes, orientations, or in their approach to a particular topic.

Derivatives

Imbricational

Imbricative

Imbricatively

Ime'mmụọ - The School of Spirituality in Astration as known in the Igbo language.

Immanent - in an Astronist contextualisation, of The Philosophy of Astronism, existing intrinsically and is at the heart of The People's Constitutional Company of Jesse Millette.

Derivatives

Immanence

Immanency

Immatriculation - in Astronist Philosophy, to register oneself as a debater with The International People's Philosophical Debatory Board so that one can debate in any Astronist philosophical argumentation held in any Astronist philosophical building, or at any event sponsored by an Astronist organisation in all participating countries.

Derivatives

Immatriculator

Immatriculating

Immemoriality - in Astronist Philosophy, an instrument of study addressing immeasurable or inconceivable periods of time for the human mind in our current state, ability, and capacity.

Derivatives

Immemorialities

Immigration Law (Cosmos) - an Astronist Subject dealing with the laws relating to immigration policy of a planet, a celestial body, or space station.

Derivatives

Cosmic Immigration Law

Immiseration - in an Astronist contextualisation, relating the state of a country, or society of peoples before an Astronist methodological system is constructed and implemented.

Derivatives

Immiserative

Immutability - in an Astronist contextualisation, relating the quality of The Grand Constitution in which the words of the constitution do not ever change, but may only be added to.

Imnemnic - in Astronist Philosophy, of a philosophical concept or notion, to be in alignment with current scientific and empirical knowledge.

Derivatives

Imnemnic

Imnemnically

Imnemnity - in Astronist Philosophy, a prominent instrument of study measuring the extent to which a philosophical concept or notion falls in alignment with current scientific and empirical knowledge, the oppositism and comparter instrument to which is known as disimnemnity.

Derivatives

Imnemnities

Imneminence

Imneminency

Impaludation - in Astronist Philosophy, referring to all concepts relating to perfection.

Derivatives

Impaludative

Impaludatively

Impartation - in an Astronist contextualisation, the official action whereby a congressional member provides information, especially that which has been previously unknown, to the entire assembly.

Impartialism - the principle of the exegesis and ascription of The Grand Centrality of The Philosophy of Astronism holding that all concepts, theories, ideas, and cosmologies written in The Grand Centrality are treated in equal measure with no supremacy of concept in relation to their order within the documentation.

Derivatives

Impartialist

Impartialistic
Impartialistically

Impedimentation - in Astronist Philosophy, an obstacle existing in the way of a philosopher's ability to fulfil a philosophical contemplation, or theory; this can either be physical, mental, or otherwise.

Impentinate - in Astronist Philosophy, commonly referenced in association with The Grand Impentination, to physically leave The Earth on a vessel, especially for another world or to embark upon some exploratory mission, but should not be confused with anapentination.

Impetratively
Impetrament
Impetramental
Impetrated
Impetrating
Impetrator
Impetress

Implementationism - a school of thought in The Philosophy of Astronism that bases all its principles on the implementation of philosophical thought, idea, and methodology, and does not consider anything that cannot be clearly implemented into the real world.

Derivatives

Implementationist
Implementationistic

Implicationism - a school of thought in The Philosophy of Astronism that views all philosophical thought, idea, and method by the implications it will bring, either in theory, or in application, and takes a similar stance to Consequencism in ethics and morality.

Derivatives

Implicationist
Implicationistic

Imploration - in Astronist Naology, the official term for the procedure of when the faculty of an Astronist philosophical building must ask a grandee to release funds for a specific purpose.

Derivatives

Implorative
Imploratively

Importancy - in Astronist Philosophy, relating to the state, fact, or characteristic of being important, either physically, or conceptually, or metaphorically.

Derivatives

Importancies

Importantmost - in Astronist Philosophy, that which is considered to be the most important for a given reason out of a series, or group of associated entities, items, or concepts.

Importitude - in Astronist Philosophy, during a philosophical argumentation, of a debater, persistent in their argument, to the point of annoyance, yet they typically succeed with their technique of persistence.

Derivatives

Importitudinal

Importitudinally

Impluvium - in Astronist Architecture, a type of unroofed area as part of an astrodium featuring a very shallow pool, typically one of checkered tiles, into which rainwater falls into and drains out of, and sticking out of the centre of the pool, an orrery is typically positioned.

Derivatives

Impluviums

Imprecisionism - in omnidoxicology as part of omnidoxical authority is the belief orientation holding that The Omnidoxy is not the ultimate witness of its author's intentions and therefore should only be seen a document and nothing of a greater power or nature.

Derivatives

Imprecisionist

Imprecisionistic

Imprevoyance - in Astronist Philosophy, showing a lack of foresight in one's philosophical contemplations, especially in relation to the future of humanity.

Derivatives

Imprevoyant

Imprevoyantly

Impute - in an Astronist contextualisation, the official action of attributing a problem, or offence to an individual, a group, or an organisation.

Derivatives

Imputation

Inaccomplissement - in Astronist Philosophy, losing a philosophical argumentation to another debater, especially one with greater experience and knowledge of the topic addressed.

Inacknowledge - in Astronist Philosophy, that which isn't acknowledged, especially not in the way it had been intended.

Derivatives

Inacknowledged

Inacknowledging

Inaction - in an Astronist contextualisation, a distinct lack of action, or concordance during an Astronist congressional session, or any other type of meeting.

Inadherence - in Astronist Philosophy, a distinct need to disassociate or reattach oneself or something else from one thing to another, either in a physical, or conceptual sense.

Inanis - derived from Latin, in Astronist Philosophy, of a person, without any philosophical imagination, or contemplation, or a distinct lack of interest in philosophical concepts.

Inastrality - in Astronist Philosophy, the oppositism to astrality, and denotes the inability to wonderment, and the extent to which someone holds that inability.

Derivatives

Inastralities

Inaugural - in an Astronist contextualisation, either relating to the founding of The People's Constitutional Company of Jesse Millette, or the beginning of an individual's role in an executive position, especially the Chairman, or Vice Chairman roles.

Inaugurological Astronism - in Astronist Philosophy, a form of The Philosophy of Astronism that is purposefully constructed in order to be comprehensively conveyed to a person, or group, especially for the first time, and is characterised by the simplification of concepts, the use of comparison, and the exclusion of unique or in-depth terminology. This may also relate to The Appendadoxy, in which this form of The Philosophy is first outlined.

Inaugurology - in Astronist Philosophy, a major discipline of study addressing the methodology of how an idea, a school of thought, or an entire philosophy is to be conveyed to an individual that is completely unaware of it beforehand, and involves concepts from education methodology and pedagogy and was first outlined in the document known as *The Appendadoxy: Inaugurological Astronism*, and is closely associated with the practices and philosophies involved with cosmechism.

Derivatives

Inaugurologic

Inaugurological

Inaugurologically

Inaugurologist

Incarpituatation - in Astronist Philosophy, the principle holding that the length for which a topic is addressed during the writings of The Omnidoxy does not correspond to the importance of the topic within wider Astronist Philosophy, as certain subjects are purposefully left for future Astronist Tradition philosophers to contemplate and further develop. Essentially, it holds that certain subjects that are relatively shortly addressed should not be dismissed as having a lesser role within Astronist Philosophy.

Derivatives

Incarpituative

Incarpituatively

Incarpituational

Incarpituatism

Incaution - in an Astronist contextualisation, a distinct lack of emphasis on the potentiality of problems, or risks, especially after they have shown their consequences.

Incentivate - during an Astronist congressional session, the official action undertaken by a member of such a session wherein they present incentives for others members to see in order to convince them that their bill, or policy, or opinion is right, or should be passed by the assembly.

Derivatives

Incentivator

Incentivation

Incentivational
Incentivative

Incentrality - in Astronist Philosophy, constructed to form the opposite of a centrality, the quality or fact of being unimportant in any particular concept, and may even go as far as to be considered dangerous if adhered to, and is most commonly seen as part of some appellations of rubrals in The Omnidoxy.

Derivatives

Incentralities

Incentric - in Astronist Philosophy, that which is not important, or does not hold a central role in a system, especially the system of The Cosmos.

Derivatives

Incentrical

Incentrically

Incentricity

Inception Epoch - in Astronist Philosophy, the appellation for the period in epochology relating to the event of The Big Bang, and is known as the Plank Epoch in mainstream Physical Cosmology.

Inceptionism - a school of thought in The Philosophy of Astronism that focuses on the establishment, or the institutionalisation of the theory, or idea to be the central purpose of philosophy, as opposed to creating theories and ideas for that sole sake.

Derivatives

Inceptionist

Inceptionistic

Inceptum - derived from Latin, in Astronist Philosophy, the beginning era of a philosophical tradition, especially the first fifty years since its founding and succeeds the initium.

Incessamment - in Astronist Philosophy, of a philosophical argumentation, a discussion that is relatively short and quickly agreed upon.

Incipient Mergence - in Astronist Philosophy, specifically within the discipline of mergenics, a type of mergence characterised by the process wherein smaller elements are conjoined in the development of a larger oneness.

Incipit - in Astronist Architecture, a term for the entrance of a promontory.

Incivism - in Astronist Philosophy, a distinct lack of public spirit, and civil attachment.

Derivatives

Incivic

Incivil

Inclusive discipline - in Astronist Philosophy, a category of philosophical discipline that is associated with each of the twelve disquisitions of The Omnidoxy and encompasses a wide variety

of disciplines within it, an example of which being the largest inclusive discipline known as compendology.

Inclusive Astronism - a form of The Philosophy of Astronism predicated on the notion that all denominations and derivations of The Philosophy are significant in their interpretations and stands in alignment with derivation theory.

Inclusivity - in Astronist Education, a major hallmark of the worldview and philosophy of the Astronist education system that promotes phrontisteries and the Astronist education system as open to all, but insists that only those students with good attitudes, are willing to grasp their talents, and are determined to work hard in the subjects of their interest and enthusiasm, will achieve opportunities within the phrontistery and the wider Astronist education system. By this, the inclusiveness is placed upon the decisions of the student, while the phrontistery itself continues in its principle of inclusivism.

Derivatives

Inclusivist

Inclusivism

Inclusivistic

Inclusivise - a discipline of study within Astronist Philosophy that is categorised within the umbrella of an inclusive discipline, as opposed to a disinclusivised discipline.

Derivatives

Inclusivised

Inclusivisation

Inclusivisational

Inclusivising

Incognisant - in an Astronist contextualisation, the official position of The People's Constitutional Company of Jesse Millette on an issue wherein the Company has no preceding knowledge of the issue at hand.

Derivatives

Incognisance

Incoherent - in an Astronist contextualisation, the state and period of time wherein The People's Constitutional Company of Jesse Millette has not yet made its official stance on an issue.

Derivatives

Incoherence

Incoherency

Incohesion - in an Astronist contextualisation, the choice of a people, or county not to accept The Philosophy of Astronism, and those whom enjoy the philosophy.

Derivatives

Incohesive

Incolore - in Astronist Art, relating to an art piece without any colour.

Incommodant - in Astronist Philosophy, a reviled approach to philosophical argumentation that is unpleasant and offensive to other debaters without any real elegance and logic in one's arguments and theories.

Derivatives

Incommodantly

Incommodance

Incommodancy

Incompositus - derived from Latin, a distinct disorder within a philosophical tradition; lacking core distinct principles.

Incomprehensibility of Scale - in perimetrics of Astronist Philosophy, the appellation for the concept holding that there is no edge to The Cosmos that can either be comprehended by cosmic beings, or there is no edge at all due to the incomprehensible scale of The Cosmos, and therefore deviates from traditional understandings of the Astronist Cosmology as it considers The Cosmos's scale to be one of infiniteness by this notion.

Inconcentric - in Astronist Philosophy, of a celestial, not conforming to the concentric shape and pattern.

Derivatives

Inconcentricity

Inconclusive - in an Astronist contextualisation, of any type of meeting, especially an Astronist congressional session, not coming to a clear, or majoritarian conclusion of a particular topic, and is therefore another for discordance.

Inconclusivity - in Astronist Philosophy, the instance that a concept or theory explained in The Omnidoxy does not leading to a firm conclusion.

Incongruous - in an Astronist contextualisation, of an individual, a philosophy, or an organisation, not being in compatible with The People's Constitutional Company of Jesse Millette, or The Philosophy of Astronism.

Derivatives

Incongruity

Inconsonant - another term for incongruity.

Derivatives

Inconsonance

Inconsonancy

Incontented - in Astronist Philosophy, to be without contentment, either emotionally, or structurally, especially of the way by which a cosmical structure is formed to infer instability.

Inconvenient - in Astronist Philosophy, failure to observe the rules of a philosophical argumentation.

Derivatives

Inconveniently

Inconvenience

Incorporated Astronism - a broad term for any type, practice, or theory of Astronism that does, or is, recognised by The Institution of The Philosophy of Astronism.

Incorporeality - in Astronist Philosophy, relating to the spirit, or the instance or notion of spirituality.

Derivatives

Incorporealities

Incorporer - in Astronist Philosophy, during a philosophical argumentation, a debater that introduces a new topic of discussion and is accepted by the borner.

Incosmical - in Astronist Philosophy, that which is not cosmical in its naturity, and nor by its characteristics; essentially, the inversion of cosmicality.

Derivatives

Incosmicality

Incosmic

Incosmicness

Incrementation

- in Astronist Philosophy, the incremental increase of a philosophical concept in terms of its popularity as measured by parameters of population increase.
- in Astronist Philosophy, the incremental increase of the topic of a philosophical argumentation through discerning the records held by each debatory borner which are submitted to The International People's Philosophical Debatory Board and are combined with statistics from across the country, and internationally.

Derivatives

Incrementational

Incrementationally

Incrementity

Incroyance - in Astronist Philosophy, an avid disbeliever of The Philosophy of Astronism in general, especially when they make their disbelief openly and publicly known.

Derivatives

Incroyant

Incroyantly

Incroyer

Incroyetress

Incrustation - a style of interior decoration on walls whereby parts of the wall recess, often termed as incrusta, especially when embossed with an illustration.

Derivatives

Incrusta

Inculpate - in an Astronist contextualisation, the official action undertaken by The People's Constitutional Company of Jesse Millette wherein the Company makes an accusation against something, or someone.

Derivatives

Inculpation

Inculpatory

Incultured - ignorant of philosophy in general, but especially ignorant of The Philosophy of Astronism and even its most basic concepts and principles.

Derivatives

Inculture

Incumbency - in an Astronist contextualisation, the period of time during which a person hold a certain role within The People's Constitutional Company of Jesse Millette, especially when referred to entirely and collectively.

Incunabulum - in Astronist Civicology, the use of the archaic word to describe a book, and refers to a text-only book which is to accompany an atlas as a reference book.

Derivatives

Incunabula

Indemnify - in an Astronist contextualisation, an official action undertaken by The People's Constitutional Company of Jesse Millette wherein the Company compensates an individual, a group, or an organisation for harm, or loss due to the actions, or policies of the Company.

Derivatives

Indemnification

Indemnifier

Indemniffee

Indentation

- in Constitutional Terminology, the moving of text to the right, typically for listations, or for a differentiation.
- in Astronist Ornamentation, the use of multiple borderings.

Indexa - in omnidoxicology, a single entry into the indexment system of The Omnidoxy, such as 1:2:3.

Derivatives

Indexas (plural)

Indexi (plural)

Indexation - in Constitutional Terminology, a type of listation of alphabetical names, subjects, or other items.

Indexication - in Astronist Education, the official term for an inspection of a phrontistery, and is conducted by an indexicator.

Derivatives

Indexicator

Indexicational

Indexicative

Indexicatively

Indexment - in omnidoxicology, the system of indexing used in The Omnidoxy categorised by disquisition, discourse, and insentensation characterised by [number:number:number], an example

of which would be 1:2:3 which pinpoints an indexa of the first disquisition of The Omnidoxy, the second discourse within that disquisition, and the third insentensation of that discourse.

Derivatives

Indexmentation

Indexmenter

Indenture - in an Astronist contextualisation, any type of legal agreement, documentation, or contract involving The People's Constitutional Company of Jesse Millette.

Indesignation - in obliviology of Astronist Philosophy, that which remains without designation in the cosmical system in Cosmic Philosophy, a prominent example of which the Event Horizon of a black hole.

Derivatives

Indesignate

Indesignating

Indesignated

Indian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of India.
- collectively refers to the various schools, branches, and denominations of The Philosophy of Astronism on the Indian subcontinent.
- the denomination of The Philosophy of Astronism present in India that is clearly influenced by English Astronism and is most typically adhered to in the larger cities and is the dominant form in the states of Goa, Lakshadweep, the Andaman and Nicobar Islands, and the Puducherry union territory.

Indistinction - in Astronist Philosophy, alternative to the term indistinct, relating to a concept or theory that is not clearly or precisely defined.

Individual Knowledge - in Astronist Philosophy, specifically within Transientology, the appellation for the type of knowledge that personal to oneself and is structured upon one's own individual and personal experiences, as compared to that which is appellated as Entire Knowledge.

Individuationism - a school of thought in The Philosophy of Astronism that bases its philosophical premise on the singling out of individual sentences from a string of many in order to derive one particular and arguably pure idea, as opposed to combining multiple sentences together to form an arguably more convoluted idea.

Derivatives

Individuationist

Individuationistic

Indivine - in Astronist Philosophy, an entity, either living or not, that do not possess a direct link to The Divine, and hasn't the possibility of possessing that direct link.

Derivatives

Indivinity

Indivinely

Indlu yeenkwenkwezi - derived from the Xhosa language and used in South African denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Izindlu zeenkwenkwezi

Indlu yenkanyezi - derived from the Zulu language and used in South African denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Izindlu zenkanyezi

IndoAstronistisation - the specific Astronistisation of Indian society, either in a macro or micro form.

Derivatives

IndoAstronistisationism

Indonesian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Indonesia.

Indrucy - in Astronist Literature and Philosophy, a period and state of intense activity for a philosopher, author, or any other artist in whichever medium they do express themselves, wherein the majority of their spare time is taken up by writing (in the case of an author or philosopher) a particular document, or set of documents, or books; this is characterised by intense levels of writing mounting to thousands of words written per day, late nights, reclusion, a general obsessiveness and attention to details, frequent experiences of nausea, sudden impulses to write, as well as an overall predisposition to deep contemplations which are uncharacteristic of people that are not experiencing indrucy. The periods of time that a person may be under indrucy vary greatly with some states of indrucy stretching on for years while others exist only for a few months. Some smaller periods of indrucy are expected to be more dangerous than those of longer periods as longer periods of indrucy are expected to become part of the person's natural disposition and the way they conduct their life while shorter forms of indrucy may result in mental health issues as this transition (known as indrucation) has not yet occurred therefore the individual is more susceptible to experiencing the potentially harmful effects of indrucy. To be classified as a period of indrucy, a person must be in the state of indrucy for at least two weeks. The first of such states or periods of indrucy known by this term was experienced by Brandon Taylorian during his writing of The Omnidoxy over the course of one and a half years of indrucy. Indrucy is a philosophical and artistically centred term that may be in close relation to obsessive-compulsive disorder. In the context of the Astronist philosophical tradition, true indrucy is not induced by drugs or alcohol, but by a purely artistic zeal and obsession. See intoxicosis for the mental illness derived from indrucy.

Inertialism - in introspectics of Astronist Philosophy, the belief that the unchanged entities in The Cosmos are those which are of greater importance in the cosmical system and are superior in relevance to dynamic entities.

Derivatives

Inertialist
Inertialistic

Inertiality - in introspectics of Astronist Philosophy, the instrument of study measuring the extent to which a cosmical entity changes its appearance, functionality, or positioning throughout its existence in the identification of whether it is inertial or dynamic.

Derivatives

Inertialities

Inertics - a branch of study in Astronist Philosophy, especially Cosmic Philosophy, as part of wider Astronomy dealing with the philosophical discussion towards the inactivity of certain celestial entities, or the parts of The Cosmos that have not, or do not change.

Derivatives

Inerticist
Inerticistic
Inertical
Inertically

Inevolic - in sentientology of Astronist Philosophy, a species that isn't humanoid, and neither has it come into contact with humanity.

Inexactitude - in an Astronist contextualisation, the discussion of something not in its exact terms, or in its exact circumstances, or consequences, especially due to it being convoluted.

Inexist - in Astronist Philosophy, that which does not exist currently and has no potentiality to exist in any future time, and therefore differs from the term, disexistence.

Derivatives

Inexistent

Inexistence

Inexorable - in an Astronist contextualisation, of a member of meeting, especially during an Astronist congressional session, not able to be persuaded, especially when the member's opinion affects the meeting's concordance.

Derivatives

Inexorability

Inextremity - in Astronist Philosophy, without extremities, especially due to existing as transcending beyond them.

Derivatives

Inextremities

Inf - in Astronist Philosophy, the philophon for the discipline of infinetics.

Infalling - in formatology of Astronist Philosophy, the instance of an infall wherein smaller objects falling within a larger object due to its collapse, or due to a formational or transformational process.

Infamilise - in familiology in Astronist Philosophy, a celestial that is unable to be categorised within one of The Seven Cosmical Families.

Derivatives

Infamilised

Infamilisation

Infamilial

Infamiliality

Infancy - in an Astronist contextualisation, of an argument, opinion, or general disputation, in the early stages of its development, complexity, or coherency.

Infantian - a child follower of The Philosophy of Astronism; someone under the age of eighteen.

Derivatives

Infantia

Infantile devotions - in Astronist Philosophy, collectively referring to all practices and expressions of wonderment, ponderment, adoration, and laudation enacted, and understood by children.

Infantism - in Astronist Philosophy, the belief that children under the age of twelve can understand certain basic philosophical concepts of Cosmic Philosophy especially, and should be active in astronomical and cosmic philosophical practices, including infantile devotions.

Derivatives

Infantist

Infantists

Infantistic

Infantistically

Inferior - in an Astronist contextualisation, the group of members of an Astronist congressional session whom do not win a majority.

Derivatives

Inferiority

Infidus - derived from Latin, in Astronist Philosophy, during a philosophical argumentation, a statement that is given that is later found to be untrue.

Infigate - in Astronist Philosophy, to fix a philosophical paradox, or a conceptual issue by proposing new ideas and contemplations.

Infinispherical

Infinispherically

Infinisphericity

Infinite Chance - in Astronist Philosophy, in an Infinity Paradigm, the probability of something inevitably existing or occurring due to the infinite amounts of space, time, and matter that exist in an Infinity Paradigm.

Infinitise - in Astronist Philosophy, to conceptually make something infinite.

Derivatives

Infinitised

Infinitising

Infinitisation

Infinitism - in Astronist Philosophy, relating to the quality, state, or fact of infinity, or of being infinite by naturity.

Infiniteous - in Astronist Mystology, as well as Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the second son of Lucien and Florentine, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Infiniteousian

Infinity Paradigm - in Astronist Philosophy, the appellation for the instance in which infinity dominates, and so anything is therefore possible due to the existence of an infinite amount of time, space, and matter.

Infirmation - in Astronist Philosophy, during a philosophical argumentation, an argument that is immediately deemed as invalid by the borner due to its blatant illogicality, irrelevancy, or irrationality.

Infit - in Astronist Philosophy, for one entity to be suitably matched and contoured with another.

Derivatives

Infitted

Infitting

Inflational - in Astronist Philosophy, relating to the physical expansion of The Cosmos during the Inflation Epoch.

Inflation Epoch - in Astronist Philosophy, the appellation for the period within epochology marking the expansion of The Cosmos and succeeds the period of the Inception Epoch, and is the epochological period that reigns in present times.

Information Law (Cosmos) - an Astronist Subject dealing with the laws of information and policy relating to information access and distribution of a particular planet, celestial body, or space station and its governing body.

Derivatives

Cosmic Information Law

Informatium - in Astronist Architecture, a type of Astronist building typically found in city centres and in which all information about the city is archived.

Derivatives

Informatia

Informatiums

Infraction - in an Astronist contextualisation, a clear and open violation of a constitutional principle, or corporate law, either committed by an employee, a group, or an organisation.

Infraphilosophy - in Astronist Philosophy, collectively referring to the fundamental structures and foundations of a philosophy.

Derivatives

Infraphilosophical

Infraphilosophically

Infraphilosophicality

Infrapplication - in Astronist Philosophy, specifically within the discipline of cosmoapplication, relating to a cosmoapplication that incorporates less than five consistencies, with a cosmoapplication employing five or more consistencies called a circumapplication.

Derivatives

Infrapplicational

Infusement - the process of instilling a duty or destiny within a being, especially within Astronist Mystology and Astronist Philosophy.

Ingenitor - in Astronist Philosophy, an alternative term to wormholes.

Derivatives

Ingenitors

Ingenium - derived from Latin, in Astronist Philosophy, relating to the argument that all philosophical contemplations, ideas, and imaginations come from one's own innate character and nature, and are triggered by the environments into which we are put, and by the experiences we feel.

Ingression - in an Astronist contextualisation, the act of entering a meeting, or an Astronist congressional session.

Derivatives

Ingress

Inherencies - in Astronist Philosophy, relating to the qualities of one entity having directly originated from that of another.

Initial Creation - in obliviology of Astronist Philosophy, the appellation for the instance in which a black hole is created.

Initiality - in Astronist Philosophy, the quality, or fact of existing at the beginning of a process or an event, typically acting as an initiator or a factor fuelling such a process.

Derivatives

Initialities

Initial Reciprocal - in omnology of Astronist Philosophy, the appellation for the notion that for reciprocity to occur, there must have been an initial reciprocation, especially in relation to The Expanding Cosmos.

Initial Singularity - in introspectics of Astronist Philosophy, the appellation for the instance and point of singularity, as it is known in mainstream physics and cosmology.

Initium - in Astronist Philosophy, the first decade in the history and development of a philosophy, and precedes the inceptum.

Inmanifest - in Astronist Philosophy, that which isn't able to be physically or conceptually manifested.

Derivatives

Inmanifested

Inmanifesting

Inmanifestation

Inmanifestational

Inmanifestationally

Innards - in an Astronist contextualisation, a colloquial and informal term for the internal operations and workings of The People's Constitutional Company of Jesse Millette.

Inner Halo - in firmamentology of Astronist Philosophy, the part of the galactic halo that is closest to the galactic core.

Innominatism - in sentientology of Astronist Philosophy, a solution provided by the Astronist Tradition to the Fermi Paradox characterised by the belief that humanity bases its exploratory procedures according to our own evolution and development; essentially, the explorative abilities of humanity are limited due to the lack of awareness of humanity.

Derivatives

Innominatist

Innominatistic

Innominatistically

Innotional - in Astronist Philosophy, that which is not philosophically constituted, nor is the notion with which it is associated comprehensive.

Derivatives

Innotationality

Innovationism - in Astronist Propaganda, the art style of making innovation and its imageries central to the propaganda piece, and using connotations of education, knowledge, and creativity to push a particular message, or subject.

Inomnitialism - in introspectics of Astronist Philosophy, the notion that if everything was removed from The Cosmos, it would still exist as it is.

Derivatives

Inomnitialist

Inomnitialistic

Inondation - in Astronist Philosophy, during a philosophical argumentation, to be flooded with many different philosophical concepts after the discussion of a topic has commenced, typically with the need of structure and order provided by the borner.

Derivatives

Inondational

Inondationally

Inondative

Inondatively

Inopine - in Astronist Philosophy, during a philosophical argumentation, for an unexpected turn to occur in the course of a discussion, typically when either a new debater joins and proposes a new concept or opinion, or when a dominating concept is suddenly disproved when challenged by a newly proposed concept.

Derivatives

Inopinal

Inopinally

Inoriginate - in Astronist Philosophy, that which doesn't originate from something else.

Derivatives

Inorigin

Inoriginated

Inoriginative

Inoriginatively

Inorigination

Inoriginational

Inoriginationally

Inphilosophy - in Astronist Philosophy, a version, or interpretation of a philosophy that is not considered to be the correct interpretation, or version of a philosophical concept, or teaching to the majority of adherents.

Derivatives

Inphilosophical

Inphilosophically

Inphilosophicality

Inproliferity - in Astronist Philosophy, the instance in which celestial entities are not regularly applied to a particular instrument of study rather than that to which they are familiarly applied which is known as prolifeferity.

Inquest - in an Astronist contextualisation, the official action and process undertaken by The People's Constitutional Company of Jesse Millette wherein an investigation is initiated into a certain problem, or issue.

Derivatives

Inquisition

Ins - in Astronist Philosophy, the philophon for the discipline of Instrument Theory.

Inscience - in Astronist Philosophy, a state in which either an individual, or a group are without knowledge of something; they are ignorant of its nature, purpose, identity, and potentiality.

Derivatives

Inscient

Insciency

Insciential

Inscientially

Insensate - a state that opposes having an official philosophy.

Derivatives

Insensatory

Insensity

Insensated

Insentence - the writing of a document in such a way that each sentence is made a paragraph rather than multiple sentences constituting a paragraph; first introduced and thoroughly used in The Grand Centrality of The Philosophy of Astronism, especially so in The Omnidoxy.

Derivatives

Insentenced

Insentensical

Insentensation

Insentensations

Insentency - in Astronist Philosophy, relating to the study and contemplation of the order of insentensations within The Omnidoxy.

Derivatives

Insentencist

Insentencists

Insentencial

Inserity - in Astronist Philosophy, the fact, instance, or quality of being inauthentic, especially in relation to an appellation that is considered to be comedic or derogatory by the Astronist Tradition.

Derivatives

Inseric

Inserical

Inserically

Insertion - in Constitutional Terminology, the inserting of images into The Grand Constitution to demonstrate a confirmation of the official versions of logos, sigils, etc.

Insignificate - in Astronist Philosophy, to take the understanding that one's own view is insignificant, or to consider something as insignificant in comparison to something else, especially something physically or conceptually larger.

Derivatives

Insignification

Insignificational

Insignificationally

Insignificative

Insignificatively

Insignificated

Insignificating

Insignificism - a school of thought in The Philosophy of Astronism the emphasises the removal of human constructs from all philosophical interpretation, due to the belief held that anthropocentrism is degrading to the centrality of The Cosmos in The Universe, and holds that humanity is insignificant when compared to the entirety of The Cosmos.

Derivatives

Insignificist

Insignificistic

Insigniological Cosmism - the branch of Cosmism dealing with mission patches that feature, and are inspired by cosmical, galactical, or celestial imagery.

Insigniological Humanism - the depiction of human beings on mission patches.

Insigniologist - an individual who studies and analyses mission patches, and aids in the selection of mission patches for publication.

Insigniology - a large branch of study Astronomy dealing with the analysis and study of mission patches and spacecraft emblems created by PUESEC, in close association with Astronist Symbolology.

Derivatives

Insigniologic

Insigniological

Insigniologically

Insistament - in Astronist Philosophy, the process by which one enters upon one's philosophical journey, no matter their age, or their life's circumstances.

Derivatives

Insistation

Insister - in Astronist Philosophy, for a debater during a philosophical argumentation, to lay stress upon a concept, and to be steadfast in one's belief of the concept.

Derivatives

Insisteration
Insisterational
Insisterationally
Insisterity

Insondable - in Astronist Philosophy, that which is unimaginable, typically applied to something that is Divine in nature.

Inspiritment
- in Astronist Philosophy, to encourage and enliven someone, or something.
- in Astronist Mystology, refers to The Cosmic Inspiritment.

Instar - in Astronist Art, a special type of depiction of an Astronist character with cosmical symbols, styles, and patterns surrounding them.

Instatine - in Astronist Mystology, as well as Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the first daughter of Zsofine and Maxatius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Instatinian

Instaurate - in an Astronist contextualisation, the official action and process undertaken by The People's Constitutional Company of Jesse Millette of renewing the incorporation of the Company in every country worldwide, or the renewing of a trademark.

Derivatives

Instauration
Instaurational
Instaurator
Instauratee

Institution - pertaining to a philosophical institution, especially one that holds the title of proprietor. In an omnidoxical context, when the term "Institution" is capitalised in this way, it refers specifically to The Institution of The Philosophy of Astronism while its non-capitalised form means to refer to philosophical institutions in a general sense.

Institutionalise - in an Astronist contextualisation, the official action and long process of the establishment of a particular philosophy or new culture into The People's Constitutional Company of Jesse Millette.

Derivatives

Institutionalisation
Institutionaliser
Institutionalisee

Instringent - in Astronist Philosophy, relating to an interpretative approach to concepts, theories, philosophies, or argumentations.

Derivatives

Instringently
Instringency

Instructionalism - a school of thought in The Philosophy of Astronism emphasising the importance of instruction in philosophical thought, preferably through step by step methodology for the implementation of the philosophical system.

Derivatives

Instructionalist

Instructionalistic

Instrumentalise - in Astronist Philosophy, to apply a concept, theory, or argument to an instrument of study during a philosophical argumentation.

Derivatives

Instrumentalisation

Instrumentalised

Instrumentalising

Instrumentaliser

Instrumentation

- in Astronist Philosophy, relating to the completed application of one or more instruments of study to form a philosophical concept, theory, or argument, or that which collectively relates to the application of all the relevant instruments of study to a subject, the rubral in The Omnidoxy for which is known as Instrument Theory.
- in Astronist Ornamentation, the tools and techniques adopted by an ornamentist in order to create a particular ornament regarded collectively.

Derivatives

Instrumentations

Instrumentational

Instrumentationally

Instrumentise - in Astronist Architecture, as also a part of gardenry, the adornment of an area, such as on a lawn, or courtyard, with philosophical, and astronomical instruments, such as telescopes, and orreries.

Derivatives

Instrumented

Instrument of Study - an element, also known as a subdivision of The Philosophy of Astronism dealing with the theories, abstract tools, and concepts that allow the studier to form conclusions and opinions, examples of which are rotality, orbitality, motionality, functionality, and many more.

Instrument Theory

- in Astronist Philosophy, a discipline of study dealing with the contemplation of the application of an instrument of study, and the nature of such an application.
- in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the discipline of study and practice of instrumentation.

In subject - in Astronist Terminology, an Astronist-originative alternative to the term “in question” and relates to that which is being discussed or addressed.

Insulation - in Astronist Ornamentation, the process of best insulating an ornamental pattern dependent upon the colours present.

Insume - in Astronist Philosophy, of gravity, to grasp matter and to become gravitational.

Derivatives

Insumes

Insumation

Insumational

Insumed

Insuming

Int - in Astronist Philosophy, the philophon for the discipline of introspectics.

Intake - in an Astronist contextualisation, the amount of people employed into The People's Constitutional Company of Jesse Millette, or any one of its subsidiaries in a given time period, typically a year.

Integrationism - a school of thought in The Philosophy of Astronism focusing on the centrality of the integration of philosophy into the state, and the way in which the state is governed, ordered, and structured.

Derivatives

Integrationist

Integrationistic

Integration of Cultural Astronomy - in astronomy of Astronist Philosophy, the appellation for the prophesied second stage of The Astronomic Revolution involving the centralisation of astronomical activities in day-to-day society.

Integuments - in an Astronist contextualisation, the securities precautions adopted outside Astronist buildings, especially when referred to collectively.

Derivatives

Integumentary

Integumental

Intelectualidad - The School of Intellectuality in Astration as known in the Spanish language.

Intelectualidade - The School of Intellectuality in Astration as known in the Portuguese language.

Intelektualitas

- The School of Intellectuality in Astration as known in the Javanese language.

- The School of Intellectuality in Astration as known in the Indonesian language.

Intellection - in Astronist Philosophy, the process of objective reasoning and understanding, intended to be used alongside the process of imagination.

Derivatives

Intellectory

Intellectional

Intellectualité - The School of Intellectuality in Astration as known in the French language.

Intellectual Property (Cosmos) - an Astronist Subject dealing with the laws of intellectual property of a specific planet, celestial body, or space station as stipulated by its reigning governing body.

Derivatives

Cosmic Intellectual Property

Intellektual'nyy - The School of Intellectuality in Astration as known in the Russian language.

Intellektuele - The School of Intellectuality in Astration as known in the Afrikaans language.

Intendance - the title relating to the faculty of management of an Astronist phrontistery.

Intendment - in an Astronist contextualisation, the way in which the constitutional law of The People's Constitutional Company of Jesse Millette interprets, such as the true intention of a policy.

Intensivity - in Astronist Philosophy, the extent of the concentration of something, especially conceptually.

Interapplication - in Astronist Philosophy, specifically within the discipline of cosmoapplication, the instance by which new ideas form during a cosmoapplication than before or after it.

Derivatives

Interapplicational

Intercivilisation

- the study of the relationships between one civilisation and another, especially in spacial civilisations and colonies.
- in spacial terms, relating to the relationship between one civilisation and another, especially on a single planet, but may also relate to civilisations on different planets.
- an Astronist Subject dealing with the general and specific interactions between two or more civilisations, or governments beyond The Earth.

Derivatives

Intercivilisationist

Intercivilisational

Intercivilisationally

Intercivilisational Telecommunications - an Astronist Subject dealing with the types of communication methods used between two or more non-Earth civilisations.

Interconfederation - in Confederationism, relating to the agreements, relations, and all other interactions between two or more different confederations.

Derivatives

Interconfederalional

Interconfederationally

Intercontinental - in an Astronist contextualisation, relating to the operations of The People's Constitutional Company of Jesse Millette, a denomination, or school of The Philosophy of Astronism that is spread, or active across two different continents.

Derivatives

Intercontinentality

Intercreational Cosmology - in Astronist Philosophy, a type of cosmos in which the theory of intercreationism dominates, so space, time, and matter are prioritised over the notions of The Cosmos, The Universe, and The Divine.

Intercreationism - in Astronist Philosophy, a branch of Creation Theory whereby space, time, and matter are prioritised in the cosmological structure, so much so that they replace the entities and notions part of the traditional Astronist Cosmology including The Cosmos, The Universe, and The Divine.

Derivatives

Intercreate

Intercreation

Intercreational

Intercreating

Intercreated

Intercreator

Intercreators

Interdenominationalism - a school of thought in The Philosophy of Astronism focusing on the argument that two or more denominations of the philosophy are best interpreted, implemented, and understood when paired together, not when studied in separation.

Derivatives

Interdenominationalist

Interdenominationalistic

Interdepartmental - in an Astronist contextualisation, relating to being between two different departments of The People's Constitutional Company of Jesse Millette, or one of its subsidiaries.

Derivatives

Interdepartmentality

Interdependency - in Astronist Philosophy, specifically within Cosmic Philosophy, the dependence of all celestial entities and phenomenal events in The Cosmos upon one another.

Derivatives

Interdependencies

Interdependencial

Interdependent - in an Astronist contextualisation, of two subsidiaries of The People's Constitutional Company of Jesse Millette, dependent upon each other for each to operate properly.

Derivatives

Interdependence

Interdisciplinarity - a school of thought in The Philosophy of Astronism relating to the argument that the study of more than one branch of the philosophy is essential, and considers the study of just one branch to be a limitation of what it terms as the knowledge potentiality.

Derivatives

Interdisciplinarity

Interdisciplinary

Interfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that the natures of celestials is so that their ultimations are dependent upon other ultimations to occur; essentially, a finality of one celestial cannot occur if the finality of another celestial doesn't.

Derivatives

Interfinalism

Interfinalities

Interfinalist

Intergalactic Cavity - see Cosmic Cavity.

Intergrow - in an Astronist contextualisation, of two or more subsidiaries of The People's Constitutional Company of Jesse Millette, grow so as to become one company.

Derivatives

Intergrowth

Intergrown

Intergrowing

Interior City - in Astronist Civicology, the part of a city which resides within the assigned city boundary.

Interiorise

- in an Astronist contextualisation, the official action and process undertaken by The People's Constitutional Company of Jesse Millette whereby a once external issue is purposefully made internal.
- in Astronist Philosophy, also known as specialised contemplation, the act of a philosopher contemplating a concept or theory who is a specialist of a discipline in which the concept resides or originates.

Derivatives

Interiorisation

Interiorisational

Interiorisationally

Interiorisor

Interiorisee

Interiority - in an Astronist contextualisation, relating to those procedures, businesses, philosophies, and practices that exist within The People's Constitutional Company of Jesse Millette, or have originated from within the Company.

Interinstitutional - in Astronist Diplomacy, also known as parenic relations, referring to the official exchanges made between The Institution of The Philosophy of Astronism and other religious, or philosophical institutions and organisations.

Derivatives

Interinstitutionality

Interinstitutionally

Interinstitution

Interinstitutionism - the belief that the parenic relations of The Institution of The Philosophy of Astronism are the most important aspects of The Institution's operational responsibilities.

Derivatives

Interinstitutionistic
Interinstitutionistically
Interinstitutionalism
Interinstitutionalist
Interinstitutionalistic
Interinstitutionalistically

Integrity - in Astronist Philosophy, a semistrument of study measuring the coordinates that one must be at in order to see a cosmically large entity as part of an Interspace Enquiry.

Derivatives

Integrities

Interjection - in Astronist Ornamentation, in particular metalworks, the process of incorporating colour into metallic engravings in order to lift the pattern from the metallic background.

Interlaccation

- in Astronist Ornamentation, the process of using the decorative element of interlace to create looped, braided, or knotted complex geometric patterns, especially if such patterns hold a cosmic theme.
- in Astronist Philosophy, relating to the connection, relationship, and interactions between different entities, especially between The Cosmos, The Chaos, The Universe, and The Divine from the Astronist Cosmology.

Intermittedox - in Cosmic Art, as a derivation of Astronist Art, a type of tetradoxical star whose rays are intermittent.

Derivatives

Intermittedoxial
Intermittedoxy
Intermittedoxic

Internalities

- the existence of impactful factors within an individual effecting the existence of that individual in some way, especially a negative way.
- in an Astronist contextualisation, relating collectively to the internal operations, activities, and procedures within The People's Constitutional Company of Jesse Millette.

Interneccism - in Astronist Philosophy, the notion and belief that the confliction between The Cosmos and The Chaos in The Great Cosmic Battle is destructive for both sides.

Derivatives

Interneccist
Interneccistic
Interneccistically
Interneccinal

Internecinally
Internecinality

Interocept - in Astronist Philosophy, a type of introspection characterised by conducting an introspection on an abstract idea rather than a physical entity in order to learn more about the idea.

Derivatives

Interocepting
Interocepted
Interoception
Interoceptive
Interoceptively
Interoceptivity
Interoceptional
Interoceptionally

Interphilosophical - taking place between philosophies, or derived from different philosophies.

Interphilosophical Learning - the process of learning about different philosophies, their differences, and similarities, in organisation, principle, and level of adherence.

Interphilosophical Relations - the cooperative, constructive, and positive interaction between people, governments, or organisations of different philosophical systems, traditions, and beliefs.

Interphilosophy - the belief in multiple philosophies in parallel, especially on a personal level, rather than a societal, or governmental level.

Interplanetary - relating to a spacial subject that encompasses two or more planets, and is especially associated with subjects of political, scientific, governmental, or business grounding.

Interplanetary Commerce - an Astronist Subject dealing with the commerce between two or more planetary governments.

Interplanetary Consumer Protection - an Astronist Subject dealing with the bilateral consumer protection laws between two or more planetary governments.

Interplanetary Law - an Astronist Subject dealing with the overall laws between two or more planetary governments and includes all other aspects of interplanetary law.

Interplanetary Leadership - an Astronist Subject dealing with the overarching leadership between two or more planetary bodies, usually in the form of an interplanetary governmental organisation.

Interplanetary Plant Sciences - an Astronist Subject dealing with the comparisons between plant life and development between two different planets.

Interplanetary Policing - an Astronist Subject dealing with police conduct, policy, and interaction between two planets and two planetary governments.

Interplanetary Politics - an Astronist Subject dealing with the bilateral politics between two or more planetary bodies and their governments.

Interplanetary Prison - an Astronist Subject dealing with the policies relating to imprisonments between two or more planetary bodies and governments and their bilateral understandings of the incarcerations of a planetary citizen on a different planet.

Interplanetary Public Policy - an Astronist Subject dealing with public policy between two or more planetary governments and their mutual understandings with regard to public policy.

Interplanetary Public Sector - an Astronist Subject dealing with the comparison between the control of an economy by the states of two different planetary bodies.

Interplanetary Sciences - an Astronist Subject dealing with the comparison of scientific studies between two or more planets.

Interplanetary Taxation - an Astronist Subject dealing with the bilateral agreements between two planetary governments on the taxation of goods and services that the two governments in some way.

Interplanetary Telecommunications - an Astronist Subject dealing with the types of communication methods used between two different planets.

Interplanetary Transportation - an Astronist Subject dealing with aspects of law and conduct in the transportations of people, traded goods, or other cargo between two or more planets, and may involve the study of bilateral agreements made between the governments of those planets.

Interpolation - in an Astronist contextualisation, the discussion of a subject during an Astronist congressional session which is traditionally not a subject of discussion during a congressional session.

Derivatives

Interpolator

Interpose - in Astronist Philosophy, to categorise a philosophical concept between two other concepts, typically creating a middleground concept.

Derivatives

Interposing

Interposed

Interposition

Interpositional

Interpositionally

Interposer

Interpretationism - a school of thought in The Philosophy of Astronism that priorities philosophical interpretation above all other concepts, and typically holds that interpretation is the source of all understanding, and without such interpretation, there cannot be knowledge, and therefore, there cannot be understanding. This argument places interpretation in the forefront of all philosophy, and typically opposes an official interpretation concept, though does not typically support relativism.

Derivatives

Interpretationist
Interpretationistic

Interpretative Astronism - as part of Divisionology, the third sector of the four Levels of Astronism relating to the interpretations of the philosophy and is subsequently followed by Applicative Astronism, the application of the philosophy.

Interrelation - in Astronist Philosophy, relating to the notion that all the forces and movements and celestials of The Cosmos are interconnected and are all related to one another in some as the necessary principle of the formation of The Cosmos.

Derivatives

Interrelational
Interrelationally
Interrelationality

Interspace Enquiry - in Astronist Philosophy, the appellation for the question and contemplation of how far away one would need to be to see something cosmically larger in order to see it in its entirety.

Interspatial

- existing, occurring, or carried on between different planets, star systems, or between different galactic regions.
- relating to a subject focusing on universal spacial significance or applicability, and is especially associated with subjects of a business, cultural, industrial, commercial, physical, medicinal, or educational nature.

Derivatives

Interspatially
Interspace
Interspaciology
Interspaciologist
Interspaciological
Interspaciologically

Interspatial Building Materials - an Astronist Subject dealing with resourcing building materials and the general construction issues in space, or on other planets.

Interspatial Business - an Astronist Subject dealing with overall business practice, policy, conduct, and operation beyond The Earth.

Interspatial Charity - an Astronist Subject dealing with all aspects of charitable operation, policy, and conduct beyond The Earth.

Interspatial Citizenship - an Astronist Subject dealing with citizenship and its nature on different planets, celestial bodies, and space stations beyond The Earth, and citizenship in space between any celestial body or space station.

Interspatial City & Town Planning - an Astronist Subject dealing with the planning, designing, and constructions of towns and cities on planets and celestial bodies other than The Earth itself.

Interspatial Commerce - an Astronist Subject dealing with the general principles and policies of commercial practice and conduct beyond The Earth.

Interspatial Criminal Law - an Astronist Subject dealing with criminal law, conviction, and incarcerations beyond The Earth and between celestial bodies.

Interspatial Curriculum Development - an Astronist Subject dealing with the study of the development of an educational curriculum on planetary bodies beyond The Earth.

Interspatial Customs - an Astronist Subject dealing with the customs laws of governments between planetary bodies.

Interspatial Dictionaries & Encyclopaedias - an Astronist Subject dealing with the development of dictionaries and encyclopaedias by the integration of terms from cultures, philosophies, and all other aspects of a multitude of other planets.

Interspatial Food & Drink - an Astronist Subject dealing with the wide-ranging foods and drinks from various different planets.

Interspatial Funding - an Astronist Subject dealing with laws of funding projects and companies beyond The Earth on other planets, and between different planetary governments and states.

Interspatial Health Service Management - an Astronist Subject dealing with the study of the management of health services in the governments of different planetary bodies.

Interspatial Higher Education - an Astronist Subject dealing with the study of the structure and management of a system of higher education on different planets.

Interspatial History - an Astronist Subject dealing with the total history of interplanetary and interspatial exploration.

Interspatial Housing & Development - an Astronist Subject dealing with the construction of houses and the development of houses for different planetary bodies, as well as homes on space stations.

Interspatial Human Anatomy, Cytology, & Histology - an Astronist Subject dealing with the affects on the human anatomy, cytology, and histology when humans are offearth and on different planetary and celestial bodies.

Interspatial Human Rights - an Astronist Subject dealing with the overall issues of human rights of different governments and states of planetary and celestial bodies and space stations and spaceships.

Interspatial Law

- an Astronist Subject dealing with law relating to the space between planets, celestial bodies, or any other space station.
- a major Astronist Subject dealing with the all-encompassing study of law relating to interspatial business, life, industry, and general existence.

Interspatial Leadership - an Astronist Subject dealing with the study of governmental leadership between different planetary bodies.

Interspatial Mental Health Services - an Astronist Subject dealing with the approaches of different planetary governments to provide mental health services.

Interspatial Nutrition - an Astronist Subject dealing with general wellbeing practices and healthy food and drink on different planets and spacial environments.

Interspatial Physical Fitness & Wellbeing - an Astronist Subject dealing with general physical fitness and wellbeing practices conducted on different planets and in different spacial environments to keep physically healthy.

Interspatial Politics - an Astronist Subject dealing with the overall politics of worlds and political organisations and entities that are beyond The Earth itself.

Interspatial Polity - an Astronist Subject dealing with the overall civil government and constitution of a state that is situated beyond The Earth.

Interspatial Primary Education - an Astronist Subject dealing with the overall education systems at a primary level on different planets and celestial bodies as stipulated by a specific governmental education methodology.

Interspatial Printing - an Astronist Subject dealing with the printing industry beyond The Earth on other planets, or space stations.

Interspatial Public Health - an Astronist Subject dealing with the study and comparison of public health on different planets, celestial bodies, and space stations.

Interspatial Public Policy - an Astronist Subject dealing with the study of the overall public policy of different planetary governments and this comparisons of these.

Interspatial Retail - an Astronist Subject dealing with the industry and businesses of retail on different planets, celestial bodies, and space stations.

Interspatial Sciences - an Astronist Subject dealing with the overall study of sciences beyond The Earth.

Interspatial Secondary Education - an Astronist Subject dealing with the overall education systems at a secondary level on different planets and celestial bodies as stipulated by a specific governmental education methodology.

Interspatial Services for Disabled Peoples - also known as ISDP, an Astronist Subject dealing with the study of services for disabled peoples as provided by a range of different organisations and governments.

Interspatial Services for Old Peoples - also known as ISOP, an Astronist Subject dealing with the study of services for elderly peoples as provided by a range of different organisations and governments.

Interspatial Services for Poor Peoples - also known as ISPP, an Astronist Subject dealing with the study of services for poor peoples as provided by a range of different organisations and governments.

Interspatial Services for Young Peoples - also known as ISYP, an Astronist Subject dealing with the study of services for young peoples as provided by a range of different organisations and governments.

Interspatial Social Injustices - an Astronist Subject dealing with the study of various social injustices found in the societies, civilisations, and states beyond The Earth.

Interspatial Specialty Education - an Astronist Subject dealing with the overall education systems at a specialty level on different planets and celestial bodies as stipulated by a specific governmental education methodology.

Interspatial Spirituality - an Astronist Subject dealing with the demographical and sociological study of the spiritual affiliations of different planetary and spacial populations.

Interspatial Transportation - an Astronist Subject dealing with the study of transportations and vehicular constructions for interspatial travel.

Interspatial Urban Communities - an Astronist Subject dealing with the sociological and demographical study of urban communities of different planetary bodies and celestial bodies.

Interspatial Utilities - an Astronist Subject dealing with the study of public utility services in different planetary states and societies as offered by the government of the area.

Interspacity - in structurology of Astronist Philosophy, the semistrument of study measuring and contemplating the distances between two or more celestial entities and the elements existent within such spaces, as dimensionally measured by proximity and disproximity.

Derivatives

Interspacities

Interspecies - in Astronist Philosophy, relations between different species.

Interspersion - in Astronist Ornamentation, the parts of an ornamental pattern which are separate from and scattered between the main pattern, typically precious stones, dots, or cosmic and galactical shapes.

Interstellor - part of The Standard Astronomical Calendar, the alternative name for the Gregorian day of Sunday.

Interterritorial - in Astronist Philosophy, the instance in which a contemplator from either philosophy, religion, or ideology addresses a topic from the territory of another subject, for

example, a contemplator that identifies as a philosopher addressing soteriological issues which is territorially religious.

Derivatives

Interterritorially

Intertextuality - in an Astronist contextualisation, relating the relationship between two different Astronist texts, especially in literary theory.

Derivatives

Intertext

Intertextual

Intertwiner - in Astronist Philosophy, a popular appellation given to gravity, as it is considered to intertwine distinct elements, entities, and events of The Cosmos together.

Intervallic splendoras - in Astronist Music, a type of splendoras that features one note intervals between each set.

Intosy - in Astronist Occurrology, an intimate social gathering held inside one's home involving casual philosophical discussions and most often, the consumption of alcohol.

Derivatives

Lepportius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the sixth and final son of Trezine and Halgus, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives
Lepportian

Leptolass - a humanoid creature of Astronist Mythology, said to be the incarnation of the element of lightness and resembles a girl or young woman, said to hold an infinite lifespan.

Lesel - a follower of the Basotho denomination of The Philosophy of Astronism, known as Leseli'ism.

Derivatives
Lesels

Leseli'ism - also known as Basotho Astronism, the denomination of The Philosophy of Astronism most commonly adhered to in Lesotho, by the Basotho peoples.

Derivatives
Leseli'ist

Lestement - in Astronist Philosophy, of a debater, having a great amount of agility and nimbleness in one's philosophical contemplations and debate; a skilful philosopher.

Letter of Credence - in an Astronist contextualisation, a letter of introduction, or recommendation, usually sent by an ambassador or senator of The People's Constitutional Company of Jesse Millette.

Lëtzebuergesch Opgekläerte - the root term for Luxembourgish Astronism.

Levantius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the son of Mariposine and Cozmotius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives
Levantian

Levels of Argumentation - in Astronist Philosophy, the appellation for the system of philosophical debating established by the Astronist Tradition holding that there exists levels of intensity during all philosophical debates. The Astronist Tradition understands that all argumentations begin with a triviality and through the course of the debate the levels of complexity and intensity rise as more concepts are involved and the subjects become more convoluted, the highest level of which is ontological debate, as is considered by the Astronist Tradition.

Levels of Debate - in Astronist Philosophy, an alternative appellation for the Levels of Argumentation. See Levels of Debate.

Levels of Astronism - part of Divisionology, and a major categorisation of The Philosophy of Astronism constituting four distinct sectors; abstract, or conceptual, applicative, interpretative, and physical. These different sectors construct the four main ways by which The Philosophy of Astronism may be perceived, or manifested according to a certain set of circumstances and contexts.

Levelum - a term of Orrology, relating to perceiving an orrery in level with one's eyes.

Levelled View - in Astronist Civicology, the most common of civicological illustration for the design and planning of a city, town, suburban area, or space colony which gives a landscape view of the area as though one is standing and looking across the area from a grounded angle.

Lexiconal addition - in lexiconology, the instance in which there exists something written in The Grand Lexicon, however, it is not referenced in any other of the Founding Documents, however, there is not a conflation.

Lexiconal conflation - in lexiconology, the instance in which there occurs a conflict between that which is stated in The Grand Lexicon and that which is stated in another of the Founding Documents. For example, the instance in which The Omnidoxy states something, however, The Grand Lexicon states something in opposition.

Lexiconetox - a male expert or interpreter of The Grand Lexicon of Astronology.

Lexiconetrix - a female expert or interpreter of The Grand Lexicon of Astronology.

Lexiconism - in Astronist Philosophy and lexiconology, the belief orientation holding that The Grand Lexicon, as one of the Founding Documents, is to be superiorised out of all the other Founding Documents primarily because it is believed to encompass all of them through the definition of all the important terms present within all the other Founding Documents.

Lexiconist

- a person who either solely writes or contributes to the writing of a lexicon.
- in Astronist Philosophy, an adherent of Lexiconism.

Lexiconology - the study and subsequent discussion of The Grand Lexicon of Astronology.

Lianian

Lianic

Liandro - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Liandroic

Liandrian

Liánxì - in Mandarin Chinese, the term given to a connection or similarity between an Astronist entity, and a non-Astronist entity.

Libellus - derived from Latin and literally translated as 'little book', a smaller and more compacted version of The Grand Centrality of The Philosophy of Astronism, especially popular for commercial sale.

Libenter - a collector of Astronist books, especially Astronist philosophical works.

Derivatives

Libentress

Liberationism - a school of thought in The Philosophy of Astronism centring on the concept of liberation, and explores the philosophy of liberation, particularly mental, political, social, and spiritual liberations, and explores in depth, the causes, influences, and subsequent consequences of liberations.

Derivatives

Liberationist

Liberationistic

Liberian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Liberia.
- the denomination of The Philosophy of Astronism most predominantly and exclusively adhered to in Liberia, by the Liberian peoples.

Libyan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the State of Libya.

Libyan Tanwir - the root term for Libyan Astronism.

Licentiate - in an Astronist contextualisation, a receiver of an official certification from an Astronist phrontistery.

Liechtensteinische Aufklärung - the root term for Liechtenstein Astronism.

Liechtenstein Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Principality of Liechtenstein.

Lien d'étoiles - in Astronist Rendition, the French name for the bracelet of Astronist philosophical adherence, predominantly known as a starbond.

Life Force - in sentientology of Astronist Philosophy, the appellation for the essence of a being to make it sentient and is often demonstrated by a distinction in purpose, character, function, appearance, and behaviour.

Lifeform - in Astronist Philosophy, relating to that which is animate, or living biologically rather than that which is inanimate, or not alive biologically.

Lifegiver - in Astronist Philosophy, a popular appellation used to describe stars as the celestials that are most responsible for the creation of life in The Cosmos.

Derivatives

Lifegivers

Lifegiving

Life in The Cosmos - in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the discipline of study of sentientology.

Lifespan - in an Astronist contextualisation, the length of time of which a subsidiary of The People's Constitutional Company of Jesse Millette, or Astronist philosophical school, or denomination had existed.

Ligature - in Astronist Ornamentation, the materials and techniques used in the process of bonding ornamental plates.

Lightbeam - in Astronist Philosophy, particularly in Cosmic Philosophy, a beam of light mostly associated with quasars that extends outwards on both sides of the central black hole of a quasar; in a cosmic devotional sense, lightbeams are provided with a great deal of reverence due to the immensity of their appearance.

Lightform - referring to the various different formations and orders of light.

Lightlessness - in Astronist Philosophy, the instance in which The Cosmos holds no light, especially due to The Vacuological Cosmos.

Lightness

- in Astronist Philosophy, one of the Nine Cosmical Elements relating to all occurrences of light in The Cosmos.
- in firmamentology of Astronist Philosophy, one of the three applied filaments, the other two being darkness and luminosity.

Lightring - in Astronist Philosophy, a ring of light, especially around a black hole, and holds important significance in Cosmic Devotion.

Lightstream - a giant stream of light in The Cosmos, usually depicted as having a divine connection and first referred to in Astronist Mystology, especially one found as part of quasars.

Derivatives

Lightstreams

Like-minded - in an Astronist contextualisation, of a person, to be similar in mentality to a specific Astronist character.

L'illumination Béninoise - the root term for Beninese Astronism.

L'illumination Bissau-Guinéenne - the root term for Bissau-Guinean Astronism.

L'illumination Guinéenne - the root term for Guinean Astronism.

L'illuminationism - one of the most widely adhered and influential forms of The Philosophy of Astronism most commonly found in former French colonial and French-speaking West and North African countries with several derivations within it, and is considered to be closely associated with originism and ethnocentrism.

L'illuminationer

L'illuminational

L'illuminationally

L'illuminationality

L'illumination Malien - the root term for Malian Astronism.

L'illumination Nigérienne - the French root term for Nigerien Astronism.

L'illumination Togolaise - the root term for Togolese Astronism.

L'illumination Tunisienne - the root term for Tunisian Astronism.

Lim - in Astronist Philosophy, the philophon for the discipline of limitology.

Limbance - in Astronist Philosophy, the instance and fact of not being able to achieve a totality.

Derivatives

Limbancy

Liminal - in an Astronist contextualisation, relating to the beginning stages of any procedure, process, or event occurring within The People's Constitutional Company of Jesse Millette, or within wider Millettaria.

Derivatives

Liminally

Liminality

Limitence - in Astronist Philosophy, the extent to which the limitational nature of The Cosmos has an affect upon its dimensionality, and the entities within its dimensionality.

Derivatives

Limitency

Limitencial

Limitology - a large discipline of study within Astronist Philosophy as part of wider Astronomy dealing with the various concepts and contexts surrounding limitations, especially in both abstract and physically cosmical terms.

Derivatives

Limitologist

Limitologic

Limitological

Limitologically

Limitational

Limitationally

Limitrophy - in Astronist Philosophy, two philosophical schools, or concepts that are considered close to one another; two bordering schools and concepts that share very similar themes, discussions, approaches, and may differ slightly in their orientations.

Derivatives

Limitrophies

Limner - a person whom illustrates Astronist books as their profession.

Derivatives

Limners

Limnic

Limnerly

Linearation - in Astronist Ornamentation, a style of ornamental design that strictly uses only a linear pattern of lines, both in vertication or horizontation.

Linearism - a school of thought in The Philosophy of Astronism holding the viewpoint that philosophical thought and theory can only be realised through the sequential maturity and progression of the development of the idea, and so opposes the idea that philosophy is something can be realised and accomplished immediately, or without some sort of linear path of development.

Derivatives

Linearist

Linearistic

Line of Ellena - see Line of Jesse.

Line of Harriet - in Astronist Mystology and Literature, the line of descent that originates with the Astronist character of Harriet.

Line of Jesse - in Astronist Mystology and Literature, the line of descent that originates with the Astronist character of Jesse, and also includes within this the Line of Ellena.

Line of Oliver - in Astronist Mystology and Literature, the line of descent that originates with the Astronist character of Oliver.

Line of Phoenix - in Astronist Mystology and Literature, the line of descent that originates with the Astronist character of Phoenix, and is often only used to emphasise the removal of the Astronist character of Jesse from the hereditary line, or to take his title of propositarian.

Line of Zara - in Astronist Mystology and Literature, the line of descent that originates with the Astronist character of Zara.

Lintang ikatan - in Astronist Rendition, the Javanese name for the bracelet of Astronist philosophical adherence, predominantly known as a starbond.

Liquidity - in structurology of Astronist Philosophy, the measurement and contemplation of the state of matter of liquid.

Derivatives

Liquidities

Listation

- the action, process or instance of creating a list of entities, with entry usually sharing a commonality.
- in Constitutional Terminology, the use of lists, typically not in alphabetical order, in order to demonstrate a commonality between numerous items.

Derivatives

Listations

Literalism - a school of thought in The Philosophy of Astronism that holds an arguably extreme view that all Astronist text should be read and interpreted exactly the way in which it was written, and excludes the official interpretation, as well as the different interpretations from people of different circumstances, and seeks an homogenous interpretation to the literal words across all adherents.

Derivatives

Literalist

Literalistic

Literalarian

Literal State - in Astronist Philosophy, especially within the discipline of epochology, the instance of how in which a celestial entity exists in reality rather than in observation.

Literary Classification - the system of categorisation used for all Astronist writings, and typically classifies texts into the following six categories: documentation, epic, novel, novelette, miniature, and tale. The classification system is typically based on the nature of the text, or whom the text is to be read by, rather than its length in general, however, it tends to be documentations that are the longest in length. An example of a documentation is The Grand Centrality.

Literary Family - a family in which a multitude of members are involved in the writing of literature.

Literary Morphism - the gradual transition of a character or place over the course of a story or a set of stories.

Literate State - a nation that has a literate population of ninety-nine percent or more.

Literatim - in an Astronist contextualisation, the copying of Astronist text letter by letter.

Locamentresses

Loci - a group of three different insentences within The Grand Centrality of The Philosophy of Astronism that occur one after the other and typically hold some thematic link with one another.

Lockdown - in an Astronist contextualisation, of any type of Astronist building, automatically locked by computers in order to keep in a criminal, or to keep out attackers.

Locomote - in Astronist Philosophy, the present participle of locomotion.

Locus - in Astronist Philosophy, relating to a specific place or location where The Philosophy of Astronism is strongly adhered to and heavily influential. This is a title that can only be vested to a place by The Institution of The Philosophy of Astronism.

Locutional - in Astronist Philosophy, relating to that which is spoken rather than written.

Locutional Astronism - in Astronist Philosophy, relating to The Philosophy of Astronism when verbalised rather than written.

Lodgement - in an Astronist contextualisation, the action carried out by an advisor to the Chairman, or Vice Chairman just before the beginning of an Astronist congressional session wherein the advisor places and affixes a copy of The Grand Constitution on the podium in front of the Chairman, or Vice Chairman of The People's Constitutional Company of Jesse Millette.

Log - in Astronist Philosophy, the philophon for the discipline of logicology.

Logarithm - in an Astronist contextualisation, in Equational Philosophy, as part of wider Astronist Philosophy, the value in an equation always expressed in subscript form, and denotes the quantity of extringents for the same amount of entities involved.

Logical Supersession - in Astronist Philosophy, the appellation for the notion of logic that if one's knowledge, authority, and comprehension does not extend over one entity, that it is not going to do so for an entity of a larger scale and complexity, especially in relation to comprehending celestial entities.

Logicast - in Astronist Philosophy, the act of constructing a Common Logic that all ideas, concepts, theories, and opinions must conform with in order to be considered logical.

Derivatives
Logicasting
Logicastical
Logicastic
Logicaster

Logicity - in Astronist Philosophy, the instance and extent to which something is logical.

Derivatives

Logicities

Logicology - in Astronist Philosophy, primarily known as sanitology and omnidoxically encompassed by the disquisition titled The Principles of The Logical Cosmos. See sanitology.

Derivatives

Logicologist

Logicological

Logicologically

Logiscence - in Astronist Philosophy, as distinguished from poetiscent writings, the style of writing that comprises the majority of The Twelve Disquisitions and is defined by its focus on the explanation of the vast array of new disciplines, concepts, and orientations within Astronist Philosophy rather than anecdotal or narrative based writing.

Derivatives

Logology - the study of Astronist logos, or more widely used to describe the study of non-religious, non-dogmatic, non-philosophical, and non-propaganda symbols, just commercial logos.

Derivatives

Logologist

Logological

Logologically

Lointainment - in Astronist Philosophy, a school of thought, concept, or discipline that is considered remote from all other schools, concepts, and disciplines in relation to its theme, approach, and orientation.

Longingness - in Astronist Philosophy, a yearning desire for cosmic exploration, philosophisation, or a greater awareness of astronomy for the masses.

Longsighted - in an Astronist contextualisation, referring to Brandon Taylorian, and the great imagination, foresight, and vision he possessed and was gifted to think of the entirety of Millettaria alone.

Longsince - in Astronist Philosophy, a large period of time before the present day.

Longuement - in Astronist Philosophy, a discussion within a philosophical argumentation that is abnormally long and takes up the majority of the time for the entire argumentation.

Longwidth - in Astronist Philosophy, progressing in both width and length as means to speak of progression in across all avenues.

Loreen - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Loreenic

Lorrenian

Lotzen - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the husband of Galine, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Lotzenian

Low Compaction - in Cosmic Art, as a derivation of Astronist Art, the level of compaction featuring more space between stars than normal compaction, and holds a smaller amount of star clusters in the art piece.

Lowcosma - in Astronist Architecture, a term used in Architectural Theory to describe an especially non-ornate version of the Cosma style, typically characterised by its largely monotone colour scheme, its modernistic approach, and its lack of detail in cosmical ornamentation, usually because of its mass usage.

Derivatives

Lowcosmal

Lowgarden - in Astronist Architecture, as part of gardenry, and used as a term in Architectural Theory, to describe a version of gardenry that is characterised by a lack of grandiose in ornamentation, and a distinct lack of decoration for outdoor structures.

Low Literate State - a nation that has a literate population of fifty percent or less.

Lowort - in Cosmic Art, as a derivation of Astronist Art, the lower part of a cosmic art piece, below both the centort, and the upport.

Derivatives

Lowortial

Lowortic

Low Philosophy - a derogatory term for the versions of philosophies which supposedly lack depth, or whose relevancy, or structure is flawed or nondescript.

Low phrontistery - in Astronist Education, collectively relating to the students of a phrontistery below the age of eleven.

Low Scatterance - in Cosmic Art, as a derivation of Astronist Art, the level of scatterance featuring smaller amounts of space between stars than normal scatterance, almost to the point were it resembles compaction.

Lubb - in Arabic, the term given for the word, core, especially when used in Cosmic philosophy, and in relation to The Astronist Astronomic, Cosmographic, Cosmological & Astrographic Methodology.

Lubnaniin Tanwir - the root term for Lebanese Astronism.

Lucan - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the only offspring of Quinto and Hydee, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Lucanian

Lucidal - in Astronist Philosophy, relating to the occurrence of a lucida.

Lucidity - in Astronist Philosophy, the semistrument measuring and contemplating the lucida and the ways in which it occurs, as well as its interactions with other celestials.

Derivatives

Lucidalties

Lucien - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Third Generation, as the sixth son of Phoenix and Celestia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Lucienian

Lucrated - in Naology, an Astronist philosophical building that funds itself according to an enterprise that is created inside, on its grounds, or as focusing on it as a destination, and is therefore not purely a building, or site used for philosophical purposes.

Lucration - in Naology, the process of developing a nonerated Astronist philosophical building into a lucrated one, which involves developing the building as both a business or destination as well as a place of philosophical significance and utility.

Luminositistical
Luminositistically
Luminosities

Luna - in Astronist Philosophy, specifically within Cosmic Philosophy, another word for a moon, especially moons other than The Moon itself.

LunARATION - the depiction of the moon on mission patches, or spacecraft emblems.

Lunar Day - in The Grand Astronist Calendar, a day of commemoration and celebration dedicated to the specific wonderment, adoration, and laudation of all moons in The Cosmos, and is characterised by decorations of moons, and special lectures and education events at Astronist philosophical buildings that focus on the subject of moons. This always takes place on 16th Jessine, which translates to the 28th March in the Gregorian calendar.

Lunar Formation - a major branch of formatology dealing with the formations of moons from a purely philosophical perspective.

Lunarity - in Astronist Philosophy, an instrument of study relating to the philosophical discussion and contemplation of moons, including their functionalities, features, processes, movements, histories, and all other aspects of lunar formation, and existence, as well as contemplating the lunar-planetary relationship.

Derivatives
Lunarities

Lunarium - in Astronist Rendition, an often silver coloured mechanical ornament illustrating the motions and phases of The Moon itself, or some other moon.

Derivatives
Lunariums

Lunarlab - in Astronist Rendition, either a brass or plastic ornament featuring a moon as its central focus rather than a planet as is characteristic of other labes.

Derivatives
Lunarlabes

Lunar Parallax - in parallaxics of Astronist Philosophy, one of the five types of parallax to be found involving moons.

Lunarsence - in observology and occurrology of Astronist Philosophy, the instance in which The Moon is brighter than the stars of a night sky.

Derivatives
Lunarsency

Lunar'zatar - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the fifth son of Cosima and Celetius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Maarif - a follower of the Azerbaijani denomination of The Philosophy of Astronism, known as Maariflandirme'ism.

Derivatives

Maarifs

Maariflandirme'ism - also known as Azerbaijani Astronism, the denomination of The Philosophy of Astronism is predominantly adhered to in Azerbaijan, and in Azerbaijani diaspora communities worldwide.

Derivatives

Maariflandirme'ist

Mabdau - in Arabic, the term given for principle, and specifically The Twelve Grand Principles of The Philosophy of Astronism.

Mac - in Astronist Philosophy, the philophon for the discipline of macroethics.

Macanese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Macao Special Administrative Region of the People's Republic of China.

Macedonian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Macedonia.

Machination - a conspiracy or plot against The Philosophy of Astronism, The Institution of The Philosophy of Astronism, or against the wider People's Constitutional Company of Jesse Millette.

Macroapplication - in Astronist Philosophy, a cosmoapplication that uses a subject considered larger in its breadth than the subject to which it addresses its application to. An example of which would be to apply a solar system to a plant on The Earth.

Derivatives

Macroapplicational

Macrocosmism - a school of thought in The Philosophy of Astronism that emphasises the importance of the philosophy in its complete and complex entirety, and not one particular part, or theory from within the philosophy.

Derivatives

Macrocosmist

Macrocosmistic

Macrobusiness - relating to business practices, enterprise, and entrepreneurship on a large-scale, or on a national, or global level.

Macrocology - in Astronist Philosophy and Astronist Cosmology, an Astronist Subject dealing with the philosophical study of The Cosmos on a large scale, or in wholeness.

Derivatives

Macrocologic

Macrocological

Macrocologically

Macrocologist

Macrofinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that each finality must be studied in macrocosmic circumstances and consequences rather than in isolation from each other as is believed to be superior in microfinalism.

Derivatives

Macrofinalism

Macrofinalities

Macrofinalist

Macrophilosophy

- the philosophies that are openly established in a particular society, are in the public psyche, and are widely disseminated and accepted throughout the society, or nation.
- in Astronist Philosophy, considering a philosophy in its entirety, rather than a particular branch of the philosophy.

Derivatives

Macrophilosophical

Macrophilosophically

Macrophilosophicality

Macroprogeny - in Astronist Philosophy, a synonym for celestial entities in comparison to humanity in The Cosmos, which are known as microprogeny.

Derivatives

Macroprogenies

Macrotopic - the midrange designation and categorisation of a topic.

Derivatives

Macrotopics

Macrotopical

MacroAstronistisation - the process and supporting of Astronistisation in a large area, especially in contrast to an associated smaller area.

MacroAstronistisationism - the belief that macroAstronistisation is the best and most efficient and effective way of Astronistisation.

Macropool - in Spatial Psychology of Astronist Philosophy, a large group of people that one associates and socialises with as is demonstrated by the average social life of a person in a society

on The Earth, the loss of which aboard a spacecraft is expected to hold grave psychological consequences. Compare with micropool.

Met- - in Astronist Onomatology, a prefix used for Astronist names, in reference to meteors.

Meta - in an Astronist contextualisation, that which is considered to be abstractly higher, or somewhat transcendent above something else so as not to pervade that which exists below, but is to be a pure, or idealistic representation of. An example of this being the status of The Five Astronist Characters in relation to The Philosophy of Astronism.

Metacosmology - in Astronist Philosophy, a perception and approach to contemplating cosmology and The Cosmos on a level that is both transcendent, but also simplified, for The Cosmos it considered according to the seven attributes of time, space, matter, knowledge, existence, reality, and instrument.

Derivatives

Metacosmological
Metacosmologically
Metacosmologic
Metacosmologist

Metadiscipline - in omnidoxicology, a discipline of study that is not officially collectivised into its own disquisition or discourse, but is instead discussed throughout The Omnidoxy in many different insentensations, contexts and applications.

Derivatives

Metadisciplinary
Metadisciplinal

Metagalactic Formation - a major branch of formatology dealing with the formations of The Metagalaxy from a purely philosophical perspective.

Metagalactic Superstructure - in Astronist Philosophy, an alternative term for The Metagalaxy, but particularly relating to the fundamental structure of The Metagalaxy and its physical components, whereas the wider term of The Metagalaxy also relates to its conceptual understanding.

Metagalaxy - in Astronist Philosophy, also known as The Metagalaxy, a theoretical and philosophical notion and appellation for the region of The Cosmos involving its superstructures, as well as all concepts and contemplations in relation to this macrocosmic part of The Cosmos. This can also be described as a branch of study of Cosmic Philosophy dealing the philosophical contemplations of filaments, superclusters, hyperclusters, quasars, and other cosmically large superstructures of The Cosmos.

Metagalacticity

Metalment - in Astronist Architecture, the use of metalwork in the construction of Astronist buildings, or in ornamentation design.

MetaAstronistisation - the study into the specific changes of conditions in a society or entity undergoing Astronistisation.

MetaAstronistisationism - the belief that studying the specific changes of conditions in a society or entity undergoing Astronistisation is the most effective way of understanding the benefits of Astronistisation.

Metamorphosis - in Astronist Ornamentation, the depiction of a person, animal, or cosmic entity experiencing the process of transformation from an immature, and small state, to a mature and larger state, especially in gradation.

Metanence - in Characterology, the concept relating to the fact that The Five Astronist Characters, although central figures in the depiction of The Philosophy of Astronism, are not once mentioned within The Omnidoxy due to their status considered to be overarching and generally meta, in the Astronist meaning of the word.

Derivatives

Metanency

Metanencial

Metanencially

Meta-originetics - a branch of originetics of Astronist Philosophy, also known as ontological originetics, dealing with the question: does everything that exists have to have an origination for it to exist?

Derivatives

Meta-originetacist

Meta-originetic

Meta-originetical

Meta-originetically

Metaphilosophy - a subdiscipline of orbanology within Astronist Philosophy dealing with the nature and contemplation of philosophy itself and the different ways philosophy can be used for betterment and also studying the Astronist approach to philosophy and its utilities. Metaphilosophy as a branch of philosophy is given particular prominence in The Grand Centrality and throughout The Omnidoxy, expectedly due to the consciousness of the Astronist Tradition to maintain its designation as a philosophy by defining the purpose and component parts of philosophy, as well as the nature of the role of a philosopher in wider society.

Derivatives

Metaphilosopher

Metaphilosophical

Metaphilosophically

Metaphoricality - in Astronist Philosophy, the instance in which a concept is metaphorical, rather than actual, or literal.

Derivatives

Metaphoricalities

Meteoric Formation - a branch of formatology dealing with the formations of meteors from a purely philosophical perspective.

Meteorine - in Astronist Ornamentation, the specific depiction of a meteorite shower.

Methodocentrism - a wing of governance in The Philosophy of Astronism, and a separate philosophy in its own right, holding that The Astronist Methodologies should be centrally studied, analysed, and all conclusions and decisions must be drawn upon from the methodologies solely, with either none, or very little outside influences, and is most commonly applied in a political, or societal circumstance.

Derivatives

Methodocentric

Methodocentricity

Methodologies of Study - a major Astronist Subject and a derivational subject of Astronist Education dealing with the different ways a person can learn, especially in different contexts and environments, and the way by which these methodologies have been implemented into the education systems of different states.

Metonym - in an Astronist contextualisation, a word, name, or expression used as a substitute for something else with which it is closely associated, the most common of which is Zurich for the Grand Embassy of The People's Constitutional Company of Jesse Millette, wherein all diplomatic relations for the Company are conducted.

Derivatives

Metonymic

Metonymy

Metrical Philosophy - the branch of Astronist Philosophy concerned with the use of mathematical methods and models in describing philosophical concepts, systems, and especially theories of Cosmic Philosophy.

Mettle - in an Astronist contextualisation, the characteristic of resilience and strength against adversity within an individual, especially an employee or associate of The People's Constitutional Company of Jesse Millette, or an adherent of The Philosophy of Astronism.

Derivatives

Mettlety

Mettlesome

Mexican Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the United Mexican States.

Miànatra - derived from the Malagasy language, in Astronist Philosophy, a term relating to the learning and study of Astronist Philosophy, especially a specific discipline, such as omnology, or contology.

Miarahàba - derived from the Malagasy language, a term relating to the act of extending congratulations to an individual, especially an employee of The People's Constitutional Company of Jesse Millette, usually in an African country.

Miàraka - derived from the Malagasy language, a term relating to one person accompanying another, especially on a business trip for The People's Constitutional Company of Jesse Millette, and especially to an African nation.

Mic - in Astronist Philosophy, the philophon for the discipline of microethics.

Microapplication - in Astronist Philosophy, a cosmoapplication that uses a subject considered smaller in its breadth than the subject to which it addresses its application to. An example of which would be to apply a plant to a solar system, rather than the other way around. Essentially, whether it is a micro- or macroapplication depends upon one's approach to the cosmoapplication.

Derivatives

Microapplicational

Microbusiness - relating to business practices, enterprise, and entrepreneurship on a small-scale, or local level.

Microcosmic Planetism - in kosmetrics of Astronist Philosophy, the appellation for the notion that all of the planets of The Cosmos are all microcosms of The Cosmos itself and are reflects of its overall shape.

Microcosmism - a school of thought in The Philosophy of Astronism that emphasises the importance of the philosophy in a very specific, or contained form, and not in its complex entirety, and opposes Macrocomism.

Derivatives

Microcosmist

Microcosmistic

Microcosmology - in Astronist Philosophy and Astronist Cosmology, an Astronist Subject dealing with the philosophical study of The Cosmos on a smaller, narrower scale, or in isolation.

Derivatives

Microcosmologist

Microcosmologic

Microcosmological

Microcosmologically

Microfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that each finality must be studied in microcosmic circumstances and consequences rather than encompassing all finalities in the study as is believed to be superior in macrofinalism.

Derivatives

Microfinalism

Microfinalities

Microfinalist

Microphilosophy - the distinct philosophies maintained in a particular subgroup of society, especially in isolation, or in secrecy.

Micropower - in an Astronist contextualisation, relating to the authority of which a manager of a department possesses, or the director of a subsidiary possesses, especially when in contrast to the authority held by the executives and Leaders of The People's Constitutional Company of Jesse Millette.

Microprogeny - in Astronist Philosophy, a synonym for humanity in comparison to the celestials of The Cosmos, which are known as either just progeny, or macroprogeny.

Derivatives

Microprogenies

Microtopic - the narrowest and least versatile designation and categorisation of a topic.

Derivatives

Microtopics

Microtopical

MicroAstronistisation - the process and supporting of Astronistisation in a small area, especially in contrast to an associated larger area.

MicroAstronistisationism - the belief that microAstronistisation is the best and most efficient and effective way of Astronistisation.

Microphilosophy - in Astronist Philosophy, considering only a particular branch, or concept within a philosophy, rather than considering it in its entirety.

Derivatives

Microphilosophical

Microphilosophically

Microphilosophicality

Micropool - in Spacial Psychology of Astronist Philosophy, a small group of people that one associates and socialises with, especially in the instance aboard of small to medium sized space craft, the occurrence of which is expected to hold grave psychological consequences. Compare with macropool.

Microtoponym - a type of term relating to the name of a planet, dwarf planet, or moon indicating its inhabitability, or that it is currently uninhabited.

Derivatives

Microtoponymous

Microtoponymic

Microtoponymity

Middellity - in Cosmic Art, as a derivation of Astronist Art, the region of the galaxy taking up the middle ring between the core and periphera, and is typically at the centre of the region called the mid rim.

Derivatives

Middelital

Middelitic

Middelities

Middle Eastern Astronism - the schools, branches, and denominations of The Philosophy of Astronism that are most widely adhered to in The Middle East region, including the Arabian Peninsula, Iran, The Levant, Turkey, and the Caucasus countries. The most widely adhered denominations in this region include Tanwir'ism, Aydınlatma'ism, Georgian and Armenian Astronism, as well as Israeli, Iranian, and Azerbaijani forms.

Middleground - in Astronist Philosophy, that which retains a median position in series, or that which retains a middle position between two extremes, either in a physical or a conceptual sense, especially as part of an interposition.

Middlepoint - in Astronist Philosophy, used to describe the functionality of a valve as the link between a contemplation and its ability to make a conclusion.

Miderior - in Astronist Philosophy, a replacement appellation for that which is deemed a comedicism by the Astronist Tradition, known as the Goldilocks Zone in non-Astronist contexts, relating to the region of a star system in which The Earth is positioned, another term for which is the habitable zone.

Derivatives

Mideriority

Mideriorly

Mideriors

Midproximate - in introspectics of Astronist Philosophy, the instance in which an entity holds secondary authority such as the notion that The Universe is the midproximate source of authority for all that exists within The Cosmos and should be compared to proproximity and preproximity.

Derivatives

Midproximately

Midproximity

Midproximation

Mignonnette - in Astronist Art and Rendition, especially in Astro-Korean, Astro-Sino, and Astro-Japanese traditions of art, the representation of one or multiple of the Astronist characters in an overly cute style which is the most prominent style used in Astronist Manga, and Anime.

Mihòatra - derived from the Malagasy language, in Astronist Philosophy, a term relating to that which exists beyond The Earth, meaning The Cosmos, and is especially known by this term in the African denominations of The Philosophy of Astronism.

Milestone - a type of mission patch, or spacecraft emblem, purely created for the purpose of commemorating a past mission, spacecraft, or event.

Military Law (Cosmos) - an Astronist Subject dealing with the law of militaries on different planets, celestial bodies, and space stations under jurisdiction of different governmental bodies and organisations.

Derivatives

Cosmic Military Law

Milky Way Day - see The Milky Way Day.

-mill - in Astronist Onomatology, a suffix used for Astronist names, in reference to the Astronist Character of Jesse Millette.

Mill- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the Astronist Character of Jesse Millette.

Millë

- a member of *The People's Astronist Peacekeeping Order*, also known as *The Millë Order*.
- used to refer to *The People's Astronist Peacekeeping Order*, also known as *The Millë Order*.
- a collective noun for the qualities an individual must hold in order to be part of *The People's Astronist Peacekeeping Order*.
- translates to “grand” in English from German.

Derivatives

Millëhood

Millëly

Millëity

Milleiaster - in Astronist Ornamentation, a style of background using many different small cosmic and galactical patterns, most usually depicted on a black backdrop to represent space.

Millë'ism - a collectivity for the group of philosophies, mainly derived from Astronism, which are specifically used and practised by *The Millë Order*, and are distinct from The Philosophy of Astronism in their interpretation, and conduct, and include Astration, Cosmosism, Astronomism, and a vast range of other practices and philosophies.

Derivatives

Millë'ist

Millettä - the first form of Astronist architectural style, characterised by a tone of revivalism, featuring turrets, and terraces, with a concentric bird's-eye view and is most commonly found in the Eastern world.

Derivatives

Millettärian

Millettäric

Millettärisism

Millettability - of an object, a person, or a situation, be able to become more assimilative to Astronist culture, or philosophy.

Derivatives

Millettability

Millettably

Millettal - relating to something Astronist, especially Astronist architecture, art, or rendition.

Derivatives

Millettality

Millettally

Millettana - styles, concepts, orientations, products, and other similar animate and inanimate things associated with Astronist culture, philosophy, and literature, or with The People's Constitutional Company of Jesse Millette, and may be interchangeable used as an alternative to the term, Millettaria.

Millettanamé - a type of Astronist artefact, most typically resembling a chalice, which The Five Astronist Characters are usually depicted, in an encrustation, as holding up the bowl.

Millettarchy

- a term of Astronist Domain relating to a country, especially of republic, in which The Philosophy of Astronism or one of its derivations is officially recognised as one of the country's primary philosophical worldviews.
- a term of Astronist Domain relating to a country in which Astronarianism, or one of its derivations, is the official governmental methodology and is officially bound to the constitution of the republic.

Derivatives

Millettarchies

Millettaria - an all-encompassing term relating to the entirety of Astronist culture in all its versions, adaptations, and in all places, and also encompasses the entirety of Astronist philosophy, the operations of The People's Constitutional Company of Jesse Millette, and the entirety of Astronist literature.

Astronist

- relating to the genre and fictional character of *Jesse Millette*.
- characteristic of a story featuring *Jesse Millette*, *Ellena Chadwell*, *Zara Litchford*, *Ollie Mehler* or *Harriet Millette*.
- building, military or political entity, organisation, group, government, ideology, religion, philosophy or business operating in accordance or inspired by *The Ideology of Astronism*, follows the values of *The Grand Constitution of the People's Constitutional Company of Jesse Millette* or is constructed by *The People's Constitutional Company of Jesse Millette*.
- relating to *The Astronist Calendar* used by *The People's Constitutional Company of Jesse Millette*.
- relating to *The Astronist Timeline*.
- having or showing relation to *The People's Constitutional Company of Jesse Millette*, especially under political or governmental circumstance.
- a person that chooses to support or follow *The Philosophy of Astronism*, but in a political, social or philosophical sense only; not as their religion, particularly in a less dogmatic form.
- relating to the Astronist tradition, movement, era, character, and style within the context of music.

Derivatives

Astronists

Astronist (literary genre) - a literary or film genre involving Astronist stories, characters, and philosophies, and includes the sub-genres of Mystology, Realities, Dimensions, Divinities, and Ancestries.

Astronist Accelerationism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the technological evolution and progression should be positioned at the centre of all society, especially when placed beyond the bounds of social and governmental systems, and typically beliefs that it should be paired with philosophy for the development of a technologically advancing and philosophically astute nation.

Astronist Accounting - the newfound accounting activities, practices, and systems derived from The Astronist Methodology, wherein the practical application of the accounting methodology is introduced and detailed, with its main distinction being the practice of truncation.

Astronist Adventism - the familiarities and intersections between the philosophies of Astronism and the religious denomination of Adventism.

Astronist Aggressionism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that it is purely humanity's nature of greed, aggression, and hunger for power that fuels the causation of war, and sees the militarisation of society, the production of weaponry, and the sensationalism of military action to be just some of the influential factors in the aggression of humanity.

Astronist Alternate Character - characters that have not yet been canonised or officially placed into any eras of Astronist Mystology.

Astronist Anabaptism - the familiarities and intersections between the philosophies of Astronism and the religious denomination of Anabaptism.

Astronist Angelology - the specific study of the depictions and symbolisms of Astronist characters represented as angelic beings and the study of angelic beings appearing in Astronist artworks, literature and visual imagery.

Astronist Anglicanism - the familiarities and intersections between the philosophies of Astronism and the religious denomination of Anglicanism.

Astronist Anti-anarchism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that anarchy leads to the eventuality of the destruction of the structure, order, and progression of society, and the advocacy of anarchism in a social and governance circumstance is an advocacy for The Chaos in opposition to The Cosmos.

Astronist Anti-anthropocentrism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that anthropocentrism, particularly in a political context, is harmful to the society of human beings as a whole, and instead advocates for the cosmocentricity, philosophocentricity, and the technocentricity of human society.

Astronist Anti-conscription - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that conscription is one of the driving forces of the militarisation of society, and thus, unnecessarily encourages the aggressionism in humanity.

Astronist Antimilitarism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the militarisation of society is in opposition to the positive progression and development of the nation overall, and would position in forefront the centrality of education, healthcare, technology, and astronomy in society, than that of the military, the arms trade, and the increase of the Military Industry Complex.

Astronist Anti-racism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that races must have equality as a fundamental humanity right, but

distinguishes itself from other anti-racist doctrine by its centrality on the inclusion and unity of all races within a state, and places not the centrality on the race, but on the philosophy and ideology of the individual, and their ethics, values, and visions for the future of humanity; these are considered paramount features than that of race.

Astronist Architectonics - the study of the overall structure of Astronist musical, literary, artistic, political, social, and philosophical systems.

Astronist Architectural Theory - the analysis, and subsequent criticisms and conclusions derived from the study of Astronist Architecture, and the transposition of these ideas into a critical essay.

Astronist Architecture

- the newfound genre of architectural theory, design, and application which attempts to reignite restoration of buildings as opposed to the defacing, or demolition of them, the reorientation of the purpose of buildings, promotes the restructure of architectural education, and tackles The Next Architectural Frontier; namely architectural design and construction in space, or on planets other than The Earth. This also encompasses the new sub-genres of Philosophical Architecture, and Cosmic Architecture, as well as further developing the Philosophy of Architecture, especially from an Astronist worldview perspective.
- the theorising, designing, and planning of buildings, and other structures, especially those of a philosophical premise, which typically feature distinctly Astronist characteristics, ornamentations, and attributes.

Astronist Archiving - the practice, and study of the collection, organisation, categorisation, and addition to The Grand Astronist Archive and The Grand Astronist Image Archive.

Astronist Art

- the far-reaching and newfound genre of art, design, and visual culture relating to the Astronist Characters, as well as wider Astronist philosophy, worldview, and methodology, with a new range of terms, and is closely associated with both Astronist Ornamentation, Architecture, and Rendition. The founding of Astronist Art marks the ushering of artistic movements, such as Cosmic, and Philosophical Art, whilst also adding to the philosophy of art, and developing new disciplines including Art Technology, and Art Theory.
- all illustration, paintings, and visual depictions of the Astronist characters, either commissioned or recognised by The People's Constitutional Company of Jesse Millette.

Astronist Art Theory - the analysis, and subsequent criticisms and conclusions derived from the study of Astronist Art, and the transposition of these ideas into a critical essay.

Astronist Arts - all artworks, including music, film, literature, and visual depictions, featuring Astronist characters, either commissioned or recognised by The People's Constitutional Company of Jesse Millette.

Astronist Astrobiology - the ideas and theories of astrobiology founded by research and development conducted by Astronist organisations, or based upon Astronist ideology.

Astronist Astrogeology - the scientific ideas and theories forming the discipline of studying the geology of celestial bodies, and particularly the possibilities for human development and industrialisation.

Astronist Astrography - the scientific discoveries, ideas, and theories forming the subject of Astrography based up on the research and developments conducted by Astronist organisations, or based upon Astronist ideology.

Astronist Astronomy - the astronomical ideas and theories founded by research and development conducted by Astronist organisations, or based upon Astronist ideology.

Astronist Attire - the formal branch of the Astronist Fashion style made up of three distinct parts; Ambassadorial Fashions, Celebratory Fashions, and Ceremonial Fashions, and is a term most commonly used in scholarly and academic works to refer to these three parts collectively.

Astronist Ballet - the collection of traditions, styles, feats, movements, set pieces and choreographies associated with, and attributed to the Astronist form of ballet, which entirely incorporates cosmical elements and genres throughout, and is known as Kosita, and to which Astronist Music is accompanied.

Astronist Banking - the banking activities and ideology derived from The Astronist Methodology, wherein the practical application of the banking system is introduced and detailed.

Astronist Baptism - the familiarities and intersections between the philosophies of Astronism and the religious denomination of Baptism.

Astronist Business Economics - the application of Astronist economic theory to the normative economic landscape, the use of economic principles to establish theory, the analysis of economic influences on business decisions, and the investigation of the market in motional circumstances.

Astronist Business Management - the branch of study within Astronology dealing with the business practices and principles actioned, managed and propagated by The People's Constitutional Company of Jesse Millette and all its subsidiaries.

Astronist Business Philosophy - collectively relating to the business practices, ideas, and methodologies of The People's Constitutional Company of Jesse Millette.

Astronist Business Practice - the business practices and principles based on Astronist methodology and ideology, most typically relating to Astronist Social Business.

Astronist Callisthenics - all calisthenic traditions that have been integrated into an Astronist practice, especially those identified within the practice of Astration.

Astronist Calque - a type of Astronist term that is used across multiple languages with the same definition, an example of which would be Astronism.

Astronist Canonical Character - characters featuring in the Canonical Era of the Astronist Universe.

Astronist Canonist(s) - a person or group that officially canonises stories, characters and events from the Astronist Universe.

Astronist Caodaism - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Caodaism.

Astronist Capitalism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the capitalist society and economic structure is pre-eminent above other economic theories, yet is distinct by its centrality on the Astronist methodologies, as well as by the centrality of philosophy, space exploration, and education.

Astronist Care & Nursing - the system of practices, policies, and philosophies forming newfound ways to nurse and care for patients, and the system upon which the Astronist Care industry is structured and operates.

Astronist Caricature - the particular styles utilised in the depictions of Astronist characters in caricatures, most typically taking upon the ideas of formationism, vibrancy, and The Cosmos.

Astronist Cartoon - the particular styles utilised in the depictions of Astronist characters in cartoons, most typically taking upon the ideas of formationism, vibrancy, and The Cosmos.

Astronist Catholicism - the familiarities and intersections between the philosophies of Astronism and the religious denomination of Catholicism.

Astronist Celestial Categorisation - the process of placing celestial bodies and objects into unique categories with other celestial entities that share similar features, or are located in similar regions of space.

Astronist Celestial Identification - the unique process of identifying celestial bodies and objects and placing identification names to them and using codes to label them as a secondary form of identification.

Astronist Centrism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that society must always have its societal poor, and its societal rich, especially when under a capitalist system, and doesn't advocates for either end of the political spectrum, just simply for the liberation, education, and progression of human society.

Astronist Christianity - the familiarities and intersections between the philosophies of Astronism and the religion of Christianity.

Astronist Civicology - the study and application of Civicology in a distinctly Astronist context, such as the towns and cities which The People's Constitutional Company of Jesse Millette has been heavily involved in the development of, and the focus on Astronist buildings in town and city planning.

Astronist Civil Development - the developmental projects sponsored and commissioned by The People's Constitutional Company of Jesse Millette.

Astronist Commemoration Day - in the Astronist calendar system, celebratory days for specific Astronist characters, as designated in The Grand Astronist Calendar documentation.

Astronist Communism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the Communistic system is pre-eminent, yet distinguishes itself by including the centrality of philosophy, the exploration of space, the education system, and away from the militarisation of the country, extreme censorship, and economic isolationism.

Astronist Communitarianism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the individual is reflective of the community in which one lives, and vice versa, and also holds that for the community to change for the better, it must first be the individual that changes to become what they wish their community to be.

Astronist Confederation - a system of governmental and societal structure and organisational as a major branch of Astronarianism, that champions confederationism as a totally revised form of the system of government of confederation, and is characterised by a balance of power between the Central Authority, and the member states, the encouragement of national currencies, intraconfederational free trade, a populationist voting structure, and the introduction of omnopolies.

Astronist Confucianism - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Confucianism.

Astronist Conservatism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the traditional values and systems upon which the society and the nation have been structured, should be ultimately protected and conserved, whilst in parallel, opening up to the new developments and trends in society for them to be eventually integrated into society to become the traditional values and systems originally developed.

Astronist Constellations - the branch of study within Astronomy dealing with the system of constellation naming and categorisation established under Astronist Methodology.

Astronist Constitutional Law

- the policies, and principles on the philosophies of Astronist constitutional law, as outlined in The Astronist Jurisprudence Methodology, as the constitutional branch of Astronist Jurisprudence.
- the body of rules that The People's Constitutional Company of Jesse Millette is obligated to abide by.

Astronist Consumerism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the consumer is at the centre of all Capitalist society as a version of the people and is often represented in propaganda, like in Communist society in which the worker is at the centre as a version of the people, and this is also an important concept for Corporatism and Corporatocracy.

Astronist contemplation - in Astronist Philosophy, the practice of thinking of, looking at, speaking about, and understanding philosophical concepts as a four step activity in basic philosophical practice.

Astronist Contextualisation - the process of shifting something into an Astronist context, especially with the use of Astronist Nomenclature.

Astronist Corporate Law - the policies, and principles on the philosophies of Astronist corporate law, and largely in alignment with The Grand Constitution, as outlined in The Astronist Jurisprudence Methodology, as the corporate branch of Astronist Jurisprudence.

Astronist Corporatism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that society must be structured by societal groups known as corporate groups, and includes a wide range occupations, philosophical school affiliations, and scientific affiliations, and believes that only this societal structuring can work.

Astronist Corporatocracy - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that corporations are now the central tenets to the society due to their economic eminence, and so, believes that the system of governance should be centred on the corporation by believing that the corporation offers mass occupation, social structure, and economic security.

Astronist Cosmist - a person who advocates for the furtherance of the ideas of Astronist Cosmosism.

Astronist Cosmology

- the study of the nature, purpose, motionality, and functionality of various celestial entities, as well as the philosophical discussion of the many concepts relating to The Cosmos, The Universe, and their origins, structures, and finalities according to Cosmic Philosophy, as a derivation of The Philosophy of Astronism.
- the cosmological ideas and theories founded by research and development conducted by Astronist organisations, or based upon Astronist ideology.

Astronist Cosmopolitanism - a wing of governance within The Philosophy of Astronism as part of Astronarianism, holding that humanity should group itself along moral, philosophical, and ethical lines, rather than along ethnic lines.

Astronist Cosmos, The

- in Astronist Art, Architecture, Rendition, Media, Mystology and Culture, collectively relating to all depictions of a multitude of Astronist characters in The Cosmos, as opposed to just one of the Astronist characters, which each have their own terms, two examples of which being Jesse's Cosmos, and Oliver's Cosmos.
- in Astronist Philosophy, relating to the Astronist philosophical interpretation and approach to what The Cosmos is, how it functions, and its subsequent representation and description in Astronist philosophical works, the most predominant of which is The Grand Centrality of The Philosophy of Astronism.

Astronist Costume - the overall fashion style synonymous with Astronist Culture, especially so when compared to other fashion styles, both in present times, and those that are historical, and is a term most commonly used in scholarly and academic works when relating to the Astronist fashion style.

Astronist Cultural Revolution - the ignition, implementation, and dissemination of Astronist culture, philosophies and methodologies within a specific period of time in a nation. The extent to which this has an impact varies from nation to nation, but its usual components comprise of Astronist entities holding an increasing influence over cultural, social, philosophical, financial, economic and especially educational traditions, policies and movements within the nation and in surrounding nations.

Astronist Culture

- the broad interest, influence and integration of Astronist characters, artworks and philosophies.
- the philosophies, traditions, styles, and principles distinctly Astronist in origin and character, as manifested in art, literature, and philosophy.

Astronist Cyber Character - characters featuring in the Cyber Era of Astronist Mystology.

Astronist Cynicism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that initial cynicism of motives in politics and government is the most efficient way to exposing false and opposing ideas.

Astronist Day - a day of the year on which people celebrate, and commemorate Astronist Culture, Literature, and everything else that can be considered Astronist. This day takes place on the 13th Jessine in The Grand Astronist Calendar, which translates to the 25th March in the Gregorian calendar.

Astronist Democracy - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the democratic system is pre-eminent, but distinguishes itself by the implementation of the centrality of philosophy, the education system, and the exploration of space as well as the cultural overarch of Astronist philosophy, culture, and art. This system also advocates for direct democracy, majoritarianism, transparenism from the government, and for the frequent use of referendums.

Astronist Destinical Character - characters featuring in the Destinies Era of Astronist Mystology.

Astronist Devotions - also known as Cosmic Devotions, in Astronist Philosophy, collectively relating to cosmic wonderment, adoration, and laudation.

Astronist Diorama - in Astronist Rendition, a kind of model representing a scene with three-dimensional versions of Astronist characters, in a whole variety of settings, and scenarios.

Astronist Discussion - the system of procedures and practices utilised in the debates conducted in Astronist governing ministries and organisations, as outlined in The Astronist Governance Methodology.

Astronist Domain - the body of terms relating to the physical manifestations and organisation of Astronist peoples, companies, philosophies, and institutions, especially in relation to nation states, politics, societies, or demographics.

Astronist Domesticity - relating to the entirety of the subjects outlined in The Astronist Housekeeping, Gardening, & Groundskeeping Methodology, especially those associated with domestic and family life.

Astronist Dominancy - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that there must always be a dominant ideology, or religion over a nation state or simply none at all, only with the exception of philosophy, wherein there can be multiple philosophies existing in parallel. It argues that there can only exist multiple religions and ideologies within a state when one is dominant over all others, despite there being multiple large minorities, there must always be a majority, or no religion at all. This can also be applied to a non-religious context, wherein Communism and Capitalism could not exist in parallel absolutely equally as there must always be one dominant side.

Astronist Dramatics - within Astronist Theatre, collectively relating to all Astronist theatrical productions, as well as the study of the plays and musicals of the Astronist theatrical tradition.

Astronist Eastern Orthodoxy - the familiarities and intersections between the philosophies of Astronism and the religious denomination of Eastern Orthodoxy.

Astronist Economics

- the social science which studies the interactions, and interrelations between humans in the acquisition, development, and allocation of resources, and typically incorporates psychological, sociocultural, and philosophical concepts into its methodologies.
- the ideology of economics derived from The Astronist Methodology, forming a newfound middle ground between opposing traditional policies and principles.

Astronist Social Welfare - the array of principles and policies forming some structures of Astronist Economics, focusing well-being and social support, with the methodology leaning towards limited, yet fair social welfares without draining the spirit of challenge and work ethic from the masses.

Astronist Sociology - the sociological principles and theories based upon Astronist theology, philosophy, and ideology.

Astronist Spacial Law

- a branch of Astronist Jurisprudence, the system of laws specific to the issues and jurisdictions beyond Earth compounded for the construction of spacial law as outlined in The Astronist Jurisprudence Methodology.

- a major branch of study within Astronology dealing with newfound concepts of legality relating to space exploration, space colonisation, and space exploitation as founded by The Astronist Methodology, and opens up new wider subjects of Spacial Ethics, Spacial Psychology, Spacial Economics, and Spacial Sociology.

Astronist Sports - sports and physical recreation that are sponsored and disseminated by The People's Constitutional Company of Jesse Millette.

Astronist Style - a broad term relating to the distinct style synonymous with Astronist Arts, Culture, and Symbology that influences the way by which Astronist fashion items are made and presented, and is a term most commonly used in scholarly and academic works to encompass the entirety of Astronist fashion tastes, especially so when according to a particular period, place, or designer.

Astronist Stylistics - the study, and usage, of the distinctive styles found in Astronist books, and other Astronist literary works.

Derivatives

Astronist Stylisticist

Astronist Subjects - relating to any subjects that arose either directly from Astronist literatures, cultures, and philosophies, or indirectly influenced in their founding by Astronist literatures, cultures, and philosophies.

Derivatives

Astronist Subject

Astronist Sufism - the familiarities and intersections between the philosophies of Astronism and the Islamic religious branch of Sufism.

Astronist Sunnism - the familiarities and intersections between the philosophies of Astronism and the Islamic religious branch of Sunnism.

Astronist Symbology - a major subject within Astronist Culture and academics relating to the study of various meanings, and inferences deriving from symbols, and their usage in the Astronist Arts.

Derivatives

Symbological

Symbologically

Symbologist

Astronist Syntax - in Astronist Philosophy, specifically within omnidoxical studies, similar to sentency and insentency, relating to the arrangement of words in a distinctly Astronist style so as to form well-structured insentensations within The Omnidoxy.

Astronist System - in Astronist Philosophy, collectively relating to the practical systems manifested as in alignment with Astronarianism, especially from the perspective of wider Astronist Philosophy.

Astronist Taoism - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Taoism.

Astronist Taxation - a branch of Astronist Jurisprudence and closely linked to the policies and principles outlined by The Grand Constitution, the system upon which The People's Constitutional Company of Jesse Millette bases its taxation policies and philosophies, typically taking on the ideas of taxation as a force of influence and a way of reaffirming the company's relevance in society.

Astronist Teacher Training - a branch of Astronist Education, focusing on the system of policies and practices in the training of teachers and educators to most efficiently and effectively educate students, as outlined in The Astronist Education Methodology.

Astronist Technocracy - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding the belief that it must be a group of technically astute and knowledgeable individuals that either help govern, or advise the governance of the nation due to their specialties, but also advocates for the people to be fully informed as the advice, and the ways in which these people are helping run the country as a right of the people of the nation. This wing also stresses the fact that anybody of talent, motivation, and knowledge should be given the opportunity to become a technocrat, and should not in any way be a closed group of elites.

Astronist Terminology - also known as Astronist Lexicon, or as the Astronist Vocabulary, the body of original terms created and used by The People's Constitutional Company of Jesse Millette and detailed in The Dictionary of Astronist Terminology.

Astronist Thaumaturge - the specific representation of Astronist characters as workers of wonders or performers of miracles, especially in Astronist Mystology, Astronist Art and fantasy.

Astronist Theatre - relating to the entirety of the theatrical and dramatics tradition within the Astronist Culture, and is a term used to collectively described all Astronist plays, all those written by Brandon Taylorian, as well as the styles, characters, themes, and organisations originating from the productions and business of the Astronist Theatre. The Astronist Culture has a strong theatrical tradition, which is evident in *The Original Jesse Millette Series*, with the first book, *Jesse Millette and The Phantom's Curse*, largely set inside a London theatre.

Astronist Theology - the collective theological references and interpretations in Astronist works, philosophy, and culture, yet not in themselves a complete theology.

Astronist Theosophy - the collectivity of theological and philosophical Astronist dogma relating to a knowledge of divinity, the presence of divinity, and the worship of divinity through faith, thought, and love.

Astronist Theravada Buddhism - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Theravada Buddhism.

Astronist Thinking/Thought - the vast subject encompassing Astronist Philosophy, Astration, and an array of other topics, with three consistent themes linking each subject together; spirituality, physicality, and intellectuality.

Astronist tiriton - see tiriton.

Astronist Tradition - most commonly used in a philosophical or theoretical context, relating to the theories, concepts, and philosophies that are considered to be in alignment with original Astronist teachings on the subject in question, or are part of the original Astronist philosophy, or in a broader sense, may relate to the entirety of Astronist philosophical approaches to different topics.

Astronist Typography - a branch of Astronology dealing with the way in which Astronist brands, organisations, as well as Astronist lexicographers layout their fonts, as well as studying the particular fonts they choose.

Astronist Unity - the wing of governance within The Philosophy of Astronism as part of Astronarianism holding that unity and the unification of the people of a nation state, or even of humanity itself, is the all-encompassing and pre-eminent goal of Astronist thought, philosophy, and system, and despite not being so obvious in some concepts than others, it is argued that Astronist Unity is still at the foundation of all Astronist theories. The concept of Unity within Astronist thought encompassing that of Unity in Knowledge, Unity in Vision, and Unity in Mind, which doesn't mean to say all should know, see, and think in the same way, but does mean to say that all should know, see, and think in a way that is true to themselves, as well as those around them, and the current circumstances at hand. In addition to this, the concept of Unity is one of, if not the most, widely depicted concepts in all of Astronist art, rendition, and propaganda.

Astronist Universalism - a school of thought in The Philosophy of Astronism holding that, from an ethical standpoint, the advocacy of loyalty and concern for others despite a difference in ethnicity, or nationality is central to a perceived good philosophical existence, and from a cosmological point of view, may also include distinct wonderment for the entire universe, especially all that is beyond The Cosmos.

Astronist Universal Observatory - an observatory that focuses on the observation of the wider universe beyond The Milky Way.

Astronist Universe - an all-encompassing term used to describe the entirety of all entities related to Astronist thought, imagery and creations.

Astronist Utopianism - a wing of governance within The Philosophy of Astronism as part of Astronarianism which encompasses a mass of theories, concepts, and philosophies within wider Astronism, and is arguably a foundational principle in all Astronist thought, culture, art, and philosophy, and is conducted in order to represent what the leaders believe the people should be like in an idealised vision, typically featuring characteristics that will better progress humanity, and is dedicated to the helping of those whom do not current hold those characteristics.

Astronist Vajrayana Buddhism - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Vajrayana Buddhism.

Astronist Vexillology - the specific study of the representations, design and symbolism within Astronist flags.

Astronist Vocabulary - see Astronist Terminology.

Astronist Wealth Management - a branch of Astronist Finance, focusing on the practices, principles, and policies utilised in the securement, and management of wealth and large funds.

Astronist Wicca - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Wicca.

Astronist Word Formation - the official process wherein a new word is coined for something relating to Astronist philosophy, culture, or terminology that has not previously existed.

Astronist World - a term frequently used in the study of demographics, referring to a unified Astronist community, or the entirety of that which could be described as Astronist, and is typically a less formal word than Millettaria, or may collectively refer to all the adherents of The Philosophy of Astronism, or the countries in which it is practiced, or is officially recognised.

Astronist World Literature

- the sum total of the world's Astronist literature from all nations, genres, and authors.
- the Astronist literary works that have garnered considerable worldwide influence and acclaim.

Astronist worldview - a term used in parallel to Astronist philosophy, and Astronist cosmology the encompasses the entirety of the beliefs, the approaches, and the general lifestyle expounded by The Philosophy of Astronism, and is typically compacted down into bullet pointed tenets for greater mass understanding, but can be said to encompass the entirety of Astronist philosophy, as well as the way in which that philosophy is to be implemented in one's life and in the surrounding world, and civilisation.

Astronist Zoroastrianism - the familiarities and intersections between the philosophies of Astronism and the religious teachings of Zoroastrianism.

Millettalise - relating to the process of Astronistisation, and its applications, implementations, and versions.

Derivatives

Millettalising

Millettalised

Millettalistical

Astronistisation

Millettate - following the precepts of Astration.

Derivatives

Millettating

Millettative

Millettatively

Millettatee - a practitioner of Astration, especially a student.

Astration (noun) - the Astronist spiritual, physical and intellectual discipline involving the practices of meditation, the acquisition and sharpening of knowledge, and the application and impartation of that knowledge in the surrounding world, with the ultimate goal of mastering that knowledge or practice.

Derivatives

Astrationer

Astrationist

Astrationistic

Astrationism - a subschool of thought in The Philosophy of Astronism derived from Astration, and not officially recognised as one of the three schools of Astration, holding that the tenets of Astration are most important and should supersede those of The Grand Centrality itself.

Millettator - a professional instructor of Astration.

Millettatural Seal - the official seal of The People's Constitutional Company of Jesse Millette, of which all official documents of the company are sealed and, of which, all Astronist founding works are too, sealed.

Millettature - written works pertaining an Astronist style and characteristic, and especially those considered to be of superior or lasting artistic merit.

Derivatives

Millettatural

Millette (verb)

- to reflect upon one's life, to change one's life accordingly, and to seek progression throughout one's life.
- to galvanise a mindset of holding a distinct excitement to learn about all there is to learn.
- a reference to the Astronist character of Jesse.
- a follower of The Philosophy of Astronism, so as not to specify any particular denomination.
- done, said, or characterised in an Astronist way.

Millettë - the second form of Astronist Architecture, typified by elaborate hexagonal gazebos, cylindrical structures, and modern open air spaces, as well as conic turrets and distinctly smaller domical roofings, most commonly found in African countries, and interiorly, encrustations, statues, and artworks are featured throughout.

Derivatives

Millettërian

Millettëric

Millettërisim

Millettëmancy - the practice of anything that has an Astronist origin, especially something related to spirituality, or philosophy.

Millettëndom

- an Astronist Domain term relating to the entirety of Astronist companies, societies, groups, organisations, and peoples whom interact with Astronist Culture, or associate themselves with Astronist Philosophy.
- relating to a kingdom in which Astronarianism, or one of its derivative forms is the primary governmental methodology or philosophy.

Derivatives

Millettëdom

Millettënum - in Astronist Architecture, a rare structure of Astronist buildings comprising of corine steps upon which giant columns emerge to form the larger superstructure of the Millettënum. Beyond this, at the top of the corine steps, four giant columns on either side support the main interior of the structure atop of which a walkable and balustraded terrace can be found. The main archway of the Millettënum is supported by the eight columns, and beyond which a typically circular columned area opens out and from which other corridors can be accessed. The main distinguishing feature of the Millettënum superstructure is the unique and grandiose of its attributes when compared to other architectural structures, and it is considered the highest product of the highcosma style.

Derivatives

Millettënia

Millettënum

Millettëpedia - an online encyclopaedia for information on the entirety of the Jesse Millette brand, its literature, characters, and all other cultural and creative expressions and manifestations related to The World of Jesse Millette.

Milletter

- a person who creates an Astronist work of any kind.
- in Astronist Philosophy, an academic or professional philosopher whom is aligned with The Philosophy of Astronism.

Millettëse - Millettëlogical, or Astronist jargon, especially of Astronist philosophical technical terms, typically when an individual whom hasn't studied Astronology, cannot understand their usage.

Derivatives

Millettëses

Millettëscue - relating to a style of architecture, or ornamental design which is in resemblance to Astronist culture, philosophy, and symbolism.

Milletteverse - the broad denotation of the entire fictional existence of Astronist characters, especially in an informal sense.

Milletti - a follower of The Philosophy of Astronism, particularly the English language denomination of the philosophy.

Derivatives

Millettis

Millettī - the third form of Astronist architectural style, characterised by the distinct baroque style adopted with a uniquely cosmic theme, as well as featuring gothic encrustations, and incrustations, with an emphasis on spires rather than domes, and is the least common form of Astronist Architecture.

Derivatives

Millettīrian

Millettī'ism

Millettīric

Millettia - relating to the entirety of Astronist philosophies, and methodologies applied to non-Astronist subjects, especially in the sciences.

Millettian

- a specified reference to the business practises of certain subsidiaries of *The People's Constitutional Company of Jesse Millette*, mostly that of the *Millettian Luxuries Group*.
- a person currently studying at a *Jesse Millette Education Institution* or under the *Jesse Millette Education System*, but has not yet graduated.

Millettiatry - the pseudoscience also known as Millettiatrics, dealing with the study and practice of Astrational procedures enacted as certified medical solutions to problems, and is made entirely distinct from the practices, orders, and philosophies of Astration itself.

Astronist

- relating to a follower of The Philosophy of Astronism, the plural of which being Astronists, which is also the name for Astronist school of thought.
- relating to a branch of study stemming from Astronist ideals, philosophy, literature, methodology, and culture, and is typically used interchangeable with the term, Astronist.

Derivatives

Astronistity

Astronist devotions - in Astronist Philosophy, an alternative term for Cosmic Devotions.

Astronistism - another term for The Philosophy of Astronism.

Astronists - a broad school of thought in The Philosophy of Astronism which mainly focuses on the ethical, moral, and logic systems of the philosophy, and can be termed as the overarching term for Astronist Ethics, Astronist Morality, and Astronist Logic when described collectively.

Derivatives

Astronistal

Astronistality

Astronistally

Astronistist

Astronist Astrology - a newfound system of astrological practice and belief stemming from Astronist philosophy that studies the movements and positions of celestial entities relative to the wider galaxy, and Cosmos, and as distinct from other forms of astrology, asserts no geocentric or anthropocentric influence, but does affirm itself as a scientific practice due to its reliance on cosmology, astronomy, and astrography.

Derivatives

Astronist-astrologist

Millettiona - a branch of the newfound Cosmical Piano style, the style of piano playing, typically heard at the beginning of cosmical pieces, that is characterised by very quick staccatos and large movements along the piano, especially when leaping across the keys one octave at a time.

Derivatives

Millettional

Millettionally

Millettine - a style resembling Astronist influence, most typically in architecture, art, or literature.

Millettinity - the supposed religion practised by members of *The Millë Order*, also known as *The People's Astronist Peacekeeping Order*, or as *The Order of the Seven-Thousand*, that is made distinct from purely philosophical belief in *The Philosophy of Astronism*, and it is the constitutional obligation of *The People's Constitutional Company of Jesse Millette*, to never recognise or give full authority to this religious order, and to always consider it to be an autonomous prefecture of the company with a strict limitation to official adherence.

Derivatives

Millettinities

Millettinitist

Millettipality - a term of Astronist Domain relating to a principality, or some other small sovereign state, in which The Philosophy of Astronism is recognised as the principality's, or one of the principality's primary philosophical worldviews, or in which Astronarianism, or one of its derivations is officially recognised as the governmental methodology of the state.

Derivatives

Millettipalities

Millettiquity

- the period of time at the founding of *The People's Constitutional Company of Jesse Millette*, and its end marked by the death of the Founder and First Chairman, *Brandon Taylorian*.

- an object, building, work of art, or philosophy from the period between the founding of *The People's Constitutional Company of Jesse Millette* and the death of the Founder and First Chairman, *Brandon Taylorian*.
- the period before any major revisions or reformations of The Philosophy of Astronism.

Millettire - a term of Astronist Domain relating to an empire in which The Philosophy of Astronism, or one of its derivations, is officially recognised as one of the empire's primary worldviews, or in which Astronarianism, or one of its derivations is officially recognised as the empire's, or one of the empire's, primary governmental methodologies.

Astronism Symbol - known as a vendox, the universal emblem of The Philosophy of Astronism that is officially recognised as such by The Institution of The Philosophy of Astronism and is characterised by a central open book surrounding by twelve stars, and is propped up by a circular shape that, at its peak, branches upward into six straight lines either with glimmers of light on their ends or not. However, there is a wide range of symbols associated with major denominations of The Philosophy of Astronism that are also considered official by The Institution of The Philosophy of Astronism, and some of which feature the Astronism Symbol somewhere within their own emblem.

Millettist (adjective)

- a person that chooses to follow Astronism more dogmatically, as though it is their religion.
- a member of The Astronist Peacekeeping Order.

Derivatives

Millettists

Millettistic (adjective)

- having or showing characteristic or relation to the character of *Jesse Millette, The People's Constitutional Company of Jesse Millette* or *The Ideology of Astronism*.

Millettistical (adjective)

- relating to or showing characteristic of the character of *Jesse Millette, The People's Constitutional Company of Jesse Millette* or *The Ideology of Astronism*.

Millettistically (adverb)

- with characteristic or relation to the character of *Jesse Millette, The People's Constitutional Company of Jesse Millette* or *The Ideology of Astronism*

Millettist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Millettistic thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Millettitian (adjective)

- a person that graduates from a *Jesse Millette Education Institution* or has successfully graduated from a course structured under the Astronist Education methodology.

Astro-

- the official prefix of The People's Constitutional Company of Jesse Millette, and more widely, Astronist philosophy, methodology, culture, and literature.
- relating to Astronists, or The People's Constitutional Company of Jesse Millette, and its subsidiary organisations.

Astro-Abkhazian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Abkhazian and Astronist characteristics, architects, and attributes, or such buildings situated in Abkhazia.

Astro-Abkhazian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Abkhazian and Astronist characteristics, traditions, and styles.

Astro-Afghan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Afghan and Astronist characteristics, architects, and attributes, or such buildings situated in Afghanistan.

Astro-Afghan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Afghan and Astronist characteristics, traditions, and styles.

Astro-African Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly African and Astronist characteristics, architects, and attributes, or such buildings situated in Africa.

Astro-African Literature - the collective stories, narratives, and literary works holding a mixture of distinctly African and Astronist characteristics, traditions, and styles.

Astro-Albanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Albanian and Astronist characteristics, architects, and attributes, or such buildings situated in Albania.

Astro-Albanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Albanian and Astronist characteristics, traditions, and styles.

Astro-Algerian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Algerian and Astronist characteristics, architects, and attributes, or such buildings situated in Algeria.

Astro-Algerian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Algerian and Astronist characteristics, traditions, and styles.

Astro-American Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly American and Astronist characteristics, architects, and attributes, or such buildings situated in the United States of America.

Astro-American Literature - the collective stories, narratives, and literary works holding a mixture of distinctly American and Astronist characteristics, traditions, and styles.

Astro-American Samoan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly American Samoan and Astronist characteristics, architects, and attributes, or such buildings situated in American Samoa.

Astro-American Samoan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly American Samoan and Astronist characteristics, traditions, and styles.

Astro-Andorran Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Andorran and Astronist characteristics, architects, and attributes, or such buildings situated in Andorra.

Astro-Andorran Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Andorran and Astronist characteristics, traditions, and styles.

Astro-Angolan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Angolan and Astronist characteristics, architects, and attributes, or such buildings situated in Angola.

Astro-Angolan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Angolan and Astronist characteristics, traditions, and styles.

Astro-Anguillan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Anguillan and Astronist characteristics, architects, and attributes, or such buildings situated in Anguilla.

Astro-Anguillan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Anguillan and Astronist characteristics, traditions, and styles.

Astro-Antiguan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Antiguan and Astronist characteristics, architects, and attributes, or such buildings situated in Antigua.

Astro-Antiguan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Antiguan and Astronist characteristics, traditions, and styles.

Astro-Argentine Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Argentine and Astronist characteristics, architects, and attributes, or such buildings situated in Argentina.

Astro-Argentine Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Argentine and Astronist characteristics, traditions, and styles.

Astro-Armenian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Armenian and Astronist characteristics, architects, and attributes, or such buildings situated in Armenia.

Astro-Armenian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Armenian and Astronist characteristics, traditions, and styles.

Astro-Aruban Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Aruban and Astronist characteristics, architects, and attributes, or such buildings situated in Aruba.

Astro-Aruban Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Aruban and Astronist characteristics, traditions, and styles.

Astro-Asian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Asian and Astronist characteristics, traditions, and styles.

Astro-Asian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Asian and Astronist characteristics, architects, and attributes, or such buildings situated in Asian.

Astro-Australian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Australian and Astronist characteristics, architects, and attributes, or such buildings situated in Australia.

Astro-Australian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Australian and Astronist characteristics, traditions, and styles.

Astro-Austrian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Austrian and Astronist characteristics, architects, and attributes, or such buildings situated in Austria.

Astro-Austrian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Austrian and Astronist characteristics, traditions, and styles.

Astro-Azerbaijani Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Azerbaijani and Astronist characteristics, architects, and attributes, or such buildings situated in Azerbaijan.

Astro-Azerbaijani Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Azerbaijani and Astronist characteristics, traditions, and styles.

Astro-Bahamian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bahamian and Astronist characteristics, architects, and attributes, or such buildings situated in the Bahamas.

Astro-Bahamian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bahamian and Astronist characteristics, traditions, and styles.

Astro-Bahraini Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bahraini and Astronist characteristics, architects, and attributes, or such buildings situated in Bahrain.

Astro-Bahraini Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bahraini and Astronist characteristics, traditions, and styles.

Astro-Bangladeshi Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bangladeshi and Astronist characteristics, architects, and attributes, or such buildings situated in Bangladesh.

Astro-Bangladeshi Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bangladeshi and Astronist characteristics, traditions, and styles.

Astro-Barbadian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Barbadian and Astronist characteristics, architects, and attributes, or such buildings situated in Barbados.

Astro-Barbadian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Barbadian and Astronist characteristics, traditions, and styles.

Astro-Barbudan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Barbudan and Astronist characteristics, architects, and attributes, or such buildings situated in Barbuda.

Astro-Barbudan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Barbudan and Astronist characteristics, traditions, and styles.

Astro-Barthélemois Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kiribati and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Barthélemy.

Astro-Barthélemois Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Barthélemois and Astronist characteristics, traditions, and styles.

Astro-Belarusian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Belarusian and Astronist characteristics, architects, and attributes, or such buildings situated in Belarus.

Astro-Belarusian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Belarusian and Astronist characteristics, traditions, and styles.

Astro-Belgian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Belgian and Astronist characteristics, architects, and attributes, or such buildings situated in Belgium.

Astro-Belgian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Belgian and Astronist characteristics, traditions, and styles.

Astro-Belizean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Belizean and Astronist characteristics, architects, and attributes, or such buildings situated in Belize.

Astro-Belizean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Belizean and Astronist characteristics, traditions, and styles.

Astro-Beninese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Beninese and Astronist characteristics, architects, and attributes, or such buildings situated in Benin.

Astro-Beninese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Beninese and Astronist characteristics, traditions, and styles.

Astro-Bermudan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bermudan and Astronist characteristics, architects, and attributes, or such buildings situated in Bermuda.

Astro-Bermudan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bermudan and Astronist characteristics, traditions, and styles.

Astro-Bhutanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bhutanese and Astronist characteristics, architects, and attributes, or such buildings situated in Bhutan.

Astro-Bhutanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bhutanese and Astronist characteristics, traditions, and styles.

Millette-Bissau-Guinean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bissau-Guinean and Astronist characteristics, architects, and attributes, or such buildings situated in Bissau-Guinea.

Astro-Bissau-Guinean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bissau-Guinean and Astronist characteristics, traditions, and styles.

Astro-Bolivian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bolivian and Astronist characteristics, architects, and attributes, or such buildings situated in Bolivia.

Astro-Bolivian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bolivian and Astronist characteristics, traditions, and styles.

Astro-Bonaire Dutch Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bonaire Dutch and Astronist characteristics, architects, and attributes, or such buildings situated in Bonaire.

Astro-Bonaire Dutch Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bonaire Dutch and Astronist characteristics, traditions, and styles.

Astro-Bosnian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Herzegovinian, and Astronist characteristics, architects, and attributes, or such buildings situated in Bosnia and Herzegovina.

Astro-Bosnian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bosnian and Astronist characteristics, traditions, and styles.

Astro-Botswanan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Botswanan and Astronist characteristics, architects, and attributes, or such buildings situated in Botswana.

Astro-Botswanan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Botswanan and Astronist characteristics, traditions, and styles.

Astro-Brazilian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Brazilian and Astronist characteristics, architects, and attributes, or such buildings situated in Brazil.

Astro-Brazilian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Brazilian and Astronist characteristics, traditions, and styles.

Astro-British Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly British and Astronist characteristics, architects, and attributes, or such buildings situated in the United Kingdom.

Astro-British Literature - the collective stories, narratives, and literary works holding a mixture of distinctly British and Astronist characteristics, traditions, and styles.

Astro-British Virgin Islander Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly British Virgin Islander and Astronist characteristics, architects, and attributes, or such buildings situated in the British Virgin Islands.

Astro-British Virgin Islander Literature - the collective stories, narratives, and literary works holding a mixture of distinctly British Virgin Islander and Astronist characteristics, traditions, and styles.

Astro-Bruneian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bruneian and Astronist characteristics, architects, and attributes, or such buildings situated in Brunei.

Astro-Bruneian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bruneian and Astronist characteristics, traditions, and styles.

Astro-Bulgarian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bulgarian and Astronist characteristics, architects, and attributes, or such buildings situated in Bulgaria.

Astro-Bulgarian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Bulgarian and Astronist characteristics, traditions, and styles.

Astro-Burkinabé Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Burkinan and Astronist characteristics, architects, and attributes, or such buildings situated in Burkina Faso.

Astro-Burkinabé Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Burkinabé and Astronist characteristics, traditions, and styles.

Astro-Burmese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Burmese and Astronist characteristics, architects, and attributes, or such buildings situated in Myanmar.

Astro-Burmese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Burmese and Astronist characteristics, traditions, and styles.

Astro-Burundian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Burundian and Astronist characteristics, architects, and attributes, or such buildings situated in Burundi.

Astro-Burundian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Burundian and Astronist characteristics, traditions, and styles.

Astro-Cabo Verdean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Cabo Verdean and Astronist characteristics, architects, and attributes, or such buildings situated in Cape Verde.

Astro-Cabo Verdean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Cabo Verdean and Astronist characteristics, traditions, and styles.

Astro-Cambodian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Cambodian and Astronist characteristics, architects, and attributes, or such buildings situated in Cambodia.

Astro-Cambodian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Cambodian and Astronist characteristics, traditions, and styles.

Astro-Cameroonian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Cameroonian and Astronist characteristics, architects, and attributes, or such buildings situated in Cameroon.

Astro-Cameroonian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Cameroonian and Astronist characteristics, traditions, and styles.

Astro-Canadian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Canadian and Astronist characteristics, architects, and attributes, or such buildings situated in Canada.

Astro-Canadian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Canadian and Astronist characteristics, traditions, and styles.

Astro-Caymanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Caymanian and Astronist characteristics, architects, and attributes, or such buildings situated in the Cayman Islands.

Astro-Caymanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Caymanian and Astronist characteristics, traditions, and styles.

Astro-Central African Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Central African and Astronist characteristics, architects, and attributes, or such buildings situated in the Central African Republic.

Astro-Central African Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Central African and Astronist characteristics, traditions, and styles.

Astro-Chadian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Chadian and Astronist characteristics, architects, and attributes, or such buildings situated in Chad.

Astro-Chadian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Chadian and Astronist characteristics, traditions, and styles.

Astro-Chilean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Chilean and Astronist characteristics, architects, and attributes, or such buildings situated in Chile.

Astro-Chilean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Chilean and Astronist characteristics, traditions, and styles.

Astro-Colombian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Colombian and Astronist characteristics, architects, and attributes, or such buildings situated in Colombia.

Astro-Colombian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Colombian and Astronist characteristics, traditions, and styles.

Astro-Comoran Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Comoran and Astronist characteristics, architects, and attributes, or such buildings situated in Comoros.

Astro-Comoran Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Comoran and Astronist characteristics, traditions, and styles.

Astro-Congolese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Congolese and Astronist characteristics, architects, and attributes, or such buildings situated in either the Republic of the Congo, or the Democratic Republic of the Congo.

Astro-Congolese Literature - the collective stories, narratives, and literary works holding distinct characteristics, traditions, and styles from the Republic of the Congo or the Democratic Republic of the Congo, mixed with Astronist characteristics, traditions, and styles.

Astro-Costa Rican Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Costa Rican and Astronist characteristics, architects, and attributes, or such buildings situated in Costa Rica.

Astro-Costa Rican Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Costa Rican and Astronist characteristics, traditions, and styles.

Astro-Croatian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Croatian and Astronist characteristics, architects, and attributes, or such buildings situated in Croatia.

Astro-Croatian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Croatian and Astronist characteristics, traditions, and styles.

Astro-Cuban Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Cuban and Astronist characteristics, architects, and attributes, or such buildings situated in Cuba.

Astro-Cuban Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Cuban and Astronist characteristics, traditions, and styles.

Astro-Curaçaoan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Curaçaoan and Astronist characteristics, architects, and attributes, or such buildings situated in Curaçao.

Astro-Curaçaoan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Curaçaoan and Astronist characteristics, traditions, and styles.

Astro-Cypriot Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Cypriot and Astronist characteristics, architects, and attributes, or such buildings situated in Cyprus.

Astro-Cypriot Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Cypriot and Astronist characteristics, traditions, and styles.

Astro-Czech Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Czech and Astronist characteristics, architects, and attributes, or such buildings situated in Czechia.

Astro-Czech Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Czech and Astronist characteristics, traditions, and styles.

Astro-Danish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Danish and Astronist characteristics, architects, and attributes, or such buildings situated in Denmark.

Astro-Danish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Danish and Astronist characteristics, traditions, and styles.

Astro-Djiboutian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Djiboutian and Astronist characteristics, architects, and attributes, or such buildings situated in Djibouti.

Astro-Djiboutian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Djiboutian and Astronist characteristics, traditions, and styles.

Astro-Dominican Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Dominican and Astronist characteristics, architects, and attributes, or such buildings situated in the Dominican Republic or Dominica.

Astro-Dominican Literature - the collective stories, narratives, and literary works holding distinct characteristics, traditions, and styles from the Dominican Republic or Dominica, mixed with Astronist characteristics, traditions, and styles.

Astro-Dutch Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Dutch and Astronist characteristics, architects, and attributes, or such buildings situated in the Netherlands.

Astro-Dutch Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Dutch and Astronist characteristics, traditions, and styles.

Astro-Ecuadorian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Ecuadorian and Astronist characteristics, architects, and attributes, or such buildings situated in Ecuador.

Astro-Ecuadorian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Ecuadorian and Astronist characteristics, traditions, and styles.

Astro-Egyptian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Egyptian and Astronist characteristics, architects, and attributes, or such buildings situated in Egypt.

Astro-Egyptian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Egyptian and Astronist characteristics, traditions, and styles.

Astro-Emirati Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Emirati and Astronist characteristics, architects, and attributes, or such buildings situated in the United Arab Emirates.

Astro-Emirati Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Emirati and Astronist characteristics, traditions, and styles.

Astro-Equatorial Guinean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Equatorial Guinean and Astronist characteristics, architects, and attributes, or such buildings situated in Equatorial Guinea.

Astro-Equatorial Guinean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Equatorial Guinean and Astronist characteristics, traditions, and styles.

Astro-Eritrean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Eritrean and Astronist characteristics, architects, and attributes, or such buildings situated in Eritrea.

Astro-Eritrean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Eritrean and Astronist characteristics, traditions, and styles.

Astro-Estonian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Estonian and Astronist characteristics, architects, and attributes, or such buildings situated in Estonia.

Astro-Estonian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Estonian and Astronist characteristics, traditions, and styles.

Astro-Ethiopian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Ethiopian and Astronist characteristics, architects, and attributes, or such buildings situated in Ethiopia.

Astro-Ethiopian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Ethiopian and Astronist characteristics, traditions, and styles.

Astro-European Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly European and Astronist characteristics, architects, and attributes, or such buildings situated in Europe.

Astro-European Literature - the collective stories, narratives, and literary works holding a mixture of distinctly European and Astronist characteristics, traditions, and styles.

Astro-Faroese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Faroese and Astronist characteristics, architects, and attributes, or such buildings situated in the Faroe Islands.

Astro-Faroese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Faroese and Astronist characteristics, traditions, and styles.

Astro-Fijian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Fijian and Astronist characteristics, architects, and attributes, or such buildings situated in Fiji.

Astro-Fijian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Fijian and Astronist characteristics, traditions, and styles.

Astro-Filipino Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Filipino and Astronist characteristics, architects, and attributes, or such buildings situated in the Philippines.

Astro-Filipino Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Filipino and Astronist characteristics, traditions, and styles.

Astro-Finnish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Finnish and Astronist characteristics, traditions, and styles.

Astro-Finnish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Finnish and Astronist characteristics, architects, and attributes, or such buildings situated in Finland.

Astro-French Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly French and Astronist characteristics, architects, and attributes, or such buildings situated in France.

Astro-French Literature - the collective stories, narratives, and literary works holding a mixture of distinctly French and Astronist characteristics, traditions, and styles.

Astro-French Guianese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly French Guianese and Astronist characteristics, architects, and attributes, or such buildings situated in French Guiana.

Astro-French Guianese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly French Guianese and Astronist characteristics, traditions, and styles.

Astro-French Polynesian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly French Polynesian and Astronist characteristics, architects, and attributes, or such buildings situated in French Polynesia.

Astro-French Polynesian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly French Polynesian and Astronist characteristics, traditions, and styles.

Astro-Gabonese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Gabonese and Astronist characteristics, architects, and attributes, or such buildings situated in Gabon.

Astro-Gabonese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Gabonese and Astronist characteristics, traditions, and styles.

Astro-Gambian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Gambian and Astronist characteristics, architects, and attributes, or such buildings situated in The Gambia.

Astro-Gambian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Gambian and Astronist characteristics, traditions, and styles.

Astro-Georgian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Georgian and Astronist characteristics, architects, and attributes, or such buildings situated in Georgia.

Astro-Georgian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Georgian and Astronist characteristics, traditions, and styles.

Astro-German Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly German and Astronist characteristics, architects, and attributes, or such buildings situated in Germany.

Astro-German Literature - the collective stories, narratives, and literary works holding a mixture of distinctly German and Astronist characteristics, traditions, and styles.

Astro-Ghanaian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Ghanaian and Astronist characteristics, architects, and attributes, or such buildings situated in Ghana.

Astro-Ghanaian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Ghanaian and Astronist characteristics, traditions, and styles.

Astro-Gibraltarian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Gibraltarian and Astronist characteristics, architects, and attributes, or such buildings situated in Gibraltar.

Astro-Gibraltarian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Gibraltarian and Astronist characteristics, traditions, and styles.

Astro-Greek Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Greek and Astronist characteristics, architects, and attributes, or such buildings situated in Greece.

Astro-Greek Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Greek and Astronist characteristics, traditions, and styles.

Astro-Greenlandic Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Greenlandic and Astronist characteristics, architects, and attributes, or such buildings situated in Greenland.

Astro-Greenlandic Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Greenlandic and Astronist characteristics, traditions, and styles.

Astro-Grenadian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Grenadian and Astronist characteristics, architects, and attributes, or such buildings situated in Grenada.

Astro-Grenadian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Grenadian and Astronist characteristics, traditions, and styles.

Astro-Guadeloupean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Guadeloupean and Astronist characteristics, architects, and attributes, or such buildings situated in Guadeloupe.

Astro-Guadeloupean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Guadeloupean and Astronist characteristics, traditions, and styles.

Astro-Guamanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Guamanian and Astronist characteristics, architects, and attributes, or such buildings situated in Guam.

Astro-Guamanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Guamanian and Astronist characteristics, traditions, and styles.

Astro-Guatemalan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Guatemalan and Astronist characteristics, architects, and attributes, or such buildings situated in Guatemala.

Astro-Guatemalan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Guatemalan and Astronist characteristics, traditions, and styles.

Astro-Guinean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Guinean and Astronist characteristics, architects, and attributes, or such buildings situated in Guinea.

Astro-Guinean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Guinean and Astronist characteristics, traditions, and styles.

Astro-Guyanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Guyanese and Astronist characteristics, architects, and attributes, or such buildings situated in Guyana.

Astro-Guyanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Guyanese and Astronist characteristics, traditions, and styles.

Astro-Haitian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Haitian and Astronist characteristics, architects, and attributes, or such buildings situated in Haiti.

Astro-Haitian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Haitian and Astronist characteristics, traditions, and styles.

Astro-Herzegovinian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Bosnian and Astronist characteristics, architects, and attributes, or such buildings situated in Bosnia and Herzegovina.

Astro-Herzegovinian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Herzegovinian and Astronist characteristics, traditions, and styles.

Astro-Honduran Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Honduran and Astronist characteristics, architects, and attributes, or such buildings situated in Honduras.

Astro-Honduran Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Honduran and Astronist characteristics, traditions, and styles.

Astro-Hong Kongese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Hong Kongese and Astronist characteristics, architects, and attributes, or such buildings situated in Hong Kong.

Astro-Hong Kongese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Hong Kongese and Astronist characteristics, traditions, and styles.

Astro-Hungarian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Hungarian and Astronist characteristics, architects, and attributes, or such buildings situated in Hungary.

Astro-Hungarian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Hungarian and Astronist characteristics, traditions, and styles.

Astro-Icelandic Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Icelandic and Astronist characteristics, architects, and attributes, or such buildings situated in Iceland.

Astro-Icelandic Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Icelandic and Astronist characteristics, traditions, and styles.

Astro-Indian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Indian and Astronist characteristics, architects, and attributes, or such buildings situated in India.

Astro-Indian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Indian and Astronist characteristics, traditions, and styles.

Astro-Indonesian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Indonesian and Astronist characteristics, architects, and attributes, or such buildings situated in Indonesia.

Astro-Indonesian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Indonesian and Astronist characteristics, traditions, and styles.

Astro-Iranian Architecture - also known as Astro-Persian Architecture, the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Iranian and Astronist characteristics, architects, and attributes, or such buildings situated in Iran.

Astro-Iranian Literature - also known as Astro-Persian Literature, the collective stories, narratives, and literary works holding a mixture of distinctly Iranian, Persian and Astronist characteristics, traditions, and styles.

Astro-Iraqi Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Iraqi and Astronist characteristics, architects, and attributes, or such buildings situated in Iraq.

Astro-Iraqi Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Iraqi and Astronist characteristics, traditions, and styles.

Astro-Irish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Irish and Astronist characteristics, architects, and attributes, or such buildings situated in Ireland.

Astro-Irish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Irish and Astronist characteristics, traditions, and styles.

Astro-Islamic Art - see Astro-Islamic Ornamentation.

Astro-Islamic Ornamentation - the Astronist Ornamentations found in Islamic countries, or created by Muslims, which, by decree of The People's Constitutional Company of Jesse Millette, must follow the laws of the Quran, in the forbiddance of the depictions of living creatures, and are thus characterised by the centralisation of the depictions of cosmic entities, celestial symbols, and galactical imagery as a suitable alternative.

Astro-Israeli Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Israeli and Astronist characteristics, architects, and attributes, or such buildings situated in Israel.

Astro-Israeli Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Israeli and Astronist characteristics, traditions, and styles.

Astro-Italian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Italian and Astronist characteristics, architects, and attributes, or such buildings situated in Italy.

Astro-Italian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Italian and Astronist characteristics, traditions, and styles.

Astro-Ivorian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Ivorian and Astronist characteristics, architects, and attributes, or such buildings situated in Côte d'Ivoire.

Astro-Ivorian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Ivorian and Astronist characteristics, traditions, and styles.

Astro-Jamaican Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Jamaican and Astronist characteristics, architects, and attributes, or such buildings situated in Jamaica.

Astro-Jamaican Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Jamaican and Astronist characteristics, traditions, and styles.

Astro-Japanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Japanese and Astronist characteristics, architects, and attributes, or such buildings situated in Japan.

Astro-Japanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Japanese and Astronist characteristics, traditions, and styles.

Astro-Jordanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Jordanian and Astronist characteristics, architects, and attributes, or such buildings situated in Jordan.

Astro-Jordanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Jordanian and Astronist characteristics, traditions, and styles.

Astro-Kazakh Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kazakh and Astronist characteristics, architects, and attributes, or such buildings situated in Kazakhstan.

Astro-Kazakh Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kazakh and Astronist characteristics, traditions, and styles.

Astro-Kenyan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kenyan and Astronist characteristics, architects, and attributes, or such buildings situated in Kenya.

Astro-Kenyan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kenyan and Astronist characteristics, traditions, and styles.

Astro-Kiribati Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kiribati and Astronist characteristics, architects, and attributes, or such buildings situated in Kiribati.

Astro-Kiribati Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kiribati and Astronist characteristics, traditions, and styles.

Astro-Kittitian and Nevisian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kittitian and Nevisian, and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Kitts and Nevis.

Astro-Kittitian and Nevisian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kittitian, Nevisian and Astronist characteristics, traditions, and styles.

Astro-Korean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Korean and Astronist characteristics, architects, and attributes, or such buildings situated in the Democratic People's Republic of Korea, and the Republic of Korea.

Astro-Korean Literature - the collective stories, narratives, and literary works holding distinct characteristics, traditions, and styles from the Democratic People's Republic of Korea or the Republic of Korea, mixed with Astronist characteristics, traditions, and styles.

Astro-Kosovar Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kosovar and Astronist characteristics, architects, and attributes, or such buildings situated in Kosovo.

Astro-Kosovar Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kosovar and Astronist characteristics, traditions, and styles.

Astro-Kuwaiti Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kuwaiti and Astronist characteristics, architects, and attributes, or such buildings situated in Kuwait.

Astro-Kuwaiti Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kuwaiti and Astronist characteristics, traditions, and styles.

Astro-Kyrgyz Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Kyrgyz and Astronist characteristics, architects, and attributes, or such buildings situated in Kyrgyzstan.

Astro-Kyrgyz Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Kyrgyz and Astronist characteristics, traditions, and styles.

Astro-Laotian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Laotian and Astronist characteristics, architects, and attributes, or such buildings situated in Laos.

Astro-Laotian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Laotian and Astronist characteristics, traditions, and styles.

Astro-Latvian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Latvian and Astronist characteristics, architects, and attributes, or such buildings situated in Latvia.

Astro-Latvian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Latvian and Astronist characteristics, traditions, and styles.

Astro-Lebanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Lebanese and Astronist characteristics, architects, and attributes, or such buildings situated in Lebanon.

Astro-Lebanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Lebanese and Astronist characteristics, traditions, and styles.

Astro-Liberian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Liberian and Astronist characteristics, architects, and attributes, or such buildings situated in Liberia.

Astro-Liberian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Liberian and Astronist characteristics, traditions, and styles.

Astro-Libyan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Libyan and Astronist characteristics, architects, and attributes, or such buildings situated in Libya.

Astro-Libyan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Libyan and Astronist characteristics, traditions, and styles.

Astro-Liechtensteiner Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Liechtensteiner and Astronist characteristics, architects, and attributes, or such buildings situated in Liechtenstein.

Astro-Liechtensteiner Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Liechtensteiner and Astronist characteristics, traditions, and styles.

Astro-Lithuanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Lithuanian and Astronist characteristics, architects, and attributes, or such buildings situated in Lithuania.

Astro-Lithuanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Lithuanian and Astronist characteristics, traditions, and styles.

Astro-Luxembourgish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Luxembourgish and Astronist characteristics, architects, and attributes, or such buildings situated in Luxembourg.

Astro-Luxembourgish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Luxembourgish and Astronist characteristics, traditions, and styles.

Astro-Macanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Macanese and Astronist characteristics, architects, and attributes, or such buildings situated in Macau.

Astro-Macanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Macanese and Astronist characteristics, traditions, and styles.

Astro-Macedonian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Macedonian and Astronist characteristics, architects, and attributes, or such buildings situated in Macedonia.

Astro-Macedonian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Macedonian and Astronist characteristics, traditions, and styles.

Astro-Mahoran Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mahoran and Astronist characteristics, architects, and attributes, or such buildings situated in Mayotte.

Astro-Mahoran Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mahoran and Astronist characteristics, traditions, and styles.

Astro-Malagasy Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Madagascan and Astronist characteristics, architects, and attributes, or such buildings situated in Madagascar.

Astro-Malagasy Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Madagascan and Astronist characteristics, traditions, and styles.

Astro-Malawian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Malawian and Astronist characteristics, architects, and attributes, or such buildings situated in Malawi.

Astro-Malawian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Malawian and Astronist characteristics, traditions, and styles.

Astro-Malaysian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Malaysian and Astronist characteristics, architects, and attributes, or such buildings situated in Malaysia.

Astro-Malaysian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Malaysian and Astronist characteristics, traditions, and styles.

Astro-Maldivian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Maldivian and Astronist characteristics, architects, and attributes, or such buildings situated in the Maldives.

Astro-Maldivian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Maldivian and Astronist characteristics, traditions, and styles.

Astro-Malian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Malian and Astronist characteristics, architects, and attributes, or such buildings situated in Mali.

Astro-Malian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Malian and Astronist characteristics, traditions, and styles.

Astro-Maltese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Maltese and Astronist characteristics, architects, and attributes, or such buildings situated in Malta.

Astro-Maltese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Maltese and Astronist characteristics, traditions, and styles.

Astro-Manx Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Manx and Astronist characteristics, architects, and attributes, or such buildings situated on the Isle of Man.

Astro-Manx Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Manx and Astronist characteristics, traditions, and styles.

Astro-Marshallese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Marshallese and Astronist characteristics, architects, and attributes, or such buildings situated in the Marshall Islands.

Astro-Marshallese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Marshallese and Astronist characteristics, traditions, and styles.

Astro-Martiniquais Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Martiniquais and Astronist characteristics, architects, and attributes, or such buildings situated in Martinique.

Astro-Martiniquais Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Martiniquais and Astronist characteristics, traditions, and styles.

Astro-Mauritanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mauritanian and Astronist characteristics, architects, and attributes, or such buildings situated in Mauritania.

Astro-Mauritanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mauritanian and Astronist characteristics, traditions, and styles.

Astro-Mauritian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mauritian and Astronist characteristics, architects, and attributes, or such buildings situated in Mauritius.

Astro-Mauritian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mauritian and Astronist characteristics, traditions, and styles.

Astro-Mexican Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mexican and Astronist characteristics, architects, and attributes, or such buildings situated in Mexico.

Astro-Mexican Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mexican and Astronist characteristics, traditions, and styles.

Astro-Micronesian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Micronesian and Astronist characteristics, architects, and attributes, or such buildings situated in the Federated States of Micronesia.

Astro-Micronesian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Micronesian and Astronist characteristics, traditions, and styles.

Astro-Moldovan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Moldovan and Astronist characteristics, architects, and attributes, or such buildings situated in Moldova.

Astro-Moldovan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Moldovan and Astronist characteristics, traditions, and styles.

Astro-Monacan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Monacan and Astronist characteristics, architects, and attributes, or such buildings situated in Monaco.

Astro-Monacan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Monacan and Astronist characteristics, traditions, and styles.

Astro-Mongolian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mongolian and Astronist characteristics, architects, and attributes, or such buildings situated in Mongolia.

Astro-Mongolian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mongolian and Astronist characteristics, traditions, and styles.

Astro-Montenegrin Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Montenegrin and Astronist characteristics, architects, and attributes, or such buildings situated in Montenegro.

Astro-Montenegrin Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Montenegrin and Astronist characteristics, traditions, and styles.

Astro-Montserratian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Montserratian and Astronist characteristics, architects, and attributes, or such buildings situated in Montserrat.

Astro-Montserratian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Montserratian and Astronist characteristics, traditions, and styles.

Astro-Moroccan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Moroccan and Astronist characteristics, architects, and attributes, or such buildings situated in Morocco.

Astro-Moroccan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Moroccan and Astronist characteristics, traditions, and styles.

Astro-Mosotho Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mosotho and Astronist characteristics, architects, and attributes, or such buildings situated in Lesotho.

Astro-Mosotho Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mosotho and Astronist characteristics, traditions, and styles.

Astro-Mozambican Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Mozambican and Astronist characteristics, architects, and attributes, or such buildings situated in Mozambique.

Astro-Mozambican Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Mozambican and Astronist characteristics, traditions, and styles.

Astro-Namibian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Namibian and Astronist characteristics, architects, and attributes, or such buildings situated in Namibia.

Astro-Namibian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Namibian and Astronist characteristics, traditions, and styles.

Astro-Nauruan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Nauruan and Astronist characteristics, architects, and attributes, or such buildings situated in Nauru.

Astro-Nauruan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Nauruan and Astronist characteristics, traditions, and styles.

Astro-Nepali Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Nepali and Astronist characteristics, architects, and attributes, or such buildings situated in Nepal.

Astro-Nepali Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Nepali and Astronist characteristics, traditions, and styles.

Astro-New Caledonian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly New Caledonian and Astronist characteristics, architects, and attributes, or such buildings situated in New Caledonia.

Astro-New Caledonian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly New Caledonian and Astronist characteristics, traditions, and styles.

Astro-New Zealander Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly New Zealander and Astronist characteristics, architects, and attributes, or such buildings situated in New Zealand.

Astro-New Zealander Literature - the collective stories, narratives, and literary works holding a mixture of distinctly New Zealander and Astronist characteristics, traditions, and styles.

Astro-Nicaraguan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Nicaraguan and Astronist characteristics, architects, and attributes, or such buildings situated in Nicaragua.

Astro-Nicaraguan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Nicaraguan and Astronist characteristics, traditions, and styles.

Astro-Nigerien Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Nigerien and Astronist characteristics, architects, and attributes, or such buildings situated in Niger.

Astro-Nigerien Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Nigerien and Astronist characteristics, traditions, and styles.

Astro-Nigerian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Nigerian and Astronist characteristics, architects, and attributes, or such buildings situated in Nigeria.

Astro-Nigerian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Nigerian and Astronist characteristics, traditions, and styles.

Astro-Niuean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Niuean and Astronist characteristics, architects, and attributes, or such buildings situated in Niue.

Astro-Niuean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Niuean and Astronist characteristics, traditions, and styles.

Astro-Northern Irish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Northern Irish and Astronist characteristics, architects, and attributes, or such buildings situated in Northern Ireland.

Astro-Northern Irish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Northern Irish and Astronist characteristics, traditions, and styles.

Astro-Northern Marianan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Northern Marianan and Astronist characteristics, architects, and attributes, or such buildings situated in the Northern Mariana Islands.

Astro-Northern Marianan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Northern Marianan and Astronist characteristics, traditions, and styles.

Astro-Norwegian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Norwegian and Astronist characteristics, architects, and attributes, or such buildings situated in Norway.

Astro-Norwegian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Norwegian and Astronist characteristics, traditions, and styles.

Astro-Oceanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Oceanian and Astronist characteristics, traditions, and styles.

Astro-Oceanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Oceanian and Astronist characteristics, architects, and attributes, or such buildings situated in Oceanian.

Astro-Omani Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Omani and Astronist characteristics, traditions, and styles.

Astro-Omani Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Omani and Astronist characteristics, architects, and attributes, or such buildings situated in Oman.

Astro-Pakistani Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Pakistani and Astronist characteristics, architects, and attributes, or such buildings situated in Pakistan.

Astro-Pakistani Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Pakistani and Astronist characteristics, traditions, and styles.

Astro-Palauan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Palauan and Astronist characteristics, architects, and attributes, or such buildings situated in Palau.

Astro-Palauan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Palauan and Astronist characteristics, traditions, and styles.

Astro-Palestinian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Palestinian and Astronist characteristics, architects, and attributes, or such buildings situated in Palestine.

Astro-Palestinian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Palestinian and Astronist characteristics, traditions, and styles.

Astro-Panamanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Panamanian and Astronist characteristics, architects, and attributes, or such buildings situated in Panama.

Astro-Panamanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Panamanian and Astronist characteristics, traditions, and styles.

Astro-Papua New Guinean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Papua New Guinean and Astronist characteristics, architects, and attributes, or such buildings situated in Papua New Guinea.

Astro-Papua New Guinean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Papua New Guinean and Astronist characteristics, traditions, and styles.

Astro-Paraguayan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Paraguayan and Astronist characteristics, architects, and attributes, or such buildings situated in Paraguay.

Astro-Paraguayan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Paraguayan and Astronist characteristics, traditions, and styles.

Astro-Peruvian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Peruvian and Astronist characteristics, architects, and attributes, or such buildings situated in Peru.

Astro-Peruvian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Peruvian and Astronist characteristics, traditions, and styles.

Astro-philosophy - another term for Astronist Philosophy, or The Philosophy of Astronism, and its distinct characteristics, and styles.

Astro-philosophical

Astro-philosophically

Astro-Polish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Polish and Astronist characteristics, architects, and attributes, or such buildings situated in Poland.

Astro-Polish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Polish and Astronist characteristics, traditions, and styles.

Astro-Portuguese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Portuguese and Astronist characteristics, architects, and attributes, or such buildings situated in Portugal.

Astro-Portuguese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Portuguese and Astronist characteristics, traditions, and styles.

Astro-Puerto Rican Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Puerto Rican and Astronist characteristics, architects, and attributes, or such buildings situated in Puerto Rico.

Astro-Puerto Rican Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Puerto Rican and Astronist characteristics, traditions, and styles.

Astro-Qatari Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Qatari and Astronist characteristics, architects, and attributes, or such buildings situated in Qatar.

Astro-Qatari Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Qatari and Astronist characteristics, traditions, and styles.

Astro-Réunionese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Réunionese and Astronist characteristics, architects, and attributes, or such buildings situated in Réunion.

Astro-Réunionese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Réunionese and Astronist characteristics, traditions, and styles.

Astro-Romanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Romanian and Astronist characteristics, architects, and attributes, or such buildings situated in Romania.

Astro-Romanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Romanian and Astronist characteristics, traditions, and styles.

Astro-Russian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Russian and Astronist characteristics, architects, and attributes, or such buildings situated in Russia.

Astro-Russian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Russian and Astronist characteristics, traditions, and styles.

Astro-Rwandan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Rwandan and Astronist characteristics, architects, and attributes, or such buildings situated in Rwanda.

Astro-Rwandan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Rwandan and Astronist characteristics, traditions, and styles.

Astro-Saba Dutch Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saba Dutch and Astronist characteristics, architects, and attributes, or such buildings situated in Saba.

Astro-Saba Dutch Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saba Dutch and Astronist characteristics, traditions, and styles.

Astro-Sahrawi Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Sahrawi and Astronist characteristics, architects, and attributes, or such buildings situated in the Western Sahara, part of the Kingdom of Morocco.

Astro-Sahrawi Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Sahrawi and Astronist characteristics, traditions, and styles.

Astro-Saint Helenian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saint Helenian and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Helena, Ascension, and Tristan da Cunha.

Astro-Saint Helenian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saint Helenian and Astronist characteristics, traditions, and styles.

Astro-Saint Lucian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saint Lucian and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Lucia.

Astro-Saint Lucian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saint Lucian and Astronist characteristics, traditions, and styles.

Astro-Saint-Martinois Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saint-Martinois and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Martin.

Astro-Saint-Martinois Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saint-Martinois and Astronist characteristics, traditions, and styles.

Astro-Saint-Pierrais Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saint-Pierrais and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Pierre and Miquelon.

Astro-Saint-Pierrais Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saint-Pierrais and Astronist characteristics, traditions, and styles.

Astro-Saint Vincentian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saint Vincentian and Astronist characteristics, architects, and attributes, or such buildings situated in Saint Vincent and the Grenadines.

Astro-Saint Vincentian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saint Vincentian and Astronist characteristics, traditions, and styles.

Astro-Salvadoran Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Salvadoran and Astronist characteristics, architects, and attributes, or such buildings situated in El-Salvador.

Astro-Salvadoran Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Salvadoran and Astronist characteristics, traditions, and styles.

Astro-Samoan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Samoan and Astronist characteristics, architects, and attributes, or such buildings situated in Samoa.

Astro-Samoan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Samoan and Astronist characteristics, traditions, and styles.

Astro-Sammarinese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Sammarinese and Astronist characteristics, architects, and attributes, or such buildings situated in San Marino.

Astro-Sammarinese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Sammarinese and Astronist characteristics, traditions, and styles.

Astro-São Toméan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly São Toméan and Astronist characteristics, architects, and attributes, or such buildings situated in São Tomé and Príncipe.

Astro-São Toméan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly São Toméan and Astronist characteristics, traditions, and styles.

Astro-Saudi Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Saudi Arabian and Astronist characteristics, architects, and attributes, or such buildings situated in Saudi Arabia.

Astro-Saudi Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Saudi Arabian and Astronist characteristics, traditions, and styles.

Astro-Scottish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Scottish and Astronist characteristics, architects, and attributes, or such buildings situated in Scotland.

Astro-Scottish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Scottish and Astronist characteristics, traditions, and styles.

Astro-Senegalese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Senegalese and Astronist characteristics, architects, and attributes, or such buildings situated in Senegal.

Astro-Senegalese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Senegalese and Astronist characteristics, traditions, and styles.

Astro-Serbian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Serbian and Astronist characteristics, architects, and attributes, or such buildings situated in Serbia.

Astro-Serbian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Serbian and Astronist characteristics, traditions, and styles.

Astro-Seychellois Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Seychellois and Astronist characteristics, architects, and attributes, or such buildings situated in the Seychelles.

Astro-Seychellois Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Seychellois and Astronist characteristics, traditions, and styles.

Astro-Sierra Leonean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Sierra Leonean and Astronist characteristics, architects, and attributes, or such buildings situated in Sierra Leone.

Astro-Sierra Leonean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Sierra Leonean and Astronist characteristics, traditions, and styles.

Astro-Singaporean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Singaporean and Astronist characteristics, architects, and attributes, or such buildings situated in Singapore.

Astro-Singaporean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Singaporean and Astronist characteristics, traditions, and styles.

Astro-Sino Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Chinese and Astronist characteristics, architects, and attributes, or such buildings situated in China.

Astro-Sino Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Chinese and Astronist characteristics, traditions, and styles.

Astro-Sint Maartener Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Sint Maartener and Astronist characteristics, architects, and attributes, or such buildings situated in Sint Maarten.

Astro-Sint Maartener Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Sint Maartener and Astronist characteristics, traditions, and styles.

Astro-Slovak Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Slovak and Astronist characteristics, architects, and attributes, or such buildings situated in Slovakia.

Astro-Slovak Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Slovak and Astronist characteristics, traditions, and styles.

Astro-Slovenian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Slovenian and Astronist characteristics, architects, and attributes, or such buildings situated in Slovenia.

Astro-Slovenian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Slovenian and Astronist characteristics, traditions, and styles.

Astro-Solomon Islander Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Solomon Islander and Astronist characteristics, architects, and attributes, or such buildings situated in the Solomon Islands.

Astro-Solomon Islander Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Solomon Islander and Astronist characteristics, traditions, and styles.

Astro-Somali Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Somali and Astronist characteristics, architects, and attributes, or such buildings situated in Somalia.

Astro-Somali Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Somali and Astronist characteristics, traditions, and styles.

Astro-Somalilander Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Somalilander and Astronist characteristics, architects, and attributes, or such buildings situated in Somaliland.

Astro-Somalilander Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Somalilander and Astronist characteristics, traditions, and styles.

Astro-South African Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly South African and Astronist characteristics, architects, and attributes, or such buildings situated in South Africa.

Astro-South African Literature - the collective stories, narratives, and literary works holding a mixture of distinctly South African and Astronist characteristics, traditions, and styles.

Astro-South Ossetian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly South Ossetian and Astronist characteristics, architects, and attributes, or such buildings situated in South Ossetia.

Astro-South Ossetian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly South Ossetian and Astronist characteristics, traditions, and styles.

Astro-South Sudanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly South Sudanese and Astronist characteristics, architects, and attributes, or such buildings situated in South Sudan.

Astro-South Sudanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly South Sudanese and Astronist characteristics, traditions, and styles.

Astro-Spanish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Spanish and Astronist characteristics, architects, and attributes, or such buildings situated in Spain.

Astro-Spanish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Spanish and Astronist characteristics, traditions, and styles.

Astro-Sri Lankan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Sri Lankan and Astronist characteristics, architects, and attributes, or such buildings situated in Sri Lanka.

Astro-Sri Lankan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Sri Lankan and Astronist characteristics, traditions, and styles.

Astro-Sudanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Sudanese and Astronist characteristics, architects, and attributes, or such buildings situated in the Sudan.

Astro-Sudanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Sudanese and Astronist characteristics, traditions, and styles.

Astro-Swazi Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Swazi and Astronist characteristics, architects, and attributes, or such buildings situated in Swaziland.

Astro-Swazi Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Swazi and Astronist characteristics, traditions, and styles.

Astro-Swedish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Swedish and Astronist characteristics, architects, and attributes, or such buildings situated in Sweden.

Astro-Swedish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Swedish and Astronist characteristics, traditions, and styles.

Astro-Swiss Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Swiss and Astronist characteristics, architects, and attributes, or such buildings situated in Switzerland.

Astro-Swiss Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Swiss and Astronist characteristics, traditions, and styles.

Astro-Syrian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Syrian and Astronist characteristics, architects, and attributes, or such buildings situated in Syria.

Astro-Syrian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Syrian and Astronist characteristics, traditions, and styles.

Astro-Taiwanese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Taiwanese and Astronist characteristics, architects, and attributes, or such buildings situated in Taiwan.

Astro-Taiwanese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Taiwanese and Astronist characteristics, traditions, and styles.

Astro-Tajik Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Tajik and Astronist characteristics, architects, and attributes, or such buildings situated in Tajikistan.

Astro-Tajik Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Tajik and Astronist characteristics, traditions, and styles.

Astro-Tanzanian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Tanzanian and Astronist characteristics, architects, and attributes, or such buildings situated in Tanzania.

Astro-Tanzanian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Tanzanian and Astronist characteristics, traditions, and styles.

Astro-Thai Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Thai and Astronist characteristics, architects, and attributes, or such buildings situated in Thailand.

Astro-Thai Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Thai and Astronist characteristics, traditions, and styles.

Astro-Timorese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Timorese and Astronist characteristics, architects, and attributes, or such buildings situated in East Timor.

Astro-Timorese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Timorese and Astronist characteristics, traditions, and styles.

Astro-Togolese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Togolese and Astronist characteristics, architects, and attributes, or such buildings situated in Togo.

Astro-Togolese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Togolese and Astronist characteristics, traditions, and styles.

Astro-Tokelauan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Tokelauan and Astronist characteristics, architects, and attributes, or such buildings situated in Tokelau.

Astro-Tokelauan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Tokelauan and Astronist characteristics, traditions, and styles.

Astro-Tongan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Tongan and Astronist characteristics, architects, and attributes, or such buildings situated in Tonga.

Astro-Tongan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Tongan and Astronist characteristics, traditions, and styles.

Astro-Trinidadian and Tobagonian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Trinidadian and Tobagonian, and Astronist characteristics, architects, and attributes, or such buildings situated in Trinidad and Tobago.

Astro-Trinidadian and Tobagonian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Trinidadian, Tobagonian, and Astronist characteristics, traditions, and styles.

Astro-Tunisian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Tunisian and Astronist characteristics, architects, and attributes, or such buildings situated in Tunisia.

Astro-Tunisian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Tunisian and Astronist characteristics, traditions, and styles.

Astro-Turkish Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Turkish and Astronist characteristics, architects, and attributes, or such buildings situated in Turkey.

Astro-Turkish Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Turkish and Astronist characteristics, traditions, and styles.

Astro-Turkmen Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Turkmen and Astronist characteristics, architects, and attributes, or such buildings situated in Turkmenistan.

Astro-Turkmen Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Turkmen and Astronist characteristics, traditions, and styles.

Astro-Turks and Caicos Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Turks and Caicos, and Astronist characteristics, architects, and attributes, or such buildings situated in the Turks and Caicos Islands.

Astro-Turks and Caicos Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Turks and Caicos, and Astronist characteristics, traditions, and styles.

Astro-Tuvaluan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Tuvaluan and Astronist characteristics, architects, and attributes, or such buildings situated in Tuvalu.

Astro-Tuvaluan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Tuvaluan and Astronist characteristics, traditions, and styles.

Astro-Ugandan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Ugandan and Astronist characteristics, architects, and attributes, or such buildings situated in Uganda.

Astro-Ugandan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Ugandan and Astronist characteristics, traditions, and styles.

Astro-Ukrainian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Ukrainian and Astronist characteristics, architects, and attributes, or such buildings situated in Ukraine.

Astro-Ukrainian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Ukrainian and Astronist characteristics, traditions, and styles.

Astro-Uruguayan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Uruguayan and Astronist characteristics, architects, and attributes, or such buildings situated in Uruguay.

Astro-Uruguayan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Uruguayan and Astronist characteristics, traditions, and styles.

Astro-U.S. Virgin Islander Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly U.S. Virgin Islander and Astronist characteristics, architects, and attributes, or such buildings situated in the U.S. Virgin Islands.

Astro-U.S. Virgin Islander Literature - the collective stories, narratives, and literary works holding a mixture of distinctly U.S. Virgin Islander and Astronist characteristics, traditions, and styles.

Astro-Uzbek Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Uzbek and Astronist characteristics, architects, and attributes, or such buildings situated in Uzbekistan.

Astro-Uzbek Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Uzbek and Astronist characteristics, traditions, and styles.

Astro-Vanuatuan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Vanuatuan and Astronist characteristics, architects, and attributes, or such buildings situated in Vanuatu.

Astro-Vanuatuan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Vanuatuan and Astronist characteristics, traditions, and styles.

Astro-Vatican Architecture - also known as Astro-Catholic Architecture, the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Vatican, or Catholic, and Astronist characteristics, architects, and attributes, or such buildings situated as associated with Catholic churches.

Astro-Vatican Literature - also known as Astro-Catholic Literature, the collective stories, narratives, and literary works holding a mixture of distinctly Vatican, Catholic, and Astronist characteristics, traditions, and styles.

Astro-Venezuelan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Venezuelan and Astronist characteristics, architects, and attributes, or such buildings situated in Venezuela.

Astro-Venezuelan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Venezuelan and Astronist characteristics, traditions, and styles.

Astro-Vietnamese Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Vietnamese and Astronist characteristics, architects, and attributes, or such buildings situated in Vietnam.

Astro-Vietnamese Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Vietnamese and Astronist characteristics, traditions, and styles.

Astro-Wallisian and Futunan Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Wallisian and Futunan, and Astronist characteristics, architects, and attributes, or such buildings situated in Wallis and Futuna.

Astro-Wallisian and Futunan Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Wallisian and Futunan and Astronist characteristics, traditions, and styles.

Astro-Welsh Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Welsh and Astronist characteristics, architects, and attributes, or such buildings situated in Wales.

Astro-Welsh Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Welsh and Astronist characteristics, traditions, and styles.

Astro-Yemeni Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Yemeni and Astronist characteristics, architects, and attributes, or such buildings situated in Yemen.

Astro-Yemeni Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Yemeni and Astronist characteristics, traditions, and styles.

Astro-Zambian Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Zambian and Astronist characteristics, architects, and attributes, or such buildings situated in Zambia.

Astro-Zambian Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Zambian and Astronist characteristics, traditions, and styles.

Astro-Zimbabwean Architecture - the styles, designs, and planning of buildings, especially observatories and planetariums, holding a mixture of distinctly Zimbabwean and Astronist characteristics, architects, and attributes, or such buildings situated in Zimbabwe.

Astro-Zimbabwean Literature - the collective stories, narratives, and literary works holding a mixture of distinctly Zimbabwean and Astronist characteristics, traditions, and styles.

Millettö - the fourth style within Astronist Architecture, characterised by its pentagonal shape, its lack of human depictions and reliefs, and its distinct architectural modernity, and is most commonly found in predominantly Islamic countries.

Millettotronics - denoting, or relating to a film that is not sanctioned by The People's Constitutional Company of Jesse Millette, and is therefore considered an independent film of Astronist cultural influence, and typically has a much smaller production budget.

Derivatives

Millettotronic

Millettotronical

Millettotronically

Millettotropics - relating to the illicit usage of drugs to enhance one's philosophical ideas and understandings, the likes of such is absolutely forbidden and universally discouraged by The People's Constitutional Company of Jesse Millette, and all Astronist philosophical traditions and denominations.

Derivatives

Millettotropic

Milletttox - a male member of *The People's Astronist Peacekeeping Order*, or *The Millë Order*.

Millettrix - a female member of *The People's Astronist Peacekeeping Order*, or *The Millë Order*.

Millettü - the most common and definitive of the five Astronist architectural styles, characterised by a focus on domical and pyramidal roofings, the presence of all five of The Astronist Characters in all reliefs, an emphasis on grandeur, rich colours, Astronomism and Cosmosism, as well as the inclusion of encrustations, and artworks, and typically aims to stand out along a cityscape.

Derivatives

Millettürian

Millettüric

Millettürism

Millettutorial - a symbol, piece of art or imagery denoting the fictional character, Jesse Millette.

Milletturity

- the state, fact, or period of an Astronist entity being mature, that is, being in existence for more than three years.
- in Astronist Accounting, the fact of a project reaching its climax, or being financial mature, that is, being in existence for at least three years, which is usually the truncation point.

Derivatives

Milletturities

Millezerie - in French speaking countries, any type of Astronist philosophical building.

Derivatives

Millezeries

Millix - a type of Astronist artifactual sculpture which may depict any of The Five Astronist Characters, and most typically stands atop an Astronist Planetarium, Observatory, or Eidouranium, and is considered to be the highest point of the building and the furthest point away from the Millox.

Millor - an individual who has mastered the understanding and interpretation of The Philosophy of Astronism, so much so that they can demonstrate this to others in a formal educational setting, such as within an Astronist Planetarium, or another philosophical building.

Derivatives

Millors

Milloration - the process journeyed by an individual in the pursuit of mastering The Philosophy of Astronism.

Derivatives

Millory

Millorational

Milloratory

Millex - the lowest point, the furthest point away from the Millix, or the object at the lowest point within an Astronist Planetarium, Observatory, or Eidouranium, and so, is distinct from a Millix, in that a Millex could be a different object in each Astronist building, but is most commonly either embedded or incrustated in the floor, or is buried beneath the floor, and can be an artefact, or part of an orrery.

Mindstep - in Astronist Philosophy, relating to The Cosmic Mindstep, a revolutionary change in societal or civilisational perception, philosophy, or understanding on a mass public scale.

Mingling - in Mandarin Chinese, the informal term given for The Millë Order.

Miniature

- in Astronist Ornamentation, a picture, symbol or decorated letter of an ornament, especially when placed alongside picture, symbol, or decorated letter of a larger scale.
- a category of Astronist text of the Literary Classification system that is typically reserved for targeting towards young children.

Minimism - a school of thought in The Philosophy of Astronism that is in direct contrast and opposition to Maximism, and believes in the containment of the philosophy in the thoughts, knowledge, methods, theory, and understanding that it originated with, rather than continuing to expand the breadth of the philosophy.

Derivatives

Minimist

Minimistic

Ministèra - derived from the Malagasy language, a term relating to a governmental ministry of The People's Constitutional Company of Jesse Millette, especially The Governing Ministry.

Minoration - in Astronist Philosophy, relating to the process of reducing a major school of thought down to a minor school of thought within the Astronist philosophical tradition; this is an official act conducted by The Institution of The Philosophy of Astronism and the factors of school relevancy, size, popularity, and usage are all taken into consideration.

Derivatives

Minorative

Minoratively

Minorational
Minorationally

Minor Instrument - in Astronist Philosophy, a classification of an instrument of study, typically defined by an instrument that isn't regularly used, or can be applied only to a small variety of subjects.

Minor School - the inferior classification of the two types of thought school within the Astronist philosophical tradition that is categorised by a relatively low relevancy in philosophical debate, a smaller pool of concepts, and a reduced amount of popularity compared to major schools.

Mintaqa - in Arabic, the term given to the word, territory.

Mino - derived from the Malagasy language, in Astronist Philosophy, a term relating to act of believing, or just having faith, especially in relation to something cosmical.

Mipoaka - derived from the Malagasy language, in Astronist Philosophy, a term relating to a supernova in Cosmic Philosophy.

Miradorium - in Astronist Architecture, as part of gardenry, a simple outbuilding in the estate of some Astronist buildings consisting of just a raised platform typically all surrounded by between three and six steps, and on top of which may stand an astronomical instrument, and embedded into the floor of which may be cosmical patterns and Astronist imagery.

Derivatives
Miradoriums

Mirate - in Astronist Philosophy, to hold wonderment for something that is not cosmical.

Derivatives
Miration
Mirational
Mirator
Miratress

Mirroment - in Astronist Music, a type of piano piece with the same notes in both hands for the majority of the piece.

Derivatives
Mirromental
Mirroments

Mirrorous - in Astronist Philosophy, that which is the same as something else, or that which holds the quality of being able to represent or transform into something that is the same as another entity, whether conceptually, or physically.

Misconduction - in Astronist Philosophy, of an celestial entity, or a concept, to act in the opposite way to that which it is expected to.

Derivatives
Misconductional
Misconductionally

Misconductionality

Mislec - the most common demonym for a follower of The Philosophy of Astronism in the Slovenian language.

Derivatives

Misleci

Mislecs

Misleća - the most common demonym for a follower of The Philosophy of Astronism in the Bosnian language.

Derivatives

Mislećas

Mislilac - the most common demonym for a follower of The Philosophy of Astronism in the Croatian and Serbian languages.

Derivatives

Mislilacs

Mislitel - the most common demonym for a follower of The Philosophy of Astronism in the Bulgarian and Macedonian languages.

Derivatives

Mislitels

Mismatching - in Astronist Ornamentation, making a mistake of the ornament's interlacion, usually because all the parts of the interlacion don't totally match.

Misnomen - in Astronist Philosophy, primarily relating to the Misnomenic Principle of The Omnidoxy, the instance in which something is created, especially that which is written, and is ascribed with a name as derived from a person, an object, or an event, but no direct reference is made to it in the aforementioned creation.

Misnomenic Principle - in Astronist Philosophy, the appellation for the principle that there must exist a separation between The Five Astronist Characters and The Omnidoxy, the only exception for which is in the context of Astronist Mysticism, in which The Five Astronist Characters hold prominence.

Derivatives

Misnomenic

Misnomenical

Misnomenically

Misnomenicity

Misnomenicism

Misnomenicist

Misnomenicistic

Misnometry - in Astronist Philosophy, the practice of the maintenance of a disconnection between Astronist philosophical enquiry and The Five Astronist Characters.

Derivatives

Misnometrist

Misobserve - in Astronist Philosophy, to make a mistake in one's understanding or perception of something, either astronomically or philosophically.

Derivatives

Misobservation

Misobservational

Misobserving

Misobserved

Misphilosophy - in Astronist Philosophy, also known as inphilosophy, a version or interpretation of a philosophy that is not considered to be the correct interpretation, or version of a philosophical concept, or teaching to the majority of its adherents.

Derivatives

Misphilosophical

Misphilosophically

Misphilosophicality

Missionism - a school of thought in The Philosophy of Astronism centring itself on the concept of certain individuals being destined to lead missions of progression for the greater human race, and takes the viewpoint that these individuals should be put onto pedestals of virtue, to be championed for their mission, and to encourage them to inspire others whom are destined to lead their missions.

Derivatives

Missionist

Missionistic

Missionarian

Mission Patch - the various badges associated with missions undertaken by PUESEC.

-mitt - in Astronist Onomatology, a suffix used for Astronist names, in reference to the Astronist Character of Jesse Millette.

Mitt- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the Astronist Character of Jesse Millette.

Mittella - in Astronist Philosophy and Rendition, the universal book, or document that an educator of Astronist Philosophy uses to teach students about a particular branch or subject within the philosophy by providing the educator with a framework of pedagogy which they can use to structure a lesson, or a lecture. Mittellas come in many varieties, usually categorised by the subject on which they focus, and by the level of knowledge, or age range which are being taught.

Derivatives

Mittellas

Mittidoxy - in Astronist Music, the piece of music within the musidoxical system that is used to introduce a new level for the musician to play at, especially shortly after the passing of an exam.

Derivatives

Mittidoxic

Mittidoxical

Mittidoxically

Mixation - the process of mixing two entities together, usually one standard and the other differential, in order to form a new order.

Mizàna - derived from the Malagasy language, in Astronist Philosophy, a term relating to the concept of balance, especially in African denominations of The Philosophy of Astronism.

Mmepe - a follower of the Igbo Nigerian denomination of The Philosophy of Astronism, known as Mmepeanya'ism.

Derivatives

Mmepes

Mmepeanya - the root term for Nigerian Astronism.

Mmepeanya'ism - also known as Igbo Nigerian Astronism, the denomination of The Philosophy of Astronism that is most commonly adhered to by the Igbo peoples of Nigeria, and is considered to be the third largest form of Astronism in Nigeria.

Derivatives

Mmepeanya'ist

Mnemonic learning - in Astronist Education, collectively relating to methods of teaching that are best positioned for students to memorise certain pieces of information, the most prominent example of which being repetition.

Moazrovne - the most common demonym for a follower of The Philosophy of Astronism in the Georgian language.

Derivatives

Moazrovnes

Moazrovneebi

Mobial - in dynastesiology and familiology of Astronist Philosophy, a group of celestials, most prominently comets and asteroids, that are categorised by their movements, separation from the cosmical system, and their association with that which is known as The Chaos in the Astronist Cosmology.

Derivatives

Mobials

Mobial Family - in familiology of Astronist Philosophy, one of The Seven Cosmical Families characterised by sporadic movements and a distinct separation in naturity from orthodox cosmical entities, and includes asteroids, meteors, and comets, with asteroids holding the title of familiarch.

Moctius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the husband of Stasia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Moctian

Modality - the branch of study in Astronist Philosophy, specifically Cosmic Philosophy, within wider Astronology dealing with the philosophical concepts of celestial entities in relation to the way in which it exists.

Derivatives

Modalitist

Modalities

Modalitistic

Modalitistical

Modalical

Modally

Modation - in Astronist Ornamentation, the way in which an ornament is displayed, such as the object onto which, or where, it is mounted.

Moderate - in an Astronist contextualisation, of a philosophical worldview, held without enthusiasm, solidity, or clarity.

Derivatives

Moderative

Moderatively

Moderativism

Moderate Literate State - a nation that has a literate population between fifty and ninety-nine percent.

Moderationism - a school of thought in The Philosophy of Astronism which priorities the avoidance of excess or extremes in thought, interpretation, understanding, and in application of the philosophy, and typically stands in contrast to Literalism, and other most excessive or extreme schools of philosophical thought.

Derivatives

Moderationist

Moderationistic

Modes of Introspection - in Astronist Philosophy, the appellation collectively relating to two different contemplative classes known as lenticularity and menticularity.

Modularity - in an Astronist contextualisation, the extent to which The People's Constitutional Company of Jesse Millette, and its traditions, and orthodoxies, influences the depiction, representation, and creation of the Astronist characters.

Moiety - in an Astronist contextualisation, of an Astronist stories, or narrative, delivered, performed, or published in two parts.

Moindrement - in Astronist Philosophy, that which is considered to be unsurprising, or not unexpected, especially when referring to a result, or the outcome of a debate.

Moldovan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Moldova.

Molecularity - in Astronist Philosophy, to exist on a molecular scale, or to hold molecular characteristics.

Derivatives

Molecularities

Monacan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Principality of Monaco.

Monarchistic - in Astronist Philosophy, a supporter of the principle of having monarchs.

Monauthorial - the instance in which a book, or document is solely authored, an example of which is The Grand Centrality, as is stated by the fact of sole authorship.

Derivatives

Monauthorially

Monauthoriality

Monauthorialism - in centralitology and omnidoxicology, the belief orientation holding that a document or book that is solely written is superior to a book or document that has multiple authors.

Derivatives

Monauthorialist

Monde - relating to a philosophy that can be found in every part of the world; on every continent and in every country.

Derivatives

Mondeful

Mondefully

Mondial - in an Astronist contextualisation, of the reascension of philosophy as described in The Philosophy of Astronism, and more broadly the words, meanings, and consequences of The Philosophy of Astronism, as both affecting, involving, and relating to the entire world, or the entirety of humanity.

Derivatives

Mondiality

Mondially

Mondialism

Mondialement - in Astronist Philosophy, describing a school of thought that can be found in, or holds an influence the world over, in every country on The Earth.

Mongolian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Mongolia.

MongoloAstronistisation - the specific Astronistisation of Mongolian society, either in a macro or micro form.

Derivatives

MongoloAstronistisationism

Monisation - in kosmetrics of Astronist Philosophy, the process in which two or more entities combine to form one, either physically or conceptually, but typically in relation to celestial entities.

Derivatives

Monisational

Monisationally

Monity - in Astronist philosophy, the study and discussion of money; its nature, utilisation, and its effects on human psychology, purely from an Astronist philosophical viewpoint.

Derivatives

Monitism

Monities

Monocentricity - in Astronist Philosophy, a perception of existence that bases all phenomena on their oneness, or the inevitability of their oneness.

Derivatives

Monocentric

Monocentrics - a small branch of study in Astronist Philosophy, specifically Cosmic Philosophy, within wider Astronomy dealing with the concept of one single celestial entity existing independently, rotating independently, and originating independently upon only itself.

Derivatives

Monocentrist

Monocentrical

Monocentrically

Monocentricality

Monocosmology - in Astronist Philosophy, a type of cosmos entirely based upon the perception that cosmical entities, events, and other phenomena are naturally singular, rather than dualistic, as is the belief in bicosmology.

Derivatives

Monocosmologic

Monocosmological

Monocosmologically

Monocosmologist

Monocosmic

Monocosmical

Monocosmically

Monocosmicity

Monocreationism - in Astronist Philosophy, the branch of Creation Theory dealing with the notion that both The Cosmos and The Universe were ultimately created by one being, force, entity, or deity.

Derivatives

Monocreacionist

Monodoxy - in Astronist Philosophy, the official term for the disquisition of The Principles of The Aesthetic Cosmos within The Grand Centrality of The Philosophy of Astronism.

Derivatives

Monodox
Monodoxic
Monodoxical
Monodoxically

Monofinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that all finalities and ultimations are essentially singular without any influence from other finalities.

Derivatives

Monofinalism
Monofinalities
Monofinalist

Monogramation - in Astronist Ornamentation, the process of using monograms, or letters, in ornaments, either in subtlety or in plain sight.

Monogramology - a branch of study as part of Logology within wider Astronology dealing with the analysis and symbolical interpretation of Astronist monograms.

Derivatives

Monogramologist
Monogramologic
Monogramologically
Monogramological

Monomania - in an Astronist contextualisation, relating to the obsessive enthusiasm and everlasting preoccupation that Brandon Taylorian felt, and experienced when founding and establishing the entirety of The People's Constitutional Company of Jesse Millette, and wider Millettaria.

Derivatives

Monomanian
Monomanial
Monomanially
Monomaniality

MonoAstronistisation - the process of Astronistisation in an isolated environment or in a singular procedure.

MonoAstronistisationism - the process of Astronistisation in an isolated form as separate from wider society is the most effective way of receiving benefits from the process of Astronistisation.

MonoAstronism - a school of thought in The Philosophy of Astronism holding that the philosophy must only be viewed and adhered to in isolation, and without any connection made to any other philosophy, or method of thought.

Derivatives

MonoAstronist

Monomillettistic

Mononess - in Astronist Philosophy, to be ultimately created or originative from one singular entity.

Mononism - in Astronist Onomatology and in wider Astronist Culture, the system and style of all Astronist names that uniquely follow a mononymous structure, of which all officially recognised names are listed within *The Grand Registerium of Astronist Onomatology*.

Derivatives

Mononist

Mononym

- a type of term relating to an Astronist character, typically in Mystology, who is only name by one name.
- in Astronist Onomatology, relating to the mononymous system of Astronist names, as listed in *The Grand Registerium of Astronist Onomatology*.

Derivatives

Mononymous

Mononymously

Mononymic

Mononymical

Mononymically

Mononymity

Monoperature - in Astronist Philosophy, to be without temperature fluctuations, or for there to be no influence of temperature to entity or event in any way.

Monophilosophy - in Astronist Philosophy, considering a philosophy in isolation from all other philosophies.

Derivatives

Monophilosophical

Monophilosophically

Monophilosophicality

Monoplanetism - in Astronist Philosophy, the instance of a species, or civilisation only reside upon one planet, such as humanity in our current circumstances, but also relates to the belief that a species, or civilisation should remain on one planet only, and should not expand to other worlds, and therefore stands in direct oppositism to the beliefs held in the Astronist Tradition.

Derivatives

Monoplanetist

Monoplanetistic

Monoplanetistically

Monosemy - in an Astronist contextualisation, the state in which an Astronist term has just one meaning.

Derivatives

Monosemic

Monosemous

Monoultimation - in Astronist Philosophy, especially in Creation Theory, the notion maintaining that The Cosmos is ultimately going to end in some form of oneness, or singularity.

Derivatives

Monoultimational

Monoultimationally

Montenegrin Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and politics in Montenegro.

Montenegrin Prosvetljenje - the root term for Montenegrin Astronism.

Monter - in Astronist Philosophy, to develop a brand new discipline of philosophical study and contemplation, and to have it accepted by The Institution of The Philosophy of Astronism.

Derivatives

Monteration

Monterative

Monteratively

Monterer

Monteress

Monteral

Monterally

Montserratian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and politics in Montserrat.

Monumentalism - in Astronist Architecture, the principle of architectural design and construction holding that all buildings, and all parts and ornamentations of buildings must be monumental in both their scale, and in their beauty, and even more so to serve the masses; to inspire wonderment, knowledge, ambition, and imagination.

Derivatives

Monumentalist

Monumentalistic

Monumentation - in Astronist Ornamentation, the specific application of an ornamental pattern onto a monument.

Moonine - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of July.

Moon laudation - in Astronist Philosophy, specifically within Cosmic Devotion, relating to the particular type of laudation over The Moon as an entity separate to moons in general in The Cosmos.

Moonology - the study of all celestial bodies categorised as moons involving their features, potentials and their topographies and geologies, as distinct from the study of just the Moon of the Earth.

Moonstream - in Astronist Philosophy, the optical phenomena in which the moon's light is obscured to the point at which two beams of light are visible on either side of the celestial.

Derivatives

Moonstreams

Mor - in Astronist Philosophy, the philophon for the discipline of morphology.

Moratorion - in Astronist Philosophy, as first outlined in the discourse known as The Principle of Moratorion, the firmly held stance in the Astronist Tradition that religious institutions, especially those in opposition to certain cosmical concepts, such as that of sentient life, have no authority, concern, nor business with interfering in cosmical affairs and contemplations, especially when such interferences are considered either irrelevant, or regressive, and thus, negatively impact upon those individuals whom wish to keep their faiths, but also enjoy being philosophical.

Derivatives

Moratorate

Moratorative

Moratoratively

Moratorator

Moratoratee

Moratorational

Moratorated

Moratorating

Moratorism - the lawful actioning of the initial concept of moratorion from Astronist Philosophy, and typically involves either the permanent prohibition, or temporary fining, or banning, of religious institutions and individual preachers whom openly and publicly preach about cosmical affairs, especially when such individuals and institutions have been proven to spread falsities regarding such issues, and may be enforced and implemented in a variety of different ways depending on the location, the laws prescribed, and the severity of the falsities.

Derivatives

Moratorist

Moratoristic

Moratoristical

Moratoristically

Morcellement - in Astronist Philosophy, the group of activities involved with commercialising The Philosophy of Astronism and preparing it to be seen by the public masses in a particular country.

Moreso - in Astronist Philosophy, a popular term used in The Omnidoxy denoting more, or further than that which has been said.

Morgatius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the first son of Aviance and Mulig, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Morgatian

Moribond - in Astronist Philosophy, collectively relating to all references to death in The Grand Centrality of The Philosophy of Astronism, and thus, relating to the Astronist philosophical approach to death and its implications.

Derivatives

Moribondal

Moribondity

Moroccan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and politics in the Kingdom of Morocco.

Moroccan Tanwir - the root term for Moroccan Astronism.

Morphation

- change smoothly from one image to another by small gradual steps
- in Astronist Philosophy, the figurative change in a character, place or idea.

Derivatives

Morphational

Morphationally

Morphationality

Morphel - in Astronist Architecture, a series of sculptures, or figurines usually found atop an Astronist building, or gardenry outbuilding that depict the morphation process of the initial figurine to the final one; typically one of greater knowledge, triumph, and physicality.

Derivatives

Morphellic

Morphenment - in Astronist Architecture, similar to a morphel, a series of sculptures, or figurines usually in the form of a figurecrown that are made distinct by the change in perspective from one to the next. Typically, they are found in sequences of four; a front view of the figurecrown, a back view, a left view, and a right view.

Derivatives

Morphenments

Morphenmental

Morphism - an art movement within Astronist Art characterised by the depiction of a particular character, or place and its gradual depreciation, or appreciation through different paintings, or illustration, typically positioned side by side in chronological order.

Derivatives

Morphist

Morphistic

Morphistically

Morphocrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as distorted beings, as morphed beings, or as the creator(s) of morphed worlds especially in Astronist Art.

Morphology - a large discipline of study in Astronist Philosophy dealing with the philosophical standpoint and concepts on the formations, structures, and shapes of celestial objections, or The Cosmos, or The Universe themselves.

Derivatives

Morphologist

Morphological

Morphologically

Morzius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second of the three sons of Serendipitine and Jaggus, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Morzian

Morzun - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the husband of Zukeen, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Morzunian

Mosie - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Mosian

Mosic

Mosthigh - in Astronist Philosophy and omnidoxicology, a popular adjective used in The Omnidoxy denoting that which is to be raised to the highest level in whatever context.

Motility - in Astronist Philosophy, relating to mental responses to a stimulus rather than physical, especially in the context of a philosophical debate, during which one may attempt to suppress their physical reactions, which are known as somatic reactions, so as not to seem weak or to become undermined.

Derivatives

Motilities

Motilic

Motilical

Motilically

Motilitive

Motilitively

Motional - a document that is subject to movement and addition beyond its original state.

Motionalism - a school thought in The Philosophy of Astronism concerned with the motional components of the philosophy, and how these such components morph to suit different societies and cultures, either in the present day, or in a future time period.

Derivatives

Motionalist

Motionalistic

Motionality - a large branch of study within Astronist Philosophy as part of wider Astronomy dealing with the concept of motion mainly in its abstract form.

Derivatives

Motionalities

Motionalical

Motionalically

Motionist

Motional Figurehead - also Motional Leader, a term given to describe the ever-changing appearances, personalities, and natures of The Five Astronist Characters, especially Jesse, as the central figures of The Philosophy of Astronism.

Motionality - in Astronist Philosophy, an instrument of study pertaining to the movements of celestial entities in relation to other celestials, as well as the cosmic environment in which they reside, and is an instrument that is majoratively concerned with a physical context, rather than an abstract or metaphorical one, which is commonplace for many of the other instruments of study of the Astronist philosophical tradition.

Derivatives

Motionalities

Motional Philosophy - a term given to describe a type of philosophy that is structured so that the components of its foundations, appearance, and application are interchangeable and are structured in order to change as societies develop, the first of which being The Philosophy of Astronism.

Motivity - a major branch of study within Astronist Philosophy as part of wider Astronomy dealing with the concepts of motivation, incentive, and intention during decision-making, from a strictly philosophical standpoint, and invokes other branches of philosophical studies such as morality, and ethics.

Derivatives

Motivist

Motivities

Motivical

Motivically

Mõtleja - the most common demonym for a follower of The Philosophy of Astronism in the Estonian language.

Derivatives

Mõtlejas

Mountation - in observology of Astronist Philosophy, conceptually relates to the way by which a philosopher may use facts, theories, and evidence to support and justify their opinions, and physically relates to the instruments used to support an astronomer's observational equipment.

Derivatives

Mountative

Mountational

Mouvance - in Astronist Philosophy, relating to the extent of the sphere of influence of either The Philosophy of Astronism generally, or a particular school of thought, or denomination in a particular country, or across a group of countries.

Derivatives

Mouvancy

Moxazine - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the first daughter of Trezine and Halgus, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Moxazinian

Movement - a denomination of Astronism that spans across more than one country.

Mozambican Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Mozambique.

Mpandinika - as well as the demonym of Filozofa, the most common demonym for a follower of The Philosophy of Astronism in the Malagasy language.

Derivatives

Mpandinikas

MPI - the acronym for The Astronist Photographic Institute.

Mpiànatra - derived from the Malagasy language, a term relating to a student of an Astronist phrontistery in Madagascar.

Derivatives

Mpià

Mpiàsa

- derived from the Malagasy language, a term relating to an employee of The People's Constitutional Company of Jesse Millette, or one of its organisations, or subsidiaries in Madagascar.
- derived from the Malagasy language, a term relating to the character of Cora Nixon, the housekeeper of Richard Millette, Jesse Millette's father.

Mpitàri-draharàha - derived from the Malagasy language, a term relating to the Chairman of The People's Constitutional Company of Jesse Millette.

Mtaalamu - the most common demonym for a follower of The Philosophy of Astronism in the Swahili language.

Derivatives

Mtaalamus

Mtatsogh - the most common demonym for a follower of The Philosophy of Astronism in the Armenian language.

Derivatives

Mtatsoghs

Muduh - in Arabic, the term given for fashion, or the fashion industry, or the distinct fashion styles and designs of Astronist Fashion.

Mufakir - the most common demonym for a follower of The Philosophy of Astronism in the Arabic language.

Derivatives

Mufakirs

Mughamara - in Arabic, the term given for adventure, specifically an adventure story, and one featuring The Five Astronist Characters.

Muhalat - in Arabic, the term given for the concept of achievement, especially in Astro-Arab philosophy.

Muhtamal - in Arabic, the term given for the concept of potential, or potentiality, especially in Astro-Arab philosophy.

Mulig - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fourth Generation, as the husband of Aviance, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Muligian

Mullion - in Astronist Ornamentation, a type of border, or bordering separating ornamental patterns from one another.

Multicrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as the creators(s) of multiple worlds, especially in Astronist Art.

Multicreationism - in Astronist Philosophy, a branch of Creation Theory holding that there exists a multitude of creations and originations for both The Cosmos and The Universe rather than just one creation path or just one origination, as is stipulated in monocreationism, and so multicreationism is the oppositism to monocreationism.

Derivatives

Multicreationist

Multidenominationalism - in Astronist Philosophy, also known as combinationism, a type of adherence to The Philosophy of Astronism characterised by a fusion between two or more different denominations or schools of thought of the Astronist Tradition, thus forming unique combinations of philosophical adherence.

Derivatives

Multidenominationalist
Multidenominationalistic
Multidenominationalistically

MultiAstronistisation - the process of Astronistisation occurring in parallel with, but indirectly to, another process of Astronistisation, most typically in a neighbouring country, society, industry, or group.

Multipitch - occurs when there are two shapes forming one mission patch or spacecraft emblem, typically with one shape overlapping the other.

MultiAstronistisationism - the belief that the process of Astronistisation in multiple forms in parallel is the most effective and efficient way of the Astronistisation of an area or any other entity.

Multitudinal - in Astronist Philosophy, relating to a multitude of something, either physically, or conceptually.

Multiverse - in Astronist Philosophy, the notion that there exists not just one of The Universe as is traditionally held by the Astronist Tradition, but a multitude of universes beyond The Cosmos that remain both unconceivable and unreachable due to our positions within The Cosmos.

Derivatives

Multiversal
Multiversally
Multiversality
Multiversism
Multiversalism
Multiversalist

Multiversism - a branch of knowledge in The Philosophy of Astronism concerning the study and centrality of the concept of there existing multiple universes, and its implications on philosophical thought, theology, and cosmology.

Derivatives

Multiversal
Multiversic
Multiversically

Mùlù - in Mandarin Chinese, the informal term given for The Grand Catalogue.

Munazama - in Arabic, the term given for organisation, and specifically the particular in which The People's Constitutional Company of Jesse Millette, or any other Astronist subsidiary is organised, or may also refer generally to an Astronist organisation.

Munhaj Dirasiun - in Arabic, the term given for the curriculum of Astronist Education, or for a particular subject within Astronist Education.

Municipalitim - also known as cantonism, the banking mechanism only practically and legally actionable in nations who recognise municipalities as autonomous or semi-autonomous from the federal government. This banking mechanism entails the emphasis of the banking autonomy of a municipality and stipulates that banks within the municipality are only legally obligated to act in accordance with the municipal banking laws, rather than the federal laws. Therefore, banks outside the municipal jurisdiction may be subject to additional laws that inhibit their abilities to affectively benefit their clientele.

Munimentum - in Astronist Philosophy, the action and instance wherein one defends one's philosophical adherence, especially in face of attack, ridicule, and cast doubt.

Munster - in Astronist Propaganda, the collective depiction of buildings, especially those of philosophical basis, in propaganda pieces.

Murahiqa - in Arabic, the term given for adolescent, especially when The Five Astronist Characters are depicted as such.

Murakabuh Fadaiyyah - in Arabic, the term given for a spacecraft, especially when relating to Astro-Arab and Cosmic philosophy.

Muraqab - in Arabic, the colloquial term given for an Astronist observatory.

Mûrement - in Astronist Philosophy, a contribution to a philosophical argumentation that is particularly shrewd and well thought out; strategic and cunning of the philosopher.

Mûrissement - in Astronist Philosophy, relating to the development stages of a school of thought, concept, theory, or discipline, especially before its public release, or scholarly critique.

Musawat - in Arabic, the term given for the concept of equality, especially in Astro-Arab philosophy.

Museology - in an Astronist contextualisation, the study, and practice of organising, arranging, and managing of an Astronist museum.

Derivatives

Museological

Museologically

Museologist

Musidoxy - in Astronist Music, the newfound system of musical education founded and utilised within the Astronist musical tradition, and is characterised by its demanding, and challenging

structure, but also by its emphasis on composition as integral to higher musical understanding and knowledge, rather than just instrument playing.

Derivatives

Musidoxic

Musidoxical

Musidoxically

Mustaqbal - in Arabic, the term given for the concept and reference of the future, or the future review, in Astro-Arab and Cosmic philosophy, or may also refer to the future plans of The People's Constitutional Company of Jesse Millette.

Mütəfəkkir - the most common demonym for a follower of The Philosophy of Astronism in the Azerbaijani language.

Derivatives

Mütəfəkkirs

Mutamar - in Arabic, the term given for a conference, especially an official one conducted by The People's Constitutional Company of Jesse Millette for some particular subject.

Mutaqaddim - in Arabic, the term given for the word, advanced, and typically is associated with Advanced Philosophy.

Mutationism - also known as Mutationist Philosophy, a school of thought in The Philosophy of Astronism which is most typically manifested in a revival movement and typically claims that its version of the philosophy is the original's natural mutation in both form, structure, and maturity.

Derivatives

Mutationist

Mutationistic

Mutationist Philosophy - another term for Mutationism.

Mutual Appropriation - a type agreement of mutuality between two Astronist organisations, or subsidiaries involving their shared obligations to spend a limited budget received from The People's Constitutional Company of Jesse Millette.

Mutual Association - a type of agreement of mutuality between two Astronist organisations, or subsidiaries involving the fact of their mutual ownership by the same organisation, The People's Constitutional Company of Jesse Millette.

Mutual Constitution - a type of agreement of mutuality between two or more Astronist organisations involving their acknowledgement of their mutual association through both being obligated to The Grand Constitution of The People's Constitutional Company of Jesse Millette.

Mutual devotion - in Astronist Philosophy, particularly within occurrology, the instance in which two people share the same devotion to The Cosmos in general, or any one of its progeny, or phenomena simultaneously with one another; essentially, any form of cosmic devotion that is initiated and conducted simultaneously, especially at an occurrencial event.

Derivatives

Mutual devotionist

Mutual Foundation - a type of agreement of mutuality between an Astronist organisation, or subsidiary and the fact of its ownership by The People's Constitutional Company of Jesse Millette, typically due to the fact that such an ownership is not legally recognised.

Mutuality - one of the most integral aspects of the structure of The People's Constitutional Company of Jesse Millette, a shared understanding of conjoinment, or ownership, between two or more different Astronist organisations, usually when there is no official legal connection between the two entities.

Mwang - a follower of the denomination of The Philosophy of Astronism, known as Mwangazaism.

Derivatives

Mwangs

Mwangazi

Mwangazis

Mwangazaism - a large overarching denomination of The Philosophy of Astronism that encompasses several main derivations and is most predominantly adhered in the countries of eastern Africa, the largest of which derivations consist of Burundian, Eastern Congolese, Kenyan, Ugandan, and Rwandan forms.

Derivatives

Mwangazaist

Mwangazan

Nataterial

Naṭcattira vīṭu - derived from the Tamil language and used in Tamil Indian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Nathanyel - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Nathanyelic
Nathanyelian

National Association - the marketing strategy of internationalisation wherein the icons of a nation are utilised in the marketing of products, such as the national flag, the national anthem, and any national figureheads.

Nationalised Brandation - the process of branding a product, character or idea in close accordance to the policies and desires of the ruling government.

Nationalism - a school of thought in The Philosophy of Astronism that is most widely known through its applicative forms in art, culture, and literature, and its representation by the depiction of the Astronist characters conducting its principles, especially in the association of the philosophy to a particular country, and nationality. The school generally encompasses the ideas of national pride, the preservation of national identity and homogeneity, and the conservation of traditional values, and principles, but do not advocate for violent means to achieve such goals.

National Astronism - the construction and establishment of the philosophy of Astronism under the values, religious beliefs, government and social orders of a nation, in order to create a national philosophy.

Nationalise - in an Astronist contextualisation, the occurrence of a denomination, school, or branch of The Philosophy of Astronism whereby it adapts to the culture, people, and identity of a particular nation state, such as German Astronism, or American Astronism.

Derivatives

Nationalisation

Nationalisationism

Nationalised Astronism - a type of Astronism that has been adjusted to suit, and to become attractive to people of a particular nationality, especially those within distinct worldviews, or national mindsets.

National Philosophy - a widely disseminated and lauded philosophy underpinning the values, beliefs and social orders of a nation, usually for the betterment of the peoples of that nation.

Nationship - in Astronist Philosophy, another term for nationhood.

Native - in an Astronist contextualisation, relating to a denomination, branch, or school of The Philosophy of Astronism whose origins occurred in a particular country, especially when originating from a country from which The Philosophy of Astronism did not originate.

Nativism - in Astronist Philosophy, the belief in the innateness of mental capacities, mental structures, and conceptualisations in the mind rather than these being established through learning.

Naturalise

- in Astronist Music Theory, the process of turning a sharpened or flattened note to its natural root note.
- in an Astronist contextualisation, the official process of redirecting a project back to its root objective, typically if it has strayed from its original course, purpose, or objective.

Derivatives

Naturalisation

Naturalism

- in Astronist Philosophy, the belief and philosophical approach holding that humans are part of nature with no higher purpose beyond being minute products of The Cosmos in The Universe, and typically involves the disbelief of an afterlife.
- in Cosmic Art, as a derivation of Astronist Art, an artistic style depicting actual celestial entities, such as in astrophotography, rather than imagined, or artificial celestial entities.

Derivatives

Naturalistic

Naturalistically

Naturalist

Naturality - in Astronist Philosophy, an important topic of discussion dealing with the debate on the extent to which something is natural in a particular setting, or context, or may refer to a discussion about whether a certain event, process, or method is conducted in the most natural of ways, and is in this way distinct from the topic of naturity.

Derivatives

Naturalities

Natural satellite - in Astronist Philosophy, any non-technological or manmade object in orbit around a celestial body, typically asteroids, dust, or perhaps even moons themselves.

Nature - in an Astronist contextualisation, of The People's Constitutional Company of Jesse Millette, the basic and intrinsic qualities that are inherent to the proper functioning of the Company; those characteristics which make the Company distinct from all others.

Naturity - in Astronist Philosophy, one of the important instruments of study and topics of discussion centring around the nature of certain entities, thus evoking larger discussions of the purpose, origin, and fate of the entity in question, and typically serve a foundational and initial role in philosophical discussions, especially in Cosmic Philosophy, and is also closely related to the instruments of study known as rationality, motionality, orderity, functionality, and many others.

Derivatives

Naturities

Natural Provider - in Astronist Civicology, the natural phenomenas that directly benefit the town, city, or space colony depicted in the civicological illustration, especially in terms of their defensive, agricultural, and climatological advantages.

Naturology - in Astronist Philosophy, a discipline of study focusing on the relations between nature and The Cosmos, the nature of the natural world, the diversities of natural worlds, and comparisons between environmental nature and cosmic nature with its major practice being cosmoapplication.

Derivatives

Naturologic

Naturological

Naturologically

Naturologist

Nauruan Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Nauru.
- the denomination of The Philosophy of Astronism that is most predominantly followed in Nauru, by the Nauruan peoples.

-neb - in Astronist Onomatology, a suffix used for Astronist names, in reference to the nebulas of The Cosmos.

Neb- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the nebulas of The Cosmos.

Nebulaenym - a type of term relating to the name of a nebulae as appointed by an Astronist organisation.

Derivatives

Nebulaenymic

Nebulaenymity

Nebulaic - relating to nebulae, their shapes, structures, natures, colours, and formations.

Derivatives

Nebulaical

Nebulaically

Nebulaic Conformation - in Cosmic Art, as a derivation of Astronist Art, the natural and artificial depiction of a recognisable creature, person, or place in the form of a nebulaic cloud.

Nebuline - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of November.

Nebula Day - in The Grand Astronist Calendar, a commemorative and celebratory day dedicated to the wondermentation, adoration, and laudation specifically to nebulas of The Cosmos, and is characterised by nebulaic related events for the public in planetariums, and other Astronist philosophical buildings. This always takes place on 12th Ellenine, which translates to 14th April in the Gregorian calendar.

Nebulaic Formation - a branch of formatology dealing with the formations of nebulae from a purely philosophical perspective.

Nebular Hypothesis - in Astronist Philosophy, the theory holding and focusing on the fact that nebulaic matter is instrumental in the development of star systems.

Nebulashia - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the fourth and final daughter of Cosima and Celetius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Nebulashian

Nébuleusement - in Astronist Philosophy, in philosophical argumentation, a contribution, the meaning or purpose of which is considered vague by the other debaters.

Necessitate - in an Astronist contextualisation, of an item to discuss during a meeting, or during an Astronist congressional session, push the item to the forefront of a meeting due to its urgency, and imperativeness.

Derivatives

Necessitation

Necessitatory

Necessitator

Necessitatee

Necronym - a type of name given to an Astronist character after their canonical death, an example of which would be Jesse The Champion.

Derivatives

Necronymic

Necronymous

Necronymity

Needle - in Astronist Architecture, and also as part of gardenry, a tall and thin structure typically in the centre of a courtyard resembling a needle shape, and atop of which either a point, a small figurine, or a star is affixed.

Neepta - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the only daughter of Delicia and Uommen, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Neeptian

Negate - in an Astronist contextualisation, the action undertaken wherein the purpose, or objectives of a subsidiary of The People's Constitutional Company of Jesse Millette are reversed.

Derivatives

Negational

Negation

Negator

Negatee

Négativement - in Astronist Philosophy, in philosophical argumentation, of a debater, to reply negatively to a proposed theory, concept, or opinion by a fellow debater.

Neglactic - in Astronist Foreign Relations, specifically as part of the diplomatic policy and principle of provisionism, the instance wherein an external entity to The People's Constitutional Company of Jesse Millette has not accepted a proposal notion from the Company to establish formal diplomatic relations in alignment with the details of the proposal.

Derivatives

Neglacticism

Neglactical

Neglactically

Neglacticist

Negligence - in an Astronist contextualisation, wherein a subsidiary, project, or another procedure of The People's Constitutional Company of Jesse Millette is not managed under the proper circumstances, and so, leads to its eventual failure.

Derivatives

Negligency

Negotium - derived from Latin, in Astronist Philosophy, relating to philosophy as a commercial industry, or support for the idea that a philosophy should be run as a brand and company.

Neighbourship - in Astronist Philosophy, relating to the physical and the philosophical proximity between two people, or two groups, and in terms of Cosmic Philosophy, the physical proximity between two or more cosmical entities.

Neocatastrophism - in sentientology of Astronist Philosophy, one of the solutions provided by the Astronist Tradition to the Fermi Paradox characterised by the belief in the occurrence of major planetary catastrophes which halt the development of life through world extinctions.

Derivatives

Neocatastrophist
Neocatastrophistic
Neocatastrophistically

Neologism - in an Astronist contextualisation, a newly coined word, or phrase from an Astronist institution, or relating to Astronist philosophy, culture, and nomenclature.

Neology - an Astronist Subject dealing with the study of the creation of the Astronist Terminologies, and their integrations and interactions with already existing words and terminologies, as well as the creation of new Astronist words after the initiation words listed in The Grand Lexicon of Astronology.

Derivatives

Neologic
Neological
Neologically
Neologist

NeoAstronistisation - the process of Astronistisation in a new or revived form or procedure.

NeoAstronistisationism - the belief that a new or revived procedure of Astronistisation is the only way to properly and fully succeed in its implementation.

NeoAstronism - a new or revived form of The Philosophy of Astronism.

NeoAstration - a new or revived form of the practices and precepts of Astration.

-nep - in Astronist Onomatology, a suffix used for Astronist names, in reference to the Classical Planet of Neptune.

Nep- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the Classical Planet of Neptune.

Nep - in Astronist Philosophy, the philophon for the discipline of neptunology.

Nepalese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Federal Democratic Republic of Nepal.

Neph - in Astronist Philosophy, the philophon for the discipline of nephology.

Nephial - in Astronist Philosophy, relating to clouds and concentrations of stardust in The Cosmos, such as nebulae.

Nephial Family - in familiology of Astronist Philosophy, one of The Seven Cosmical Families including nebulae, proplyds, haloes, and molecular clouds, the familiarch of which are nebulae.

Nepholation - in Astronist Philosophy, the instance in which one's view of the night sky is obstructed due to clouds, thus stopping astronomical observation and cosmic devotion.

Nepholicity - in Astronist Philosophy, the instance, fact, and period during which cloud cover occurs.

Derivatives

Nepholic

Nephological

Nephologically

Nephology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of clouds in relation to the wondermentation of The Cosmos, and involves the newfound concept of Nepholism which holds that clouds are the main natural obstructions to cosmical wonderment.

Derivatives

Nephologic

Nephological

Nephologically

Nephologist

Nepholism

Nepholist

Nepholistic

Neptulabe - in Astronist Rendition, either a brass or plastic ornament featuring the classical planet of Neptune and its fourteen moons.

Derivatives

Neptulabes

Neptune Day - in The Grand Astronist Calendar, also known as Neptunian Day, a day of commemoration and celebration dedicated to the specific wondermentation, adoration, and laudation of Neptune itself as one of the classical planets, and is characterised by decorations of Neptune, competitions, festivals, and special lectures and education events at Astronist philosophical buildings that focus on the subject of Neptune, and its place in The Cosmos as a whole. This always takes place on 17th Zaarine, which translates to the 27th November in the Gregorian calendar.

Derivatives

Neptunian Day

Neptunology - in Astronist Philosophy, specifically as part of Cosmic Philosophy, the discipline dealing with the philosophical contemplations of the Classical Planet of Neptune.

Derivatives

Neptunologic

Neptunological

Neptunologically

Neptunologist

Nescience - in an Astronist contextualisation, of a person who does not follow, or is interested in The Philosophy of Astronism, or more broadly, The Cosmos itself and its importance to humanity from an Astronist philosophical worldview perspective.

Derivatives

Nescient

Nesciently

Nescient Era - part of The Standard Astronomical Calendar, the period of time before the first human being went into outer space, also termed of the Prior To Peregrination period, or PTP.

Nettement - in Astronist Philosophy, in the context of philosophical argumentation, of a debater, to speak in clarity and eloquence.

Neutralism - in an Astronist contextualisation, the official policy, or stance upheld by The People's Constitutional Company of Jesse Millette on an item of congressional discussion, or relations between the Company and an external entity.

Neutrotius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second son of Cosima and Celetius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Neutrotian

New Age Rights - an Astronist Subject dealing with the entirety of rights that arose after the beginning of humanity's exploration of The Cosmos and typically revolve around spacial settings and the issues that branch from this.

New Antiquity - the principle within Astronist Fashion, Rendition, Art, and Architecture holding that the Astronist approach to these creative and visual artistic expressions and outlets is to hark back to and be inspired by pre-modernist and pre-contemporary eras of ostentation, heavy ornamentation, and individually crafted items, whilst also adding the symbols, imageries, and character that the Astronist Style is known and distinguished for, so as to forge a new era of Astronist inspired antiquity.

New Caledonian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in New Caledonia.

New Culture - an Astronist Subject dealing with the study of cultures of different newly discovered planets and the peoples of societies and civilisations of those planets, as well as their similarities and differences to Earth and human cultures.

Newel - in an Astronist contextualisation, relating to the central supporting structure of The People's Constitutional Company of Jesse Millette, usually The Governing Ministry.

Newfounder - a person that discovers The Philosophy of Astronism and becomes an adherent of it during their adulthood rather than being taught about it in school, or adhering to the philosophy because of one's familial adherence.

Derivatives

Newfoundership

Newfounders

New Knowledge - in Astronist Philosophy, literally relating to the new discoveries of The Cosmos that philosophers must then incorporate into their ideas and opinions derived from The Philosophy of Astronism and The Omnidoxo, and typically refers to these collectively.

New Life - in Astronist Philosophy, an appellation collectively referring to life beyond The Earth, and life other than the human civilisation.

Newmasonic - relating to the reformed *Order of Newmasonry*.

Newmasonry - the newfound body of practices, principles, and philosophy of the *Order of Newmasonry*.

New Mythology - in an Astronist contextualisation, a broad and newfound term relating to the period in mythological tradition that arguably began with the development of The Philosophy of Astronism, and the establishment of Cosmic Mythology, and wider Astronist Mythology, and traditionally places a distinct focus on the future of humanity, the exploration of The Cosmos, and humanity's place within it as it explores new worlds, and is also said to include many science fiction narratives, most notably, the Star Wars franchise, though this may be disputed.

New Philosophy - a group of philosophies, most prominently The Philosophy of Astronism, as characterised by their distinct application and interaction with other religions, political ideologies, and philosophies, especially in the form of National Philosophy.

New Realism - also known as Astronist Realism, an art movement within Astronist Art that considers its foundations to be the classical Realism art movement, and is typically characterised by the representation of people, places, or any other subject in a way that is true to sight, and may either reflect the daily lives of people, or may be used for propaganda purposes to represent what is called The New Reality, which is traditionally a utopian representation of people, typically The Five Astronist Characters, in such a way that suggests it is attainable for the future of the current society, or the individual.

Derivatives

New-realist

New Republics - a genre within Astronist literature denoting the details of revolution, state establishment and the struggles, hardships and tragedies attributed to the revolt of the people.

New World

- in Astronist Philosophy, a world that not yet been physically explored by human endeavour, the plural of which is the most commonly used variation.
- in an Astronist contextualisation, specifically within Astronist philosophy, relating to The Cosmos.

Derivatives

New Worlds

New World Development - a major Astronist Subject dealing with the study of the planning, designing, establishment, and construction of towns, cities, and communities in a newly discovered world.

New Zealand Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in New Zealand.
- the denomination of The Philosophy of Astronism that is most widely followed in New Zealand.

Ngôi nhà cũ - derived from the Vietnamese language and used in Vietnamese denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Ngôi sao

Ngokomzimba - The School of Physicality in Astration as known in the Zulu language.

Nhà tư tưởng - the most common demonym for a follower of The Philosophy of Astronism in the Vietnamese language.

Derivatives

Nhà tư tưởngs

Nián - in Mandarin Chinese, the term given for the Astronist year.

-nican - in Astronist Onomatology, a suffix used for Astronist names, in reference to the extolled astronomer, Nicolaus Copernicus.

Nicaraguan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Nicaragua.

Nicholaus - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Nicholausian

Nicholausic

Nickname - in an Astronist contextualisation, the use of a shortened version of an Astronist character's name, typically in children's Astronist books, and especially in The Original Jesse Millette Series.

Nigerien Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Niger.

Nigerian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Federal Republic of Nigeria.
- the second largest single-nation form of Astronism after the culmination of the Indian forms, the denomination of The Philosophy of Astronism that is most predominantly followed in Nigeria, and includes three main derivations relating to the three main ethnic groups of the country; Yoruba, Igbo, and Hausa forms. As the unified form of these derivations and the wider Nigerian populous, Nigerian Astronism is the largest single-nation form of The Philosophy of Astronism in Africa.

Nightglow - in Astronist Philosophy, a glow in the night sky caused by radiation from the atmosphere.

Nightly - in an Astronist contextualisation, a more informal for nocturnality, relating to the procedures and activities taking place within The People's Constitutional Company of Jesse Millette, or by employees of the Company during the nighttime hours.

Nihilation - in obliology of Astronist Philosophy, the supposed process of obliteration involved when someone or something enters a black hole, and termed as such to remove the comedicism of the mainstream term known as spaghettification.

Derivatives

Nihilative

Nihilatively

Nihilativity

Nihilational

Nihon Keimō - the root term for Japanese Astronism.

Nijar Haske - the primary root term for Nigerien Astronism.

Nimiser - in Astronist Philosophy, a person who excessively practices and believes in a philosophy, to the extent that it can no longer be considered a philosophy, but instead, a religion.

Derivatives

Nimitress

Nine Cosmical Elements - in Astronist Philosophy, specifically within Cosmic Philosophy, the elements that are existent within The Cosmos according to the Astronist Tradition, as derived from Cosmic Alchemy, consisting of the elements of earth, fire, water, air, lightness, darkness, cosmos, chaos, and divine.

NipponoAstronistisation - the specific Astronistisation of Japanese society, either in a macro or micro form.

Derivatives

NipponoAstronistisationism

Nisarga - in Astronist Ornamentation, specifically Astro-Bengali Ornamentation, relates to the depiction of The Cosmos in ornaments, and the symbols, icons, and imageries associated with The Cosmos.

Nitida - a lizard-like creature of Astronist Mythology, with radiant scales and is said to be the incarnation of the element of Divine.

Nitor - derived from Latin, in Astronist Philosophy, relating to cosmical brilliance, illuminance, and elegance, especially a grand cosmical event, such as a supernova.

Derivatives

Nitoral

Nitorally

Nitority

Niuean Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Niue.
- the denomination of The Philosophy of Astronism most exclusively adhered to in territory of Niue.

Noblement - in Astronist Philosophy, in the context of philosophical argumentation, to retain one's dignity even in the face of a pressurising dispute.

Nociception - in Astronist Philosophy, the connection between the human mind and body and the processes involved, especially during philosophical experiences.

Derivatives

Nocicept

Nociceptional

Nociceptive

Nociceptively

Nociceptivity

Noct - in Astronist Philosophy, a person that is active during the night just as a diuric person would be active during the day, and therefore nocts sleep during the majority of the daytime hours. Despite the vast majority of humans adhering to diurism, those whom practice noctism, especially for cosmic devotional or observational reasons, are considered to be of a much greater awareness of The Cosmos according to the Astronist philosophical tradition.

Derivatives

Noctic

Noctical

Noctically

Nocticity

Noctarian

Noctarians

Noctarianism

Noctilucence - in firmamentology of Astronist Philosophy, categorised as a filament, the clouds of a nebula that surround forming stars and are illuminated by the stars within them.

Derivatives

Noctilucency

Noctilucent

Noctilucently

Noctilucent Accompicence - in firmamentology of Astronist Philosophy, a special filament characterised by a perfectly complete spherical nebulaic cloud surrounding a central entity, usually a star.

Nocturcentricity - in Astronist Philosophy, of a society, place, or group, to centre their lives and to order their civilisation around night time rather than day time, therefore the majority of the activities of such a society occur during the hours of nocturnality.

Derivatives

Nocturcentric

Nocturcentral

Nocturcentrically

Nocturnality - in an Astronist contextualisation, the official term for nightly, relating to the activities of The People's Constitutional Company of Jesse Millette that occur at night, or occurrences at night in general.

Derivatives

Nocturnalities

Nocturnalism - in Astronist Propaganda, the depiction in a propaganda piece of nighttime, or the background, signpost, or event occurring during the night, especially during a clear and starry night, or at midnight.

Derivatives

Nocturnal

Nodality - in kosmetrics of Astronist Philosophy, a minor instrument of study applied to intersections of orbits of cosmical entities to make contemplations about such occurrences.

Derivatives

Nodalities

Nodation - in Astronist Ornamentation, the point in an ornamental pattern, especially an interlaccation, at which lines or pathways intersect or branch out.

Noetics - in Astronist Philosophy, a branch of Astronist Metaphysics dealing with any concepts, statement, or theory that contemplates the nature of the mind and the intellect.

Derivatives

Noetical

Noetically

Noeticist

Noeticality

Nòfy - derived from the Malagasy language, in Astronist Philosophy, a term relating to the concept of a dream, and the Astronist approach to contemplating dreams.

Nom - in Astronist Philosophy, the philophon for the discipline of nomology.

Nomenclature - in an Astronist contextualisation, collectively relating to the entire terminology of Millettaria.

Derivatives

Nomenclatural

Nomenclaturity

Nominativement - in Astronist Philosophy, in the context of philosophical argumentation, to refer to a debater by their name, especially in addressing them after they have made a challenged to one's argument, or proposed concept, theory, or opinion.

Nomology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of law and its nature in the interaction with the state, the people, and the government.

Derivatives

Nomologic

Nomological

Nomologically

Nomologist

Nonage - in an Astronist contextualisation, relating to the depiction of an Astronist character when in their childhood, or teenage years.

Nonarant - in Astronist Propaganda, the use of nine quadrant squares in the creation of a propaganda piece in order to ensure the positioned centrality of the chosen signpost, as well as the proper alignment of the subjects.

Non-anthropicity - in Astronist Philosophy, neither emphasising or standing in opposition to humanity, and is one of the central notions of The Cosmic Mindstep, and the wider Astronist philosophical tradition.

Non-attendance - in an Astronist contextualisation, the scenario in which The Chairman of The People's Constitutional Company of Jesse Millette cannot attend a meeting, especially an Astronist congressional session.

Derivatives

Non-attendancy

Non-clusteral - in Astronist Philosophy, a celestial entity that doesn't demonstrate the functionality of clustering.

Non-compartment - in Astronist Philosophy and Naology, a single, or a group of Astronist philosophical buildings, especially prevalent amongst planetariums, that are not officially registered as being situated in any particular geographical region, county, or province of a country, and this can have implications and complications for the maintenance, upkeep, and recognition planetariums designated as such.

Derivatives

Non-compartmented

Non-compartmentism

Non-compartmentation

Non-compartmentational

Non-compilationism - in omnidoxicology and Astronist Philosophy, the belief orientation characterised by the notion that Astronism and Astronarianism should always remain distinct from one another in publications, and usually protests against the occurrence of The Compilation.

Compare with compilationism.

Derivatives

Non-compilationist
Non-compilationistic

Nonconcentric - in Astronist Philosophy, without any concentric shape to the structure and functionality of a celestial entity.

Derivatives

Nonconcentrically
Nonconcentricity
Nonconcentricities

Non-conformative - in Astronist Philosophy, that which does not conform with cosmical characteristics, or the wider cosmical orderity.

Derivatives

Non-conformativity

Nonconjunction - in Astronist Philosophy, the principle that, as humans, cannot truly and entirely say that we fully comprehend or hold complete knowledge of something.

Derivatives

Nonconjunctional
Nonconjunctuality

Non-constitutional - not related to or having an impact upon the writings of a constitution.

Non-denominational - relating to non-denominationalism in The Philosophy of Astronism.

Derivatives

Non-denominational
Non-denominationalism
Non-denominationality

Non-denominational Astronism - open or acceptable to any denomination of The Philosophy of Astronism, with no preference or association with any particular denomination.

Derivatives

Non-denominational Astronist

Non-destinical - in Astronist Philosophy, that which is not based or dependent upon the concept of destiny.

Nondevotionism - in Astronist Philosophy, the belief orientation supporting a sense of non-devotion to that which is known as The Divine in the Astronist Cosmology, which holds an important influence over general Astronist approaches to devotion. In this case, The Divine is not devoted to in Astronist versions of devotion, instead it is towards The Cosmos, and in rarer cases The Universe.

Derivatives

Nondevotionist

Non-directional - in Astronist Philosophy, that which seemingly lacks direction in its existence, typically something that is infinite, or is autocreational because these are not structured upon a authority dictating beginning and end.

Nondiscovery - in Astronist Philosophy, the notion that discovery should neither be prioritised and neither should it be considered a virtuous act, or an act of philosophy, which stands in direct and vehement opposition to the beliefs of the Astronist Tradition.

Non-Divine - in Astronist Philosophy, that which does not correspond to The Divine, or a cosmology that emphasises Divine action.

Derivatives

Non-divinical

Non-divinically

Nonerated - in Naology, an Astronist philosophical building that funds itself purely from donations, government-funded grants, or from money provided by The Institution of The Philosophy of Astronism itself, and is therefore a building and site used for philosophical purposes only, rather than a lucrated building, which also has an enterprise branch to its operations in order to fund itself.

Noneration - in Naology, the process of developing a lucrated Astronist philosophical building into a nonerated one, which involves the removal of all commercial branches of the building and its administration in order to make it a building and place of philosophical significance and utility only, rather for any business purpose.

Derivatives

Nonerate

Nonerater

Noneratress

Nonerating

Nonerational

Nonerationally

Non-experimentation Principle - in pneumovology of Astronist Philosophy, the appellation for the principle holding that Astronist Mysticism doesn't share the ambition of proving one's understandings or beliefs but instead holds the ambition of sharing all ideas and concepts no matter their correctness in order to create a greater abundance of new ideas.

Nonfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by a similarity to infinality, but instead holds that finalities are neither necessary, nor important to the structure of The Cosmos, and The Universe.

Derivatives

Nonfinalism

Nonfinalities

Nonfinalist

Non-financial - wealth that originates from donations, governmental funds or charitable works.

Non-governmental - in an Astronist contextualisation, relating to those parts of The People's Constitutional Company of Jesse Millette that are not connected to The Governing Ministry, or its operations; the strictly commercial activities of the Company.

Non-material Philosophy - the non-physical aspects of an Organised Philosophy, most commonly its intangible practices and ideas.

Non-metagalactic - in Astronist Philosophy, that which isn't directly part of The Metagalaxy, or the metagalactic superstructure.

Non-Astronist - that which originated after the founding of The Philosophy of Astronism, but did not originate from an Astronist philosopher, institution, or organisation, or does not address Astronist topics.

Derivatives

Non-Astronistness

Non-Astronist disciplines - in Astronist Philosophy, the phrase used to refer to philosophical discipline that originated after the Founding of The Philosophy of Astronism, but did not originate from an Astronist philosopher, or institution, or do not address Astronist ideas.

NonAstronistisation - the self-proclamation by The People's Constitutional Company of Jesse Millette whereby the company pledges that its intentions do not focus on Astronistisation.

NonAstronistisationism - the belief that nonAstronistisation is a policy that should be at the forefront of the operations of The People's Constitutional Company of Jesse Millette.

Non-mystery - relating to a book involving the character of Jesse Millette, or another of The Five Astronist Characters that in no way incorporates a mystery into the narrative.

Non-natural - in an Astronist contextualisation, relating to that which is not natural of The People's Constitutional Company of Jesse Millette.

Non-observance - in an Astronist contextualisation, of an employee, or a subsidiary of The People's Constitutional Company of Jesse Millette, a failure to comply with constitutional policies and principles.

Nonodoxy - in Astronist Philosophy, the official term for the disquisition of The Principles of Epistemology & Ethics within The Grand Centrality of The Philosophy of Astronism.

Derivatives

Nonodox

Nonodoxic

Nonodoxical

Nonodoxically

Nonology - nine related literary works of Astronist origination or theme.

Non-omnidoxic - in Astronist Philosophy, relating to that which does not originate from within The Omnidoxy.

Derivatives

Non-omnidoxic

Non-operational - in an Astronist contextualisation, relating to the elements of The People's Constitutional Company of Jesse Millette that are not part of its daily operations.

Non-philosophical - an individual with no interest in philosophical affiliation, or broadly, an individual with no interest in philosophy.

Nonphilosophy - in Astronist Philosophy, concepts and theories that some consider to be part of a philosophy, but others reject as part of the philosophy.

Derivatives

Nonphilosophically

Nonphilosophicality

Nonpurposity - in Astronist Philosophy, the instance in which something exists without a defined purpose, considered to be a characteristic of chaosity.

Non-singularity Cosmology - in Astronist Philosophy, the type of cosmos persisting that there exists absolutely no true singularities in The Cosmos.

Non-Taylorian - that which is Astronist and originated while Brandon Taylorian was alive, but did originate directly from Brandon Taylorian himself, examples of which may be an Astronist story, philosophy, artwork, symbol, or some other creative expression.

Non-theistic Matrixian theology - see Matrixian theology.

Non-theistic Naturalism - see naturalism.

Non-theocentrism - in Astronist Propaganda, the argued point that there is a distinct lack of theological or religious prominence portrayed within the propaganda pieces and styles.

Non-ultimatory - in Astronist Philosophy, that which is not bound by an ultimatum, or does not hold an ultimatum, typically a divinical entity in the Astronist Cosmology.

Non-union - in an Astronist contextualisation, of an employee of The People's Constitutional Company of Jesse Millette, or any one of its subsidiaries, not part of an Astronist union, or any other union.

Non-universal Cyclometrics - in Astronist Philosophy, a branch of cyclometrics considering The Cycles of The Cosmos to be naturally, orderatively, and functionatively in separation from those of The Universe, and supports the notion of Composite Cycles.

Nonworlder - an individual whom has no citizenship on any planet.

Derivatives

Nonworlders

Noo - in Astronist Philosophy, the philophon for the discipline of noology.

Noology - in Astronist Philosophy, the discipline of study dealing with the philosophical contemplations of human intuition and reason as the phenomena of the mind.

Derivatives

Noologic
Noological
Noologically
Noologist

Normalise - in an Astronist contextualisation, of a policy, or stance of The People's Constitutional Company of Jesse Millette, returning to its original state, especially after divergence, or distortion.

Derivatives

Normalisation

Normative principle of devotion - in Astronist Philosophy, a principle holding that both cosmic devotions established in The Omnidoxy and those not mentioned in The Omnidoxy are valid and opposes the procedural principle of devotion which only advocates for cosmic devotions mentioned and established within The Omnidoxy.

North - in an Astronist contextualisation, relating to the activities and operations of The People's Constitutional Company of Jesse Millette in the northern hemisphere of The Earth.

Derivatives

Northern
Northernity
Northbound

Northern Astrocy - in Astronist Philosophy, the name given to the four day long Starlight Festival held in the northern hemisphere beginning on 20th December and ending on 23rd December annually, another name for which is Stellara. See Stellara.

Northern Astronism - in an Astronist contextualisation, relating collectively to those denominations, branches, and schools of The Philosophy of Astronism found in the northern hemisphere of The Earth.

Northern Qǐshì - a small denomination of Chinese Astronism most commonly found in the regions of Liaoning, Jilin, and Heilongjiang.

NorvegoAstronistisation - the specific Astronistisation of Norwegian society, either in a macro or micro form.

Derivatives

NorvegoAstronistisationism

Norwegian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Kingdom of Norway.

Noscence - in Astronist Music, the ninth musical piece of the amassory known as The Cosmicusy.

Notarise - in an Astronist contextualisation, the providing of the signature of the Chairman, or Vice Chairman of The People's Constitutional Company of Jesse Millette onto a documentation in order to verify it.

Derivatives

Notarisation

Notary - in an Astronist contextualisation, relating both to the Chairman, and Vice Chairman of The People's Constitutional Company of Jesse Millette collectively.

Derivatives

Notarial

Notaries

Notionery - in Astronist Architecture, as part of a gardenry, a type of outbuilding most commonly found on the estate of an Astronist building characterised by the small plash surrounding it. A notionery consists of an outdoor platform surrounding the main structure beside the plash and typically balustraded, and the structure itself is pavilion-like with four archways on each side, and almost all notioneries feature a stairway leading up to the terrace, whereupon the main purpose of a notionery is realised; orators can speak to the public beyond the plash, especially of a philosophical topic.

Derivatives

Notioneries

Notionise - in Astronist Philosophy and omnidoxicology, a popular verb for posing a philosophical notion.

-nov - in Astronist Onomatology, a suffix used for Astronist names, in reference to novas of The Cosmos.

Nov- - in Astronist Onomatology, a prefix used for Astronist names, in reference to novas of The Cosmos.

Novaenym - a type of term relating to the name of a novae when appointed by an Astronist organisation.

Derivatives

Novaenymic

Novaenymity

Novaetion - in Astronist Philosophy, particularly within Cosmic Alchemy, the seventh of The Eleven Cosmo-Alchemic Processes relating to the contemplations, alchemic theories, and practices focusing on all types of novae, within which supernovaetion, and hypernovaetion are included as variations of the process of novaetion.

Derivatives

Novaetional

Novaetionally

Novate - in an Astronist contextualisation, the creation of a new contract, statement, policy, or documentation in the place of an old one.

Derivatives

Novatory

Novation

Novative

Novel - a category of Astronist text of the Literary Classification system relating to the most common of all Astronist texts, typically books of fictionality, and those of The Original Jesse Millette Series.

Derivatives

Novelity

Novelities

Novelette - a category of Astronist text of the Literary Classification system relating to a type of book that is an equal mixture of fictionality and afiction, and is typically half the size of a novel, and is usually targeted towards young adults.

Derivatives

Novelettes

Novicial - in Astronist Philosophy, displaying novice tendencies during philosophical enquiries, and discourses; an easy mistake to make.

Derivatives

Novicity

Novus - in Astronist Philosophy, a new philosophical concept officially added to The Philosophy of Astronism, especially when added after the initial founding of The Philosophy of Astronism, and by someone other than Brandon Taylorian.

Ntlo ea linaleli - derived from the Southern Sotho language and used in the Botswanan, Basotho, and South African denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Nuitamment - in Astronist Naology, relating to the period of time consisting of the hours of moonlight cast over an Astronist philosophical building.

Null Flux - in firmamentology of Astronist Philosophy, the appellation for the instance in which a filament is unable to be applied to two different entities.

Nullement - in Astronist Philosophy, in the context of philosophical argumentation, the instance in which no other debater in the argumentation agrees with a proposed concept, theory, or opinion.

Nullify - in an Astronist contextualisation, the official action and process of wherein a previously verified documentation is overrode and considered null and void in a constitutional sense.

Nyota nyumba - derived from the Swahili language and used in East African denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Nyumba nyota

985 terms

Oasis - in an Astronist contextualisation, a geographical region in which The Philosophy of Astronism flourishes in popularity and freedom, especially when surrounding by regions in which this is the opposite.

Obediah - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Obedian

Obediaic

Obedience - in an Astronist contextualisation, to fully comply with the policies, and writings of The Grand Constitution.

Derivatives

Obediency

Oberon

- in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.
- in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Third Generation, as the husband of Cassandra, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Oberonic

Oberonian

Obfuscate - in an Astronist contextualisation, to make the stance of The People's Constitutional Company of Jesse Millette on a particular subject unclear, unintelligible, or obscure.

Derivatives

Obfuscation

Obfuscatory

Obfuscater

Obfuscatee

Obl - in Astronist Philosophy, a philophon for the discipline of obliviology.

Oblate - in an Astronist contextualisation, a characteristic of Brandon Taylorian, especially his interest, and repeated study of religion, and wider theology.

Derivatives

Oblative

Oblation - in an Astronist contextualisation, according to Brandon Taylorian, the purpose of The People's Constitutional Company of Jesse Millette to be initiated, created, and offered up to The Divine, another term for God, or the creator of The Universe.

Derivatives

Oblatory

Oblationism - a school of thought in The Philosophy of Astronism which focuses on the concept that an individual should work as hard as they physically, spiritually, and mentally can in order to create a legacy which is then offered to their creator at the end of their life, and demonstrates one of the rare, yet obvious intercessions between The Philosophy of Astronism, and theological thought.

Derivatives

Oblationist

Oblationistic

Obligatories - in an Astronist contextualisation, relating collectively to the sole duties of the Chairman of The People's Constitutional Company of Jesse Millette as described in The Grand Constitution.

Oblivescence - in Astronist Philosophy, the inability to remember a philosophical concept from memory, especially its finer and more obscure aspects.

Obliviology - in Astronist Cosmology, and as part of Astronist Philosophy, specifically Cosmic Philosophy, the discipline of study and philosophical discussion of the nature, purpose, motionality, structure, and possibility of black holes.

Derivatives

Obliviologist

Obliviological

Obliviologically

Obliviation

- in Astronist Philosophy, particularly within Cosmic Alchemy, the sixth of The Eleven Cosmo-Alchemic Processes dealing with the alchemical practices, and theories involving the black holes of The Cosmos.
- in Astronist Ornamentation, the specific depiction of a black hole, characterised by a distinct blackness, and by the blurriness, stretching, and distortion of surrounding patterns, symbols, colours, and motifs.

Derivatives

Oblivionational

Oblivionationally

Oblivion Day - in The Grand Astronist Calendar, a celebratory and commemorative day dedicated to black holes, their specific wondermentation, adoration, and laudation, and is characterised by black hole lectures, black hole interactive learning sessions, and other black hole related activities for the public. This always takes place on 118th Zaarine, which translates to 12th March in the Gregorian calendar.

Oblivionic - in Astronist Philosophy, relating to the functionalities, naturity, positions, and the general characteristics of oblivions of The Cosmos, colloquially known as black holes.

Derivatives

Oblivionicity

Oblivionical

Oblivionically

Oblivionic Epoch - see Oblivionic Era.

Oblivionic Era - in Astronist Philosophy, especially within vacuology, the appellation for the period within The Vacuological Cosmos during which black holes are completely dominant and the Black Hole Cosmology is at its peak.

Oblivionic Evaporation - in obliviology of Astronist Philosophy, the appellation for the process in which a black hole evaporates.

Oblivionic Formation - a major branch of formatology dealing with the formations of black holes from a purely philosophical perspective.

Oblivionic Issues - in obliviology of Astronist Philosophy, the appellation for the six issues still associated with black holes in mainstream physics and cosmology, and include the No-hair Theorem, Cosmic Censorship, Alternative Models, Black Hole Complementarity, ER=EPR, and the Final Parsec Problem; these six issues are prominent subjects for oblivionologists to contemplate.

Oblivionic Instrumentation - in obliviology of Astronist Philosophy and omnidoxyology, the appellation for the application of as many instruments of study as possible to black holes in the obliviological discourse in The Omnidoxy.

Oblivionic Orchestration - in obliviology of Astronist Philosophy, the appellation for the approach to oblivionic contemplation to focus on the sounds of black holes rather than their physical or consequential attributes due to sound being considered a more accurate medium for which to understand black holes.

Oblivionic Origination Paradox - in obliviology of Astronist Philosophy, the appellation for the paradox that black holes originate from supernovas, thus demonstrating a connection between that which is chaotic (black holes) and that which is considered to be cosmical (supernovas). This paradox draws upon the question of the true nature of black holes and confuses students as to what their true nature is.

Oblivionic Seasons - in Astronist Philosophy, particularly within seasonology, the seasons of formation associated with black holes, as derived from the Formational Seasons.

Oblivionism - in obliviology of Astronist Philosophy, the philosophical orientation and belief that black holes are of primary importance in The Cosmos, and oblivionists emphasise oblivionic relevance over all other celestial entities.

Derivatives

Oblivionist

Oblivionists

Oblivionistic

Oblivionistically

Oblivionment - in the Astronist philosophical tradition, the process whereby an object is stretched and ripped apart by gravitational forces upon falling into a black hole, in direct opposition to the title of spaghettification considered as part of comedicism.

Oblivionym - a type of term relating the name of a black hole as appointed by an Astronist organisation.

Derivatives

Oblivionymic

Oblivionymity

Obloquy - in an Astronist contextualisation, the joining of The People's Constitutional Company of Jesse Millette in the public condemnation of a person, group, organisation, or company for their proven actions.

Obs - in Astronist Philosophy, a philophon for the discipline of observology.

Obscene - in an Astronist contextualisation, a policy, viewpoint, or philosophy that is so far from that of The Grand Constitution, or The Philosophy of Astronism.

Derivatives

Obscenity

Obscurantism - in Astronist Philosophy, the use of distractions and illusions during an argument, or discourse that are intended to prevent the enlightenment, or to hinder the process of knowledge, exploration, and attainment of greater wisdom. In Astronist terms, this is considered to be any argument that leans towards being against cosmocentricity, the Humanic Exploration of The Cosmos, or the reascension of philosophy.

Derivatives

Obscurantist

Obscurantistic

Obscurantistical

Obscurantistically

Obscurantic

Obscurant

Obscure - in an Astronist contextualisation, of a project, campaign, or advert by The People's Constitutional Company of Jesse Millette, or one of its subsidiaries, lacking an explanation on its clarity, purpose, or meaning.

Derivatives

Obscurity

Observable Cosmos - in introspectics of Astronist Philosophy, the appellation for the part of The Cosmos that humanity can physically observe.

Observable Universe - an alternative appellation for the Observable Cosmos in mainstream cosmology.

Observality - in Astronist Philosophy, an instrument of study measuring the extent to which an ospination is considered to have taken place, or the application of the concept of observance of a subject.

Derivatives

Observalities

Observancy

- the process of observing through an observatory telescope, especially one built or sponsored by The People's Constitutional Company of Jesse Millette.
- the process of an entity observing a conflict, dispute or crisis before actually partaking in its resolution or deciding on which side it will join.

Observatist Tradition - in Astronist Philosophy, especially within the discipline of epochology, standing in opposition to the Pretemporalist Tradition, the collection of notions and beliefs which generally place a higher emphasis on the observation of The Cosmos rather than emphasising imagination and devotion of The Cosmos.

Observatology - a major branch of Naology dealing with the study and practical management, preservation, construction, and categorisation of Astronist observatories worldwide, and in specific regions, and countries.

Derivatives

Observatologist

Observatologic

Observatological

Observatologically

Observatorial - referring to observatories, especially those built or sponsored by The People's Constitutional Company of Jesse Millette.

Observatory - a principal Astronist building featuring an astronomical telescope, and is most typically centred in the cities of a nation.

Derivatives

Observatories

Observatory Visual Arts - the specific ornamentation, art, architectural styles, and renditions found exclusively in observatories.

Observia - collectively relating to entirety of observatories worldwide, or throughout a single country.

Observology - a discipline of study within Astronist Philosophy dealing with the philosophical concepts surrounding the observability of The Cosmos, and The Universe, and the very nature of The Observable Universe.

Derivatives

Observologic

Observological

Observologically

Observologist

Obsess - in an Astronist contextualisation, of a hostile entity, repeatedly and consistently attacking The People's Constitutional Company of Jesse Millette.

Derivatives

Obsessor

Obsession

Obsolete - in an Astronist contextualisation, relating to a school of thought of The Philosophy of Astronism, no longer practiced, or seen to be relevant.

Obstacled - in Astronist Philosophy, for there to be an obstacle in place, either physically, or conceptually.

Obstetrics - in an Astronist contextualisation, the depiction, or representation of childbirth, or of a newborn child in an Astronist book, or art piece.

Derivatives

Obstetric

Obtention - in an Astronist contextualisation, the official for the action of obtaining concordance at the end of an Astronist meeting, especially an Astronist congressional session.

Obtrude - in an Astronist contextualisation, relating to anything that is forced upon The People's Constitutional Company of Jesse Millette from an external entity.

Derivatives

Obtrusion

Obtrusivity - in Astronist Philosophy, the instance, fact, and feature of being obtrusive to The Cosmos, especially characteristic of clouds.

Derivatives

Obtrusivities

Occultatee - in firmamentology of Astronist Philosophy, the smaller of two celestials in an occultation.

Derivatives

Occultatees

Occultateeship

Occultator - in firmamentology of Astronist Philosophy, the larger of two celestials in an occultation.

Oliverian-American Character Representation - the specific representation of the Astronist character of Oliver in the United States of America, including all its variations.

Oliverian-American Samoan Character Representation - the specific representation of the Astronist character of Oliver in American Samoa, including all its variations.

Oliverian-Andorran Character Representation - the specific representation of the Astronist character of Oliver in Andorra, including all its variations.

Oliverian-Angolan Character Representation - the specific representation of the Astronist character of Oliver in Angola, including all its variations.

Oliverian-Anguillan Character Representation - the specific representation of the Astronist character of Oliver in Anguilla, including all its variations.

Oliverian-Antiguan-Barbudan Character Representation - the specific representation of the Astronist character of Oliver in Antigua and Barbuda, including all its variations.

Oliverian-Argentine Character Representation - the specific representation of the Astronist character of Oliver in Argentina, including all its variations.

Oliverian-Armenian Character Representation - the specific representation of the Astronist character of Oliver in Armenia, including all its variations.

Oliverian-Aruban Character Representation - the specific representation of the Astronist character of Oliver in Aruba, including all its variations.

Oliverian-Australian Character Representation - the specific representation of the Astronist character of Oliver in Australia, including all its variations.

Oliverian-Austrian Character Representation - the specific representation of the Astronist character of Oliver in Austria, including all its variations.

Oliverian-Azerbaijani Character Representation - the specific representation of the Astronist character of Oliver in Azerbaijan, including all its variations.

Oliverian-Bahamian Character Representation - the specific representation of the Astronist character of Oliver in the Bahamas, including all its variations.

Oliverian-Bahraini Character Representation - the specific representation of the Astronist character of Oliver in Bahrain, including all its variations.

Oliverian-Bangladeshi Character Representation - the specific representation of the Astronist character of Oliver in Bangladesh, including all its variations.

Oliverian-Barbadian Character Representation - the specific representation of the Astronist character of Oliver in Barbados, including all its variations.

Oliverian-Basotho Character Representation - the specific representation of the Astronist character of Oliver in Lesotho, including all its variations.

Oliverian-Belarusian Character Representation - the specific representation of the Astronist character of Oliver in Belarus, including all its variations.

Oliverian-Belgian Character Representation - the specific representation of the Astronist character of Oliver in Belgium, including all its variations.

Oliverian-Belizean Character Representation - the specific representation of the Astronist character of Oliver in Belize, including all its variations.

Oliverian-Beninese Character Representation - the specific representation of the Astronist character of Oliver in Benin, including all its variations.

Oliverian-Bermudan Character Representation - the specific representation of the Astronist character of Oliver in Bermuda, including all its variations.

Oliverian-Bhutanese Character Representation - the specific representation of the Astronist character of Oliver in Bhutan, including all its variations.

Oliverian-Bissau-Guinean Character Representation - the specific representation of the Astronist character of Oliver in Guinea-Bissau, including all its variations.

Oliverian-Bolivian Character Representation - the specific representation of the Astronist character of Oliver in Bolivia, including all its variations.

Oliverian-Bonaire Character Representation - the specific representation of the Astronist character of Oliver in Bonaire, including all its variations.

Oliverian-Bosnian Character Representation - the specific representation of the Astronist character of Oliver in Bosnia and Herzegovina, including all its variations.

Oliverian-Botswanan Character Representation - the specific representation of the Astronist character of Oliver in Botswana, including all its variations.

Oliverian-Brazilian Character Representation - the specific representation of the Astronist character of Oliver in Brazil, including all its variations.

Oliverian-British Character Representation - the specific representation of the Astronist character of Oliver in the United Kingdom, including all its variations.

Oliverian-Bruneian Character Representation - the specific representation of the Astronist character of Oliver in Brunei, including all its variations.

Oliverian-Bulgarian Character Representation - the specific representation of the Astronist character of Oliver in Bulgaria, including all its variations.

Oliverian-Burkinan Character Representation - the specific representation of the Astronist character of Oliver in Burkina Faso, including all its variations.

Oliverian-Burmese Character Representation - the specific representation of the Astronist character of Oliver in Myanmar, including all its variations.

Oliverian-Burundian Character Representation - the specific representation of the Astronist character of Oliver in Burundi, including all its variations.

Oliverian-Cabo Verdean Character Representation - the specific representation of the Astronist character of Oliver in Cape Verde, including all its variations.

Oliverian-Cambodian Character Representation - the specific representation of the Astronist character of Oliver in Cambodia, including all its variations.

Oliverian-Cameroonian Character Representation - the specific representation of the Astronist character of Oliver in Cameroon, including all its variations.

Oliverian-Canadian Character Representation - the specific representation of the Astronist character of Oliver in Canada, including all its variations.

Oliverian-Caymanian Character Representation - the specific representation of the Astronist character of Oliver in the Cayman Islands, including all its variations.

Oliverian-Central African Character Representation - the specific representation of the Astronist character of Oliver in the Central African Republic, including all its variations.

Oliverian-Chadian Character Representation - the specific representation of the Astronist character of Oliver in Chad, including all its variations.

Oliverian-Chilean Character Representation - the specific representation of the Astronist character of Oliver in Chile, including all its variations.

Oliverian-Colombian Character Representation - the specific representation of the Astronist character of Oliver in Colombia, including all its variations.

Oliverian-Comoran Character Representation - the specific representation of the Astronist character of Oliver in the Comoros, including all its variations.

Oliverian-Congolese Character Representation - the specific representation of the Astronist character of Oliver in both the Democratic Republic of the Congo, and in the Republic of the Congo, including all its variations.

Oliverian-Costa Rican Character Representation - the specific representation of the Astronist character of Oliver in Costa Rica, including all its variations.

Oliverian-Croatian Character Representation - the specific representation of the Astronist character of Oliver in Croatia, including all its variations.

Oliverian-Cuban Character Representation - the specific representation of the Astronist character of Oliver in Cuba, including all its variations.

Oliverian-Curaçaoan Character Representation - the specific representation of the Astronist character of Oliver in Curaçao, including all its variations.

Oliverian-Cypriot Character Representation - the specific representation of the Astronist character of Oliver in Cyprus, including all its variations.

Oliverian-Czech Character Representation - the specific representation of the Astronist character of Oliver in Czechia, including all its variations.

Oliverian-Danish Character Representation - the specific representation of the Astronist character of Oliver in Denmark, including all its variations.

Oliverian-Djiboutian Character Representation - the specific representation of the Astronist character of Oliver in Djibouti, including all its variations.

Oliverian-Dominican Character Representation - the specific representation of the Astronist character of Oliver in both the Dominican Republic, and in Dominica, including all its variations.

Oliverian-Dutch Character Representation - the specific representation of the Astronist character of Oliver in the Netherlands, including all its variations.

Oliverian-Ecuadoran Character Representation - the specific representation of the Astronist character of Oliver in Ecuador, including all its variations.

Oliverian-Egyptian Character Representation - the specific representation of the Astronist character of Oliver in Egypt, including all its variations.

Oliverian-Emirati Character Representation - the specific representation of the Astronist character of Oliver in the United Arab Emirates, including all its variations.

Oliverian-Equatorial Guinean Character Representation - the specific representation of the Astronist character of Oliver in Equatorial Guinea, including all its variations.

Oliverian-Eritrean Character Representation - the specific representation of the Astronist character of Oliver in Eritrea, including all its variations.

Oliverian-Estonian Character Representation - the specific representation of the Astronist character of Oliver in Estonia, including all its variations.

Oliverian-Ethiopian Character Representation - the specific representation of the Astronist character of Oliver in Ethiopia, including all its variations.

Oliverian-Falkland Islands Character Representation - the specific representation of the Astronist character of Oliver in the Falkland Islands, including all its variations.

Oliverian-Faroese Character Representation - the specific representation of the Astronist character of Oliver in the Faroe Islands, including all its variations.

Oliverian-Fijian Character Representation - the specific representation of the Astronist character of Oliver in Fiji, including all its variations.

Oliverian-Filipino Character Representation - the specific representation of the Astronist character of Oliver in the Philippines, including all its variations.

Oliverian-Finnish Character Representation - the specific representation of the Astronist character of Oliver in Finland, including all its variations.

Oliverian-French Guianese Character Representation - the specific representation of the Astronist character of Oliver in French Guiana, including all its variations.

Oliverian-French Character Representation - the specific representation of the Astronist character of Oliver in France, including all its variations.

Oliverian-French Polynesian Character Representation - the specific representation of the Astronist character of Oliver in French Polynesia, including all its variations.

Oliverian-Gabonese Character Representation - the specific representation of the Astronist character of Oliver in Gabon, including all its variations.

Oliverian-Gambian Character Representation - the specific representation of the Astronist character of Oliver in the Gambia, including all its variations.

Oliverian-Georgian Character Representation - the specific representation of the Astronist character of Oliver in Georgia, including all its variations.

Oliverian-German Character Representation -the specific representation of the Astronist character of Oliver in Germany, including all its variations.

Oliverian-Ghanaian Character Representation - the specific representation of the Astronist character of Oliver in Ghana, including all its variations.

Oliverian-Greek Character Representation - the specific representation of the Astronist character of Oliver in Greece, including all its variations.

Oliverian-Greenlandic Character Representation - the specific representation of the Astronist character of Oliver in Greenland, including all its variations.

Oliverian-Grenadian Character Representation - the specific representation of the Astronist character of Oliver in Grenada, including all its variations.

Oliverian-Guamanian Character Representation - the specific representation of the Astronist character of Oliver in Guam, including all its variations.

Oliverian-Guatemalan Character Representation - the specific representation of the Astronist character of Oliver in Guatemala, including all its variations.

Oliverian-Guinean Character Representation - the specific representation of the Astronist character of Oliver in Guatemala, including all its variations.

Oliverian-Guyanese Character Representation - the specific representation of the Astronist character of Oliver in Guyana, including all its variations.

Oliverian-Haitian Character Representation - the specific representation of the Astronist character of Oliver in Haiti, including all its variations.

Oliverian-Honduran Character Representation - the specific representation of the Astronist character of Oliver in Honduras, including all its variations.

Oliverian-Hong Kongese Character Representation - the specific representation of the Astronist character of Oliver in Hong Kong, including all its variations.

Oliverian-Hungarian Character Representation - the specific representation of the Astronist character of Oliver in Hungary, including all its variations.

Oliverian-Icelandic Character Representation - the specific representation of the Astronist character of Oliver in Iceland, including all its variations.

Oliverian-Indian Character Representation - the specific representation of the Astronist character of Oliver in India, including all its variations.

Oliverian-Indonesian Character Representation - the specific representation of the Astronist character of Oliver in Indonesia, including all its variations.

Oliverian-Iranian Character Representation - the specific representation of the Astronist character of Oliver in Iran, including all its variations.

Oliverian-Iraqi Character Representation - the specific representation of the Astronist character of Oliver in Iraq, including all its variations.

Oliverian-Irish Character Representation - the specific representation of the Astronist character of Oliver in Ireland, including all its variations.

Oliverian-Israeli Character Representation - the specific representation of the Astronist character of Oliver in Israel, including all its variations.

Oliverian-Italian Character Representation - the specific representation of the Astronist character of Oliver in Italy, including all its variations.

Oliverian-Ivorian Character Representation - the specific representation of the Astronist character of Oliver in the Ivory Coast, including all its variations.

Oliverian-Jamaican Character Representation - the specific representation of the Astronist character of Oliver in Jamaica, including all its variations.

Oliverian-Japanese Character Representation - the specific representation of the Astronist character of Oliver in Japan, including all its variations.

Oliverian-Jordanian Character Representation - the specific representation of the Astronist character of Oliver in Jordan, including all its variations.

Oliverian-Kazakh Character Representation - the specific representation of the Astronist character of Oliver in Kazakhstan, including all its variations.

Oliverian-Kenyan Character Representation - the specific representation of the Astronist character of Oliver in Kenya, including all its variations.

Oliverian-Kiribati Character Representation - the specific representation of the Astronist character of Oliver in Kiribati, including all its variations.

Oliverian-Kittitian-Nevisian Character Representation - the specific representation of the Astronist character of Oliver in Saint Kitts and Nevis, including all its variations.

Oliverian-Korean Character Representation - the specific representation of the Astronist character of Oliver in Korea, including all its variations.

Oliverian-Kosovar Character Representation - the specific representation of the Astronist character of Oliver in Kosovo, including all its variations.

Oliverian-Kurdish Character Representation - the specific representation of the Astronist character of Oliver in the Kurdish populated regions, including all its variations.

Oliverian-Kuwaiti Character Representation - the specific representation of the Astronist character of Oliver in Kuwait, including all its variations.

Oliverian-Kyrgyz Character Representation - the specific representation of the Astronist character of Oliver in Kyrgyzstan, including all its variations.

Oliverian-Laotian Character Representation - the specific representation of the Astronist character of Oliver in Laos, including all its variations.

Oliverian-Latvian Character Representation - the specific representation of the Astronist character of Oliver in Latvia, including all its variations.

Oliverian-Lebanese Character Representation - the specific representation of the Astronist character of Oliver in Lebanon, including all its variations.

Oliverian-Liberian Character Representation - the specific representation of the Astronist character of Oliver in Liberia, including all its variations.

Oliverian-Libyan Character Representation - the specific representation of the Astronist character of Oliver in Libya, including all its variations.

Oliverian-Liechtenstein Character Representation - the specific representation of the Astronist character of Oliver in Liechtenstein, including all its variations.

Oliverian-Lithuanian Character Representation - the specific representation of the Astronist character of Oliver in Lithuania, including all its variations.

Oliverian-Luxembourgish Character Representation - the specific representation of the Astronist character of Oliver in Luxembourg, including all its variations.

Oliverian-Macanese Character Representation - the specific representation of the Astronist character of Oliver in Macau, including all its variations.

Oliverian-Macedonian Character Representation - the specific representation of the Astronist character of Oliver in Macedonia, including all its variations.

Oliverian-Malagasy Character Representation - the specific representation of the Astronist character of Oliver in Madagascar, including all its variations.

Oliverian-Malawian Character Representation - the specific representation of the Astronist character of Oliver in Malawi, including all its variations.

Oliverian-Malaysian Character Representation - the specific representation of the Astronist character of Oliver in Malaysia, including all its variations.

Oliverian-Maldivian Character Representation - the specific representation of the Astronist character of Oliver in the Maldives, including all its variations.

Oliverian-Malian Character Representation - the specific representation of the Astronist character of Oliver in Mali, including all its variations.

Oliverian-Maltese Character Representation - the specific representation of the Astronist character of Oliver in Malta, including all its variations.

Oliverian-Manx Character Representation - the specific representation of the Astronist character of Oliver on the Isle of Man, including all its variations.

Oliverian-Marshallese Character Representation - the specific representation of the Astronist character of Oliver in the Marshall Islands, including all its variations.

Oliverian-Martinican Character Representation - the specific representation of the Astronist character of Oliver in Martinique, including all its variations.

Oliverian-Mauritanian Character Representation - the specific representation of the Astronist character of Oliver in Mauritania, including all its variations.

Oliverian-Mauritian Character Representation - the specific representation of the Astronist character of Oliver in Mauritius, including all its variations.

Oliverian-Mahoran Character Representation - the specific representation of the Astronist character of Oliver in Mayotte, including all its variations.

Oliverian-Mexican Character Representation - the specific representation of the Astronist character of Oliver in Mexico, including all its variations.

Oliverian-Micronesian Character Representation - the specific representation of the Astronist character of Oliver in Micronesia, including all its variations.

Oliverian-Moldovan Character Representation - the specific representation of the Astronist character of Oliver in Moldova, including all its variations.

Oliverian-Monacan Character Representation - the specific representation of the Astronist character of Oliver in Monaco, including all its variations.

Oliverian-Mongolian Character Representation - the specific representation of the Astronist character of Oliver in Mongolia, including all its variations.

Oliverian-Montenegrin Character Representation - the specific representation of the Astronist character of Oliver in Montenegro, including all its variations.

Oliverian-Montserratian Character Representation - the specific representation of the Astronist character of Oliver in Montserrat, including all its variations.

Oliverian-Moroccan Character Representation - the specific representation of the Astronist character of Oliver in Morocco, including all its variations.

Oliverian-Mozambican Character Representation - the specific representation of the Astronist character of Oliver in Mozambique, including all its variations.

Oliverian-Namibian Character Representation - the specific representation of the Astronist character of Oliver in Namibia, including all its variations.

Oliverian-Nauruan Character Representation - the specific representation of the Astronist character of Oliver in Nauru, including all its variations.

Oliverian-Nepalese Character Representation - the specific representation of the Astronist character of Oliver in Nepal, including all its variations.

Oliverian-New Caledonian Character Representation - the specific representation of the Astronist character of Oliver in New Caledonia, including all its variations.

Oliverian-New Zealand Character Representation - the specific representation of the Astronist character of Oliver in New Zealand, including all its variations.

Oliverian-Nicaraguan Character Representation - the specific representation of the Astronist character of Oliver in Nicaragua, including all its variations.

Oliverian-Nigerien Character Representation - the specific representation of the Astronist character of Oliver in Niger, including all its variations.

Oliverian-Nigerian Character Representation - the specific representation of the Astronist character of Oliver in Nigeria, including all its variations.

Oliverian-Niuean Character Representation - the specific representation of the Astronist character of Oliver in Niue, including all its variations.

Oliverian-Norwegian Character Representation - the specific representation of the Astronist character of Oliver in Norway, including all its variations.

Oliverian-Omani Character Representation - the specific representation of the Astronist character of Oliver in Oman, including all its variations.

Oliverian-Pakistani Character Representation - the specific representation of the Astronist character of Oliver in Pakistan, including all its variations.

Oliverian-Palauan Character Representation - the specific representation of the Astronist character of Oliver in Palau, including all its variations.

Oliverian-Palestinian Character Representation - the specific representation of the Astronist character of Oliver in Palestine, including all its variations.

Oliverian-Panamanian Character Representation - the specific representation of the Astronist character of Oliver in Panama, including all its variations.

Oliverian-Papua New Guinean Character Representation - the specific representation of the Astronist character of Oliver in Papua New Guinea, including all its variations.

Oliverian-Paraguayan Character Representation - the specific representation of the Astronist character of Oliver in Paraguay, including all its variations.

Oliverian-Peruvian Character Representation - the specific representation of the Astronist character of Oliver in Peru, including all its variations.

Oliverian-Polish Character Representation - the specific representation of the Astronist character of Oliver in Poland, including all its variations.

Oliverian-Portuguese Character Representation - the specific representation of the Astronist character of Oliver in Portugal, including all its variations.

Oliverian-Puerto Rican Character Representation - the specific representation of the Astronist character of Oliver in Puerto Rico, including all its variations.

Oliverian-Qatari Character Representation - the specific representation of the Astronist character of Oliver in Qatar, including all its variations.

Oliverian-Réunionese Character Representation - the specific representation of the Astronist character of Oliver in Réunion, including all its variations.

Oliverian-Romanian Character Representation - the specific representation of the Astronist character of Oliver in Romania, including all its variations.

Oliverian-Russian Character Representation - the specific representation of the Astronist character of Oliver in Russia, including all its variations.

Oliverian-Rwandan Character Representation - the specific representation of the Astronist character of Oliver in Rwanda, including all its variations.

Oliverian-Saint Helenian Character Representation - the specific representation of the Astronist character of Oliver in Saint Helena, including all its variations.

Oliverian-Saint Lucian Character Representation - the specific representation of the Astronist character of Oliver in Saint Lucia, including all its variations.

Oliverian-Saint Martinois Character Representation - the specific representation of the Astronist character of Oliver in Saint Martin, including all its variations.

Oliverian-Salvadoran Character Representation - the specific representation of the Astronist character of Oliver in El Salvador, including all its variations.

Oliverian-Samoan Character Representation - the specific representation of the Astronist character of Oliver in Samoa, including all its variations.

Oliverian-Sammarinese Character Representation - the specific representation of the Astronist character of Oliver in San Marino, including all its variations.

Oliverian-São Toméan Character Representation - the specific representation of the Astronist character of Oliver in São Tomé and Príncipe, including all its variations.

Oliverian-Saudi Arabian Character Representation - the specific representation of the Astronist character of Oliver in Saudi Arabia, including all its variations.

Oliverian-Senegalese Character Representation - the specific representation of the Astronist character of Oliver in Senegal, including all its variations.

Oliverian-Serbian Character Representation - the specific representation of the Astronist character of Oliver in Serbia, including all its variations.

Oliverian-Seychellois Character Representation - the specific representation of the Astronist character of Oliver in the Seychelles, including all its variations.

Oliverian-Sierra Leonean Character Representation - the specific representation of the Astronist character of Oliver in Sierra Leone, including all its variations.

Oliverian-Singaporean Character Representation - the specific representation of the Astronist character of Oliver in Singapore, including all its variations.

Oliverian-Sino Character Representation - the specific representation of the Astronist character of Oliver in China, including all its variations.

Oliverian-Slovak Character Representation - the specific representation of the Astronist character of Oliver in Slovakia, including all its variations.

Oliverian-Slovenian Character Representation - the specific representation of the Astronist character of Oliver in Slovenia, including all its variations.

Oliverian-Solomon Islands Character Representation - the specific representation of the Astronist character of Oliver in the Solomon Islands, including all its variations.

Oliverian-Somali Character Representation - the specific representation of the Astronist character of Oliver in Somalia, including all its variations.

Oliverian-South African Character Representation - the specific representation of the Astronist character of Oliver in South Africa, including all its variations.

Oliverian-South Ossetian Character Representation - the specific representation of the Astronist character of Oliver in South Ossetia, including all its variations.

Oliverian-South Sudanese Character Representation - the specific representation of the Astronist character of Oliver in South Sudan, including all its variations.

Oliverian-Spanish Character Representation - the specific representation of the Astronist character of Oliver in Spain, including all its variations.

Oliverian-Sri Lankan Character Representation - the specific representation of the Astronist character of Oliver in Sri Lanka, including all its variations.

Oliverian-Sint Maartener Character Representation - the specific representation of the Astronist character of Oliver in Sint Maarten, including all its variations.

Oliverian-Sudanese Character Representation - the specific representation of the Astronist character of Oliver in Sudan, including all its variations.

Oliverian-Surinamese Character Representation - the specific representation of the Astronist character of Oliver in Suriname, including all its variations.

Oliverian-Swazi Character Representation - the specific representation of the Astronist character of Oliver in Swaziland, including all its variations.

Oliverian-Swedish Character Representation - the specific representation of the Astronist character of Oliver in Sweden, including all its variations.

Oliverian-Swiss Character Representation - the specific representation of the Astronist character of Oliver in Switzerland, including all its variations.

Oliverian-Syrian Character Representation - the specific representation of the Astronist character of Oliver in Syria, including all its variations.

Oliverian-Taiwanese Character Representation - the specific representation of the Astronist character of Oliver in Taiwan, including all its variations.

Oliverian-Tajik Character Representation - the specific representation of the Astronist character of Oliver in Tajikistan, including all its variations.

Oliverian-Tanzanian Character Representation - the specific representation of the Astronist character of Oliver in Tanzania, including all its variations.

Oliverian-Timorese Character Representation - the specific representation of the Astronist character of Oliver in East Timor, including all its variations.

Oliverian-Thai Character Representation - the specific representation of the Astronist character of Oliver in Thailand, including all its variations.

Oliverian-Togolese Character Representation - the specific representation of the Astronist character of Oliver in Togo, including all its variations.

Oliverian-Tongan Character Representation - the specific representation of the Astronist character of Oliver in Tonga, including all its variations.

Oliverian-Trinidadian and Tobagonian Character Representation - the specific representation of the Astronist character of Oliver in Trinidad and Tobago, including all its variations.

Oliverian-Tunisian Character Representation - the specific representation of the Astronist character of Oliver in Tunisia, including all its variations.

Oliverian-Turkish Character Representation - the specific representation of the Astronist character of Oliver in Turkey, including all its variations.

Oliverian-Turkmen Character Representation - the specific representation of the Astronist character of Oliver in Turkmenistan, including all its variations.

Oliverian-Turks and Caicos Character Representation - the specific representation of the Astronist character of Oliver in the Turks and Caicos Islands, including all its variations.

Oliverian-Tuvaluan Character Representation - the specific representation of the Astronist character of Oliver in Tuvalu, including all its variations.

Oliverian-Ugandan Character Representation - the specific representation of the Astronist character of Oliver in Uganda, including all its variations.

Oliverian-Ukrainian Character Representation - the specific representation of the Astronist character of Oliver in Ukraine, including all its variations.

Oliverian-Uruguayan Character Representation - the specific representation of the Astronist character of Oliver in Uruguay, including all its variations.

Oliverian-Uzbek Character Representation - the specific representation of the Astronist character of Oliver in Uzbekistan, including all its variations.

Oliverian-Vanuatu Character Representation - the specific representation of the Astronist character of Oliver in Vanuatu, including all its variations.

Omnicyclist

Omnidependent - in Astronist Philosophy, to be entirely and intrinsically dependent upon another, especially characteristic of the nature of the relationship between a planet and the star around which it orbits.

Derivatives

Omnidependency

Omnidependently

Omnidimensional - in Astronist Philosophy, existing in, or relating to, or holding a dominion over all dimensions in existence.

Derivatives

Omnidimensionality

Omnidimensionally

Omnidoxical antinomy - in omnidoxicology, the instances in which one insentensation of a discourse in The Omnidoxy is contradictory to the words of another insentensation.

Omnidoxical authority - in omnidoxicology, the extent to which The Omnidoxy is considered to be a witness and accurate representative of the author's intentions and is divided into two branches, including manifestationism and imprecisionism.

Omnidoxical commercialisation - in omnidoxicology, the process in which a publisher or an editor changes the length, appearance, or structure of The Omnidoxy in order for the document to suit commercial markets, thus developing two forms of The Omnidoxy, one that is commercialised and one that remains original and scholarly.

Omnidoxical composition - in omnidoxicology, the study and contemplation of how The Omnidoxy was written, the processes and procedures involved, and its overall structure relative to its creation.

Omnidoxical consistency - in omnidoxicology, the notion propounded by Brandon Taylorian, as the author of The Omnidoxy, that the rapid writing of The Omnidoxy within one year was essential in keeping all of the document consistent in message and form.

Omnidoxical justification - in omnidoxicology, the choice of a justified text alignment in the original edition of The Omnidoxy wherein the text is aligned to both the left and right.

Omnidoxical literalism - see omnidoxitrim.

Omnidoxical misquotation - in omnidoxicology, the instance in which someone misquotes an insentensation from The Omnidoxy, typically in order to serve their own ends.

Omnidoxical navigation - in omnidoxicology, the study and mastering being able to efficiently navigate The Omnidoxy through the use of the indexas, the contents, the register, the glossary, and other preppendices and appendices.

Omnidoxical paratext - in omnidoxicology, refers to any instance in which editors, publishers, or other authors write about The Omnidoxy, especially in the form of writing in margins alongside the actual text of The Omnidoxy.

Derivatives

Omnidoxical paratexting

Omnidoxical readability - in omnidoxicology, one of the main justifications for the alteration of The Omnidoxy for certain variants of publication with the aim of keeping the extent to which general people will be able to read it at the highest while terminological accuracy and actuality are not prioritised.

Omnidoxical redaction - in omnidoxicology, the process involved in the editing of The Omnidoxy for its publication, and the exploration of why it may have been expanded, abridged, altered, or in any way rearranged from the original version.

Omnidoxical translation - in omnidoxicology, the practice of translating The Omnidoxy with particular emphasis being made to the accurate transliteration of the new words in The Omnidoxy from Astronist Terminology.

Omnidoxical variorum - also known as an omnivariorum, a written work that collates and organises different versions and editions of The Omnidoxy according to some parameter, typically either by date published, or in alphabetical order by the name of the publisher, editor, or critic.

Omnidoxical velitation - in omnidoxicology and centralitology, the instance in which the authenticity and values of all or a portion of either The Grand Centrality or The Omnidoxy is disputed.

Omnidoxic authority - in omnidoxicology, relating to one's views over the centrality, the importance, and the dominion of The Omnidoxy over The Philosophy of Astronism, and the wider Astronist philosophical tradition, and is often a source of contention.

Omnidoxic criticism - in omnidoxicology, the systematic and scholarly investigation of The Omnidoxy in the effort of coming to conclusions about its accuracy, its supremacy, and its competence to lead the Astronist philosophical tradition.

Omnidoxic errancy - in omnidoxicology, the belief that The Omnidoxy is with error and remains a fallible document due to it being a document rested upon philosophy, and therefore cannot claim its own infallibility.

Omnidoxic fallibility - in omnidoxicology, the belief that The Omnidoxy is ultimately capable of being wrong due to it resting upon the principles of the Philosophical Spirit, which embraces the notion of mistake as a natural occurrence in philosophy for philosophical document are not to proclaim that they hold absolute truth.

Omnidoxic inerrancy - in omnidoxicology, the belief that The Omnidoxy is without error; essentially, it is an infallible document.

Omnidoxicology - in Astronist Philosophy, a major branch of Astronology dealing with the study of The Omnidoxy including its insentensations, the interpretations of those insentensations, and the context in which The Omnidoxy was written, as well as including textual criticism, literary criticism, philology, and social science. Another term for this is Omnidoxy Studies, although that term is used in less formal and scholarly settings. This branch of study must not be confused with centralitology, or Centrality Studies, which deals only with the parts of The Grand Centrality that are not part of The Omnidoxy itself.

Omnirelationism

Omnirelationalism

Omnis - derived from Latin, a philosophy that exists in all countries and territories on The Earth.

Omnissarism - in introspectics of Astronist Philosophy, the notion that all that exists within The Cosmos is essential to its existence and even removing just one element would alter the narrative, structure, and essential nature of The Cosmos as it does exist now, and exists as the opposite to inomnitialism.

Derivatives

Omnissarist

Omissaristic

Omnistellation - in Astronist Philosophy, part of the practices of asterism, the adoration and laudation of the entirety night sky of stars rather than any particular constellation, or star pattern.

Derivatives

Omnistellations

Omnistellational

Omnistellationally

Omnistery - derived from an Astronist phrontistery, a type of music academy found in major cities, and owned and managed by The People's Constitutional Company of Jesse Millette which teaches all subjects classed within the Astronist Performing Arts.

Derivatives

Omnisteries

Omnisterial

Omnisterially

Omnitology

- in Astronist Cosmology, and as part of Astronist Philosophy, specifically Cosmic Philosophy, the study and philosophical discussion of the dimension in which multiple and perhaps infinite universes exist to form The Greater Universe, and how the natures, purposes, and differing laws of physics of these omniverses.
- a major discipline of study within Astronist Philosophy, specifically Cosmic Philosophy, as part of wider Astronology dealing with concepts surrounding the idea of The Omniverse, and which all possible cosmologies and laws of physics in all the possible universes are studied.

Derivatives

Omnitologist

Omnitological

Omnitologically

Omnitritus - in Astronist Philosophy, the instance in which an instrument of study is applied to something only to receive a irrationality, or a paradoxy.

Derivatives

Omnitrity

Omnitrities

Omnitrital

Omnitritality

Omnivarium - see omnidoxical variorum.

Omniverse - a term used in Astronist Cosmology, and in Cosmic Philosophy, describing not only multiple universes, but an infinite, or ultimately unknown amount of universes, usually in the creation of The Greater Universe concept in which the infinite universe create one overarching universe.

Derivatives

Omniverses

Omniversal

Omniversal

Omniversally
Omniversality
Omniversalism
Omniversalist

Omnology - in Astronist Cosmology, and as part of Astronist Philosophy, specifically Cosmic Philosophy, the study and philosophical discussion of the future and fate of the expansion of The Cosmos in The Universe, and how this may affect the relationship between these two entities.

Derivatives

Omnologist
Omnologists
Omnological
Omnologically
Omnologic

Omnural - in Astronist Philosophy, relating to an entity that facilitates the functionality of something greater, or external to itself.

Derivatives

Omnurality
Omnuralities

Omphalos

- in an Astronist contextualisation, the main hub, or epicentre of The People's Constitutional Company of Jesse Millette in a given geographical region, or country.
- in Astronist Architecture, the central point of an Astronist building.

Derivatives

Omphaloi

One - in Astronist Philosophy, the philophon for the discipline of oneirology.

Oneiricism - in Astronist Philosophy, the orientation and belief upholding that the primary initiators of philosophical enknowledgement, enquiry, and experience are dreams and suspend philosophical investigation on the occurrence of dreams.

Derivatives

Oneiricist
Oneiricists
Oneiricistic
Oneiricistically

Oneiricity - in Astronist Philosophy, the semistrument of study measuring the influence of one's dreams on their philosophical enquiries and contemplations.

Derivatives

Oneiricities

Oneirology - in Astronist Philosophy, a discipline of study dealing with the relationship between dreams and philosophical knowledge and experience, and how one impacts the other.

Derivatives

Oneirologic

Oneirological
Oneirologically
Oneirologist

Oneiromancy - in an Astronist contextualisation, relating to the times in which Brandon Taylorian is known to have considered his dreams to foretell the future, or to influence the actions he took.

Derivatives

Oneiromancies

Oneness Cosmology - in Astronist Philosophy, a type of cosmos wherein all existence is considered to be originative to a singularity, or at least a form of oneness, and can be applied in a physical, or conceptual sense.

Onerous - in an Astronist contextualisation, relating to the mass of obligations placed upon the Chairman of The People's Constitutional Company of Jesse Millette.

Derivatives

Onerousness

One System - in Astronist Philosophy, an appellation for the notion that The Cosmos may be composite in naturity, but is ultimately singular, and is ultimately accumulated as one system.

One System Or No System - a wing of governance and a theory within The Philosophy of Astronism as part of Astronarianism holding that no two systems of governance, whether based upon secularism, theocracy, or ideology, can coexist within the same nation state without one being dominant over the other, and describes this idealised coexistence of systems to be as if there is no system at all, and is closely linked to the wing of Astronist Dominancy.

One world - in Astronist Philosophy and omnidoxicology, a common synonym used in The Omnidoxo to relate to The Earth singularly, especially so in comparison to all the other worlds of The Cosmos.

Onplane - in Cosmic Art, as a derivation of Astronist Art, the depiction of a star in the foreground of a nebulaic gas and dust formation.

Derivatives

Onplanial

Onplanic

Ont - in Astronist Philosophy, a philophon for the discipline of ontology.

Ontic - in Astronist Philosophy, relating celestial entities and the facts about them, especially in relation to their real existences rather than their phenomenal or idealised existences.

Derivatives

Onticity

Ontological originetics - see meta-originetics.

Onus - in an Astronist contextualisation, relating to a particular duty of an employee, especially one unique to that employee.

Openary - in Astronist Architecture, an architectural element most commonly found in tropical countries whereby a room can be made unroofed by a mechanical system.

Derivatives

Openaries

Openness Principle - in orbanology of Astronist Philosophy, the appellation for the essential principle of the Philosophical Spirit that philosophical enquiry must remain open to interpretation and application and therefore does not suit the doctrine of prescriptivism.

Open problem - in Astronist Philosophy, an issue of contemplation and study that remains unresolvable, and that the Astronist Tradition has no official stance, or answer to.

Openthought - in Astronist Philosophy, the oppositism to narrowthought, to think in a way that aligns with the Astronist Tradition view about the vast possibilities of The Cosmos, and humanity's exploratory role and place within it.

Derivatives

Openthinking

Openthinker

Opentise - in Astronist Philosophy, the development of a diverse civilisation beyond The Earth on another planet in terms of race, philosophy, religion, ethnicity, and sexuality, and is largely associated with the prophecy of The Grand Opentisation.

Derivatives

Opentising

Opentised

Opentisation

Opentisational

Opentiser

Opentisers

Opentive

Opentively

Opentivity

Open Universe - see The Open Universe.

Openwork - in Astronist Ornamentation, a technique that produces decorative patterns by creating holes in solid materials, typically to create cosmical, or galactical patterns.

Operational Freedom - a circumstance whereby the government of The People's Constitutional Company of Jesse Millette has very little involvement, or interruption in the operations of one of its subsidiary companies.

Opgek - a follower of the Luxembourgish denomination of The Philosophy of Astronism, known as Opgekläerte'ism.

Derivatives

Opgeks

Opgekläerte'ism - also known as Luxembourgish Astronism, the denomination of The Philosophy of Astronism that is almost exclusively adhered to within Luxembourg.

Derivatives

Opgekläerte'ist

Opinator - in Astronist Philosophy, in the context of philosophical argumentation, a debater that comes out in either full favour of a proposal, or in complete loathe of a proposal; in essence, lacks balance in their opinions and positions.

Derivatives

Opinatress

Opine - in an Astronist contextualisation, the official term for the action of a member of an Astronist congressional session whom lays down their opinion to the floor of the assembly on a particular topic.

Derivatives

Opining

Opined

Opinative

Opiner

Opionate - the official term for the action undertaken by a member of an Astronist congressional session, or of The Governing Council, wherein the member formally places their opinion to the assembly for judgement.

Derivatives

Opinionating

Opinionation

Opinionator

Opinionative

Oppan - in Astronist Architecture, a term used to describe the right side of an Astronist building, especially when in relation to the left, back, and front sides of the building.

Oppentina - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the fourth daughter of Zorianna and Xatius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Oppentinian

Opplysning - the root term for Norwegian Astronism.

Opponent - in an Astronist contextualisation, a member of an Astronist congressional session whom directly opposes the opined opinion of another member.

Opport - in Astronist Architecture, a term used to describe any door to an Astronist building other than the front, back, or bullant doors.

Derivatives

Opports

Opportal

Oppositise - in Astronist Philosophy, to make something opposite from its original, or traditional, or known state, especially in a conceptual and metaphorical sense.

Derivatives

Oppositised

Oppositising

Oppositisation

Oppositism

- in Astronist Philosophy, relating to that which is opposite to the aforementioned subject either physically, or metaphorically, but does not necessarily relating to that which something is in opposition to for this infers rivalry.
- in Astronist linguistics, a figure of speech describing two similar differences with the same words, typically with the words swapped around, an example of which would be a cleaning singer, and singing cleaner.

Derivatives

Oppositisms

Oppositist

Oppositistic

Oppositist Dyadic Pairs - in firmamentology of Astronist Philosophy, the appellation for dyadic entities that hold opposing functions that are nevertheless forced to interact with each other.

Oppositist Flux - in firmamentology of Astronist Philosophy, the appellation for the instance in which an applied filament to an entity results in the opposite expectation for that filament in comparison to its natural form.

Op'ly - a follower of the denomination of The Philosophy of Astronism, known as Op'lys'ningism.

Derivatives

Op'lys

Op'lys'ningism - the denomination of The Philosophy of Astronism that is predominantly adhered to in Norway, Denmark, and the Faroe Islands.

Derivatives

Op'lys'ningist

Opticality - a branch of study within Astronist Philosophy, specifically Cosmic Philosophy, as part of wider Astronology dealing with the philosophy of vision, and observance of The Cosmos in The Universe.

Derivatives

Opticalities

Opticalist

Opticology - a subdiscipline of study of introspectics as part of Astronist Philosophy dealing with the philosophical contemplations of the utility of different optical systems in telescopes, and other observational equipments, especially prioritising efficiency, clarity, and ability.

Derivatives

Opticologic
Opticologist
Opticologists
Opticological
Opticologically

Optimus - in Astronist Philosophy, a person that is considered a role model and an idealised adherent of The Philosophy of Astronism, especially posthumously.

Derivatives

Optima

Optocrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as the spectators of the universe, most typically with golden eyes, especially in Astronist Art.

Opus - in an Astronist contextualisation, relating to Brandon Taylorian's works sizing more than one hundred thousand words in total, or more broadly, any Astronist work sizing more than one hundred thousand words.

Opuscule - in an Astronist contextualisation, relating to Brandon Taylorian's work sizing less than one hundred words in total, or more broadly, any Astronist work sizing less than one hundred thousand words.

Oracy - in Astronist Education, a prominent subject taught in high phrontistery that deals with developing one's ability to express oneself fluently and grammatically in speech, especially in aid of one's philacy and their philosophical and argumentation skills and abilities.

Derivatives

Oracist

Oracists

Oracory

Oracorial

Oracorially

Oralement - in Astronist Philosophy, to prefer to express one's philosophical beliefs and opinions through oration rather than through writing.

Orality - in Astronist Philosophy, relating to one's preference to read out The Omnidoxy to either themselves or to others, rather than a preference to read The Omnidoxy.

Orangence - in Cosmic Art, as a derivation of Astronist Art, an orange theme.

Derivatives

Orangencial

Orangenic

Oration - in an Astronist contextualisation, the official term describing a ceremonial speech given by the Vice Chairman of The People's Constitutional Company of Jesse Millette, especially in the event of the non-attendance of the Chairman.

Derivatives

Orational

Oratory Garden - in Astronist Architecture, as part of gardenry, a type of garden on the estate of some Astronist buildings that features instruments and outbuildings which are best suited for orators to conduct their speeches.

Orbanology - in Astronist Philosophy, a major discipline of study dealing with a wide variety of concepts including the nature of causality, relativity, origination, and intuition, but principally considers to the concepts and instruments of naturality and rationality.

Derivatives

Orbanologist

Orbanologic

Orbanological

Orbanologically

Orbitality

- in Astronist Philosophy, a prominent instrument of study concerned with contemplating all factors of the orbits of planets, moons, and other astronomical phenomena around some central entity, typically either a star, or a black hole.
- in Space Studies, the extent to which an orbiting object, whether a natural phenomena or a manmade entity, orbits a larger entity such as a planet, how long it has orbited for, and the usages of such an orbit and what research can be derived from such an orbit.

Derivatives

Orbitalities

Orbitation - in Astronist Philosophy, the process and instance of orbiting something, especially of a celestial entity.

Derivatives

Orbitalational

Orbitology - a subdiscipline of study in Astronist Philosophy, specifically Cosmic Philosophy, as part of wider Astronology dealing with the philosophy of orbits, their connection to concentritology, and most broadly, the patterns, shapes, and structures of The Cosmos and celestial entities.

Derivatives

Orbitologist

Orbitologic

Orbitological

Orbitologically

Orbits of Disorderity - in kosmetrics of Astronist Philosophy, the appellation collectively relating to orbitalities of celestials that are affected by perturbations.

Orbits of Orderity - in kosmetrics of Astronist Philosophy, the appellation collectively relating to orbitalities of celestials that are not affected by perturbations.

Orberium - in Astronist Architecture, a rare room within few Astronist buildings in which orb-shaped planets are projected upward from the ground in order to create a space for studying their

topographies, atmospheres, and all their other characteristics, and typically the floorings of orberiums are ornamented in highcosma.

Derivatives

Orberiums

Orb Roofed - in Astronist Architecture, a term describing a type of capital upon which an orb-shaped relief is affixed, and usually cosmically ornamented.

Orchestration - in Astronist Philosophy, a branch of Sensory Philosophy manifested by the approach to the philosophical concepts and theories through the sense of sound, an example of which is Oblivionic Orchestration.

Derivatives

Orchestrational

Orchestrationally

Ord - in Astronist Philosophy, the philophon for the discipline of ordology.

Order - relating to one, or more, of the orders of The Philosophy of Astronism, such as The Zoic Order.

Derivatives

Ordoric

Ordorial

Orderative - in Astronist Philosophy, relating to the cosmical order, and the unique but all-pervading system of how The Cosmos functions.

Derivatives

Orderatively

Orderity - in Astronist Philosophy, one of the primary and most regularly applied instruments of study concerned with the extent to which a celestial entity, or even an abstract notion is in alignment with The Cosmos and its system and structure of organisation and order, the oppositism to which is known as disorderity, which is aligned with that which is known as The Chaos in the Astronist Cosmology.

Derivatives

Orderities

Orderial

Orderially

Orderiality

Orderity Season - in Astronist Philosophy, particularly within seasonology, one of the Formational Seasons relating to the instance in which a celestial and its elements become categorised and ordered into the cosmical system.

Order of Newmasonry - the reformational governing body of Freemasonry founded by *Brandon Taylorian*.

Ordinal - in an Astronist contextualisation, relating to the order of a series of Astronist books.

Derivatives

Ordinally
Ordinality

Ordinarianism - in Astronist Philosophy, a philosophy, or school of thought that isn't formed by the combination of two or more other philosophies, or schools of thought, and are the opposite to hybridistic philosophies and schools of thought. See hybridism.

Derivatives

Ordinarian

Ordology - in Astronist Philosophy and Astronist Cosmology, a discipline of study dealing with the contemplations of the orderity of The Cosmos in Astronist Cosmology and in Cosmic Philosophy with which one may use the instrument of study of orderity in order to study.

Derivatives

Ordologist

Ordologic

Ordological

Ordologically

Ordonnance - in Astronist Architecture, a style of ornamental design, and architectural positioning in which all attributes are systematically and orderly arranged so that they are perpendicular to one another, and is usually in contrast the cosma style of design and positioning which is traditionally more whimsical with less uniformity.

Derivatives

Ordonnancial

Oresy - in Spacial Psychology of Astronist Philosophy, the belief that philosophy is the one and only way to connect between a sentient person and The Cosmos thus encouraging philosophical enquiry and enknowledgement.

Derivatives

Oresis

Oresor

Oresors

Oreser

Oresers

Organicism - in sentientology of Astronist Philosophy, the view that sentient life should be categorised as organic rather than intelligent, as intelligence needn't be organic.

Derivatives

Organicist

Organicistic

Organicists

Organisationism - in Astronist Ornamentation, the design style and practice holding that ornamentations should always be organised with borders, and should never look overly opulent, or resemble any type of chaos.

Derivatives

Organisationist

Organisationistic

Organisationistically

Organised Philosophy

- a philosophy in which its concepts, theories, and cosmologies are structured and established according to an applied schema, or the goal of which is unified under one governing entity, either a company, or government, or some other organisation.
- a structured system of seeking knowledge, inspiration, and enlightenment, by philosophical practices, especially a system followed by a large number of people.
- a group of philosophies made distinct by their specific style of strategic governance, the first of which being The Philosophy of Astronism, which is organised by buildings, administration, and by nation with a specified purpose and goal.

Organonic Method - in astronomy of Astronist Philosophy, the system of communicating astronomical concepts and other forms of data and information through vocal, or visual platforms, especially via digital technologies such as holograms, screens, or oral-lead presentations.

Derivatives

Organonic

Organonical

Organonically

Organonist

Ori - in Astronist Philosophy, a philophon for the discipline of originetics.

Oria - in Astronist Mystology, a female character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Orian

Orianic

Oridora - in Astronist Theatre, collectively relating to the first one-hundred and twenty plays and musicals written by Brandon Taylorian, and are considered the foundations of Astronist Theatre.

Derivatives

Oridoras

Orienter - in Astronist Philosophy, in the history of a particular discipline of study, or school of thought, the individual considered to have played a central role in the orientation of a school thought or discipline.

Derivatives

Orienters

Orientress

Original Jesse Millette Series, The - an icosalogy written by *Brandon Taylorian* centred around the fictional character, *Jesse Millette*. All twenty books are considered the basis for the canonical era in the *Astronist Timeline*.

Original Astronism - a term relating to the English version of The Philosophy of Astronism, considered to be untranslated, and untampered, and the version of the philosophy that has not been subject to enculturation before being disseminated to the masses; in essence, the pure version of The Philosophy of Astronism.

Origination - in Astronist Ornamentation, the stage of the ornamental creation process in which the initial design and theme is constructed, but no colour or detail is yet added.

Originational Totality - in Astronist Philosophy, especially within totology, a type of totality encompassing that which is known as the regensis; the way in which an entity returns to its origination; essentially, the totality at the origination point of a particular entity.

Originetics - a major subdiscipline of study in Astronist Philosophy dealing with the nature of origin, and the concepts of originality, the significance of origin, and the philosophy of origin, either from a cosmical context, or from a more abstract context.

Derivatives

Originetic

Originetical

Origineticist

Originetically

Originatory

Originational

Originism - in Astronarianism, as part of wider Astronist Philosophy, a philosophy and orientation towards one's love of their origins, including their familial, national, ethnic, philosophical, or religious origins, and may closely be associated with patriotism when in relation to one's national origins.

Derivatives

Originist

Originistic

Originistically

Orison - also known as Philosophical Prayer, a newfound type of meditation resembling prayer carried out either in small groups or solitarily, either conducted in silence or in whisper, which focuses on philosophical elevation, postulation, philosophical adoration, and relaxation.

Derivatives

Orisons

Orisonic

Orisonery - a room dedicated to the conduct of orisonic prayer.

Ornamental Cosmism - a branch of Cosmism relating to the shift in mentality in the art and design world towards the rapid inclusion of cosmic, and celestial symbols, icons, and imagery onto ornamentations, particularly inspired by the philosophy of Cosmism, a branch of The Philosophy of Astronism.

Ornamental Humanism - in Astronist Ornamentation, the depiction of humans, especially one or more of the Astronist characters in ornamentations.

Ornamentationism - an art movement within Astronist Art holding that the established styles of modernism and futurism do not reflect modernity, or the future due to their general lack of character, depth, and clarity for audiences, and thus, strongly advocates for the re-emergence of an heavily ornamented style, whilst still supporting functionalism, and is also largely influenced by the Cosmism art movement.

Ornithality

Oromancy - in Astronist Mysticism, a little known form of mysticism involving the practice of cosmic devotion or any other Astronist philosophical practices on top or on the slope of a mountain.

Derivatives

Oromancer

Oromancers

Oromantic

Oronym - a type of term relating to a name of a geological phenomenon named after an Astronist character, or whose name is derivational of Astronist culture, or philosophy.

Derivatives

Oronymous

Oronymic

Oronymity

Orphentius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second son of Lucan and Cordelia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Orphentian

Orrerate - a term of Orrology, the official process of designing, manufacturing, and distributing orreries.

Derivatives

Orrerative

Orreration

Orrerational

Orrerator

Orreratrix

Orrerium - a room within a Planetarium, Observatory, or an Eidouranium, in which a clockwork model of the solar system is constructed and put on display, and typically, the larger the building the orrery is in, the larger and more ornate and elaborate the clockwork model is.

Derivatives

Orreriums

Orrery - in Astronist Rendition, one of the central instruments of astronomical that is a clockwork model of the solar system, or of the galaxy itself, or of another planetary system, and is rendered into many different themes, sizes, and ornamental versions.

Derivatives

Orreries

Orrology - the branch of study dealing with the designing, distribution, and usage of orreries, and the various different parts of orreries.

Derivatives

Orrologist

Orrologic

Orrological

Orrologically

Orthodox - in Astronist Philosophy, relating to the official, or traditional way of interpreting something, especially when this is derived from an insentensation within The Omnidoxy of The Grand Centrality of The Philosophy of Astronism.

Derivatives

Orthodoxic

Orthodoxical

Orthodoxically
Orthodoxy
Orthodoxicality

Orthodox Naturalism - in Astronist Philosophy, a belief within naturalism that there is indeed an existing, creating, and all-encompassing god, and therefore challenges non-theistic, atheistic, and agnostic forms of naturalism.

Orthogonalism

- in Astronist Philosophy, an area of contemplation and an approach and subphilosophy to understanding The Cosmos that focuses on trying to locate natural and proper right angles in The Cosmos in order to make philosophical inferences, measurements, and investigations into cosmic perfection and the perfect structure of cosmic entities.
- in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with and contemplating the instrument of study of orthogonality.

Derivatives

Orthogonalist
Orthogonalists
Orthogonalistic
Orthogonalistically

Orthogonality - in Astronist Philosophy, an instrument of study contemplating the philosophical inferences and meanings derived from right angles found in The Cosmos, as well as the nature of right angles and natural perfectionism in a wider sense.

Derivatives

Orthogonalities

Orthoscope - in observology and opticology, any type of eyepiece attached to one's fact that is used during a stargazing event for the purpose of observation.

Derivatives

Orthoscopic
Orthoscopical
Orthoscopy
Orthoscopes

Oryctology - an Astronist Subject dealing with the study of fossils, minerals, and rocks excavated from planets other than The Earth itself.

Oryctologically

-osc - in Astronist Onomatology, a suffix used for Astronist names.

Oscillity - in Astronist Philosophy, an instrument of study contemplating oscillation, and measuring the extent to which a celestial entity oscillates.

Derivatives

Oscillities
Osculative

Ospicusy

- relating to *The Astronist Ospicusy*.
- a type of short Astronist book in which insentensations of philosophical expression and wisdom are displayed, the majority of which derive from the writings of The Grand Centrality.

Derivatives

Ospicusant
Ospicusantly
Ospicusance
Ospicusancy

Ospinate - in introspectics of Astronist Philosophy, to observe according to the four aspects of observation as understood by the Astronist Tradition and holds that observing involves perceiving, interpreting, applying, and imparting.

Derivatives

Ospinational
Ospinative
Ospinating
Ospinated
Ospinatery

Ossify - in an Astronist contextualisation, of an Astronist subsidiary, philosophy, or business project, cease to develop; in a permanent period of stagnation.

Derivatives

Ossification
Ossifier

Ostentation - in an Astronist contextualisation, of the planetariums, observatories, eidouraniums, and the other Astronist philosophical buildings, ornamentations, renditions, and architectures, holding a strong sense of luxury, wealth, and grandiosity.

Derivatives

Ostentational
Ostentative
Ostentatively

Österreichische Aufklärung - the root term for Austrian Astronism.

Osví - a follower of the Czech denomination of The Philosophy of Astronism, known as Osvícení'ism.

Derivatives

Osvís

Osvícení'ism - also known as Czech Astronism, the denomination of The Philosophy of Astronism that is predominantly followed in Czechia, by the Czech peoples, and is closely associated with Czech originism.

Derivatives

Osvícení'ist

Osviet - a follower of the Slovak denomination of The Philosophy of Astronism, known as Osvietenie'ism.

Derivatives

Osviets

Osvietenie'ism - also known as Slovak Astronism, the denomination of The Philosophy of Astronism that is predominantly followed in Slovakia, by the Slovak peoples, and is closely associated with Slovak originism.

Derivatives

Osvietenie'ist

Oświ - a follower of the Polish denomination of The Philosophy of Astronism, known as Oświecenie'ism.

Derivatives

Oświs

Oświecenie - the root term for Polish Astronism.

Oświecenie'ism - also known as Polish Astronism, one of the largest single-nation denominations of The Philosophy of Astronism in Europe that is most commonly followed in Poland, especially in the southern regions, as well as by the Polish diaspora communities in other nations that still hold a strong affiliation with Poland.

Derivatives

Oświecenie'ist

-osy - in Astronist Terminology, a suffix relating to a type of activity, examples of which are intosies and panosies.

Derivatives

-osies

Other World - in an Astronist contextualisation, a term relating to Mystology.

Derivatives

Other Worldly

Otiose - in an Astronist contextualisation, of a concordance made at the end of an Astronist meeting, especially an Astronist congressional session, lacking practical purpose, application, or result.

Derivatives

Otiosly

Otiosness

Ouio - a lion-like beast of Astronist Mythology, with mixed features of a tiger and wolf, and is said to have been present when the realm was created.

Outcastation - in Astronist Philosophy, especially within Cosmic Philosophy, the instance in which a celestial is cast out of the cosmical system and deemed chaotic due to its characteristics, functions, and tendencies.

Outdistance - in an Astronist contextualisation, of a subsidiary of The People's Constitutional Company of Jesse Millette, to outperform competitors so much so as to leave them all far behind and subsequently secure market dominance.

Derivatives

Outdistanced

Outdistancing

Outdistancer

Outdistancee

Outer Halo - in Astronist Philosophy, the part of the galactic halo that is furthest from the galactic core.

Outermost - in an Astronist contextualisation, relating to those operations of The People's Constitutional Company of Jesse Millette that are either of the least importance, furthest distance away from any headquarters, or minuscule so as to be disregarded by the Company.

Outfill - in Astronist Philosophy and in wider philosophical writing, a method and practice of philosophical writing involving the collection of a number of different opinions about a topic and placing these into a discourse before starting to write the piece in order to trigger oneself of the different viewpoints so that one is better poised to enthusiastically agree with or oppose that which has already been postulated about the topic of the discourse.

Derivatives

Outfilling

Outlight - in Astronist Philosophy, of one source of light, possessing a brightness or position so that another source of light is either distorted, or entirely missed, especially when the lights of human civilisation block out the lights of the stars at night.

Derivatives

Outlighted

Outlighting

Outlination - in Astronist Ornamentation, the process of using the technique of outlining on ornamentals in order to insulate and make the patterns stand out, especially from a bold background.

Outpopulate - to attempt, or to succeed in creating a greater abundance of one entity than another with the intention of gaining wider influence and control.

Derivatives

Outpopulation

Outpopulating

Outpopulated

Outrance - in Astronist Architecture and Naology, particular ostentation and extravagance on the face of an Astronist philosophical building, especially in such a way that it stands out from all the other buildings near to it.

Derivatives

Outrancy

Outreach - in an Astronist contextualisation, relating to the activities and operations of The People's Constitutional Company of Jesse Millette connected to the communities in which it has a presence, and generally relates to helping the poor, establishing community togetherness, and gathering communities to discuss philosophy, cosmology, and astronomy.

Derivatives

Outreaching

Outreached

Outreacher

Outreachee

Outskirting - in Astronist Civicology, the process of designing, and attribution of the outskirts of a town or city.

Outspread - in Astronist Architecture, a category of Astronist building in which the width of the building is at least twice as long as its depth, and is thus most commonly characterised by its very wide appellation, and is a style mainly used on the construction of observatories.

Ovalic - in Astronist Philosophy, relating to an oval shape, especially of a celestial entity.

Ovality - in Cosmic Art, as a derivation of Astronist Art, the core region of a two-armed galaxy shaped as an oval.

Derivatives

Ovalities

Ovalial

Overarching Form - a version of The Philosophy of Astronism that is present in multiple countries under the same heading.

Overlight - overwhelmed by light.

OverAstronistisation - the act of overly promoting the process of Astronistisation of any entity.

OverAstronistisationism - the belief that the over promotion of the process of Astronistisation is the only way to effectively secure Astronistisation.

Overpin - in Astronist Philosophy, encapsulate from above, especially so in a protective and authoritative sense, an example of which is in The Tricosmic Paragon, wherein The Universe both overpins and underpins The Cosmos and The Chaos.

Derivatives

Overpins

Overpinning

Overpinnings

Overpinned

Overseeingness - in Astronist Philosophy, the instance of a higher being overseeing something below, either in a physical sense or a conceptual sense.

Overwatch - in Astronist Architecture, any place within an Astronist building, or in the gardens and estate of an Astronist building where an individual can look down onto a wide area.

Derivatives

Overwatches

Oyçul - the most common demonym for a follower of The Philosophy of Astronism in the Kyrgyz language.

Derivatives

Pencerahan

- the root term for Malaysian Astronism.
- a follower of the South East Asian denomination of The Philosophy of Astronism, known as Pencerahanism.

Derivatives

Pencerahans

Pencerahan Indonesia - the root term for Indonesian Astronism.

Pencerahanism - the most widely adhered denomination of The Philosophy of Astronism in the South East Asian region, and can be divided into three distinct derivations including Bruneian, Indonesian, and Malaysian Astronism. The Indonesian form can be further derived into five groups, including Central, Bornean, Javan, New Guinean, and Sumatran Pencerahanism according to the island(s) on which that form is most widespread. Similarly, the Malaysian form can be split into two main groups; Western and Eastern Pencerahanism, which relates to the two sections that make up the country.

Derivatives

Pencerahanist

Pendantry - in Astronist Architecture, a feature found in many high-ceilinged rooms and halls, especially those of a barning style, within Astronist buildings that structures the beams in vaults so as to form central pendant-like structure to hang down from the converging vaults, and onto which lights can be hung, or ornaments can be affixed.

Derivatives

Pendantries

Pendentine - in Astronist Ornamentation, a common type of ornamental design, typically found on drawer handles on furnitures, as well as on lighting fixtures, whereby a typically metal ornament hangs from the main structure of the furniture, or fixture.

Pendlement - in Astronist Architecture, a type of patio that is cosmically ornamented and encrusted.

Derivatives

Pendlements

Penetrability - in Astronist Philosophy, the extent to which a concept or philosophy has the ability to be understandable, acceptable, and disseminable.

Penetralia - in an Astronist contextualisation, those parts of an Astronist building that are the innermost.

Derivatives

Penetralium

Péngyou - in Mandarin Chinese, the informal term given for an official relation of The People's Constitutional Company of Jesse Millette.

Pēnquán - in Mandarin Chinese, the term given for a fountain of Astronist style or found around an Astronist building.

Pensador - the most common demonym for a follower of The Philosophy of Astronism in the Spanish, Portuguese, Catalan, and Galician languages, and all Spanish Astronists.

Derivatives

Pensadors

Pensadores

Pensatore - the most common demonym for a follower of The Philosophy of Astronism in the Corsican and Italian languages.

Derivatives

Pensatores

Pensatori

Penseur - the most common demonym for a follower of The Philosophy of Astronism in the French language.

Derivatives

Penseurs

Pensulo - the most common demonym for a follower of The Philosophy of Astronism in the Esperanto language.

Derivatives

Pensulos

Pentad - in an Astronist contextualisation, another term relating to five Astronist characters at once, or when five Astronist characters appear in an art piece, illustration, or literature at once.

Pentadoxy - in Astronist Philosophy, the official term for the disquisition of The Principles of Ambition & Enlightenment within The Grand Centrality of The Philosophy of Astronism.

Derivatives

Pentadox

Pentadoxic

Pentadoxical

Pentadoxically

Pentagine - in Astronist Ornamentation, the use of pentagonal shapes to create ornamental patterns.

Pentagonium - in Astronist Architecture, a style of appellation that resembles a pentagonal shape.

Pental - in Astronist Philosophy, relating to five elements of something, especially in association with The Pental Trajectory.

Derivatives

Pentality

Pentalities

Penter

Penters

Pentress

Pentresses

Pentalogy - five related literary works of Astronist origination and theme.

Pentsalari - the most common demonym for a follower of The Philosophy of Astronism in the Basque language.

Derivatives

Pentsalaris

Pentych - in Astronist Ornamentation, a picture or relief carving on five panels that are pentagonally shaped.

Penultimation - in Astronist Philosophy, that which is last but one in a series of cosmical events or periods.

Derivatives

Penultimatory

Peopality - in Astronist Propaganda, the amount and the extent to which a particular propaganda piece is peopled with figures.

People's - in an Astronist contextualisation, a term often used in Millettaria relating to that which belongs to the people; humanity, as an all inclusive unified whole.

Peoples of the World - in Astronist Philosophy, a popular appellation relating to, and addressing the entirety of people living on The Earth.

People's Philosopher - in Astronist Philosophy, a role synonymous with that of Astronist philosophers entailing philosophers to actively interact with and be integral members in the

civilisation and society in which they reside; this means to play an active leadership role in all relevant industries and disciplines, and especially refers to a politician that identifies as a philosopher.

Per - in Astronist Philosophy, the philophon for the discipline of perfectics.

Perambulate - in an Astronist contextualisation, relating to walking around any kind of Astronist building.

Derivatives

Perambulation

Perambulatory

Perambulator

Perarm - in Cosmic Art, as a derivation of Astronist Art, the region at the end of a galactic arm.

Derivatives

Perarmial

Perarmic

Per Capita - in an Astronist contextualisation, of the employees of The People's Constitutional Company of Jesse Millette, the salaries of each individual employee, especially when compiled into statistical data.

Perceivence - in Astronist Philosophy, relating to a particular approach to philosophical contemplation, and enquiry.

Derivatives

Perceivences

Perceivencial

Perceivencially

Perceivency

Perdain - a term of Orrology, the act of using orreries for wondermental or astronomical practices.

Derivatives

Perdainer

Perdainment

Perdaining

Perdainative

Perdainatively

Perdition - in an Astronist contextualisation, a serious defiance from constitutionality; from the writings of The Grand Constitution, especially when such a defiance has significant consequence.

Derivatives

Perditioner

Perditional

Perdurable - in an Astronist contextualisation, relating to the fact that the words and importance of The Grand Constitution are imperishable to The People's Constitutionality Company of Jesse Millette.

Peregrinationism - a school of thought in The Philosophy of Astronism which emphasises the importance of the journey of life, and is closely associated with the tenets of Missionism.

Derivatives

Peregrinationist

Peregrinationistic

Pericapation - in Astronist Philosophy, to be disconnected from The Cosmos yet to still exist within it, the few examples of which being an event horizon, an oblivionic singularity, the core of a planet, and the core of a star.

Derivatives

Pericapational

Pericapative

Pericapatively

Pericapativity

Peremptory

- in an Astronist contextualisation, relating to an issue that requires immediate attention from the executive of The People's Constitutional Company of Jesse Millette.
- in Astronist Philosophy, in the context of philosophical argumentation, of a debater, approaching a dispute with a commanding attitude and expecting one's theoretical and conceptual proposals to be immediately addressed.

Perfectics - a major discipline of study within Astronist Philosophy as part of wider Astronomy dealing with the philosophy of perfection, the concepts surrounding the nature, purpose, and intentions of reaching perfection, and from a purely cosmical context, the philosophical discussion of The Perfect Cosmos, as an entirely order, beautiful, and fully functioning whole, and thus, the truest embodiment of perfection.

Derivatives

Perfecticist

Perfectical

Perfectically

Perfectic

Perforation - in Astronist Ornamentation, a dotted pattern across the ornamentation.

Performament - in Astronist Philosophy, a tradition of philosophical expression involving any sort of performative activity, the most common examples of which would be a dance, a music recital, a singing performance, an oration, or a play acted out for an audience with a philosophical theme, narrative, or message; this exists as the oppose of literary philosophical expression, and an alternative to philosophical argumentation and debate.

Derivatives

Performation

Performational

Performater

Performatress

Performamental

Performamentality

Performativity - in Astronist Education, a school of thought, and learning approach relating to subjects and teaching methods which demand to test the performance of a student through examination, rather than through coursework, or other prolonged assessments, and by this model, only takes into account the performance of the student on that day, rather than the wider context of their overall educational development and journey.

Pericreated
Pericreator
Pericreators
Pericreationist

Perim - in Astronist Philosophy, the philophon for the discipline of perimetrics.

Perimeter

- the continuous edge beyond the trajectory which forms the boundary of the patch or emblem, and thus constructs the pitch.
- in Astronist Ornamentation, the continuous line forming the boundary between the ornamentation, and the externality.

Perimetrical Collapse - in Astronist Philosophy, the appellation for the process of diminishment, wherein the cosmical periphery collapses and deteriorates with various different causes attributed to this occurrence.

Perimetrical Cosmology - in Astronist Philosophy, also known as the Perimetric Cosmology, a type of cosmos characterised by the notion that the cosmical perimeter is the ultimate entity in the cosmical existence and is all that The Cosmos depends upon.

Perimetrics - in Astronist Cosmology, and as part of Astronist Philosophy, specifically Cosmic Philosophy, the study and philosophical discussion of the nature, consequences, purpose, and motionalty of the edge of The Cosmos, and how this may impact upon the relationship between The Cosmos and The Universe.

Derivatives

Perimetrical

Perimetrically

Perimetrist

Perimetrists

Period - in the context of The Grand Astronist Calendar, a series of days that are collected together under a common name, with five of these such groups forming the Astronist Year, and are the periods of Jessine, Ellenine, Harrietine, Oliverine, and Zaarine.

Periology - a large subdiscipline of study within Astronist Philosophy dealing with cosmic periods, and the ways in which these periods have caused the evolution of The Cosmos and their purposes, patterns, and consequences.

Derivatives

Periological

Periologic

Periologically

Periologist

Peripatetic - in an Astronist contextualisation, of an ambassador, representative, or senator of The People's Constitutional Company of Jesse Millette, or an executive of the Company, travelling from place to place to conduct diplomatic procedures and duties, especially for short periods.

Derivatives

Peripateticism

Peripatetic educator - in Astronist Education, an educator at any level, or in any subject, that teaches at more than one phrontistery.

Periphera - in Cosmic Art, as a derivation of Astronist Art, also known as the Peripheral Core, the region of the galaxy marking the very edge and most outer ring of the galactic concentricity.

Derivatives

Peripherality

Peripheric

Peripheral

Peripherically

Peripheral Glow - in Cosmic Art, as a derivation of Astronist Art, the lining of bright colour along the edges of a nebulaic cloud, especially when in contrast to the deep darkness of space.

Peripheral Thoughts - in Astronist Philosophy, one part of a cosmic metaphor, relating to those thoughts and opportunities that are considered to be furthest away from the way in which one sees oneself, the counterparts of which are Central Thoughts.

Peripherance - in perimetrics of Astronist Philosophy, the enclosing boundary and perimeter of The Cosmos, which may or may not be represented as being circular in shape.

Derivatives

Peripherencial

Peripherentially

Peripherency

Periphery - in an Astronist contextualisation, the parts of The People's Constitutional Company of Jesse Millette that are furthest from significance, or essentiality to the operations of the Company.

Periphiscence - in Astronist Philosophy, collectively referring to the sections of writing on either side of The Grand Centrality that are separate from The Twelve Disquisitions. These writings form the distinction between The Grand Centrality and The Omnidoxy, as The Omnidoxy does not feature the periphiscence while The Grand Centrality does.

Derivatives

Periphiscenic

Periphiscenical

Periphiscenically

Periphiscenicity

Perishment - in Astronist Philosophy, relating to the physical decomposition of the body after death.

Peristylum - in Astronist Architecture, as inspired by Roman and Hellenistic Greek architecture, an open courtyard within one's residential home with columns encircling it, and its main Astronistised feature being its use for astronomical observations at night from within one's own residence, as well as being specially laid out for the conduction of philosophical discussions with friends and relatives.

Perlocution - in Astronist Philosophy, philosophical concepts that inform, mildly instruct, or stay largely neutral without an intended action as opposed to illocutive concepts. See perlocution.

Derivatives

Perlocutive

Perlocutively

Perlocutional

Perlocutionally

Perlocutionality

Permanency - in an Astronist contextualisation, of a stance held by The People's Constitutional Company of Jesse Millette on a particular topic, remaining unchanged for the foreseeable future.

Permeation - in an Astronist contextualisation, of an idea, or opinion during an Astronist congressional session, spread throughout and agreed upon by the entire assembly.

Derivatives

Permeative

Permeatively

Permutate - in an Astronist contextualisation, change the order or arrangement of an Astronist book series, documentation, or another type of literature.

Perquisition - in Astronist Philosophy, a type of long quest, also termed as a philosophical pilgrimage, for philosophical knowledge and inspiration, especially involving travelling to new countries, reading many books, speaking and debating with a plethora of different people with different philosophical orientations, and with a general attitude of exploring the world, and all the philosophical traditions of the world.

Philophonic

Philoprogenitive - in an Astronist contextualisation, of an Astronist character, having many offspring.

Derivatives

Philoprogenitivity

Philoprogenitor

Philorology - an Astronist Subject dealing with the study of the central texts of a philosophy, especially The Grand Centrality of The Philosophy of Astronism as the central text of Astronism, and Astronist Thought and Philosophy, as well as comparing the central texts of different philosophies.

Derivatives

Philorologist

Philorologic

Philorological

Philorologically

Philosieux - a man devoted to the study of philosophy, especially one considered to have mastered a specific philosophy.

Philositrix - a woman devoted to the study of philosophy, especially one who is considered to have mastered a specific philosophy.

Philosocial - combining philosophical and social factors.

Derivatives

Philosocially

Philosocial System - a method of categorising a human population by social factors such as age, class, and gender, and relating those factors to the philosophical leanings of such groups.

Philosopher - the most common and synonymous demonym for an individual who follows The Philosophy of Astronism, typically not to differentiate between Astronist philosophical schools, denominations, or any other derivational branch.

Derivatives

Philosophers

Philosopher-politician - in Astronist Philosophy, a politician that self-identifies as a philosopher, primarily before identifying as a politician.

Philosopher's Garden - in Astronist Architecture, as part of gardenry, also known as a Philosophy Garden, a type of area on the estate of some Astronist buildings in which the study, debate, and intimate discussion of philosophical concepts, and ideas is conducted with fellows, and strangers alike, especially in the setting of a restaurant, or open courtyard, or on an instrumented lawn.

Philosophership - collectively relating to the philosophical career, legacy, and written works of Brandon Taylorian.

Philosopher's Mind - in Astronist Philosophy, an appellation for the notion that the philosophers of a civilisation should reflect the views of the masses of the people in their philosophies and orientations.

Philosopher's World - in Astronist Philosophy, the appellation encompassing the metaphor of a world in which philosophers rule, and their words and ideas are paramount in civilisational shifts and on mass public opinion.

Philosophia - in Astronist Architecture, the entirety of Astronist philosophical buildings when considered, or described collectively.

Philosophical Advertisement - in Astronist Philosophy, an advertisement that is solely based upon the promotion of The Philosophy of Astronism and any one of its concepts, beliefs, and values, but does not include other advertisements, or visual medias that only happen to reference The Philosophy of Astronism. The distinct difference is the purpose and focus of the advertisement.

Philosophical Analytics - the systematic computational analysis of data and statistics about the trends in philosophical beliefs.

Derivatives

Philosophical Analyst

Philosophical Anthropology - the study of philosophical institutions in relation to other institutions, and the comparison of philosophical beliefs and practices across cultures, countries, and regions of the world.

Derivatives

Philosophical Anthropologist

Philosophical Appropriation - the adoption or use of the elements of one philosophy by members of another philosophy.

Philosophical Area - the area in which a particular philosophy is dominant, especially when categorised by country, or region.

Philosophical Art - artistic imagery using philosophical inspirations, and motifs and is often intended to uplift and enlighten the mind, to raise one's philiosity, and is usually made distinct by the corresponding Organised Philosophy.

Philosophical Artefact - an object made by a human being, especially when it relates to a specific philosophical belief, or features the symbols and icons of a particular philosophy.

Philosophical Architecture - a category of architecture concerned with the design and construction of Philosophical Buildings specific to The Philosophy of Astronism, such as Planetariums, Observatories, Eidouraniums.

Philosophical Assimilation - the process by which a person's or a group's philosophy come to resemble those of another group.

Philosophical Association - a non-profit organisation in which donations pay for the furtherance of the associated philosophy.

Philosophical Attire - the official clothing worn in accordance with one's philosophical belief.

Philosophical Baggage - the tendency for one's philosophical beliefs to pervade thinking, speech, and behaviour without one being aware of this pervasion.

Philosophical Behaviour - the distinct, yet largely generalised, set of behaviours associated with those whom follow a particular philosophy.

Philosophical Bias - the phenomenon of interpreting and judging a philosophy by standards inherent to one's own philosophy.

Philosophical Broadcasting - broadcasting by philosophical organisations, usually with a distinct philosophical message, or theme.

Philosophical Buildings - the range of buildings in which philosophical enhancement, and study is conducted, mainly entailing Astronist philosophical buildings, with the most common being Planetariums.

Philosophical Capital

- the investment an individual makes into their philosophical beliefs, and the subsequent study of these trends by experts.
- the city within a nation, or on a continent, that is either officially or unofficially considered to be the centre of the region's philosophicality.

Philosophical Communism - a form of communism that incorporates a distinct set of philosophical principles.

Philosophical Community - a group of people who follow the same philosophy.

Philosophical Confederation - the concept that despite The Philosophy of Astronism holding many branches, schools, sampanas, and denominations, there is still a distinct uniting factor to all these divisions, and thus, as a result, a Philosophical Confederation is born.

Philosophical Conflict - a type of conflict that occurs when different philosophical values and beliefs clash, either between two different philosophies, or between two denominations of the same philosophy.

Philosophical Controversies - the collective scandals and incidents that have plagued philosophical institutions, especially in the distinction between philosophy and religion, and the extent of the role philosophy should play in society, national identity, and government.

Philosophical Conversion - the act of informally changing from one set of philosophical beliefs to another.

Philosophical Corporation - a type of philosophical non-profit organisation which has been incorporated by the law and is often recognised by the government.

Philosophical Cosmology - in Astronist Philosophy, a cosmology derived purely from a philosophical tradition rather than scientific or empirical endeavour.

Philosophical Cringe - an internalised inferiority complex that causes people in a country to dismiss their own philosophical beliefs as they view them to be inferior to the philosophy held by another country.

Philosophical Criticism - the field of study, and the profession, of researching, analysing, and criticising, mainly in the form of academic journals and essays, a range of differing philosophies, from a number of different sectors, including politics, economics, and law.

Philosophical Democracy - a form of government where the values of a particular philosophy affect laws, methodology, and rules, also known as a philosophocracy.

Philosophical Demography - also known as sophodemology, or Philosophical Demographics, the study of the number of adherents in a philosophical denomination according to country, continent, region, state, city, planet, and by all other geographic, religious, and psychographic measures. Philosophical Demographics are distinct from Religious Demographics, and although they may sometimes be mixed, they are considered distinct according to Astronist contexts.

Derivatives

Philosophical Demographics

Philosophical denomination - as distinct from a religious denomination, in Astronist Philosophy, relating to the title given to the collective traditions of a particular geographical area, language group, or national group, an example of which being the denomination of Hanazavaism in Madagascar. The essential point of difference between a religious denomination and philosophical denomination is that philosophical denominations only differ from one another in the languages and terminologies they use to relate to the philosophy, but the essential beliefs, concepts, and ideas of the philosophy remain. For example, the denominations of Christian Protestantism and Catholicism differ in their theological orientations and in their central beliefs, whereas as the Astronist denominations of Qishì'ism and Hanazavaism share the same beliefs, concepts, and philosophical orientations.

Philosophical Disaffiliation - the act of leaving a particular philosophy, or philosophical community in an overly public manner.

Philosophical Discrimination - treating a person or group differently due to their philosophical association, or beliefs.

Philosophical Dissonance - is an uncomfortable sense of discord, disharmony, confusion, or internal conflict experienced by people in the midst of change in their philosophical environment.

Philosophical Economics - also known as Philonomics, the branch of philosophy concerned with the economic impact of Organised Philosophy.

Philosophical Education - the teaching of a particular philosophy in a formal educational setting, especially in primary and secondary education, and its subsequent integration into the national curriculum.

Philosophical Era - a typically long period marked by distinct philosophical ideas and societal change.

Philosophical Exclusivism - the doctrine or belief that only one particular philosophy is true.

Philosophical expression - a practice, involving different techniques, traditions, apparatus and genres, that are utilised to make known one's philosophical ideas, theories, opinions, and orientations; the three main branches of philosophical expression within the Astronist Tradition are literary, debatory, and performative.

Philosophical Family - a family, the first of which is considered to be the Taylorian Family, in which multiple members have contributed to philosophy, and philosophical thought in some way.

Philosophical Festival - a time of special importance in a philosophy's calendar marked by adherents to that philosophy, and typically involving open celebration, and public gatherings.

Philosophical Framework - the value systems, myths, terminologies, and symbols that are common in a given philosophy, or philosophical community.

Philosophical Heritage - the legacy of physical science artefacts and intangible attributes of a particular philosophy, or philosophical community, that are preserved and upheld by present and future generations.

Philosophical History - the study of the various periods in history in a philosophical context, typically chronologically categorised into Ancient, Socratic, Christian Philosophy, Islamic Philosophy, Shankara, Medieval, Renaissance, Enlightenment Period, Modern, and Advanced.

Philosophical Humanism - the creation of a distinct denomination, and the integration of a non-theistic philosophy with an Organised Philosophy, especially one centring on human needs, and interests.

Philosophical Icon - an artefact, or a person, who is identified by members of a philosophy to be the representative of that philosophy.

Philosophical Iconography - the visual images and symbols used in Philosophical Art, Architecture, and Literature associated with a particular Organised Philosophy, especially The Philosophy of Astronism.

Philosophical Identity - the sense of group membership to an Organised Philosophy, and the extent to which this is important to an individual.

Philosophical Indifference - a person with indistinct philosophical affiliation.

Philosophical Individualism - a philosophy which is characterised by the prioritisation of the individual over society as a whole.

Philosophical Industry - the creation, production, and distribution of goods and services that are philosophically distinct, or whose manufacturer or provider is a subsidiary to, or uses the methodologies of, a philosophical institution.

Philosophical Insertion - in Constitutional Terminology, the inserting of new and already existing philosophies beside their definitions into The Grand Constitution, so that they are constitutionally recognised.

Philosophical Institution - the main governmental bodies of an Organised Philosophy, the most notable of which is The Institution of The Philosophy of Astronism.

Philosophical Intolerance - intolerance against another's philosophical beliefs, or lack thereof.

Philosophical Invention - any innovation developed by people of a particular philosophical community that is not of a physical construct.

Philosophicality - the extent to which a nation, or region is philosophically inspired, or guided.

Philosophical Jurisdiction - the official managerial, and administrative, power granted to a philosophical institution by its authoriser within an appointed area, usual a nationwide jurisdiction, or a provincial jurisdiction.

Philosophical Landscape - the past, present, and predicted demographics, and trends relating to Organised Philosophy, and wider philosophical belief.

Philosophical Law - the ethical and moral codes taught by philosophies, typically characterised by a distinct vagueness or a strictly conceptual set of principles.

Philosophical Levelling - the process by which different philosophies approach each other as a result of travel, communication, and globalisation.

Philosophical Literacy - the ability to understand and participate fluently in a given philosophical community, or in a country with a very distinct Organised Philosophy.

Philosophical Mapping - the organisations and individuals concerned with safeguarding philosophical diversity and the study, research, and application of this by mapping distinct philosophies around the world.

Philosophical Marketing - in Astronist Philosophy, and in wider study, the branch of knowledge dealing with the wide range of marketing and advertising campaigns, strategies, and techniques that are used in promoting a specific philosophy, and its principles, values, beliefs, and concepts.

Philosophical Mediation - the study of the philosophical differences between people.

Philosophical Meditation - in Astronist Philosophy and Astronist Mysticism, a version of traditional meditation practiced within Astronist philosophy and mysticism characterised by the focus on deriving greater contemplation, knowledge and understanding of a subject from the meditative practice while pre-Astronist forms of meditation focus on its utility for ritual and spiritual purposes, or for the purposes of relaxation. A branch of Philosophical Meditation is Cosmic Meditation.

Philosophical Method - in Astronist Philosophy, also known as the Contemplative Method, the central aspect of Astronist philosophical study characterised by the application of instruments of study to form concepts, orientations, and theories, and also involves thinking philosophically, practising philosophical thought, and assuming the role of the philosopher.

Philosophical Movement - an either sudden or gradual widespread change in philosophical direction and thought, especially affecting art, society, national identity, and governance.

Philosophical Movement, New - a philosophical group that isn't considered to be an Organised Philosophy.

Philosophical Music - music performed or composed for philosophical use, or through philosophical influence, or a specific style of music associated with a particular philosophy.

Philosophical Name - in The Philosophy of Astronism, an informally given name bestowed by oneself upon oneself or one's children which is associated with a particular philosophy, and is a practice that is strictly unassociated with The Institution of The Philosophy of Astronism.

Philosophical Nationalism - the relationship of nationalism to a particular Organised Philosophy.

Philosophical Official - is a person who is employed by The Institution of The Philosophy of Astronism, and holds authority in their designated philosophical building, most commonly called a Sophian.

Philosophical Order - a lineage of communities and organisations of people who live in some way set apart from society in accordance with their specific denomination of the root philosophy which typically has its own practices, dogma, and extra beliefs, and the most common of which is The Millë Order.

Philosophical Organisation - the branch of philosophy concerned with the various ways in which a philosophy can be, and is, organised.

Philosophical Persecution - the systematic mistreatment of an individual or group of individuals as a response to their philosophical affiliation.

Philosophical pilgrimage - in Astronist Philosophy, a long quest, or journey to discover philosophical knowledge involving travelling, reading, debating, and enknowledge, typically taking place over a number of years. See Perquisition.

Philosophical Pluralism - in an Organised Philosophy context, an attitude or policy regarding the diversity of philosophical belief systems co-existing in society.

Philosophical Politics - a category of philosophy, focusing on the construction and application of political systems which are directly inspired by a particular philosophy.

Philosophical Practice - the various commemorations, veneration, and adorations associated with The Philosophy of Astronism.

Philosophical Property - physical items that are part of the philosophical heritage of a group, or wider society.

Philosophical Psychology - the application of psychological methods and interpretive frameworks to philosophical belief systems, especially Organised Philosophy, as well as to both philosophical and aphilosophical individuals.

Philosophical Reformation - the action or process of reconstructing a philosophical institution, or reimagining an Organised Philosophy.

Philosophical Reproduction - the transmission of existing philosophical values and normalities from generation to generation.

Philosophical Revivalism - a notable increase in the mass interest of philosophical belief systems, especially as a precursor to becoming an Organised Philosophy.

Philosophical Satire - a form of satire targeted at Organised Philosophy.

Philosophical Skepticism - a type of skepticism relating to philosophy, specifically Organised Philosophy, and typically questions philosophical authority, yet are not necessarily anti-philosophy, or even aphilosophical.

Philosophical Socialism - any form of socialism based on philosophical values, and especially socialism when guided by a specific Organised Philosophy, or philosophical denomination.

Philosophical Sovereignty - the concept that Organised Philosophy should be intertwined with the nation state, and thus, the sovereignty of the nation, is too, the sovereignty of the philosophy.

Philosophical Spirit - in Astronist Philosophy, a major concept within the discipline of logicology stating that there exists a distinct and unique level of philosophical knowledge, thought, and belief in every sentient being and that this spirit must be protected, grown, and continually enhanced and is said to be damaged by notions of anti-knowledge and anti-learning.

Philosophical Statement - in Astronist Civicology, a statement decreeing the philosophical affiliation of a town, city, or another area, typically in the form of a large tablet, or a stature, or pillar.

Philosophical Stratification - the division of a society into hierarchical layers on the premise of philosophical affiliation.

Philosophical Studies - the study of Organised Philosophy, and its many systems, dogma, and structures, especially in a higher education setting.

Philosophical Symbol - any type of icon intended to represent a specific philosophy, or a concept within a given philosophy.

Philosophical Syncretism - the formal action of a government, or society, blending two or more philosophical or ideological belief systems together in order to form a new system.

Philosophical System - the interactions of different elements of a philosophy, such as art, principle, and organisation.

Philosophical Technology - a broad term referring to the use of technologies in the furtherance of a particular philosophy, especially an Organised Philosophy.

Philosophical Theology - the presence of theological depiction, interpretation, and representation in philosophical principle, art, and culture.

Philosophical therapy - in occurrology of Astronist Philosophy, the practice of philosophical activities and study in order to make oneself feel more cheerful.

Philosophical Tourism - a type of tourism in which people travel, either individually or in groups, specifically to visit philosophical sites, or buildings.

Philosophical tradition - a group of philosophical concepts, branches, beliefs, and disciplines that are historically tied and share the same origins, and that have developed through eras, geography,

and people groups to form a full body of philosophical works, beliefs, thought schools, and ideas. In Astronist Philosophy, the most prominent example of this is of course that which is termed as the Astronist philosophical tradition, or simply, the Astronist Tradition.

Philosophical Uniformity - the action taken by a government in the promotion of a specific Organised Philosophy, yet not so extreme as to exclude other philosophical systems.

Philosophical Universal - is an element, pattern, trait, or institution common to all human civilisations and cultures, with the aim of making a specific philosophical affiliation part of this.

Philosophical Values - ethical principles founded in philosophical traditions, beliefs, texts, and organisation.

Philosophical Views On Capitalism - the views of The Philosophy of Astronism on the right to property relate to the important of advancement, freedom, ambition, and education, yet also stressed are the ideas of aid and stewardship.

Philosophical Views On Communism - the views of The Philosophy of Astronism on Communism relate to the importance of equality, and order, yet too, the greatest connection stems from the cultural aspects of Communist social systems, from which much of Astronist art, and propaganda is openly inspired.

Philosophical Views On Contraception - the views of The Philosophy of Astronism on contraception relate to the importance of Procreationism and Populationism in Astronist philosophy and society, and the general discouragement of family planning.

Philosophical Views On Euthanasia - the views of The Philosophy of Astronism on euthanasia are scarcely interpreted from Astronist philosophy.

Philosophical Views On Genetically Modified Foods - the views of The Philosophy of Astronism on Genetically Modified Foods stand as favourable due to the necessities of support humanity.

Philosophical Views On Homosexuality - the views of The Philosophy of Astronism on homosexuality are scarcely interpreted from Astronist philosophy, but is generally considered to be of no hindrance to philosophical affiliation, or belief.

Philosophical Views On Masturbation - the views of The Philosophy of Astronism on masturbation are scarcely interpreted from Astronist philosophy.

Philosophical Views On Organ Donation - the views of The Philosophy of Astronism on organ donation are scarcely interpreted from Astronist philosophy, but are generally considered to be relaxed.

Philosophical Views On Pornography - the views of The Philosophy of Astronism on pornography are scarcely interpreted from Astronist philosophy.

Philosophical Views On Same-Sex Marriage - the views of The Philosophy of Astronism on same-sex marriage are scarcely interpreted from Astronist philosophy, but is generally considered to be of no hindrance to philosophical affiliation, or belief.

Philosophical Views On Smoking - the views of The Philosophy of Astronism on smoking are scarcely interpreted from Astronist philosophy, yet discouragement of such a practice is enforced, especially the depiction of Astronist characters conducting such practices.

Philosophical Views On Suicide - the views of The Philosophy of Astronism on suicide are scarcely interpreted from Astronist philosophy, yet discouragement of such a practice is enforced, especially the depiction of Astronist characters conducting such practices.

Philosophical Views On Transgenderism - the views of The Philosophy of Astronism on transgenderism are scarcely interpreted from Astronist philosophy, yet niche art forms have been dedicated to such ideas.

Philosophical Vocation - a calling, or vocation, is a strong internal feeling for an individual to do something, especially from being inspired by their affiliated philosophy, doing something in the name of their affiliated philosophy, or committing themselves to the furtherance of their affiliated philosophy.

Philosophicise - seeking to promote a particular brand, or branch of philosophy to a person, especially so with intentions of them one day associating themselves with that particular philosophy, or one of its denominations, or more widely, may simply be any advocacy for philosophical discourse in general and the rising of the importance of philosophy in society.

Philosophicises

Philosophicised

Philosophiciser

Philosophicisee

Philosophicism - the belief that philosophy is, and should always be, the central set of beliefs and practices an individual should live their life, especially when placed above religious beliefs and practices.

Philosophicless - without philosophical involvement, or approval.

Philosophicness - a state in which something holds an abundance of philosophical guidance, or someone being philosophically astute.

Philosophisation - in Astronist Philosophy, the process of transitioning from a non-philosophical nation to a philosophical nation, or the introduction to philosophical nation, primarily a nation which is founded or is heavily influenced or operates by a particular philosophy.

Derivatives

Philosophisational

Philosophism - in Astronist Philosophy, the notion of the combination of power between the state and the philosophical institutions, organisations, and denominations within the state in joint partnership for mutual benefit.

Derivatives

Philosophist
Philosophists
Philosophistic
Philosophistically

Philosophist - excessive philosophical zeal, especially so in the defence of a specific school of philosophy.

Philosophitrix - a woman bound to her philosophical beliefs.

Philosophocentricity - particularly in a political context, the centrality of philosophy and its prominent role in society, and in the lives of the citizens.

Derivatives

Philosophocentric
Philosophocentral
Philosophocentrically
Philosophocentricist

Philosophocentrism - in Astronist Propaganda, the belief that all propaganda pieces should overtly expound the official philosophy and worldview of the nation in which the propaganda is distributed, and believes this to be the central piece of all propaganda.

Philosophocracy

- a system of government inspired by or bound to a particular philosophy.
- a system of government that officially recognises at least one philosophy as its State Philosophy.
- a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that a philosophy, or philosophies, should be the central foundational principles, values, and systems of a nation state, and believes that the philosophy adopted by the state will lead to the advancement of the state, the betterment of the people, and the furtherance of the leader's and people's ambitions for their nation state, especially over a theocratic, or ideological state system.

Derivatives

Philosophocracies

Philosophogenesis - relating to concepts and theories originating from a philosophical orientation, or understanding.

Philosophology - the large branch of study within Astronomy dealing with the distributions, uses, purposes, and operations of philosophical buildings, especially Astronist philosophical buildings.

Derivatives

Philosophologist
Philosophological
Philosophologically

Philosophopolis - in Astronist Architecture, a portion of a town, or city which is dominated by philosophical buildings, and cosmical imagery.

Philosophor - a man bound to his philosophical beliefs.

Philosophosynthesis - also known as the process of millettosynthesis, the integration of two distinct Astronist philosophical orientations, typically mixed together by an individual to form a new philosophical tradition.

Philosophotranspiration - in introspectics of Astronist Philosophy, one of The Six Transpirations characterised by all discoveries of new philosophical perspectives, concepts, and theories.

Derivatives

Philosophotranspirational

Philosophotranspirative

Philosophotranspiratively

Philosophotranspire

Philosophotranspired

Philosophotranspiring

Philosophous - the state in which something is uniformly philosophical, as in closely conforming to a specific school's philosophical teachings.

Derivatives

Philosophously

Philosophy

- the continuous search for the ultimate truth of existence.
- the incorporation of knowledge, understanding, and principle to form a specific system of function.
- the origin of all academic study.
- the association of oneself to one or more set of ideas and principles.
- holding a particular worldview, especially when regarding the future of humanity as a whole.
- a subject considered classed within performing arts, sciences, humanities, social sciences, as well as within cosmology, and astronomy, so as to be a foundational, and thus transcendent topic for all subjects.

Derivatives

Philosophies

Philosophise

Philosophisation

Philosophisational

Philosophy by continent - the broad, and largely inaccurate, classification of continents by the majority philosophies.

Philosophy by country - the classification of countries by the majority philosophy, or by the State Philosophy.

Philosophy Exam - another term for an exadoxy: an Astronist philosophical exam held in an Astronist planetarium.

Philosophy Family - a group of philosophies that are loosely connected either by their subject, era of origin, or place of prevalence.

Derivatives

Philosophical Family

Philosophy Garden - another term for a Philosopher's Garden.

Philosophy of Practice - in Astronist Ornamentation, the particular philosophy adopted during the creation of an ornament, or for which the ornament is created to further, and especially the revelation of this to the ornament's observer.

Philosphere - relating to the entirety of the history, traditions, cultures, concepts, theories, branches, and disciplines of all philosophies, either as a cultural tradition that shapes society, or as an academic subject.

Phoeniology - the branch of Astronology solely relating to the study of the fictional character, Phoenix-Oliver Millette.

Derivatives

Phoeniologial

Phoeniologist

Phoeniologically

Phoenixary - in Astronist Ornamentation, the specific depiction of a phoenix bird in various patterns, designs, and symbols.

Phoenixian Day - a celebratory day in The Grand Astronist Calendar on which people celebrate, devote, read about, and dress up as the Astronist character of Phoenix, and this always takes place on the 48th Ellenine (20th May), but is notably not considered to be on the same level as the other Astronist character celebratory days, such as Jessian Day, Zaranian Day etc.

Phoenixianism - a school of thought in The Philosophy of Astronism centring on the thoughts, beliefs, theories, and ideas distinctively held and associated with the Astronist character of Phoenix, so as to interpret concepts from a strictly Phoenixian viewpoint.

Derivatives

Phoenixianist

Phoenixianistic

Phoenixine - in Astronist Ornamentation, the specific depiction of the Astronist character, Phoenix.

Phoenixism - distinctive features, characteristics, traits or way of thinking relating to that of the destinal fictional character, Phoenix-Oliver Millette.

Derivatives

Phoenixian

Phoenix's Cosmos - in Astronist Art, Architecture, Rendition, and Media, a collection of similar depictions of The Cosmos in its entirety, or of just one or a multitude of cosmical progenies that solely feature the Astronist character of Phoenix in the depiction.

Phoenix's Theme - a short musical composition that is associated with the Astronist character of Phoenix, and may be used in films, video games, advertisements and other digital media that involves the character.

Photon Epoch - see Nanonic Epoch.

Photonsphere - in Astronist Philosophy, a region of space that is so strongly influenced by gravity that light can travel in circles.

Derivatives

Photonspheres

Photonspheric

Photonspherical

Photonspherically

Phr - in Astronist Philosophy, the philophon for the discipline of phrontology.

Phreetius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the first son of Zsofine and Maxatius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Phreetian

Phront - in Astronist Education, the informal term for a phrontistery.

Derivatives

Phronts

Phrontistas - in occurrology, a social dance sponsored by a phrontistery and held on its premises for its students that either be casual or formal.

Derivatives

Phrontistases

Phrontistery - in Astronist Education, large complexes used by both students and the general public for a vast range of educational needs, with most including primary, secondary and higher education facilities within the complex, and are managed by Millette Education, the educational subsidiary of The People's Constitutional Company of Jesse Millette.

Phrontistic

Phrontistical

Phrontistically

Phrontistery board - in Astronist Education, the equivalent of an academic board, which consists of a group of faculty members of a phrontistery that regularly gather to regulate and monitor the academic affairs and operations of the phrontistery.

Phrontistery Year - in Astronist Education, the period of the year in which students of an Astronist phrontistery are required to attend, and is usually divided into both terms and semesters.

Phrontistic confederation - in Astronist Education, a confederation of a number of different phrontisteries of a state, province, or across the whole nation, and is the essential organisational structure of all phrontisteries of the Astronist education system.

Phrontistic monitoring - in Astronist Education, the set of procedures put in place by a phrontistery board in order to observe, check, and keep all phrontistic operations in proper balance and above ratified standards.

Phrontistic rigour - in Astronist Education, the strict and rigorous application of high academic standards in a phrontistery in order to uphold a particular reputation.

Phrontology - a major branch of Astronology, dealing with the study, construction, preservation, and management of Astronist phrontisteries.

Derivatives

Phrontological

Phrontologically

Phrontologist

Phteahsaamnak - derived from the Khmer language and used in Cambodian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Physical Abundance - in Astronist Philosophy, as part of The Philosophy of Abundance, dealing with the scales and amounts of physical attributes of celestials, such as the amount of stars of a galaxy.

Physicality - in Astronist Philosophy, relating to that which holds physical substance, rather than an abstract existence.

Derivatives

Physicalities

Physical Astronism - as part of Divisionology, the second of the four Levels of Astronism relating to the physical manifestations of the philosophy, namely The Grand Centrality, philosophical buildings, renditions, and artworks, and many other types of physical manifestation.

Physique - The School of Physicality in Astration as known in the French language.

Phytonym - a type of term relating to a plant whose name derives from the name of an Astronist character, or whose name derives from a word of Astronist culture, and terminology.

Derivatives

Phytonymic

Phytonymous

Phytonymity

Pickering - in Astronist Architecture, a term used to describe a wall with a number of different crevices on it, typically for holding different ornaments, or small instruments.

Picturise - in an Astronist contextualisation, the adaptation of an Astronist book into a film.

Derivatives

Picturising

Picturised

Picturiser

Picturisation

Piétinement - in Astronist Philosophy, the instance in which a philosophical argumentation is not making progress; in essence, the debate has stagnated, and requires the borner to either reignite the discussion, or change the topic of discussion.

Pikirane - the most common demonym for a follower of The Philosophy of Astronism in the Javanese language.

Derivatives

Pikiranes

Pilation - in Astronist Philosophy, drawing an association between one's abstract philosophical ideas, or beliefs, and the reality of the surrounding world, especially when inside an Astronist philosophical building, or during a stargazing event, or some other type of cosmic devotional practice.

Derivatives

Pilate

Pilating

Pilated

Pilative

Pilational

Pilatively

Pilationally

Pilsapat - refers to the meaning of philosophy in Sundanese.

Píndào - in Mandarin Chinese, the informal term given for an Astronist media channel.

Píng Héng - in Mandarin Chinese, the term given for balance, and is typically philosophically associated.

Pinion - in Astronist Ornamentation, the part of an ornament on both the left and the right sides.

Pinment - a term of Orrology, the part of an orrery relating to the legs upon which the orrery stands

Derivatives

Pinments

Pinnacle - in Astronist Architecture, an ornamental pyramid, or cone atop many parts of Astronist buildings, but not usually on the highest point, also known as the millix, and is typically ornamented crockets, and a finial with cosmical ornamentation.

Derivatives

Pinnacles

Pinnaclie

Pitch - the shape into which a mission patch or spacecraft emblem is made, most typically circular, triangular, pentagonal, or cosmically shaped.

Physis - in Astronist Philosophy, specifically in Cosmic Philosophy, relating to the nature of change in The Cosmos, and its contemplation.

Derivatives

Physes

-pla - in Astronist Onomatology, a suffix used for Astronist names, in reference to the planets of The Cosmos.

Pla- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the planets of The Cosmos.

Pla - in Astronist Philosophy, the philophon for the discipline of planetics.

Place of contemplation - in Astronist Philosophy, an alternative term for a place of philosophy.

Place of philosophy - in Astronist Philosophy, a synonym for Astronist philosophical buildings, to define them as places where philosophical discourses, debates, and investigations can be conducted.

Plan - in Astronist Philosophy, the philophon for the discipline of planetology.

Plane Landing View - in Astronist Civicology, the design and planning method of illustrating a city, town, suburban area, or space colony plan from the view similar to the angle that a plane would see when landing, so incorporates a sense of verticality and horizontality into the illustration.

Planemo - in Astronist Philosophy, a planetary classification within the contental philosophy of alternatism denoting an astronomical object with enough mass to achieve hydrostatic equilibrium, but not enough to initiate core fusion at any time during its existence.

Derivatives

Planemos

Planemic

Planetaria - collectively relating to the entirety of planetariums worldwide, or throughout a single country.

Planetarity - in Astronist Philosophy, an instrument of study relating to the philosophical discussion and contemplation of planets, including their functionalities, features, processes, movements, histories, and all other aspects of planetary formation, and existence.

Derivatives

Planetarities

Planetarium - a type of domed building used to project images of The Cosmos as a philosophical, and educational experience, and is the most common of all Astronist buildings.

Derivatives

Planetariums

Planetarium Visual Arts - the specific ornamentation, art, architectural styles, and renditions found exclusively in planetariums.

Planetarology - a major branch of Naology dealing with the study and practical management, preservation, construction, and categorisation of Astronist planetariums worldwide, and in specific regions, and countries.

Derivatives

Planetarologist

Planetarologic

Planetarological

Planetarologically

Planetary - relates to a subject whose discipline of study focuses on a singular planet as opposed to multiple planets or a subject of an interplanetary nature.

Planetary Architecture - an Astronist Subject dealing with the architectural culture and heritage of new discovered planets and celestial bodies on which civilisations are developed.

Planetary Business - an Astronist Subject dealing with the entirety of business conduct, policy, philosophy, and operations on a given planet.

Planetary Citizenship - an Astronist Subject dealing with the issues of citizenship of a planet and the various policies involved.

Planetary Commerce - an Astronist Subject dealing with the entirety of commerce and social interactions between the peoples and societies of a particular planet.

Planetary Consumer Protection - an Astronist Subject dealing with the protection of consumer rights in the economies of a particular planet.

Planetary Cosmology - in Astronist Philosophy, a type of cosmos and approach to cosmological understanding that focuses and emphasises the roles and prominence of planets and therefore raises their status in the Cosmic Hierarchy.

Planetary Education Management - an Astronist Subject dealing with the management of the education systems of a particular planet as stipulated by the governments of that planet.

Planetary Evolution - an Astronist Subject dealing with the evolutionary path of a particular planet, both ecologically and anthropologically.

Planetary Evolutionism - see Evolutionism.

Planetary Formation - a major branch of formatology dealing with the formations of planets from a purely philosophical perspective.

Planetary Formationism - see Formationism.

Planetary History - an Astronist Subject dealing with the history of a planet, either its anthropological history, or its ecological history.

Planetary Housing & Development - an Astronist Subject dealing with the development of a planet's housing structure.

Planetary Human Rights - an Astronist Subject dealing with the human rights of a particular planet.

Planetary Governance, Regulation & Control - an Astronist Subject dealing with the governance of a planet and all the regulatory controls that follow this.

Planetary Land - an Astronist Subject dealing with the study of the landmass of a particular planet, and its topographies.

Planetary Law - an Astronist Subject dealing with the study of the entirety of the laws of a planet and the government, or governments, that rule it, and involves many other branches of studies of law.

Planetary Leadership - an Astronist Subject dealing with the study of the leaderships of a planet.

Planetary Mergenics - in Astronist Philosophy, a branch of mergenics dealing with the instances and processes in which planets merge together.

Planetary Oversector - an area surrounding a Planetary Sector whereby the boundary isn't identifiable or well-established.

Planetary Parallax - in parallaxics of Astronist Philosophy, one of the five types of parallax to be found involving planets and planetoids.

Planetary Plant Sciences - an Astronist Subject dealing with the study of the unique flora of a particular planet.

Planetary Policing - an Astronist Subject dealing with the general policing operations of various police commissions of a particular planet.

Planetary Politics - an Astronist Subject dealing with the overall politics of a planet including all its various governmental bodies and authorities.

Planetary Polity - an Astronist Subject dealing with the general civil governmental processes of various states and societies of a planet.

Planetary Prison - an Astronist Subject dealing with the study of the planetwide prison system of various governments and nations.

Planetary Prospection - in Astronist Philosophy, as part of prospology, a type of prospection focusing on planets rather than on moons, and small celestial bodies.

Planetary psychology - a branch of Spacial Psychology in Astronist Philosophy dealing with psychological effects of different planetary environments.

Planetary Public Policy - an Astronist Subject dealing with the study of public policy of the governments of a particular planet.

Planetary Public Sector - an Astronist Subject dealing with the study of the various levels of control over the economy of a nation by its government.

Planetary Region - a vast area of the galaxy covering billions of star systems further divided into sectors and subsectors.

Planetary Sciences - an Astronist Subject that is an umbrella term for the sciences of a planet.

Planetary Seasons - in Astronist Philosophy, particularly within seasonology, the seasons of formation associated with planets, as derived from the Formational Seasons.

Planetary Sector - an area of the galaxy framed by an artificial, conventional boundary containing a number of planetary systems.

Planetary Series - in Cosmic Art, as a derivation of Astronist Art, a type of morphational art characterised by the depiction of the same planet multiple times in a series, with each depiction typically showing some sort of gradual change.

Planetary Studies - in Astronist Philosophy, a discipline of philosophical contemplation and study dealing with planets, their geographies, their topographies, and their histories, and holds within it many different derivations, one of which being areography which focuses on the classical planet of Mars.

Planetary Subsector - an area within a Planetary Sector, usually pinpointing a smaller number of planetary systems.

Planetary Suspension - in kosmetrics of Astronist Philosophy, the appellation for the conceptual instance in which planets are perceived to be positioned in such a way in The Cosmos that they are hanging, or are suspended in space.

Planetary Taxation - an Astronist Subject dealing with the entirety of taxation policy of the governments and states of a planet.

Planetary Transportation - an Astronist Subject dealing with the study of transportation systems on a particular planet and how such systems may vary to the systems of other planets.

Planetics - a discipline of study of structurology within Astronist Philosophy dealing with the philosophy of planets, and typically specifies its discussions on individual planets, their natures, climates, and habitabilities.

Derivatives

Planetacist

Planetical

Planetically

Planetic

Planetine

- in Astronist Ornamentation, the specific depiction of a planet.
- part of The Standard Astronomical Calendar, the alternative name given to the Gregorian month of May.

Planetment - a term of Orrology, the part of an orrery relating to the stand upon which the planets are positioned.

Derivatives

Planetments

Planetoid - in Astronist Astronomy, a planetoid is a class of planet that do not harbour any life, and so, despite their larger sizes, gas planets may be placed in this category.

Derivatives

Planetoid

Planetoidery

Planetology

- a major branch of study within Astronomy dealing with the naming, classification, scientific study, and the overall study of planets in general from the systems devised in the The Astronist Astronomic, Cosmographic, Cosmological & Astrographic Methodology.
- in Astronist Philosophy, another term for Planetary Studies.

Derivatives

Planetologist

Planetological

Planetologically

Planetologic

Planetometrics - a subdiscipline of kosmetrics in Astronist Philosophy dealing with the positions, motions, shapings, and magnitudes of planets in a similar fashion to astrometry.

Derivatives

Planetometrist

Planetometrists

Planetometric

Planetometrical

Planetometrically

Planetometricity

Planetometry

Planetonym - a type of term relating to the name of a planet as appointed by an Astronist organisation.

Derivatives

Planetonymic

Planetonymity

Planetoplane - in Astronist Philosophy, the homaloidal plane upon which celestials rest in The Cosmos, as understood philosophically.

Planetport - in Astronist Philosophy, relating to the building on a dwarf planet classified as a waystation that is typically used for refuelling, for purchasing food supplies, or for taking refuge.

Derivatives

Planetports

Planetum - a term of Orrology, relating an individual planet of an orrery.

Derivatives

Planetums

Planeture - a term of Orrology, collectively relating to all the planets of an orrery.

Derivatives

Planetural

Planetwide - referring to a whole planet, especially when studying it in its entirety.

Planisphere - in Astronist Rendition, derived from the pre-Astronistally originating adjustable circular star map that, in an Astronist context, is instead transferred to a digital or holographic form for the projection of stars at a specific time and place. Non-digital versions of the map may also be used as aids to cosmic devotion and general astronomical observation.

Derivatives

Planisphericity

Planispherical

Planispherically

-plas - in Astronist Onomatology, a suffix used for Astronist names, in reference to plasma in The Cosmos.

Plas- - in Astronist Onomatology, a prefix used for Astronist names, in reference to plasma in The Cosmos.

Plash - in Astronist Architecture, as part of gardenry, the square-shaped pond surrounding a notionery, at some part over which a small bridge extends to other people to walk across it to reach the notionery.

Plasmity - in structurology of Astronist Philosophy, the measurement and contemplation of the state of matter of plasma.

Derivatives

Plasmities

Plate - the part of a mission patch, or spacecraft emblem, which resembles the background, and thus ends at the trajectory.

Platement - in Astronist Philosophy, to describe a concept that is believed to have very little imagination, or a school of thought that doesn't allow much philosophical scope or imagination.

Derivatives

Platemental

Plamentality

Plerion - in formatology of Astronist Philosophy, the centre of a supernova.

Derivatives

Plerions

Plulabe - in Astronist Rendition, either a brass or plastic ornament featuring the minor planet of Pluto and its five moons.

Derivatives

Plulabes

Pluto Day - in The Grand Astronist Calendar, also known as Plutonian Day, a day of commemoration and celebration dedicated to the specific wondermentation, adoration, and laudation of the dwarf planet of Pluto itself, and is characterised by decorations of Pluto, competitions, parties, and special lectures and education events at Astronist philosophical buildings that focus on the subject of Pluto, and its place in The Cosmos as a whole. This always takes place on 56th Zaarine, which translates to the 5th January in the Gregorian calendar.

Derivatives

Plutonian Day

Plutology - in Astronist Philosophy, specifically within Cosmic Philosophy, the discipline of study concerning the philosophical contemplation of Pluto as a minor planet in The Solar System.

Derivatives

Plutologist

Plutologic

Plutological

Plutologically

Plenary - in an Astronist contextualisation, of both the meetings of The Governing Council and The High Council of The People's Astronist Peacekeeping Order, must be attended by all members in order for it be authorised.

Plerophory - in Astronist Philosophy, the state, or quality of having full confidence, or absolute certainty of an idea, argument, opinion, or theory.

Derivatives

Plerophoric

Plerophorical

Plerophorically

Pneu - in Astronist Philosophy, the philophon for the discipline of pneumovology.

-plu - in Astronist Onomatology, a suffix used for Astronist names, in reference to the dwarf planet of Pluto.

Plu- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the dwarf planet of Pluto.

Pneum - in Astronist Philosophy, the philophon for the discipline of pneumatology.

Pneumatology - an Astronist Subject dealing with the affects of being in space, or being on another planet, or celestial body other than The Earth, on the human respiratory system.

Derivatives

Pneumatologic

Pneumatological

Pneumatologically

Pneumatologist

Pneumovollic View - in pneumovology of Astronist Philosophy, the appellation for the way in which something is viewed as an animate, vigorous, and destinal entity.

Pneumovology - in Astronist Philosophy, also simply known as vology, the discipline of study dealing with the Astronist philosophical approach and contemplations about invisible, or spiritual entities, and related concepts, such as those of ghosts, and other paranormal entities and activities.

Derivatives

Pneumovologist

Pneumovologists

Pneumovological

Pneumovologically

Pneumovollic

Pneumovollical

Pneumovollically

-poch - in Astronist Onomatology, a suffix used for Astronist names, in reference to a cosmical epoch.

Pocket Earth - see Pocket Galaxy.

Pocket Galaxy - in Astronist Rendition, a small palm-sized trinket in the shape of a sphere that is often heavily cosmically ornamented on its external shell, and opens up to reveal a globe within it, that details the major star systems and the largest structures of a galaxy. Other variations of this are a Pocket Earth, Pocket World, or Pocket System, but the most common of which is the Pocket Galaxy version.

Pocket System - see Pocket Galaxy.

Pocket World - see Pocket Galaxy.

Podorian - in Astronist Pedagogy, relating to the method of teaching that makes consistent use of holographic projections and any other visualisations in order to make their point better understood, especially when the subject is more abstract and philosophical.

Derivatives

Podorianism

Podorium - in Astronist Rendition and Architecture, specifically interiors, a moveable platform on which an educator stands to give a lecture, or a lesson about astronomy and cosmology, typically with a holographic image of a galaxy, or some other celestial entity in front of them which they refer to throughout their pedagogy.

Derivatives

Podoriums

Poeticism - in Astronist Philosophy and omnidoxicology, the parts of The Omnidoxy that are written in a metaphorical or a generally more poetic style, which is especially characteristic of the first few discourses of the compendological disquisition within The Omnidoxy.

Derivatives

Poeticisms

Poetiscence - in Astronist Philosophy, the discourses within The Twelve Disquisitions that are noticeably written in a different style from the logiscence. Although their distinction is not define within The Twelve Disquisitions, their address to the topic in question is characterised by a greater sense of poeticism which may also cause convolution amongst readers. One of the main distinguishing factors of poetiscences is the use of the word thou, as well as sometimes featuring the uncommon typology known as object-subject-verb.

Derivatives

Poetiscences

Poetiscent

Poetiscently

Poetiscenic

Poetiscenically

Poetiscenicity

Poetship - collectively relating to the poetic works and legacy of Brandon Taylorian.

Polarium - in Astronist Architecture, as part of gardenry, a type of archway exit from an estate of an Astronist building that is not through the building itself, and is typically on the opposite side of the estate from the building, and is usually traditionally ornamented with cosmical imagery, and patterns.

Derivatives

Polariums

Pollardise - in an Astronist contextualisation, the purposeful cutting back of a subsidiary's operations in order to consolidate funds, and to secure efficiencies.

Derivatives

Pollardising

Pollardiser

Pollardised

Pollardisation

Polish Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Poland.

Politology - in Astronist philosophy, ideology, and jurisprudence, the broad discipline of study concerned with polity and its various elements; philosophical politology deals with the nature and function of polity; ideological politology deals with the development of different polities; jurisprudential politology deals with the applications and implications of polity.

Derivatives

Politological

Politologically

Politologist

Pollonine - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the first daughter of Yemaya and Adentius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Pollonian

PolonoAstronistisation - the specific Astronistisation of Polish society, either in a macro or micro form.

Derivatives

PolonoAstronistisationism

Polyadic - in an Astronist contextualisation, of an Astronist book, having three Astronist characters as the protagonists of a story.

Polyauctorial - the instance in which a book, or document is authored by more than one person.

Derivatives

Polyauctorially

Polyauctoriality

Polyauctorialism - the belief orientation holding that a book or document written by multiple authors is superior to one that is written monauctorially.

Derivatives

Polyauctorialist

Polycyclic - in Astronist Philosophy, a multitude of cycles, especially those which interact with one another.

Derivatives

Polycyclical

Polycyclically

Polycyclicality

Polycyclicism

Polycyclics

Polycyclicist

Polycyclic Cosmology - in Astronist Philosophy, a type of cosmos in which a multitude of cycles have formed to create The Cosmos as we know and understand it to function; the key to polycyclicality is that a multitude of cycles are considered to have interacted to form The Cosmos.

Polymanx - a creature of Astronist Mythology, made up of thousands of tiny men to form a giant entity that can resemble many different legendary creatures.

Polymath - in Astronist Philosophy, a person with long-standing and experienced knowledge in more than five different branches, or subjects within Astronist Philosophy.

Derivatives

Polymathic

Polymathical

Polymathically

PolyAstronism - the presence of different versions and distinct interpretations of Astronism within an area or group.

PolyAstronistisation - the process of Astronistisation in both traditional and revised forms within an area or group.

PolyAstronistisationism - the belief that both traditional and revised forms of Astronistisation are best applied within a group or an area in parallel.

Polyocrator - an interchangeable title of either all or one of The Five Astronist Characters, represented as the guardian(s) of many worlds, especially in Astronist Art.

Polysemy - in an Astronist contextualisation, of an Astronist term, having many different and interchangeable meanings.

Polysexuality - sexually attracted to more than one gender.

Pon - in Astronist Philosophy, the philophon for the discipline of ponerology.

Ponderance - in Astronist Philosophy, the state, fact, or characteristic of pondering.

Derivatives

Ponderancy

Ponderation - in Astronist Philosophy, in the context of philosophical argumentation, a balanced and level-headed argument or proposed concept, theory, or opinion.

Ponderment - in Astronist Philosophy, a term that is closely associated with devotional traditions and practices in the Astronist Tradition, and specifically relates to any time that an individual contemplates a philosophical idea for a longer period of time than they normally would do, and so, by its nature, is very personal and specific to the extent of their own contemplations.

Derivatives

Pondermentation

Pondermental

Pondermentality

Pondermenter

Ponerology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of evil, and the surrounding concepts and theories.

Derivatives

Ponerologic

Pontally

Poppentius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the fourth son and final offspring of Jopten and Signia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Poppentian

Poppentop - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the second daughter of Alexine and Gulgas, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Poppentopian

Popportius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the second and final son of Detrix and Zannan, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Popportian

Popular Philosophy - a category of philosophies, characterised by their mass appeal, adherence, and influence, and their tendency to modify themselves according the audience.

Populationism

- the ideology that there can never be enough humans either on the Earth or in The Universe.
- the political policy championed by The People's Constitutional Company of Jesse Millette in some areas of the world, stating that the people's majority opinion supersedes the opinion of the

government or political party in power, thus placing the highest importance to public referendums.

Populationist - a person who advocates at least one variation of the ideas of Populationism.

Portalment - in Astronist Architecture, a type of door to some Astronist buildings which is characterised by its gigantic size, and is a term typically reserved for double doors that are at least ten feet in height.

Derivatives

Portalments

Portent - in an Astronist contextualisation, of a problem, threat, or event, having future significance.

Derivatives

Portence

Portential

Portraitation - in Astronist Propaganda, the creation of a propaganda piece in a portrait format, typically showing greater detail of the attire, facial expressions, and the other aesthetics of the central figure.

Portrance - in Astronist Architecture, a outdoor structure sometimes considered to be part of gardenry that can be most commonly found at the front of the estate of some larger Astronist buildings, and consists of three archways; the central one typically used for vehicles and the two on either side of this used for pedestrians. The variety of portrances is vast as some can be very large, and even have their own terraces and stairways within them, while others can be affixed to the front of the Astronist building itself, which is why its inclusion into gardenry is somewhat disputed.

Derivatives

Portrances

Portratine - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the first daughter of Azenzor and Annasophia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Portratinian

Portuguese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Portuguese Republic.

Positionings - in Astronist Philosophy, collectively referring to the positions of either different celestial entities, or of one celestial entity throughout the course of its existence, usually in order to derive meaning, purpose, and to ignite contemplation.

Position of Period - an element, also known as a subdivision of The Philosophy of Astronism dealing with the theories, and stances of the ways in which The Philosophy of Astronism has been and is to be implemented in the societies in which it exists in relation to the time period, with special attention given to language, nationhood, the changing state of the philosophy, and the inevitable civilisations of humanity elsewhere in The Cosmos.

Derivatives

Positionist

Positivic - in Astronist Foreign Relations, specifically as part of the diplomatic policy and principle of provisionism, the instance wherein an external entity to The People's Constitutional Company of Jesse Millette has accepted a proposal notion from the Company to establish formal diplomatic relations in alignment with the details of the proposal.

Derivatives

Positivicism

Positivicist

Possident - the owner of something Astronist, such as a rendition, artwork, building, or an antique, especially if it is not owned by The People's Constitutional Company of Jesse Millette.

Postapplication - in Astronist Philosophy, relating to after the cosmoapplication has been conducted.

Derivatives

Postapplicational

Postapplicative

Postcursor - in Astronist Philosophy, a person, concept, or some other entity that comes after another of the same kind.

Derivatives

Postcursory

Postcursors

Postdora - in Astronist Theatre and Dramatics, an open-ended amount of musicals and plays of the Astronist theatrical tradition arranged after the two-hundred plays that are categorised within the predora.

Derivatives

Postdoras

Postdoral

Posterium - in Astronist Architecture, the part of an Astronist philosophical building that is north of the equatorium; the back half of the building.

Derivatives

Posteria

Posteriums

Postfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by the notion that everything that does occur beyond the finality is the most intrinsic to the finality itself; essentially, the consequences of the finality are emphasised in the study of the finality.

Derivatives

Postfinalism

Postfinalities

Postfinalist

Postgenitor - in Astronist Philosophy, a person or thing that comes from something else which is known as a progenitor.

Derivatives

Postgenitors
Postgenitorial

Posthumous - in an Astronist contextualisation, relating to the time period, and all occurrences involving The People's Constitutional Company of Jesse Millette, and wider Millettaria, after the death of Brandon Taylorian.

Derivatives

Posthumeity
Posthumousness
Posthumously

Post-Astronist - relating to that which occurred after the Founding of The Philosophy of Astronism.

PostAstronistisation - the period in a society or group after the process of Astronistisation has been fully enacted.

PostAstronistisationism - the belief that society will improve once Astronistisation has been fully enacted, as opposed to the idea that society should improve as soon as the process of Astronistisation is initiated.

Post-omnidoxical - in Astronist Philosophy and omnidoxicology, relating to the time after which The Omnidoxy is first published and widely disseminated.

Derivatives

Post-omnidoxically

Postphilosophy - in Astronist Philosophy, relating to a time after the ascension of a philosophy in a particular nation.

Postradix Name - a name given to an Astronist character in either a colloquial sense, or for commercial purposes, and is not the official name of the character; an example of which is the Astronist character's name of Oliver which is his radix name, and his postradix name is Ollie as that is used in a colloquial and commercial context only, never in official, academic, or philosophical circumstances.

Derivatives

Postradix
Postradixy

Postrance - in Astronist Architecture, the back door of an Astronist planetarium.

Derivatives

Postrances

Postrizon - in obliviology of Astronist Philosophy, the part of the Event Horizon that exists beyond the actual Event Horizon.

Derivatives

Postrizonal

Postsentient - in Astronist Philosophy relating to the Postsentient Era, the time in human history after the discovery of the existence of sentient life on a world other than The Earth, and succeeds the Presentient Era.

Derivatives

Postsentience

Postsentient Era - see Postsentient.

Post-Taylorian - that which originated after the death of Brandon Taylorian in relation to an Astronist story, symbol, or philosophy.

Postymicity - in Astronist Philosophy, of celestial entity, to exist in behind another celestial so as to be further away from the star of the system, especially characteristic of a trojan planet.

Derivatives

Postymicities

Potentialise - in an Astronist contextualisation, the planning and measuring of a subsidiary's, business operation's, or anything else's potentiality.

Derivatives

Potentialisation

Potentialiser

Potentialisee

Potissmius - derived from Latin, in Astronist Philosophy, one's most favourite concept or aspect of The Philosophy of Astronism, especially the concept that first drew them to the philosophy, and cemented their adherence to the philosophy.

Pourrissement - in Astronist Philosophy, the instance in which a school of thought deteriorates in the extent of its popularity, relevancy, and the quality of its concepts and theories.

Powersome - in Astronist Philosophy, of any entity, extremely impressive and strong, perhaps even divine.

Prabōdhamat Karami - a root term for Sri Lankan Astronism.

Prabod - a follower of the Hindi Indian denomination of The Philosophy of Astronism, known as Prabodhanism.

Derivatives

Prabods

Prabodhanism - also known as Hindi Indian Astronism, and with a large minority of speakers of Odia in the state of Odisha, the largest denomination of The Philosophy of Astronism in India, and is most prevalent in northern India. The denomination attempts to unify the Hindi speaking population and can also be found in Hindi diaspora communities around the world. Prabodhanism is dominant in the Indian states of Manipur, Assam, Sikkim, Bihar, Jharkhand, Odisha, Chhattisgarh, Uttar Pradesh, Madhya Pradesh, Rajasthan, Delhi, Haryana, Uttarakhand, Chandigarh, Himachal Pradesh, and in the disputed territory of Jammu and Kashmir.

Prasvia - a follower of the Belarusian denomination of The Philosophy of Astronism, known as Prasviatliennie'ism.

Derivatives

Prasvian

Prasvias

Prasviatliennie'ism - also known as Belarusian Astronism, the denomination of The Philosophy of Astronism that is exclusively found in Belarus, and in some Belarusian communities in Russia, and other surrounding countries.

Derivatives

Prasviatliennie'ist

Praxis - in an Astronist contextualisation, relating to the practices, or the physical manifestations of The Philosophy of Astronism, rather than the theories, or concepts of the philosophy.

Pre - in Astronist Philosophy, the philophon for the discipline of prerology.

Preamblement - in Constitutional Terminology, the preamble of The Grand Constitution, including specifics to the emboldened text, titles, font, and paragraphing.

Preapplication - in Astronist Philosophy, relating to before the cosmoapplication has been conducted.

Derivatives

Preapplicational

Preapplicative

Precedence - in an Astronist contextualisation, relating to an employee of The People's Constitutional Company of Jesse Millette belonging to a higher rank than other.

Preceptor - a teacher of the precepts of Astration.

Derivatives

Preceptorial

Preceptorship

Precipitancy - in an Astronist contextualisation, relating to the suddenness or rashness of action conducted by The People's Constitutional Company of Jesse Millette.

Precis - in an Astronist contextualisation, relating to the summary of an Astronist book, documentation, or other literatures.

Precosmic - in Astronist Philosophy, relating to a time before the creation and existence of The Cosmos.

Derivatives

Precosmical

Precosmically

Precosmos

Precreation - in Astronist Philosophy, that which is created before the subject and context of the word is created, especially relating to The Big Bang.

Derivatives

Precreated

Precreational

Precursor - the colloquial term for the Precursory Edition of an Astronist book.

Precursories - in Astronist Philosophy, collectively referring to precursors of any kind, though most commonly in a cosmic sense.

Derivatives

Precursorly

Precursory Edition - also colloquially known as the precursor, an edition of an Astronist book that is made available to purchase before the first edition has been officially published, and does not include a blurb, contents page, inside illustrations, the title on the book spine, promotional materials for future books, and does not include any other types of branding such as sigils, logos, or Company branding.

Predecessor - in Astronist Ornamentation, especially relating to ornamental archives, the specific ornament, or ornamental style that is confirmed to be chronologically preceding another.

Predictional - in Astronist Philosophy, a thing predicted; a forecast; Predictional Astronism.

Derivatives

Predictionally

Predictional Astronism - in Astronist Philosophy, a branch of knowledge and school of thought within The Philosophy of Astronism characterised by its focus on the future, particularly the concepts and philosophies originating from within The Omnidoxy that are foresighted, or predicted.

Derivatives

Predictionalism

Predictionalist

Predemonition - in Astronist Philosophy, the process of placing a greater emphasis on the occurrences before an event in The Cosmos rather than on the event or phenomena itself.

Derivatives

Predemonitional

Predemonitionally

Predemonitionism

Predemonitionist

Predora - in Astronist Theatre and Dramatics, a group of fifty plays and musicals written by Brandon Taylorian arranged after the first one-hundred and twenty plays and musicals of the Astronist theatrical tradition, known as the oridora.

Derivatives

Predoras

Predoral

Preodoxy - in Astronist Music, the first great stave of a piece of music.

Derivatives

Primordiologist

Principle of Exangeney - in Astronist Philosophy, the appellation encompassing the twin concepts of exangenation and disexangenation.

Principle of the Mind - in Astronist Philosophy, particularly within Sensory Philosophy, the appellation for the notion that the human mind is the necessary factor in all sensory philosophical applications for each of these senses is wholly dependent upon the activity, capacity, and ability of the mind.

Principles of Advancement, The - the eighth of The Twelve Grand Principles of The Philosophy of Astronism, relates to the worldview of Astronist thought, and is considered to be one of the most defining principles of them all due to its more radically charged expressions of distrust for current the worldviews, and superimposes the ideas of change, neuroscience, choice, freedom, and many others into the new worldview and futureview of humanity, which is the central-most purpose of this principle.

Principles of Aid & Stewardship, The - the third of The Twelve Grand Principles of The Philosophy of Astronism, relates to the importances of aid, as the foremost unifier of humanity, and stewardship, as the purpose of humanity on The Earth as distinct from the purpose of humanity in The Cosmos, and discusses these concepts in relation to ethics, morality, worldview, and unification.

Principles of Ambition & Enlightenment, The - the fifth of The Twelve Grand Principles of The Philosophy of Astronism, relates to the foundational natures of ambition and enlightenment. Ambition as the intrinsic, yet rare nature of humanity, and enlightenment as the state of knowledge, duty, and interest, and its natural state in constant motion with the surrounding world, and its fragile state in full synchrony with human emotion and mentality.

Principles of Cosmic Exploration, The - the seventh of The Twelve Grand Principles of The Philosophy of Astronism, relates to a practical worldview of The Cosmos, and how humanity is to technological, philosophical, socially, and mentally advance in order to accomplish the exploration and intelligence of The Cosmos in The Universe, and typically holds a strong cosmocentric and universocentric viewpoint, as opposed to an anthropocentric viewpoint.

Principles of Imagination & Freedom, The - the twelfth and final of The Twelve Grand Principles of The Philosophy of Astronism, relates to the essences of humanity, and the qualities of humanity that make us what and who we are. The immense importance of imagination and creativity are discussed, along with Divine intercession, belief, faith, and duty, as well as, to end The Grand Centrality, the nature of death, life, and the purposes of each in relation to the human and the humanity.

Principles of Justice & Patience, The - the fourth of The Twelve Grand Principles of The Philosophy of Astronism, relates to the topics of justice, as the fundamental boundary of all humanity's laws and morality, and patience, as a key virtue that must be adhered to if one wishes to progress with one's ambitions in the name of humanity's progression and betterment.

Principles of Knowledge & Ethics, The - the ninth of The Twelve Grand Principles of The Philosophy of Astronism, relates to the concept of knowledge, what it is, how it exists, what humanity should do with or how to come across it, and also references the "Sequences of Thought". In the second half, Astronist Ethics is introduced here, as the concept of the unified morality is formed to create a system under full communion with human nature, and in full adherence to the necessary and eventual progressions of humanity, and incorporates the worldview and futureview into this ethicality.

Principles of Ontology & Perception, The - the sixth of The Twelve Grand Principles of The Philosophy of Astronism, relates to the nature of existences and what it means to be in existence, and the differences between reality and existence. Also, relates to the ideas of the ways in which to experience the world around oneself, and the subsequent theme of perspectivity, and its various infinities.

Principles of Peace & Acceptance, The - the eleventh of The Twelve Grand Principles of The Philosophy of Astronism, relates back to the world and society at the time of writing, and discusses the nature of the religions, and their actions, as well as the dogmatisms of belief, faith, and divinity, and is considered to be the most irreligious principle of them all. In addition, the nature of humanity relating to peace is discussed in full, and conclusions are made regarding the inevitabilities of humanity.

Principles of Space & Time, The - the tenth of The Twelve Grand Principles of The Philosophy of Astronism, relates to the concept of space-time, and the possibilities of existence, and discusses the various entities of The Cosmos and the mysteries they hold, and the answers they may bring to us. This principle also discusses the nature of time and space, and their codependent relationship, and how affects perspectivity and the relationship between The Cosmos and The Universe, and what could exist beyond The Universe.

Principles of The Aesthetic Cosmos, The - the first of The Twelve Grand Principles of The Philosophy of Astronism, relates to the central concept that The Cosmos is of ultimate importance

to the discovery of the universal mysteries, and discusses the nature, patterns, existence, and purpose of The Cosmos, and its relationship with humanity, and The Universe.

Principles of The Logical Cosmos, The - the second of The Twelve Grand Principles of The Philosophy of Astronism, relates to the scientific, evidential, and more realistic views of The Cosmos and its nature, patterns, existence, and purpose in relation to mathematics, physics, cosmology, and astronomy, and is the set of principles most based on rationality and reason, as opposed to wonderment, faith, and Divine intercession.

Principling - in Astronist Philosophy, the present participle of principle; to principle something, so as to establish it as proper and true.

Principlism - a school of thought in The Philosophy of Astronism that focuses on the following of a set of clearly marked principles, especially of a philosophy, and especially in contrast to following a narrative-based, or convoluted religious text.

Derivatives

Principistic

Principalist - an individual holding that the beliefs of Principlism in philosophy are paramount.

Principalist Philosophy - a branch of philosophy, of which The Philosophy of Astronism is the founder, whereby a set of principles are centrally positioned and given the greatest importance, especially over a narrative-based set of ideas.

Principal Planet - the planet or moon within a planetary system that holds the most significance, in terms of lifeforms, wealth, habitability, and industry.

Prinscinity - in Astronist Architecture, the typically walkable and balustraded terrace atop an archway of a Millettenium, also featuring its own pavilion structure atop itself, and is very heavily ornamented.

Derivatives

Prinscinities

Priorance - in Astronist Architecture, the front door of an Astronist planetarium.

Derivatives

Priorances

Priority - in an Astronist contextualisation, that topic of debate that must be discussed during a particular Astronist congressional session, or another type of meeting, especially due to the immediacy of its consequences.

Priscence, The - in Astronist Music, the first musical piece of the amassory known as The Cosmicusy titled Cosmical Wisps.

Prismatory - in Astronist Architecture, usually a series of around five or more seats embedded into a wall, with encrusted and ornamented niches featuring finials, and pinnacles atop of them.

Derivatives

Prismatories

Private - in an Astronist contextualisation, relating to private companies as part of The People's Constitutional Company of Jesse Millette, private companies invested in by the Company, or private companies working in close relation and cooperation with and to the Company.

Private devotion - in Astronist Philosophy, particularly within Cosmic Devotion, also known as personal devotion, the practice of Cosmic Devotion by an individual in the privacy of their own room, or home rather than with friends, family members, or the public, or in a public place.

Privation - in an Astronist contextualisation, of an Astronist philosophical school, branch, or denomination, having lost a once widely admired quality, or attribute.

Derivatives

Privational

Pro - in Astronist Philosophy, the philophon for the discipline of prospology.

Probate (Cosmos) - an Astronist Subject dealing with the issues of probate and its various interpretations and laws across different governments beyond The Earth on other planets and celestial bodies.

Derivatives

Cosmic Probate

Probity - in an Astronist contextualisation, of an individual, holding an exceptionally strong and deep connection to The Philosophy of Astronism.

Derivatives

Probital

Probitor

Probitism

Procedural principle of devotion - in Astronist Philosophy, a principle holding that only the cosmic devotions mentioned within The Omnidoxy should be practised, and opposes the normative principle of devotion which advocates for conducting cosmic devotions both established and those unestablished by The Omnidoxy.

Proceedings - in an Astronist contextualisation, relating to those procedures, and actions undertaken by The People's Constitutional Company of Jesse Millette especially after a major problem, threat, or crisis has been resolved.

Derivatives

Proceedence

Proceedences

Procella - in Astronist Philosophy, a period in the history of a philosophy wherein many disputes regarding the interpretation of the philosophy were conducted, and is especially occurrent during the earlier developmental stages of a philosophical tradition, or movement.

Procese - in Astronist Philosophy, an alternative plural for process.

Processal - in Astronist Philosophy, especially used in a Cosmo-alchemic context, relating to a process of Cosmic Alchemy, an example of which would be selenation.

Derivatives

Processality

Processally

Procession - in Astronist Ornamentation, a repetitive ornamental pattern that points in one direction.

Prochainement - in Astronist Philosophy, a prophecy proposed by a debater, or philosopher of the Astronist Tradition about the future of the philosophy, or of one of its schools of thought, disciplines, concepts, or branches.

Procommon - collectively known as procomion, a card, book, trinket, or another object that is free for visitors to an Astronist philosophical building to take with them when they leave, and typically exists in the form of a card on which reflective questions and passages are printed, and to which another person the card is to be given in order to show another person what the visitor to the philosophical building has learned during their visit.

Derivatives

Procomion

Procommonal

Procommonally

Procreation - in an Astronist contextualisation, the depiction, or representation of procreational acts in Astronist art, literature, and wider culture, especially so in Mystology.

Prodigary Sculpture - in Astronist Architecture, a rare class of giant sculpture, typically depicting an Astronist character, or something cosmical, and is usually at least twenty meters in height.

Prodigy - in an Astronist contextualisation, an individual into which The People's Constitutional Company of Jesse Millette invests.

Prodoxy - in Astronist Music, the second great stave of a piece of music.

Derivatives

Prodoxies

Prodoxic

Prodox

Productism - a school of thought in The Philosophy of Astronism centring on the concept that each entity is a product of something greater, and all entities are products of The Divine. This concept holds that The Universe is a product of The Divine, The Cosmos is a product of The Universe, The Earth is the product of The Cosmos, and humanity is a product of The Earth, and attempts to clarify the insignificance of humanity when compared to The Cosmos in The Universe.

Derivatives

Productist

Productistic

Professionalisation - also known as academicisation, the process proclaimed by Astronist Institutions to have occurred regarding philosophy in general that focuses on the idea that

throughout its modern history, philosophy has become less and less involved and relevant in societies, governances, cultures, and personal belief orientations, and has therefore become obscure and is perceived to only be understood and used in a scholarly, or academic circumstance.

Derivatives

Professionalise
Professionalised

Professionality - the degree to which, or the quality of an individual, an organisation or a company acting professionally.

Profit - in an Astronist contextualisation, relating to the different interpretations of profit, not just money, but in reputation, fame, and ethics.

Profundum - in Astronist Philosophy, an in-depth and complex concept within The Philosophy of Astronism that requires deep and long-established experience and knowledge of the philosophy and its context in order to understand it.

Progenitorial Collapse - in Astronist Philosophy, the appellation for the instance in which celestial entities collapse as progenies of The Cosmos, especially so as to attribute their collapse as having an affect on the cosmical periphery's stability.

Progeny - in Astronist Philosophy, specifically within Cosmic Philosophy, one of the most regularly used nouns and collectively refers to all the celestial entities that exist within The Cosmos as considered to be the relational descendants of The Cosmos.

Derivatives

Progenic
Progenial
Progenials
Progenially
Progenical
Progenically
Progenity
Progeniture
Progenitorial

Progradial - in Astronist Philosophy, relating to an astronomical prograde.

Derivatives

Progradially
Progradiality

Progressionism - a branch of knowledge in The Philosophy of Astronism concerning the ultimacy of progression in humanity at all cost, but is also criticised for its vagueness due to the fact that one individual's version of progression may differ from that of another's, and so, Homogeneous Progressionism is often called upon for a single vision of progression.

Derivatives

Progressionist
Progressionistic
Progressionistically

Progressionarian

Progressivity - in Astronist Philosophy, an instrument of study in oppositism to regressivity, that is applied to the Astronist Tradition's understanding of what is progressive which can generally be said to include all notions that support cosmocentricity, the reascension of philosophy, educentrism, and the centralisation of astronomy in society.

Derivatives

Progressivities

Pro-knowledge - in Astronist Propaganda, the stance held that knowledge and its representation should be the central attribute to new propaganda, especially above over traditional attributes such as that of politics, military, and religion.

Prolegomenon - the introduction of a critical essay, or book about anything relating to Millettaria.

Derivatives

Prolegomenary

Prolegomenous

Prolegomenously

Prolegomenonic

Prolepsis - in Astronist Philosophy and Argumentation, the anticipation of an opponent's argument and answering it before it can be made.

Derivatives

Proleptic

Proleptical

Proleptically

Prolepticality

Proliferity - in Astronist Philosophy, the instance in which celestial entities are regularly applied to a particular instrument of study rather than that to which they are not familiarly applied which is known as inproliferity.

Prolong - in an Astronist contextualisation, the extension of an invested project belonging to a subsidiary of The People's Constitutional Company of Jesse Millette, especially so after the traditional truncated period of three years according to the Astronist Accounting methodology.

Derivatives

Prolongation

Prolongative

Prolusion - in Astronist Lexicography, the segment of a definitional entry that includes a short summary of the defined word, so as to expand upon the initial definition.

Derivatives

Prolusional

Prolusory

ProAstronistisation - in favour of the process of Astronistisation, either in one's personal life, or in wider circumstances, such as within a society, nation, or group.

Derivatives

ProAstronistisationism

Prominentmost - in Astronist Philosophy, that which is most important, highest in rank, or most prevalent in popularity, or distribution.

Prominise - in Astronist Philosophy, to place one concept in front of other concepts in correspondence to its perceived importance.

Derivatives

Prominising

Prominised

Prominisation

Prominisational

Prominisationally

Prominitive

Prominitively

Prominism - in Astronist Philosophy, the school of thought and belief that only the most prominent concepts of each discipline are worth studying and contemplating by philosophers in order to grasp a widespread understanding of the Astronist Tradition.

Derivatives

Prominist

Prominists

Proministic

Proministically

Promission - in Astronist Philosophy, a series of instrumentations, especially when conducted across multiple disciplines of philosophical study.

Derivatives

Promissions

Promissional

Promissionally

Promissionist

Promontia - collectively relating to the entirety of promontories worldwide, or throughout a single country.

Promontology - a major branch of Naology, the study of the management, preservation, construction, and categorisation of Astronist promontories worldwide, and in particular regions, and countries.

Derivatives

Promontologist

Promontologic

Promontological

Promontologically

Promontorium - in Astronist Architecture, the official term for a promontory, especially one that is larger, and more ornately cosmically ornamented.

Promontory - in Astronist Architecture, a kind of remote observatory, especially one built or sponsored by The People's Constitutional Company of Jesse Millette, and is distinctly scientific rather than philosophical, and is typically not open to the public, yet too, is architecturally distinct and ornate.

Derivatives

Promontories

Promontory Day - a commemorative day in The Grand Astronist Calendar whereby people attempt an organised walk, or hike to their closest promontory, which are usually located in the hills, the countryside, or even the mountains. This day is commemorated on 21st Oliverine in The Grand Astronist Calendar, which translates to 27th July in the Gregorian calendar. The walks and hikes associated with Promontory Day may not take place on the actual Promontory Day if it is a weekday, or working day, but instead, will be organised for the closest weekend, or holiday after Promontory Day.

Promontory Visual Arts - the specific ornamentation, art, architectural styles, and renditions found exclusively in promontories.

Promulgate - in an Astronist contextualisation, make an Astronist product, or philosophy widely advertised, or known through an area, or by a certain group of people.

Derivatives

Promulgation

Promulgator

Promulgatory

Promulgative

Proof - in an Astronist contextualisation, the finding of a constitutional clause in order to prove and secure one's opinion, or statement, especially in an internal dispute, or during an Astronist congressional session.

Proofing - in Astronist Ornamentation, the process of reviewing an ornamentation before an endorsement, and attempting to detect any mismatching in the interlocation, or any other mistaken appurtenance.

Prop - in Astronist Philosophy, the philophon for the discipline of proplydics.

Propaganda - a broadened meaning, any message or idea distributed by a company, government, religion or any other entity.

Derivatives

Propagational

Propagandaism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that the propaganda of the nation state's philosophy, or ideology, should be respected, understood by all peoples, and also acknowledged that it is biased in its nature, but its purpose is to lead to the achievement of the perfection of the nation state, and most typically refers to Astronist Propaganda in its many forms, and variations.

Propagated Philosophy - a term that is closely associated with that of Organised Philosophy, a philosophy that is actively commercialised and disseminated rather than occupying a static state.

Proper - in an Astronist contextualisation, an informal, or colloquial term for the backing up an opinion by constitutional means, or from the principles of constitutionality.

Property Law (Cosmos) - an Astronist Subject dealing with the study of law relating to property ownership and rights on a multitude of planets, or across a multitude of governmental areas on the same or different planets.

Derivatives

Cosmic Property Law

Proph - in Astronist Philosophy, the philophon for the discipline of prophetics.

Prophecies - the sixth era in Astronist Mystology, a collection of stories usually, but not always, set in a pastoral world, denoting the lives of prophetic Astronist characters and are part of the Astronist Universe, yet are not considered canonical.

Prophetics - a major discipline of Astronist Philosophy dealing with the notions and contemplations involved with the future of humanity from the perspective of the Astronist Tradition, as outlined in a series of prophecies.

Derivatives

Propheticist

Propheticists

Propheticistic

Propitiation - in Astronist Philosophy, of a philosopher, gaining the favour of humanity by doing something that betters or advances humanity.

Derivatives

Propitiative

Propitiator

Propitiatress

Propitiational

Propitiatory

Propitiationism - in Astronist Philosophy, the belief orientation holding that sentient beings must do all they can to stay in alignment with the cosmical order so that they please it and can therefore remain within the cosmical system and not be categorised as chaotic; being in alignment with the cosmical order and system is known as transcorrespondence.

Derivatives

Propitiationist

Propitiationistic

Protophilosophy

- in Astronist Philosophy, a philosophy that is considered to not have a fully developed system of inquiry, especially when in comparison to other philosophies. Other philosophies may describe a philosophy as protoic in order to undermine it.
- an original, or primitive version of a philosophy.

Derivatives

Protophilosophic
Protophilosophical
Protophilosophies

Protoplanet - in Astronist Philosophy, a planetary classification that is in its embryonic stage of develop.

Derivatives

Protoplanets
Protoplanetary

Protos - in protology of Astronist Philosophy, the earliest and most primitive state of a celestial entity and relates to the fact and instance of such a period in the celestial's existence.

Prototypical Millettese - relating to the entire set of vocabulary originating from the first edition of The Grand Lexicon of Astronology, and is typically referred to in Astronist Lexicography.

Protrusery - in Astronist Architecture, a type of rounded protrusion common in many Astronist buildings, typically used as a small seating area, and may be similar to a bay window.

Derivatives

Protruseries

Provenance - in an Astronist contextualisation, relating to the concept of Partial Provenance, the first part of which describes the inherent, intrinsic, and eternal physical ownership of The People's Constitutional Company of Jesse Millette over the entirety of Millettaria, and all Astronist works of creativity. The second part of which describes the eternal Divine, or non-physical, ownership over the entirety of Millettaria by God, or The Divine, or the creator of The Universe.

Derivatives

Provenancial
Provenanciality
Provenancism

Provincewide - in an Astronist contextualisation, relating to the operations of The People's Constitutional Company of Jesse Millette throughout a particular province of a country, especially in the People's Republic of China.

Provisionism - in Astronist Foreign Relations, the policy and principle of diplomacy wherein The People's Constitutional Company of Jesse Millette is constitutionally obligated to make a proposal of diplomatic relations with all desired external, or foreign entities, but the choice of acceptance is left with that external entity, and their decided choice is considered a reflection of their own

inability, or repudiation, not that of The People's Constitutional Company of Jesse Millette as the proposer. Those of which whom accept are described as positivic, and those of which whom do not accept are described as neglactic. It is important to note that with the policy of provisionism, the proposal of diplomatic relations must always be kept open even if the recipient does not accept it.

Derivatives

Provisionist
Provisionistic
Provisionistical
Provisionistically

Proxemia - in Spacial Psychology of Astronist Philosophy, the state in which a human has never lived, or lengthily resided on The Earth, but was actually born on The Earth, though left soon after their birth.

Derivatives

Proxemian
Proxemians

Proximatmost - in Astronist Philosophy, that which is closest to something, either physically, or conceptually.

Proximates - in Astronist Philosophy, to either physically or conceptually move two entities closer together.

Prudenter - a person that has been an adherent of The Philosophy of Astronism for more than twenty years.

Derivatives

Prudentress

Pryor - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Pryorian
Pryoric

Pseudocosmology - in Astronist Philosophy, a type of cosmos and cosmology that extremely divorces itself from the standard cosmology of The Cosmos, as is outlined by the Astronist philosophical tradition.

Derivatives

Pseudocosmologic
Pseudocosmological
Pseudocosmologically

PseudoAstronistisation - a version of Astronistisation that is purporting to be the best, or truest form, but is not really so, especially a version that is not supported or commissioned by The People's Constitutional Company of Jesse Millette.

PseudoAstronistisationism - the belief that the versions of Astronistisation that are not supported or commissioned by The People's Constitutional Company of Jesse Millette are in fact the truest and most beneficial versions for society.

Ptoch - in Astronist Philosophy, the philophon for the discipline of ptochology.

Ptochology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of poverty, and the surrounding concepts and theories.

Derivatives

Ptochologist

Ptochologic

Ptochological

Ptochologically

PTP - part of The Standard Astronomical Calendar, the acronym standing for Prior To Peregrination, the period of time before the Exploratory Commencement, before the first human being went into outer space, and is also known as the Nescient Era.

Public

- in an Astronist contextualisation, relating to the public subsidiaries belonging to The People's Constitutional Company of Jesse Millette, the public companies in full relations and alliances with the Company, and that which both the public company, and the Company itself invest in each other for symbiotic benefit.
- in an Astronist contextualisation, relating to the relations between The People's Constitutional Company of Jesse Millette and the public of a country.

Public Buildings - also known as tectonology, a major Astronist Subject dealing with the study of public buildings and their various usages, architectural styles, and heritages.

Public philosophy - a branch of Astronist Philosophy dealing with the engagement and dialogue of The Institution of The Philosophy of Astronism, especially with the wider society, as part of social movements, and with organisations. Essentially, public philosophy attempts to understand and address the present troubles of a particular society in an effort to resolve them through the charities associated with The Philosophy of Astronism.

Puerto Rican Iluminación - the root term for Puerto Rican Astronism.

Puerto Rican Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in Puerto Rico.

-pul - in Astronist Onomatology, a suffix used for Astronist names, in reference to the pulsars of The Cosmos.

Pul- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the pulsars of The Cosmos.

Pulchritism - in Astronist Art, the perfectionism and excessive beautification of a female Astronist character, or simply an overt emphasis on their appearance rather than any of their other characteristics.

Pulchritist

Pulchritistic

Pulchritistical

Pulchritistically

Pulchritudinous

Pulsaration - in Astronist Ornamentation, the specific depiction of a pulsar in a rotational form, by using shadowing, blurriness, and stretching colours.

Pulsar Day - in The Grand Astronist Calendar, a day of commemoration and celebration dedicated to the specific wonderment, adoration, and laudation of pulsars in The Cosmos, and is characterised by decorations of pulsars, and special lectures and education events at Astronist philosophical buildings that focus on the subject of pulsars. This always takes place on 61st Oliverine, which translates to the 5th September in the Gregorian calendar.

Pulsarial - in Astronist Philosophy, relating to pulsars.

Derivatives

Pulsaric

Pulsarical

Pulsarial Seasons - in Astronist Philosophy, particularly within seasonology, the seasons of formation associated with pulsars, as derived from the Formational Seasons.

Pulsaric Formation - a branch of formatology, and an extension to Stellar Formation, dealing with the formations of pulsars from a purely philosophical perspective.

Pulsarine - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of June.

Pulsarnym - a type of term relating to the name given to a pulsar as appointed by an Astronist organisation.

Derivatives

Pulsarnymic

Pulsarnymity

Pulsartius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the fourth son of Cosima and Celetius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Pulsartius

Punction - in Astronist Attire, and more rarely so in Astronist Garmentry, a type of tiara that is cosmically ornamented, and is distinguished by the way that its teeth slot into a woman's hair which is from where the item derives its name, and is typically paired with another headwear accessory.

Punctulary - in Astronist Architecture, two typically hollow and wide columns beside an archway, usually made distinct by the surrounding smaller columns, and is always heavily ornamented.

Derivatives

Punctularies

Pupillage - in an Astronist contextualisation, collectively relating to the pupils of Astronist phrontisteries worldwide.

Pur - in Astronist Philosophy, the philophon for the discipline of purpology.

Purecentre - in Cosmic Art, as a derivation of Astronist Art, a term describing the very centre of a depicted star.

Derivatives

Purecentral

Purecentrality

Pure Divinity - in Astronist Philosophy, that which is directly Divine rather than indirectly Divine as part of the notions within productism; that which is perceived to be closest to divinity.

Purement - in Astronist Philosophy, that which is considered to be the purest version of The Philosophy of Astronism, or of a particular school of thought, discipline of study, or concepts.

Derivatives

Puremental

Purementally

Purementality

Puristic Phantomism - in Astronist Philosophy, a branch of, and an approach to phantomism holding that an adherence to phantomism is the greatest way of uncovering humanity's ignorance about The Cosmos, known as Anthropic Vacancy, in order to achieve that which is appellated as The True Cosmos.

Puristicism - in Astronist Philosophy, an approach to Cosmic Art, Cosmic Architecture, and the wider cultural sphere of The Cosmos proclaiming that neither The Cosmos itself nor its progenies should be embellished in their depictions, but should only be represented in their true, unaltered, and unornamented forms.

Derivatives

Puristicist

Puristicistic

Puristicistically

Puristine - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the fourth and final daughter of Aleece and Teodorin, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Puritianian

Purpii - a term used only in Equational Philosophy, and denotes the plural for purposivity.

Purplence - in Cosmic Art, as a derivation of Astronist Art, a purple theme.

Derivatives

Purplencial

Purplenic

Purpology - the major subdiscipline of study in Astronist Philosophy dealing with the overall purpose of existence, as well as the nature of purpose, and its application in philosophical concepts and theories.

Derivatives

Purpologist

Purpologists

Purpologic

Purpological

Purpologically

Purposity - a major instrument of study of The Philosophy of Astronism dealing with the inherent purpose(s) of something, whether that be a person, a celestial entity, some abstract theory, or the purpose of a philosophy itself, or any one of its denominations.

Derivatives

Purposities

Purpositism

Purposation

Purposational

Purposatory

Purview - in an Astronist contextualisation, the scope and extent to which a threat, or problem has caused concern to the employees, diplomats, or executives of The People's Constitutional Company of Jesse Millette, especially when expressed during a meeting, or during an Astronist congressional session, or during a summit.

Derivatives

Purviewance

Purviewation

Purviewancy

Pyr - in Astronist Philosophy, the philophon for the discipline of pyronics.

Pyronics - in Astronist Philosophy, especially in Cosmic Philosophy, the discipline of study dealing with the heating up of something, or the return of something to its original, normal, or functional temperature, and most often relates to the increasing of a human's body temperature to a normal and functional state after being in a state of cryonic deep-freeze, especially for a journey in space.

Realignmental

Realignmentality

Realignment

Reappoint - in an Astronist contextualisation, the official term for the process of choosing and selecting a replacement for an executive of The People's Constitutionality of Jesse Millette.

Derivatives

Reappointer

Reappointment

Reappointmental

Reapportion - in an Astronist contextualisation, the official process wherein funds are withdrawn and redistributed by The People's Constitutional Company of Jesse Millette, typically due to error, or some consequential issue.

Derivatives

Reapportionment

Reapportionmental

Rearchitect - in Astronist Architecture, the process of re-envisioning, or upgrading an Astronist building to a higher level, such as from a planetarium to an observatory, by adding certain characteristics which would make it class as such.

Derivatives

Rearchitecture

Reascensionism - in Astronist Philosophy, the belief in the prophecy that philosophy will regain its place as a societal force and cultural driver after being diminished by other drivers such as ideology, religion, and materialism.

Derivatives

Reascensionist

Reascensionistic

Reascension of Philosophy - in Astronist Philosophy, the appellation for the first stage of The Astronomic Revolution prophesied by the Astronist Tradition wherein philosophy regains a central role in all of the societies of humanity and is expected to stay this way by the careful management of The Institution of The Philosophy of Astronism.

Reassemble - in an Astronist contextualisation, the official and typically mandatory return of the members of the Astronist Congress to discuss an issue of immediacy, especially when not long has passed since the previous congressional session.

Derivatives

Reassemblément

Reassembly

Reassertion - in an Astronist contextualisation, the official action wherein The People's Constitutional Company of Jesse Millette remains in a certain stance on an issue that gathers considerable backlash.

Derivatives

Reassertional

Reassertor

Reassign - in an Astronist contextualisation, the official action wherein an employee of The People's Constitutional Company of Jesse Millette, or any one of its subsidiaries, is assigned with a new role, especially one that is distant from that which they were first employed to do.

Derivatives

Reassignment

Reassignmental

Rebirth Cosmos - in Astronist Philosophy, a type of cosmos in which The Cosmos is committed to an eternal rebirth, and is inspired by the notions of autocreacionism.

Rebirthing - in Astronist Philosophy, the practice of systematically reviewing, changing, and reintroducing a concept and theory after its degradation or obscuration from the wider philosophical world.

Derivatives

Rebirthed

Rebondissement - in Astronist Philosophy, a type of radical revival movement within an Astronist philosophical school of thought, or of a denomination or branch of The Philosophy of Astronism itself.

Recadrage - in Astronist Philosophy, the process of refocusing a school of thought towards a new topic, or endeavour in the hope of securing its revival in popularity.

Recantation - in an Astronist contextualisation, the instance in which The People's Constitutional Company of Jesse Millette revokes a formerly held view, or stance on a particular issue, especially if such a stance is discovered to be unfounded, or evidence is gathered that does not support it.

Derivatives

Recantational

Recapitulate - in Astronist Philosophy, the instance in which one restates their belief, or argument during a philosophical debate.

Derivatives

Recapitulation

Recapitulatory

Recapitulative

Receivance - a benefit gained by being a paying member of an Astronist organisation, and are usually introduced on a monthly basis at the beginning of each month, the first of such schemes was the members' zone of the Astronism Archive.

Derivatives

Receivances

Recency - in an Astronist contextualisation, relating to events or activities relevant to The People's Constitutional Company of Jesse Millette that have occurred in the last month.

Derivatives

Recencies

Recencial

Recension - in an Astronist contextualisation, the revised edition of an Astronist book, documentation, or another piece of Astronist literature.

Derivatives

Recensional

Recession - in an Astronist contextualisation, a period of an unprecedented decline in the revenues, reputation, profits, or in the relations of The People's Constitutional Company of Jesse Millette.

Derivatives

Recessional

Recessive

Recipient - in an Astronist contextualisation, an individual who receives any sort of Astronist reward, or honour.

Reciprocative - in Astronist Philosophy, relating to the instances of reciprocation in The Cosmos.

Derivatives

Reciprocatively

Reciprocatory

Reciprocity - in Astronist Philosophy, an instrument of study dealing with the reciprocations found in the functionalities of some celestial entities, and those which can be derived from cosmical entities, or from concepts.

Derivatives

Reciprocies

Reciprology - a discipline of study in Astronist Philosophy dealing with the reciprocal nature of certain celestial entities in The Cosmos, and the nature, purpose, and structure of reciprocity from a philosophical standpoint, as well as the discussion of the concept of mutual benefit, and The Symbiotic Cosmos.

Derivatives

Reciprologist

Reciprologic

Reciprological

Reciprologically

Recitation - in Astronist Ornamentation, the depiction of a shape within the same shape.

Recite - in Astronist Philosophy, relating to the preference of repeating insentensations of The Omnidoxy as a form of philosophical practice, enknowledgegement, and devotion.

Recognise - in an Astronist contextualisation, the official action wherein The People's Constitutional Company of Jesse Millette identifies something for what it truly is.

Reconcentrate - in Astronist Philosophy, to move one's concentration from one subject to another, either physically with regards to celestial entities, or conceptually.

Derivatives

Reconcentration

Reconcentrational

Reconcentrating

Reconcentrated

Reconfigure - in an Astronist contextualisation, the hugely arduous and complex process of overhauling an Astronist business, or governmental agency, in order to restructure and devise a new vision for its operations.

Derivatives

Reconfiguration

Reconfigurative

Reconfiguratively

Reconfigurational

Reconstituted Astronism - a broad, and most typically derogatory, term for any school, sampana, branch, or denomination of Astronism that does not recognise, or does openly oppose, the authority of The Institution of The Philosophy of Astronism, or that claims to hold Astronist thought at the central of its philosophy, but not wholly incorporate The Philosophy of Astronism in some way, or that claims to be a restorative version of Astronism.

Reconstitucionalise - in an Astronist contextualisation, an instance in which the entirety of, an article of, or just a small part of The Grand Constitution of The People's Constitutional Company of Jesse Millette is forced to change, and also involves the analysis into the consequences of such a change to the Company and its operations, as well as to wider Millettaria.

Remersivity

ReAstronistisation - the process of reimplementing and re-evolving something back towards Astronist methodology, ideology, or philosophy, after a movement away from such Astronist ideas.

ReAstronistisationism - the belief that the movement back towards Astronist methodology, and philosophy is the only way to save one's nation or society from poverty, violence, and miseducation.

ReAstronistisatiophobia - the fear that a movement back towards Astronist methodology, and philosophy will lead to national and societal ruin.

Remunerate - in an Astronist contextualisation, the specific payments made, or the funds set aside to pay for the architectures, constructions, monuments, and buildings, as well as the maintenances of these.

Derivatives

Remunerator

Remuneration

Remunerative

Remuneratively

Rén - in Mandarin Chinese, the term given for a human being.

Renascent - in an Astronist contextualisation, relating to the regaining of popularity of an Astronist book, or other literature, especially after a drop in popularity.

Rendement - in Astronist Philosophy, relating to the extent of the contributions a particular philosopher has made to the Astronist Tradition over the course of his or her career.

Render - in Astronist Architecture, a term describing the entire process of planning, designing, and constructing an Astronist building.

Derivatives

Rendering

Renderation

Rendezvous - the point on a mission patch, or spacecraft emblem, in which the plate meets the trajectory.

Rendition - see Astronist Rendition.

Derivatives

Renditional

Renditive

Renditively

Renditivity

Renditional store - see renditory.

Rendition Theory - as a subject derived from Astronist Rendition, and a sister subject to Architectural Theory, and Art Theory, the study and critical discussion of the ways in which an object, or ornamented is encrusted with ornamentations, and is usually accompanied by a critical essay, or lecture on the crafting of such an object.

Renditory - in Astronist Rendition and Philosophy, another term for a renditional store, a shop in which renditions associated with The Philosophy of Astronism, one of its denominations, or one of its constituents are sold.

Derivatives

Renditories

Renege - in an Astronist contextualisation, relating to a hostile entity that once was an ally, or good relation of The People's Constitutional Company of Jesse Millette.

Rénkǒu - in Mandarin Chinese, the term given for population, or the population of people who associate themselves with an Astronist philosophy.

Rénlèi - in Mandarin Chinese, the term given for mankind.

Rénmen - in Mandarin Chinese, the term given for the word, people's.

Renominate - in an Astronist contextualisation, the official action wherein the members of The Governing Council decide to vote again for a new member to the council, especially if the previous vote come out in a draw.

Derivatives

Renominative

Renomination

Renominatively

Renominational

Reorientism - one of the Three Orientations of Astronist political philosophy, considered to be on the left-wing of the right-left political spectrum, and advocates for the dehomogenisation of state culture and society, for globalism and globalisation at the forefront, absolutely no sense of nationalism, or originism, a centralised governmental structure (not federative), and is built upon social reform including free welfare, benefits, education, and heavy regulation on corporations. The World Reorientarian Association serves as the annual congregation of all reorientist politicians to discuss the status, influence, and future of reorientarian politics.

Derivatives

Reorientist

Reorientistic

Reorientarian

Reorientarianism

Reorientationism - a major art movement initiated by Astronist Art, and wider Astronist Philosophy and Culture, that strongly opposes the heavily functionalist and characterless postmodernist art and architectural style and its wider culture.

Reorientationism strongly advocates for the education of art history, religious art, as well as the Philosophy of Art, and holds the philosophy that art should be at the centre of human society, for it is the reflection of what is achieved in a given period of human history. Though not technically a art style itself, Reorientationism plays a more social, educational, cultural, and political role in the representation of the art styles it supports, and in what it calls The Struggle against the established modernist and postmodernist functionalist and characterless art, and describes a future redirected towards a rich artistic character, style, and culture, with space exploration, and cosmic adoration as its centrality. Also, Reorientationism raises concepts, questions, and discussions on the Philosophy of Art, and reaffirms the purpose, and the natural need for ornamented, and philosophical art in human society, and strongly supports its sister movements; Ornamentationism and Cosmism.

Derivatives

Reorientationist

Reorientationistic
Reorientationistically

Reorigination - in Astronist Philosophy, the process during which an entity returns to its original state, also known as its regenesis.

Derivatives

Reoriginational

Revologists

Revolution - in an Astronist contextualisation, relating to The Cosmic Revolution as described in The Grand Centrality of The Philosophy of Astronism wherein humanity's focus philosophically, theologically, and in all other aspects of existence, will turn to The Cosmos as it superior.

Derivatives

Revolutional

Revolutionally

Revolutionism - also known as Revolutionist Philosophy, a school of thought in The Philosophy of Astronism calling and strongly advocating for the removal of all non-philosophical systems of governance in a country, as well as the complete integration and institutionalisation of philosophy in culture, government, and national identity in the attempt to establish a newfound social order.

Derivatives

Revolutionist

Revolutionistic

Revolutionist Philosophy - another term for Revolutionism.

Revolvent - in Astronist Philosophy, relating to a celestial entity that is in the process of revolving around another celestial, particularly when the former celestial completes its revolution around the latter celestial.

Derivatives

Revolvently

Revolventive

Revolvency

Rhapsodic - in omnidoxicology, one of the three main writing styles found in The Omnidoxy, the other two being definitional and poetical, and relates to the discourses and insentensations that are written with a distinct insensity about the subject. Rhapsodic insentensations still hold a message to express, but they do so in a way that is much more emotionally expressive regarding complex philosophical topics, especially when in comparison to the definitional style. Rhapsodic insentensations are considered to be the most numerous out of all the insentensations of the Omnidoxy.

Derivatives

Rhapsodicism

Rhapsodicist

Rhapsodicistic

Rhe - in Astronist Philosophy, the philophon for the discipline of rhemnology.

Rhetoricism - in Astronist Philosophy, a frequently invoked argument in opposition to something, usually labelled as such by the defender of that which the rhetoricism is targeting.

Derivatives

Rhetoricist

Rhetoricistic

Rhetoricisms

Rhythm - in an Astronist contextualisation, relating collectively to the frequently occurring events within and surrounding The People's Constitutional Company of Jesse Millette, or even wider Millettaria.

Ribboning - the part of some mission patches and spacecraft emblems which resembles a scroll or ribbon underneath the patch or emblem, and can include the title or some sort of numeration.

Riddance - in an Astronist contextualisation, the triumphant instance wherein The People's Constitutional Company of Jesse Millette manages to completely eradicate a hostile entity, or ideology from their hostilities towards the Company.

Derivatives

Riddancy

Riddancial

Riddancially

Riddancity

Ridging - in Astronist Architecture, the structural apex of a pitched roof of an Astronist building.

Derivatives

Ridgings

Right - in an Astronist contextualisation, consider true, morally good, or justified under the judgement of The Grand Constitution.

Righten - in an Astronist contextualisation, to make something align with The Grand Constitution.

Rihla - in Arabic, the term given for the concept of the journey, especially in Astro-Arab and Cosmic philosophy.

Rima - a crack or fissure on a planetary, or lunar surface.

Derivatives

Rimas

Riseforth - in Astronist Philosophy, an adverb used in The Omnidoxy denoting that which is expected to become prominent, especially from a place of obscurity.

Rita - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era whose name means brave, whom is part of the Third Generation, as the only sixth daughter of Phoenix and Celestia, and a twin to Clementine, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Ritan

Ritanian

Rivergarden - in Astronist Architecture, as a part of gardenry, a type of a garden in the estate of some Astronist buildings through which a river flows, whether artificially, or naturally.

Riverhouse - in Astronist Architecture, as part of a gardenry, which is itself closely associated with naology, a type of sopharium resembling a large outbuilding on the estate of an Astronist building

characterised by its position beside a pond, lake, or river, and is usually heavily cosmically ornamented, and in its most basic form, consists of an orreriium as its main room, an astrotry, and a telescopetry, with some riverhouses consisting of extra rooms.

Derivatives

Riverhouses

Riverry - in Astronist Architecture, as part of gardenry, a unique type of outbuilding found in the estate of some Astronist building that is constructed on the eyot of river, and may also be constructed as though it is a bridge stretching across the river itself.

Derivatives

Riverries

Riwaya - in Arabic, the term given for a novel, especially one of Astronist style, or featuring any of The Five Astronist Characters.

Roading - in Astronist Civicology, the planning, design, and designation of roads in a city, town, or suburban area.

Robotic Sentience - see Droid Sentience.

Robust - in an Astronist contextualisation, of a business project, or proposal for The People's Constitutional Company of Jesse Millette, after analysis, showing resilience and stability.

Rocketry - also known as Rocketology, large branch of scientific study in Astronomy dealing with the philosophy of rockets, as well as rocket propulsion technologies, and rocket engineerings that are specific to those of PUESEC.

Savational

Savings - in an Astronist contextualisation, informally relating to the monies held by The People's Astronist Fund, The Astronist Corporate Wealth Fund, The Astronist Investment Fund, or any other Astronist fund.

Saviourism - also known as Saviourist Philosophy, a school of thought in The Philosophy of Astronism which centres itself on the concept of The Saviour, the idea represented in art, literature, and culture through a figure that is shown to save the masses of people from some widespread and oppressive threat, or circumstance. In this way, the figures represented are intended to symbolise the embodiment of philosophy itself, thus holding the belief that philosophy is the one and only path to great knowledge, and inner peace, with a strong sense of wonderment for The Cosmos in The Universe.

Derivatives

Saviourist

Saviouristic

Saviourist Philosophy - another term for Saviourism.

Scaffolding - in an Astronist contextualisation, relating to the supporting elements of a business project, or subsidiary of The People's Constitutional Company of Jesse Millette that allow it to continue to function, and operate.

Scalar - in an Astronist contextualisation, of an issue, impactful on the surrounding world, but not holding any directed impact on the Company itself, The Philosophy of Astronism, or any of the subsidiaries of The People's Constitutional Company of Jesse Millette.

Derivatives

Scalaric

Scalarical

Scalarically

Scalaration - in Astronist Philosophy, the contemplation of scalar in the context of Cosmic Philosophy, and is typically considered chaotic by its naturity.

Derivatives

Scalarational

Scalarity - in Astronist Philosophy, the semistrument measuring the extent of the correlation between the size of a celestial entity and its ability to direct itself, and the extent to which it is directed by external forces.

Derivatives

Scalarities

Scandinavianist - a person who advocates for the inclusive unification or cooperation of Scandinavian peoples.

ScandoAstronistisation - the specific Astronistisation of Scandinavian societies, either in a macro or micro form.

Derivatives

ScandoAstronistisationism

Scatterance

- in Cosmic Art, as a derivation of Astronist Art, when only a small amount of stars are depicted in one cosmic art piece especially in such as a way that large amounts of space are left between each star.
- in Astronist Philosophy, the scattered appearance of celestial entities in The Cosmos, especially in relation to stardust particles.

Derivatives

Scatterancy

Scatterancial

Scatterancially

Scedasticity - in Astronist Philosophy, an instrument of study concerned with the measurement of philosophy, or two philosophies in terms of their abundance of concepts, theories, terms, and schools that reside within them, as well as the level of impact that they hold over the functioning of something, especially a society. Compare with heteroscedasticity and homoscedasticity.

Derivatives

Scedastic

Scedastical

Scedastically

Scelearian - a person that has been an adherent of The Philosophy of Astronism for more than sixty years.

Derivatives

Scelearor

Sceleartriss

Scellement - in Astronist Philosophy, the practice conducted in some Astronist philosophical buildings of locking the door to the debating hall during a philosophical argumentation for the purpose of limiting the amount of disruption.

Schema - in an Astronist contextualisation, the elements of a business proposal compacted into a single plan in order to form a project of which then The People's Constitutional Company of Jesse Millette must judge in whether it will invest in the project.

Schematic Cosmology - in Astronist Philosophy, the type of cosmos and the approach to cosmological understanding that is most associated with The Cosmical Schematism, and by extension, the subphilosophy of schematicism.

Schematicism - in Astronist Philosophy, the subphilosophy and set of beliefs maintaining that The Cosmos is entirely constructed and established according to a particular formula of ideas known as The Cosmical Schematism pertaining to cosmical structure, function, as well as celestial and elemental distribution. In this set of beliefs, The Cosmical Schematism replaces the notion and concept of The Divine.

Derivatives

Schematicist

Schematicistic

Scholar - in an Astronist contextualisation, an individual who studies in great depth and detail a particular branch of study within Astronomy, or the entirety of Astronomy itself.

Derivatives

Scholarship

Scholar's Garden - in Astronist Architecture, as part of gardenry, a type of walled garden, or area, on the estate of some Astronist buildings in which only official scholars may enter in order to discuss the most pressing of philosophical, academic, and perhaps political, economic, and social matters, and is usually accompanied by a private refectory.

School of thought - a conceptual subdivision, also known as an element of The Philosophy of Astronism concerned with interpretation, such as Principlism, or may refer to a particular school of methodology.

Derivatives

School

Schools

Schoolism - a wing of governance within The Philosophy of Astronism as part of Astronarianism holding that a school of The Philosophy of Astronism should be implemented into the system of the nation state, especially over a philosophical denomination, branch, or wing, or over a religion, or ideology.

Schweizer Aufklärung - the root term for Swiss Astronism in the German language.

Sciement - in Astronist Philosophy, that which is certainly known by all as fact, and therefore, to dispute it is almost always fruitless, though it is important emphasise that to dispute this isn't discouraged. An example of which would be the existence of The Cosmos.

Sciencentrism - in Astronist Propaganda, the belief held that propaganda in modern society should be used to further mass interest in science by depicting the positioning the study of sciences at the centre of human society.

Scientia - collectively referring to all scientific knowledges and interactions with The Philosophy of Astronism, especially in relation to cosmology, astronomy, physics, exobiology, and the natural sciences.

Scientificism - in Astronist Philosophy, an alternative term for consubstantiation in the Astronist philosophical context. See consubstantiation.

Derivatives

Scientificist

Scientificists

Scientificistic

Scientificistically

Scientism - in Astronist Propaganda, the depiction of science, knowledge, and scientists themselves to be the centre of advancement and progression for all of human society, and may also relate to the depiction of abstract scientific concepts, or the depiction of scientific symbols and imageries in propaganda pieces.

Scintilla - in Astronist Architecture, also called a scintillatory, a type of electronic effect most typically used in the ceilings of Astronist buildings to resemble stars, and creates a display of continual scintillation and is most beautiful at night.

Derivatives

Scintillas

Scintillation

- in Astronist Philosophy, a prominent subject of Cosmic Devotion.

- in Astronist Ornamentation, the use of shading and colour to display the twinkling of stars in an ornamental design, or pattern.

Derivatives

Scintillational

Scintillationally

Scintillatory - another term for scintilla.

Derivatives

Scintillatories

Scion - in an Astronist contextualisation, specifically in the Prophecies era of Astronist Mystology, an individual known to have been born after the Astronist character of Phoenix, or may refer collectively all characters born as descendants of Phoenix.

Derivatives

Scionic

Scionism

Scionical

Scionically

Scissionism - also known as Scissionist Philosophy, the school of thought in The Philosophy of Astronism which is often considered by most other schools to be anti-philosophical, and centres itself around the idea that philosophy, to preserve its uniqueness and true value to humanity, should not be part of social governance, or wider social because it is believed that these usages degrade the true beauty of philosophy by clouding it with humanity's politics and society.

Derivatives

Scissionist

Scissionistic

Scissionist Philosophy - another term for Scissionism.

Scopist - a person who understands, recognises or follows the ideas of Scopism.

Scotopic - in an Astronist contextualisation, relating to meanings of Astronist terms that are broadened for applicative usages, especially in order to make their real-world consequences align with constitutionality.

Derivatives

Scotopical

Scotopically

Scrawny - in an Astronist contextualisation, informally used to describe a hostile entity towards The People's Constitutional Company of Jesse Millette.

Scribing - in Astronist Ornamentation, relating to the types of writing on ornamentations, especially titles, and the ornamentist's name, but excluding monogramations.

Scriptured - in Astronist Philosophy, relating to that which has been written in a religious doctrinal, or dogmatic context.

Scruple - in an Astronist contextualisation, hesitation towards the constitutionality of some action, policy, or project undertaken.

Sculpture Garden - in Astronist Architecture, as part of gardenry, a type of walled garden on the estate of some Astronist buildings, that features more sculptures than it does plants, flowers, and other natural phenomena.

Sculpturology - in Astronist Architecture, and as part of gardenry, the study of sculptures of Astronist influence, cosmical and astronomical themed, and those of philosophical influence.

Derivatives

Sculpturologist
Sculpturological
Sculpturologically

Sea - in Astronist Philosophy, the philophon for the discipline of seasonology.

Seagaze - in Astronist Philosophy, alternatively known as sea stargazing, a major astronomical practice and version of stargazing that takes place out at sea, or aboard a boat, or some other sea vessel.

Derivatives

Seagazing
Seagazer
Seagazers
Seagazed
Seagazes

Sealed - in an Astronist contextualisation, of an Astronist documentation, or a room within an Astronist building, locked and bolted so that only authorised persons may enter.

Searchability - in an Astronist contextualisation, the capability of being able to quickly locate, and recite a specific clause, or article within The Grand Constitution, especially during a disputation.

Seasonology - a discipline of study in Astronist Philosophy, specifically within epochology, dealing with the definitive seasons that occur in The Cosmos, such as following the formation of a planetary system, or galaxy, the nature of such time periods, and their inferences on cosmogony.

Derivatives

Seasonologically

Sea stargazing - see Seagazing.

Seat - in an Astronist contextualisation, the official term relating to the role of the Chairman and Constitutional Leader of The People's Constitutional Company of Jesse Millette in relation to other Astronist organisations, such as within The Governing Ministry, The People's Astronist Congress, and amongst The High Council of The People's Astronist Peacekeeping Order.

Secarity - in Cosmic Art, as a derivation of Astronist Art, the second most prominent subject of a cosmic art piece after the primarity.

Derivatives

Secaritial
Secaritic
Secarities

Seclusionism - also known as Seclusionist Philosophy, the school of thought in The Philosophy of Astronism propounding that philosophical adherence and reverence should be done only in the

privacy of one's home, and should not be spoken of with others, and is considered by some other schools of thought to be anti-philosophical.

Derivatives

Seclusionist

Seclusionistic

Seclusionist Philosophy - another term for Seclusionism.

Secondary student - in Astronist Education, a student that has already participated in, and completed a course at an Astronist phrontistery, as distinguished from primary students.

Secondary term - in Astronist Terminology, relating to a version of a term that is less popularly used when compared to its primary, but is more so than its tertiary.

Second Generation - in Astronist Genealogy, the term used to describe the group of descendants one generation after Jesse Millette, and traditionally only consists of Phoenix and Celestia.

Secondment - in Astronist Education, relieving a educator from their teaching duties on a temporary basis in order for them to take up another role, either in a teaching capacity in another phrontistery, or for some other administrative capacity.

Second Wave - a cradial term relating to the secondary subjects listed in The Grand Cradle of Astronology.

Section - in Constitutional Terminology, a tool used within constitutional articles to divide differing topics.

Derivatives

Sectioning

Sectionings

Sections

Securist - a person who has tendencies towards Securism.

Seditionism - a school of thought in The Philosophy of Astronism which centres itself on the futurological concept that the people of a nation should rebel against the tyranny of the rulers, especially when inspired and lead by a strong philosophy and a new system of social order.

Derivatives

Seditionist

Seditionistic

Seemful - in Astronist Philosophy, that which is apparently so, or true.

Derivatives

Seemfully

Seeker of Truth - in Astronist Philosophy, one of the titles of the persona of The Philosopher as an individual that values truth, but equally accepts the inaccessibility of ultimate truths the minds of humans.

Sel - in Astronist Philosophy, the philophon for the discipline of selenology.

Selenal - in Astronist Philosophy, relating to moons, or The Moon in particular.

Derivatives

Selenality

Selenally

Selenation - in Astronist Philosophy, particularly within Cosmic Alchemy, the fourth of The Eleven Cosmo-Alchemic Processes involving all alchemic practices and contemplations involving The Moon itself as an individual celestial, but also moons in general in The Cosmos.

Derivatives

Selenational

Selenationally

Selenology - a large discipline of study in Astronist Philosophy dealing with the structure, formation, naturity, classification, and categorisation of moons, as well as the moon's relationship with its planet.

Derivatives

Selenologist

Selenologic

Selenological

Selenologically

Selenym - a type of term relating to the name of a moon as appointed by an Astronist organisation.

Derivatives

Selenymic

Selenymity

Self-concerning - in Astronist Philosophy, to be concerned only with one's own issues, wants, and needs as a detriment to the issues, wants, and needs of humanity as a whole.

SelfAstronistisation - the process of Astronistisation in a personalised form that an individual thrusts upon themselves, but does not impose others.

SelfAstronistisationism - the belief that selfAstronistisation is the truest, most effective, and most widely practiced form of Astronistisation as opposed to more societal versions of Astronistisation.

Semantics - in an Astronist contextualisation, relating to the meanings of words in Astronist contexts, especially of such words that have different meanings in common usage.

SemiAstronistisation - the process of Astronistisation in a half-imposed form, or in a form that only half emulates Astronist methodology, ideology, and philosophy.

SemiAstronistisationism - the belief that semiAstronistisation is the most efficient and effective version of Astronistisation.

Semi-official - in an Astronist contextualisation, relating to a bill passed by Astronist Congress, but not yet implemented into The Grand Constitution.

Derivatives

Semi-officially
Semi-officiality

Semionic - in Astronist Onomatology, also known as hemionic, relating to a name where either its prefix, or its suffix are Astronist, with the non-Astronist side usually stemming from national and cultural origins.

Derivatives

Semionical
Semionically

Semiphilosophy - in Astronist Philosophy, a philosophy that is considered, academically and scholarly, to be half-complete, or still in development, which is often considered to be the state of all young philosophies by some scholars.

Derivatives

Semiphilosophical
Semiphilosophically
Semiphilosophicality

Semistrument - in Astronist Philosophy, as derived and inspired from a standard instrument and applied largely in the same way, yet is either only applicable in certain circumstances, or the popularity of its application is dramatically lower than that of a standard instrument.

Derivatives

Semistruments
Semistrumental
Semistrumentality
Semistrumentation

Sen - in Astronist Philosophy, the philophon for the discipline of sentientology.

Senary - in an Astronist contextualisation, relating to, or involving the Astronist character of Phoenix.

Derivatives

Senarity

Senate - in an Astronist contextualisation, relating representative, ambassadorial, and senatorial members present in any one Astronist congressional session.

Derivatives

Senative
Senatively

Senatulate - the building in which the diplomatic and political duties of a senator of The People's Constitutional Company of Jesse Millette are carried out, are lower in rank than embassies, and there are typically multiple senatulates in a nation's largest cities as distinct from embassies, of which they is only one in a nation.

Derivatives

Senatulates

Senegalese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Senegal.

Senial - in Astronist Philosophy, relating to the period in a celestial's development before it has fully developed, or is obscured from the standard version of that celestial category.

Derivatives

Seniality

Senior education - in Astronist Education, the range of educational services provided to people aged above sixty-five years of age in the Astronist education system, in participating phrontisteries.

Senses - in an Astronist contextualisation, relating to the concept of The Senses of The Company, exploring the five fundamental elements upon which The People's Constitutional Company of Jesse Millette flexes its operations, and will, and includes philosophy, culture, education, business, and politics.

Derivatives

Sensorium

Sensicality - in Astronist Philosophy, an instrument of study measuring the extent of common sense derived from a concept, or theory, as demonstrated by a series of logical decisions or conclusions.

Derivatives

Sensicalities

Sensory Philosophy - in Astronist Philosophy, a method of philosophical understanding manifested by a system of approaches based upon the five senses available to humans sound, vision, touch, taste, and smell as demonstrated by the practices of orchestration, visionation, contigation, tastation, and aromation respectively.

Sentieneity - in sentientology of Astronist Philosophy, the status of being sentient.

Sentiental - in Astronist Philosophy, relating to the fact, state, and characteristic of being, or maintaining sentience.

Derivatives

Sentientality

Sentientics - a major subdiscipline of sentientology within Astronist Philosophy dealing with the mapping of sentient life and the variations of sentient life on different planets, and in different star systems, sectors, and regions of the galaxy.

Derivatives

Sentienticist

Sentienticists

Sentienticistic

Sentientism - in sentientology of Astronist Philosophy, one of the Four Orientations of Sentientology characterised by a belief in all types of sentience living beyond The Earth on different ways, and also supports the notion of the Diversity of Sentience.

Derivatives

Sentientist

Sentientistic
Sentientistically

Sentientological Demographics - the branch of Philosophical Demography dealing with the measurement of a population according to their beliefs in sentient life beyond The Earth, and is typically segregated according to belief in sentient life and a disbelief in sentient life, or a stance of unknownness towards whether we can know sentient life exists.

Derivatives

Sentientological Demography
Sentientological Demographer

Sentientology - a major discipline of study in Astronist Philosophy dealing with the discussion of sentient life beyond The Earth and the various concepts and theories surrounding such a vast topic.

Derivatives

Sentientologist
Sentientologic
Sentientological
Sentientologically

Sentient Psychology - a subdiscipline of Spacial Psychology in Astronist Philosophy dealing with the minds of species other than humans, and their extraordinary functions in comparison to the human mind as a window into understanding the behaviours and mentalities of other species, a branch of which is Spacio-Sentient psychology.

Sentient Self-creation - see fabrism.

Sentiment - in an Astronist contextualisation, an opinion, or view on a topic which members of the Astronist Congress presume another member will have.

Sentranspiration - in introspectics of Astronist Philosophy, one of The Six Transpirations characterised by all discoveries of sentient life and the processes involved during which sentient life is found.

Derivatives

Sentranspirational

Septorship

Septresship

Septor

Septresses

Septorage

Septressage

Septodoxy - in Astronist Philosophy, the official term for the disquisition of The Principles of Cosmic Exploration within The Grand Centrality of The Philosophy of Astronism.

Derivatives

Septodox

Septodoxic

Septodoxical

Septodoxically

Septology - seven related literary works of Astronist origination or theme.

Sequencing - the process that is part of the selection of mission patches and spacecraft emblems, in which all potential patches or emblems are laid out consecutively and a team of designers,

executives, Astronist symbologists, and insigniologists, discuss and eventually decide which patch or emblem is the most appropriate and which sends the correct message.

Sequency

- in omnidoxology, relating to the study and inferences derived from the order of the words of insentations within The Omnidoxy.
- in Astronist Philosophy, relating to, and measuring the sequences found in the formations of celestial entities, or the sequences of processes occurring in The Cosmos.

Derivatives

Sequencist

Sequencists

Sequacious - in an Astronist contextualisation, relating to a subsidiary of The People's Constitutional Company of Jesse Millette that is in constant need of management and guidance from the Company in order to survive.

SerboAstronistisation - the specific Astronistisation of Serbian society, either in a macro or micro form.

Derivatives

SerboAstronistisationism

Serbian Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Serbia.

Serendipitine - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the fourth daughter of Lucien and Florentine, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Serendipitianian

Serial - in an Astronist contextualisation, relating to an Astronist book that is part of a series, and is thus not standalone, or whose narrative is dependent upon other books in order to be completed.

Series - in an Astronist contextualisation, the informal term for The Original Jesse Millette Series.

Servancy - referring to the actions of a servant.

Serve - in an Astronist contextualisation, relating to the role of The Constitutional Leader towards The Grand Constitution itself, an obligation to protect, preserve, and progress The Grand Constitution in a way that does not compromise its principles.

Sēta - derived from the Latvian language and used in Latvian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Sētas

Setarism - in Astronist Philosophy, the comprehensive form of The Philosophy of Astronism including Iranian Astronism, Afghan Astronism, and all forms of The Philosophy present in Pakistan.

Derivatives

Setari

Setarist

Setarists

Setaric

Setaristic

Setgegch - the most common demonym for a follower of The Philosophy of Astronism in the Mongolian language.

Derivatives

Setgegchid

Seuta bondeu - in Astronist Rendition, the Korean name for the bracelet of Astronist philosophical adherence predominantly known as a starbond.

Seven Tenets - see Seven Tenets of Association.

Seven Tenets of Association - in Astronist Philosophy, an collective appellation for the seven core beliefs and principles of The Philosophy of Astronism, specifically denoting what it means to be an adherent of the philosophy, yet it is emphasised in The Omnidoxy that these tenets are not to be dogmatically followed as is the case within religions, yet they are to be respected and people should expect The Institution of The Philosophy of Astronism to constantly uphold and expound these tenets.

Severalty - in an Astronist contextualisation, relating to the separation of the roles of Brandon Taylorian specifically within The People's Constitutional Company of Jesse Millette, especially the role of Chairman and Constitutional Leader.

Seychellois Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of Seychelles.
- the denomination of The Philosophy of Astronism that is most widely adhered to in the Seychelles.

Shaareerik - The School of Physicality in Astration as known in the Hindi language.

Shape - in an Astronist contextualisation, to change a subsidiary, or a business project so as to suit better the vision of The People's Constitutional Company of Jesse Millette.

Shaping - in Astronist Ornamentation, relating to the shape of the perimeter of the entire ornament, typically square or rectangularly shaped.

Shamanist Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of Shamanist thought and faith, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Shāngdiàn - in Mandarin Chinese, the term for any kind of shop owned or managed by The People's Constitutional Company of Jesse Millette.

Shàngsù - in Mandarin Chinese, the term given for formal appeals made by, or made towards The People's Constitutional Company of Jesse Millette.

Shapings - in Astronist Philosophy, collectively relating to the shapes of different celestial entities, or the different shapes of a celestial entity.

Sharika - in Arabic, the colloquial term used for The People's Constitutional Company of Jesse Millette.

Solarologic
Solarological
Solarologically

Solar Parallax - in parallaxics of Astronist Philosophy, one of the five types of parallax to be found involving stars.

Solar Seasons - in Astronist Philosophy, particularly within seasonology, the seasons of formation associated with stars, as derived from the Formational Seasons.

Sole - in an Astronist contextualisation, another term for the foundations, or the fundamental elements of The People's Constitutional Company of Jesse Millette.

Sole authorship - in centralitology, the fact holding that Brandon Taylorian was the only author of The Grand Centrality, as well as The Omnidoxo within it, and therefore The Grand Centrality is a monauthorial document.

Solemniter - a person that has been an adherent of The Philosophy of Astronism for more than eight years.

Derivatives

Solemnitress
Solemnitarian

Solial - in Astronist Philosophy, relating to stars, pulsars, or other forms of stellar celestials.

Solial Family - in familiology of Astronist Philosophy, one of The Seven Cosmical Families including all types of stars, and stellar formations, the familiarch of which is a general star.

Solidity - in structurology of Astronist Philosophy, the measurement and contemplation of the state of matter of solid.

Derivatives

Solidities

Solitary Cosmos - The Cosmos as an entity of singularity.

Solitocrator - an interchangeable title of either all or one of The Five Astronist Characters, represented in solitary formation in The Cosmos, especially in Astronist Art.

Solitology - a branch of Formationism, the representation of an Astronist character in a solitary form.

Derivatives

Solitological
Solitologic

Sologue - in an Astronist contextualisation, in an Astronist narrative, especially referenced in literary theory, a dialogue including just one of The Five Astronist Characters talking to themselves.

Derivatives

Sologued

Sologuing

Solomon Island Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Solomon Islands.
- the denomination of The Philosophy of Astronism that is most predominantly followed in the Solomon Islands.

Solontèna - derived from the Malagasy language, a term relating to a representative of The People's Constitutional Company of Jesse Millette in the context of foreign relations and diplomacy, and is one rank below the ambassador.

Solsticism - a branch of knowledge in The Philosophy of Astronism concerning the study of the solstices on The Earth, and on other planets, and moons, and holds higher reverence of solstices due to their purely cosmical origin.

Derivatives

Solsticist

Solstic

Solsticistical

Solsticistically

Somali Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Federal Republic of Somalia.

Somatic - in Astronist Philosophy, relating to physical response to a stimulus rather than mental, especially in the context of a philosophical debate, during which one may attempt to suppress their physical reactions so as not to seem weak or to become undermined by them.

Derivatives

Somaticity

Somaticities

Somatical

Somatically

Somaticism

Somaticist

Somnium - a state of philosophical daydream in which one experiences a deep, uncontrollable thought and contemplation about a philosophical concept.

Son - in an Astronist contextualisation, relating to the father and son relationship between the Astronist characters of Jesse and Phoenix, or between Jesse and his father, Richard.

Derivatives

Sonship

Sonia - derived from the Malagasy language, a term relating to the brand of Brandon Taylorian®, or Brandon Taylorian's signature.

Son of the manifestor - in Taylorianology, the exact meaning of the etymology of the surname, Taylorian in Astronist etymology.

Soomaali Nuurin - the root term for Somali Astronism.

Sophian - also termed as a Sophist, the individual responsible for the maintenance, protection, and management of an Astronist philosophical building.

Derivatives

Sophist

Sophistic

Sophistically

Sophianic

Sophianically

Sophise - in Astronist Philosophy, an alternative term for Millettisation, to make Astronist or sophic in character, especially when used in conjunction to sophism.

Derivatives

Sophising

Sophiser

Sophised

Sophisation

Sophisational

Sophisationally

Sophism - in Astronist Philosophy, one of the two primary alternative terms for The Philosophy of Astronism that is used in a specific set of circumstances depending upon one's approach to Astronist Philosophy, namely identified by the notion that Astronist Philosophy represents a resurgence of philosophical thought and the centrality of philosophy in life due to reascensionism. Sophism is therefore used as a term to make a distinct connection to Astronist Philosophy and wider philosophy in general, as well as past forms of philosophy. Followers of The Philosophy of Astronism therefore use this term to demonstrate the contributions and developments of Astronist Philosophy to philosophy in general.

Derivatives

Sopharian

Sopharianism

Sophic

Sophical

Sophically

Sophicism

Sophicist

Sophicistic

Sophistication - in Astronist Philosophy, the quality and ability of knowingly and successfully arguing for one's opinions in a way that is backed up by either logic, rationality, belief, knowledge, experience, and imagination, and is considered to be the hallmark of the greatest of philosopher in the Astronist Tradition.

Derivatives

Sophisticative
Sophisticatively
Sophisticational
Sophisticationally

Sophobia - dislike of or prejudice against Astronism (Sophism), Astronist Culture or sophists/sophians, especially as a political or ideological force. See Millettophobia, astronophobia, and kosmaphobia.

Derivatives

Sophobe
Sophobes
Sophobic

Sophodemiology - also known as Philosophical Demography, or Philosophical Demographics, the study and analysis of the distribution and determinants of philosophical alignments and associations in defined populations, typically by characteristics such as class, race, or gender, or by geographic locations such as cities, counties, countries, or even continents.

Derivatives

Sophodemiologist
Sophodemiologic
Sophodemiological
Sophodemiologically

Sophology - in Astronist Philosophy, an Astronist Subject dealing with the philosophical study of wisdom, and the surrounding concepts and theories.

Derivatives

Sophologist
Sophologic
Sophological
Sophologically

Sophry - in Astronist Philosophy, sophists considered collectively. See also kosmry and astry.

Derivatives

Sophries

Sororal - in an Astronist contextualisation, relating to the representation of two or more female Astronist characters as being sisters.

Derivatives

Sororally
Sororality

South - in an Astronist contextualisation, relating to the operations and activities of The People's Constitutional Company of Jesse Millette conducted below the equator of The Earth.

Derivatives

Southernmost
Southern
Southbound

South African Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of South Africa.

South Asian Astronism - the schools, branches, and denominations of The Philosophy of Astronism that are most predominantly found and adhered to in South Asia, and includes Afghanistan, Pakistan, India, Nepal, Bhutan, Bangladesh, Sri Lanka, and the Maldives. The largest forms of Astronism in this region include the culmination of the Indian forms, the culmination of the Pakistani forms, as well as Jbālānaism in Bangladesh and India, Jyōti'ism in Nepal, Afghan Astronism, and Dæ'numaism in Sri Lanka.

Southern Astrozy - in Astronist Philosophy, the name given to the four day long Starlight Festival held in the southern hemisphere on 20th to the 23rd June annually, another name for which is Kintana.

Southern Qǐshì - the second largest denomination of Chinese Astronism, most commonly found in the southern regions of Yunnan, Guangxi, and Hainan in China.

South Ossetian Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Tskhinvali District.
- the denomination of The Philosophy of Astronism that is most widely followed in the region of South Ossetia.

South Sudanese Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of South Sudan.
- the denomination of The Philosophy of Astronism that is most predominantly adhered to in South Sudan, by the South Sudanese people, with the main goal of unifying the diverse ethnic groups under one philosophical worldview.

Souvenir - in an Astronist contextualisation, relating to the various souvenirs collected by the Astronist character of Jesse throughout his adventures, especially when referring to those souvenirs collected in The Original Jesse Millette Series.

Souverainement - in Astronist Philosophy, the action of going to a leading philosopher in the field of a particular thought school, or discipline about a philosophical dispute, or a paradox in the hope that the philosopher may be able to assist.

Sovereign Planet - an entire planet, or the majority of a planet over which some political organisation, or group declares their sovereignty.

Sovereign Space - a region of space that is declared sovereign to some political organisation, or group of people.

Sovereign System - another term for Sovereign Planet.

Sovereign Territory - another term for Sovereign Space.

Sovereignty - in an Astronist contextualisation, collectively relating to the fundamental elements of The People's Constitutional Company of Jesse Millette which the Company itself considers to make it sovereign, such as being founded on its own newfound philosophy, and The Grand Constitution, amongst other items, which are referred to as the Company's sovereignties.

Derivatives

Sovereignties

Space Age - in an Astronist contextualisation, relating to the Astronist Space Age.

Spacebow - a giant arch in the sky created by the residue of a rocket engine after its lift off, which is considered to be a subject of cosmic devotion in the Astronist Tradition.

Derivatives

Spacebows

Space Colony Planning - the design, attribution, and subsequent construction of a space colony.

Spacecraft Emblem - the various emblems associated with specific spacecraft used and owned by PUESEC.

Space Culture - referring to the widespread interest and investment inspired by The People's Constitutional Company of Jesse Millette in space exploration and spatial technological advancements.

Spaceflight Preparation - in Spacial Psychology of Astronist Philosophy, the appellation for the tests under which one may go in order to measure their mental ability, sanity, awareness, and general suitability for spacefaring.

Spacelane - in spaciology, a regulated path or course used by spacecraft, considered to be the safest routes for spacefaring voyages.

Space Propaganda - in Astronist Propaganda, the specific style of propaganda that is most typically characterised by a space background, or includes imagery of space technology, space symbols, and other cosmical inspirations.

Spacer - in spaciology, an individual that regularly pilots spacecraft, either for commercial reasons, as part of their employment, or for leisure.

Derivatives

Spacers

Spacerhood

Space Renaissance International - a non-governmental organisation dedicated to invoking the Space Renaissance movement, the philosophy of which is known as astronautic humanism, or astrohumanism; the advancement of humanity's economic, political, and societal circumstances, as well as the enlightenment of humanity's philosophy, worldview, perception, and culture through the exploration, and civilisation of space and planets other than The Earth. Principally, though there are several diverging concepts and theories, the Space Renaissance movement that Space Renaissance International is committed to furthering, is largely in alignment and complimentary to Astronist

Philosophy and Worldview. Thus, The Institution of The Philosophy of Astronism extends a proposal of the establishment of formal diplomatic and parenic relations with the Space Renaissance International in *The Astronist Foreign Relations Methodology* due to the similarity in principle of The Institution and said organisation.

Space Renaissance movement - a term that is associated with the non-governmental organisation, Space Renaissance International, the group leading and expounding the philosophical movement towards the general expansion of space economics, the involvement of space in human culture, the expansion of humanity's perception of The Earth and space, and warns of the drastically foreboding consequences of humanity's continued ignorance of space and its opportunities. The movement is closely associated with that of Astronist Philosophy, and although Astronist Philosophy establishes itself as a separate movement, it is considered that the Space Renaissance movement is the precursor to the Astronist philosophical tradition, though it is staunchly maintained that the Space Renaissance idea and movement had no influence over the Astronist philosophical tradition. Although the two movements agree on the overarching issues of space and humanity's future in space, as well as the role of philosophy, astronomy, and education, the Astronist philosophical tradition establishes a much wider academic and philosophical basis with Cosmic Philosophy and a plethora of other Astronist philosophical disciplines, while the Space Renaissance movement largely focuses on the practical implications, consequences, and possibilities of human space travel and extraterrestrial civilisations.

Spacial

- relating to the activities, occurrences and territories of space or planetary bodies.
- relating to subjects of a spacial setting that focus themselves on a variety of natures, such as business, finance, agriculture, commerce, technology, geology, manufacturing, and management.

Derivatives

Spacially

Spaciality

Spacialism

Spacial Accounting - an Astronist Subject dealing with the study of the methodologies and practices of accounting on different planets other than The Earth.

Spacial Aerospace - an Astronist Subject dealing with the technologies and industries relating to space travel, and the various usages of space ships and space travel.

Spacial Agriculture - an Astronist Subject dealing with the practice of agriculture and the agricultural industry as a whole on different planets.

Spacial Alcoholism - an Astronist Subject dealing with the abuse and prevalence of alcohol in places offearth, and its various consequences.

Spacial Art - an art movement within Astronist Art that is characterised by its depiction of humanity's exploration, colonisation, and general wonderment of space, and may also depict human civilisations on other planets, and on spacecraft, and traditionally depicts The Five Astronist Characters.

Derivatives

Spacialist

Spacialistic
Spacialistically

Spacial Banking - an Astronist Subject dealing with the practices and methodologies and system of banking on planets, celestial bodies, and space stations, other than on The Earth.

Spacial Botany - an Astronist Subject dealing with the in-depth study of physiology, structure, ecology, distribution, classification, and the economic value of the plants of a planet.

Spacial Business - an Astronist Subject dealing with the general study of business and business conduct, practice, operation, and regulation beyond The Earth on other planetary bodies and space stations.

Spacial Business Ethics - an Astronist Subject dealing with the ethical stances on business conduct and operation held by various non-Earth philosophies and governments.

Spacial Cartography - in cosmotopography of Astronist Philosophy, also known as spaciocartography, a major discipline of study dealing with the systemic mapping of space, phenomena in space, and all the progenies of The Cosmos, either collectively, or individually.

Derivatives

Spaciocartography
Spaciocartographer
Spaciocartographers
Spaciocartographic
Spaciocartographical
Spaciocartographically

Spacial Commerce - an Astronist Subject dealing with the study of the overall interactions between people socially, economically, and otherwise when they are offearth.

Spacial Computer Graphics - an Astronist Subject dealing with the practice of creating digital graphics that show a number of complex star systems and which a navigator may use in order to reach different stars and planetary systems.

Spacial Computer Networks & Systems - an Astronist Subject dealing with the study, construction, and development of a computer network to be used offearth during space travel, and on other planets, and may also involve the study of computer systems on other planets.

Spacial Crystallography - an Astronist Subject as part of prospection that deals with the studying, finding, and excavating of crystals and other precious stones and gems from planets and celestial bodies other than The Earth, and also involves the recording of one's discoveries.

Spacial Data Storage - an Astronist Subject dealing with the storage of large amounts of data, especially aboard spacecraft, but may also involve the study of the data storage methods and techniques developed by other civilisations on different planets.

Spacial Dentistry - an Astronist Subject, and is a branch of dentistry, dealing with the study of the affects of being in space or on another planet to one's teeth.

Spacial Domestic Economics - an Astronist Subject dealing with the study of the economy of the home and domestic life on planets, celestial bodies, and space stations other than on The Earth itself, and compares the differences between the various domestic economies.

Spacial Drug Abuse - an Astronist Subject dealing with the abuse and prevalence of drugs in places offearth, and its various consequences.

Spacial/Space Economics - the branch of knowledge concerned with the production, consumption, and transfer of wealth beyond Earth.

Derivatives

Spacioeconomical

Spacioeconomic

Spacial Engineering - an Astronist Subject dealing with the designing, building, and usage of engines, machines, and structures specifically tailored for use in space and on environmentally diverse worlds.

Spacial Engineering Materials - an Astronist Subject dealing with the finding, resourcing, and recording of the properties of materials used in Spacial Engineering.

Spacial Etiquette & Social Behaviour - an Astronist Subject dealing with the various etiquettes and traditional social behaviours of a society and civilisation on a different planet, and the various comparisons to human etiquette and accepted social behaviours.

Spacial Eventing - an Astronist Subject dealing with the organisation, planning, creating, and executing of an event anywhere offearth.

Spacial Finance - an Astronist Subject dealing with the study of the financial methodologies and systems of the governments and companies of different planets other than on The Earth.

Spacial Geology - an Astronist Subject dealing with the study of physical structures and substances of a particular planet.

Spacial Geriatrics - an Astronist Subject dealing with the medical study of elderly people across different societies across different planets.

Spacial Hazard & Emergency Management - an Astronist Subject dealing with the various processes and procedures involved with the management of hazards and emergencies and the comparison of these processes and procedures between different governments of planets.

Spacial Home & House Planning - an Astronist Subject dealing with the planning of individual houses both exteriorly and interiorly on different planets with various different usages and features.

Spacial Homelessness - an Astronist Subject dealing with people are homeless, typically with only a spacecraft to their name, or how homeless people are treated in civilisations and societies in different planets.

Spacial Homeopathy - an Astronist Subject dealing with the study and practice of homeopathic systems of medicinal treatment on planets and celestial bodies other than on The Earth.

Spacial Horticulture - an Astronist Subject dealing with the study of garden cultivation and management on different planets, celestial bodies, and space stations.

Spacial Humanology - the scientific study of the ideas and theories forming the role of human society in space and how this connects to Astronist ideology, theology, and philosophy.

Spacial Human Resources - an Astronist Subject dealing with the study of the way in which human resources are treated in companies on different planets, celestial bodies, and space stations.

Spacial Hydrology - an Astronist Subject dealing with the study of the properties of water masses on a planet, especially in relation to the planet's landmass.

Spacial Information Systems - an Astronist Subject dealing with the study of the information systems utilised by various organisations on different planets other than The Earth itself.

Spacial Jurisprudence - the legal system, theory, and philosophy underpinning the legalities of space.

Spacial Labour & Welfare Law - an Astronist Subject dealing with the study of law in relation to labour and welfare of a government on a particular planet.

Spacial Livelihood - an Astronist Subject dealing with the study of the ways in which individuals make their incomes sufficient enough to support a certain lifestyle, especially of individuals on different planets, space stations, or celestial bodies.

Spacial Manufacturing - an Astronist Subject dealing with the study of the manufacturing industry of a particular planet, space station, or celestial body.

Spacial Mechanics - an Astronist Subject dealing with the industry of mechanics on planets other than The Earth.

Spacial Metallurgy - an Astronist Subject dealing with the discovery, resourcing, and recording of metals on a particular planet, or celestial body.

Spacial Minerals - an Astronist Subject dealing with the discovery, resourcing, and recording of minerals on a particular planet, or celestial body.

Spacial Mining - an Astronist Subject dealing with the industry, concepts, and philosophies of mining on a particular planet.

Spacial Nursing - an Astronist Subject dealing with the nursing industry, profession, and services on a particular planet, especially in comparison to those on another planet.

Spacial Obstetrics - an Astronist Subject dealing with the medical study of childbirth and midwifery across different societies on different planets.

Spacial Packaging - an Astronist Subject dealing with the industry of packaging products, and traded goods, especially for long haul spacial transportation between planets, or between two other celestial bodies.

Spacial Paediatrics - an Astronist Subject dealing with the medical study of young people across different societies across different planets.

Spacial Pharmacology - an Astronist Subject dealing with the study of uses, effects, and modes of action of drugs on different planets in different cultures.

Spacial Phenomena - an Astronist Subject dealing with the study of rarely occurring events that may only occur beyond The Earth.

Spacial Politics - an Astronist Subject dealing with the overall study of the politics of a particular government of a planet, or the entirety of the political landscape of a planet, or some other celestial body, or space station.

Spacial Prehistoric Studies - an Astronist Subject dealing with the study of a planet's or celestial's entities prehistoric period, other than The Earth itself.

Spacial Production - an Astronist Subject dealing with the production of goods on a particular planet, or celestial body, under a governmental authority, and includes the subsequent concepts, ethics, and methodologies involved.

Spacial Project Management - an Astronist Subject dealing with the study of the management of some business project taking place on a planet, celestial body, or space station beyond The Earth.

Spacial Psychology - a discipline of study in Astronist Philosophy dealing with the realities of how space travel, living in space, experiencing space, living on worlds or celestials other than The Earth will effect one's mentality and the wider psychology of humanity as a whole.

Derivatives

Spacio-psychologic
Spacio-psychological
Spacio-psychologically

Spacial Realism - an art movement within Astronist Art, and as a derivation of Spacial Art, characterised by its depiction of space colonisation, exploration, education, and wonderment through a Realist style foundation, and traditionally depicts The Five Astronist Characters.

Derivatives

Spacio-Realist
Spacio-Realistic
Spacio-Realistically

Spacial Sciences - an Astronist Subject dealing with the overall study of the sciences of a planet or celestial body other than The Earth, and is typically used an umbrella term for a large range of other scientific topics.

Spacial Surgery - an Astronist Subject dealing with the conduct of surgery in any form in a particular planet, celestial body, or space station, just not on The Earth itself, and may involve the comparison of surgical procedures between planets.

Spacial Teaching & Professorship - an Astronist Subject dealing with the different methodologies and approach to pedagogies and the training of teachers and professors in different education systems of planets other than The Earth itself.

Spacial Training - an Astronist Subject dealing with the different methodologies of training for various roles in different planets other than The Earth itself, especially in comparison to the training methodologies used on The Earth.

Spacial Ventilation - an Astronist Subject dealing with the provision of fresh air to a building, room, or spacecraft, and involves the subsequent training and studying for this.

Spacio- - the prefix relating to space, spacecraft technology, and space exploration.

Spacio-abasia - in Spacial Psychology of Astronist Philosophy, relating to the inability to walk in space and the inability to walk due to the effects of being aboard of spacecraft for a long period.

Spacio-atrophy - in Spacial Psychology of Astronist Philosophy, one of the most impacts of spacefaring involving the wasting away of an organic product such as muscle or bone.

Spaciocentric - in Astronist Philosophy, policies, methods, and outlooks oriented on the idea that outer space is a resource that is central to the future of human civilisation and survival. In a philosophical sense, relating to the notion that space, or The Cosmos, deserves to be given a central role in human society and mentality, and in this sense, is synonymous with the main element of The Philosophy of Astronism known as cosmocentricity.

Derivatives

Spaciocentric

Spaciocentrically

Spaciocentricity

Spaciocentrism - in Astronist Philosophy, the notion that space is the most important resource for humanity to enknowledge, understand, and use to help expand its civilisation and survival in addition to the idea that space-related industries and companies must be given forefront power, funding, and attention from the media, the government, and public institutions.

Spaciocentricistic

Spacio-Cosmism - the branch of Cosmism dealing with spacecraft emblems.

Spacioeconomics - an Astronist Subject dealing with the overall study of the various economies of different planets, celestial bodies, and space stations.

Derivatives

Spacioeconomist

Spaciology - a subject of Astronist origin encompassing all the concepts, methods, objects, conducts, organisations and philosophies associated with spacefaring.

Derivatives

Spaciologist

Spaciologists

Spaciologic

Spaciological

Spaciologically

Spacio-physician - in Spacial Psychology of Astronist Philosophy, a medical professional concerned with physical ailments that are caused by the environment of space.

Derivatives

Spacio-physicians

Spaciorhetoricism - in Astronist Philosophy, a frequently invoked notion about why space development, investment in space, space colonisation, or general spaciocentric policies and methods should not or cannot be conducted, usually for a variety of political, social, environmental, financial, and economic reasons.

Derivatives

Spaciorhetoricisms

Spaciorhetoricist

Spaciorhetoricistic

Spacio-Sentient psychology - in Spacial Psychology of Astronist Philosophy, the branch of study concerned with how the effects of space and spacefaring effect species other than human, as derivation of the subdiscipline known as Sentient Psychology.

Spanish Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Kingdom of Spain.

Spearhead - a title given to the Astronist character, Jesse, or in a broader context, all five Astronist characters, meaning the symbolical leader of The People's Constitutional Company of Jesse Millette.

-spec - in Astronist Onomatology, a suffix used for Astronist names, in reference to a spectroscope and cosmical spectra.

Spec- - in Astronist Onomatology, a prefix used for Astronist names, in reference to a spectroscope and cosmical spectra.

Specialisation - in Astronist Philosophy, relating to the process by which a philosopher specialises in a specific discipline of The Philosophy, rather than being a general studier of The Philosophy, and is the preferred route of study for scholars.

Specialised contemplation - see interiorisation.

Special Recognition Year - part of The Standard Astronomical Calendar, the specially chosen years in human history in which an astronomer made an important development in astronomy, or cosmology, or the year in which a significant astronomer was born, and these are commemorated as special years.

Specificism - relating to anything referenced specifically, especially during an Astronist congressional session, and especially during a disputation, and is a strong tactic of disputational utilisation.

Derivatives

Specificist

Specificisms

Spectacality - in Astronist Philosophy, to be in a state of spectacle for something, or for a cosmical entity to heed the spectacle from philosophisations.

Derivatives

Spectacalities

Spectaculum - the title of a cosmic light show conduct frequently inside the auditoriums of Astronist observatories, grand observatories, eidouraniums, and some grand planetariums.

Spectrality - in the subdiscipline of Astronist Philosophy of spectrics, the instrument of study concerned with concepts in relation to notions of spectrics and connected contemplations.

Derivatives

Spectralities

Spectricity - in the subdiscipline of Astronist Philosophy of spectrics, the instrument of study measuring the extent to which a spectral contemplation leads on to another discussion with certain spectric contemplations holding the ability to endlessly expand.

Derivatives

Spectricities

Spectrics - a subdiscipline of introspectics in Astronist Philosophy, specifically in Cosmic Philosophy, as part of wider Astronology dealing with the spectrum colour band witnessed in The Cosmos, its naturity, purpose, and influence on cosmogony.

Derivatives

Speculativistic

Speculativistically

Spheric Art - relating to the art form of positioning Astronist characters, icons, or symbols into spheres, of which are typically resemblant of one of the elements, and commonly featuring symbols, drawings, and other indentations around the outside of the sphere.

Sphericism - in kosmetrics of Astronist Philosophy, the notion that the primary shape of The Cosmos and its progeny is a sphere and therefore, a sphere is the most superior and divine of all shapes.

Derivatives

Sphericist

Sphericists

Sphericistic

-spi - in Astronist Onomatology, a suffix used for Astronist names.

Spirallation - the use of spirals to create patterns of galactication.

Spiritualitas - The School of Spirituality in Astration as known in the Javanese language.

Spiritualité - The School of Spirituality in Astration as known in the French language.

Spiritualiteit - The School of Spirituality in Astration as known in the Afrikaans language.

Spirituality - in an Astronist contextualisation, relating to The School of Spirituality of Astration.

Spiroette - in Astronist Ornamentation, a spirographic pattern embossed onto an ornament.

Splendora - in Astronist Music, a specified arrangement of the notes in any system of music to be played on any musical instrument in a tricope of repeated notes that ascend in pattern and descend accordingly.

Derivatives

Splendoras

Splendature

Splendoral
Splendorally

Splendoral bass - in Astronist Music, a set of four splendoras, typically inverted splendoras, that make up a base tune to either be played alone with both hands, or with a separate melody in the right hand.

Spo - in Astronist Philosophy, the philophon for the discipline of sporadics.

Sponsored Philosophy - an Organised Philosophy that is openly supported and promoted by an organisation, Organised Religion, or a government.

Sporadics

- a major discipline of study in Astronist Philosophy dealing with the nature, and purpose of The Chaos, the absolute opposite to The Cosmos.
- in Astronist Philosophy, collectively relating to the entities and phenomena existent within The Cosmos that demonstrate affiliation with The Chaos.
- in omnidoxicology, the rubral in the disquisition of The Principles of The Aesthetic Cosmos dealing with the discipline of study of sporadics.

Derivatives

Sporadicist
Sporadicity
Sporadical
Sporadically

Sporadicy - in Astronist Philosophy, the instance of, or to be in a state of chaos, either of a philosophical notion or concept, or a physical entity, such as a celestial.

Derivatives

Sporadicies

Sporadisy - in Astronist Philosophy, an alternative spelling of sporadicy. See sporadicy.

Derivatives

Sporadisies

Sports Law (Cosmos) - an Astronist Subject dealing with the laws relating to sports of a particular government, or regulatory authority of a particular planet other than The Earth itself.

Derivatives

Cosmic Sports Law

Squaring - in Astronist Civicology, the process of planning and designing the squares of a city.

Squirrel - in an Astronist contextualisation, the official practice carried out by The People's Constitutional Company of Jesse Millette, especially in times of downturn and depression, whereby the rates of monies being saved into funds is raised, and so, as a direct result, funds for purchasing resources, or funds to operate subsidiaries are decreased.

Derivatives

Squirrelling
Squirrelation

Squirrelled
Squirreler
Squirrelive

Squiskine - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fifth Generation, as the second daughter of Janine and Jacobotius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives
Squiskinian

Sri Lankan Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Democratic Socialist Republic of Sri Lanka.

Srrārhas - derived from the Malayalam language and used in Malayalam Indian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

-sta - in Astronist Onomatology, a suffix used for Astronist names, in reference to the stars of The Cosmos.

Sta- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the stars of The Cosmos.

Staarhaus - derived from the Hindi language and used in Hindi Indian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives
Staarhauson

Stablemate - in an Astronist contextualisation, relating to the shared origins, or characteristics, of all Astronist products.

Staffage - in Astronist Civicology, similar to its original definition, the inclusion of people, animals, or other figures in the foreground of a civicological townscape or cityscape, especially as a reflection of whom would typically live in the town or city illustrated.

Stale - in an Astronist contextualisation, relating to a period of relations between The People's Constitutional Company of Jesse Millette and some foreign entity which had turned from being good to being hostile.

Stampede - in an Astronist contextualisation, specifically relating to the Education Sector Index, better known as the EduSecIndex, the short term instance in which investors either pull out, or rapidly invest in a particular company in direct response to some political activity, or a media storm.

Stand-alone - in an Astronist contextualisation, an informal term for an unincorporated subsidiary of The People's Constitutional Company of Jesse Millette.

Standardisation - in Astronist Education, the process of ensuring that all work from students is assessed according to the same criteria and requirement, and also relates to the procedures put in place in order to achieve this.

Standing - in an Astronist contextualisation, an informal term generally relating to the relations between The People's Constitutional Company of Jesse Millette, and an external entity.

Stansation - the process of taking a clear position in a conflict, dispute or crises, especially when centred around political circumstances.

Staple - in an Astronist contextualisation, describing something that is at the core of The People's Constitutional Company of Jesse Millette, or The Philosophy of Astronism.

Stapular - in Astronist Philosophy, that which is a necessary part of something.

Derivatives

Stapularity

-star - in Astronist Onomatology, a suffix used for Astronist names, in reference to the stars of The Cosmos.

Star- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the stars of The Cosmos.

Ṣṭārahā'usa - derived from the Gujarati language and used in Gujarati denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Ṣṭārahā'usas

Starakuća - derived from the Macedonian language and used in Macedonian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Starešini

Starball - in occurrology, a formal and cosmically-themed social gathering held in a grand venue for dancing, singing, and stargazing.

Derivatives

Starballs

Starbath - a period of starbathing.

Derivatives

Starbaths

Starbathe - in Occurrology, a form of stargazing involving sitting, or lying in one's garden or a public place during a clear night sky on starloungers, or in starchairs for the purpose of looking up at the stars with hope of noticing cosmical phenomena. This does not have to necessarily include

using telescopes, or other astronomical apparatus. This may be considered as a form of Cosmic Devotion from an Astronist philosophical perspective.

Derivatives

Starbathing

Starbathed

Starbather

Starbathers

Starbed - in Astronist Occurology, a type of bed used for starsleeping.

Derivatives

Starbeds

Starbelt - in Astronist Occurology, the startraps of a country considered collectively, especially when they are clustered in certain regions.

Derivatives

Starbelts

Starbirth - in Cosmic Philosophy, as part of Astronist Philosophy, the processes involved in the initiation and formation of stars, and the philosophical discussion of concepts.

Derivatives

Starbirths

Starblind - in Astronist Occurology, a person that hasn't ever been to a stargazing, starbathing, or starsleeping event, and has neither had their own session.

Derivatives

Starblinder

Starblinders

Starbond - in Astronist Rendition, a type of bracelet made up of either seven large or twelve smaller eight-pointed three-dimensional stars that is worn to represent one's adherence to The Philosophy of Astronism, though this is not compulsory to be an adherent. The bracelet is specially designed to dig into the skin slightly so as to remind the wearer of their philosophical association and is most popularly worn in Asian and African countries, but is known under different names in only a few countries such as the Chinese version known as a Xīngjiàn. The starbond has a different name in the Philippines, Japan, Korea, French-speaking countries, Indonesia, Madagascar, Thailand, Turkey, Ethiopia, Uzbekistan, Vietnam, Malaysia, in some states of India, the Arabic-speaking countries in the Middle East, as well as in Spanish-speaking countries, but it is predominantly known through its English name.

Derivatives

Starbonds

Starburst/Sunburst Symbol - in Astronist Ornamentation, a type of symbol resembling a star-like image with rays emanating from it, and is prevalently featured throughout many types of Astronist Ornamentation, Rendition, and Art.

Star Centricity - in Astronist Philosophy, an appellation for the notion within heliology maintaining that stars and their contemplations hold an essential and central role in Cosmic Philosophy, and are

therefore necessary to gaining a deeper understanding of the naturity, functionality, orderity, and all other aspects of The Cosmos.

Starchair - an adjustable chair used for starbathing.

Derivatives

Starchairs

Stardance - in Astronist Occurrology, often considered a form of Cosmic Devotion, a type of dance performed under a clear night sky, especially during a starparty, or as part of a startryst.

Derivatives

Stardances

Stardancer

Stardancers

Stardancing

Stardark - in Astronist Occurrology, the need for lights to be switched off in certain designated areas during an organised stargazing or starbathing event.

Stardate - in Astronist Occurrology, another for term for a startryst.

Stardeath - in Astronist Philosophy, a colloquial term for a supernova.

Stardeck - a type of deck, or platform found in some Astronist philosophical buildings, but is mainly attributed to non-Astronist buildings, and is used for the purposes of stargazing, starbathing, and other forms of Cosmic Devotion.

Derivatives

Stardecks

Star Dorn - a ceremonial staff with a large pointed star at the top, as used by The Astronist Security for The Leadership.

Stardot - a derived from the literal perception and understanding of a star perceived from The Earth as a dot in the night sky.

Stardown - in Astronist Occurrology, a period of alcoholic consumption that takes place during a session of stargazing, starbathing, or during the night for the purposes of also viewing the stars.

Derivatives

Stardowner

Stardowners

Stardowning

Stardowned

Stardrench - in Astronist Occurrology, of a place, or of a particular stargazing, or starbathing session, receiving a great deal of starlight, or of the sky, being exceptionally astronomically active.

Derivatives

Stardrenched

Stardress - in Astronist Occurrology, a type of cosmically styled dress that a woman might wear to a stargazing event.

Derivatives

Stardresses

Stardust Cosmology - in Astronist Philosophy, a cosmology characterised by three different orientations; the first being that stardusts are directly controlled and destined by some higher power; the second being that the creation of stars, planets, and star systems by stardust is by pure coincidence; the third being that stardusts are the most cosmically loyal progenies in The Cosmos.

Stärekoop - derived from the Luxembourgish language and used in Luxembourgish denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stagiaire

Starfade - in Astronist Occurrology, the period in which the stars of the night sky begin to fade as dawn approaches.

Derivatives

Starfades

Starfading

Starfaded

Starfast - in Astronist Occurrology, a stargazing or astronomy event that ends before midnight.

Derivatives

Starfastly

Starfield - in introspectics of Astronist Philosophy, but also expanding to Astronist Education, a digital system displaying star systems, galactic regions, galaxies, and other phenomena of The Cosmos displaying holographically.

Starfish - also referred to as a sea star, the personal emblem of the philosopher, Cometan.

Starform - in Astronist Philosophy, resembling, or in the form of, or by the character of a star.

Stargaze - in Astronist Occurrology, a major form of Cosmic Devotion involving an individual, a family, or a larger organised group taking a few hours to gather in a location where the stars are visible for the purposes of viewing the stars with the hope of experiencing wonderment, witnessing a cosmical event, or thinking of new philosophical ideas in relation to The Cosmos. The organisation, setting, circumstances, and purposes of stargazing activities are vast and can be enacted in many different ways.

Derivatives

Stargazing

Stargazed

Stargazer

Stargazers

Starguild

- in Occurrology, a type of festival involving a parade through a town or city which has an astronomical theme.
- in Occurrology, to attend, or to partake in a starguild.

Derivatives

Starguilding

Starguils

Starguilder

Starguilders

Stārhaus - derived from the Kannada and Telugu language and used in Kannada and Telugu Indian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stārhausgaḷu

Starhouse - a type of Astronist philosophical building that is most commonly found along the coast and typically resembles a lighthouse, but is instead publicly accessible, used for philosophical and wondermenting purposes, as well as for astronomical and cosmological learning purposes, and is often uniquely cosmically ornamented.

Derivatives

Starhouses

Starjam - in occurrology, an improvised yet casual performance by a group of musicians performed to friends, relatives, and some members of the public that typically have not paid and involves one or more of the following: stargazing before, after, and during, cosmic decoration, cosmic devotion, and cosmically-themed songs.

Derivatives

Starjams

Starjamming

Starjammer

Starjammed

Starkuča - derived from the Croatian language and used in Croatian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Starihkuća

Starless - in Astronist Occurrology, relating to a stargazing, or starbathing event that turns out to be very poor in actual starlight, especially when the opposite was forecasted.

Derivatives

Starlessness

Starlessly

Starlight social - in Astronist Occurrology, a smaller and private version of a starlight festival, usually held in one's own residence, or on one's own land. This also includes any starlight festival that is not directly initiated or managed by The Starlight Council.

Derivatives

Starlight socials

Starment - in Astronist Rendition, a type of metal necklace, especially golden or silver coloured, that features either the Astronism Symbol, a star, a compass, or another characteristically Astronist symbol.

Derivatives

Starments

Starnight - in Astronist Occurrology, a type of stargazing, or astronomy-related event that takes place throughout the night, especially lasting passed midnight.

Derivatives

Starnights

Starox - part of The Standard Astronomical Calendar, the alternative name given for the Gregorian day of Monday.

Starparty - in Naology and Occurrology, a type of event that consists of an organised gathering of either amateur, or professional astronomers, cosmologists, or astrophotographers for the purpose of observing the night sky, and can range in length from just one evening, or up to a work, or even longer, and are usually planned, and managed by sophians of the Astronist planetarium building used as the venue.

Derivatives

Starparties

Starpattern - in Astronist Philosophy, a pattern in the stars, but not something distinctive, large, or popular enough to constitute a constellation.

Derivatives

Starpatterns

Starport - in spaciology, a town or city with space for spacecraft landing and parking, typically located on moons and other smaller celestials, yet remain larger and more expansive than waystations.

Derivatives

Starports

Star-roof - in Astronist Occurrology, Naology, and Architecture, a flat platform built into the roof of someone's private home that is used as an area for private stargazing, starbathing, and starsleeping.

Derivatives

Star-roofs

Starroom - in Astronist Occurrology, a specially positioned extended room on a private residence for the observation of stars and features a totally openable roof.

Derivatives

Starrooms

Starseeker - in Astronist Occurrology, a person who spends the majority of their free time stargazing, starbathing, and attending astronomical event and gatherings, and finds Cosmic Devotion very beneficial.

Derivatives

Starseeking
Starseek
Starseekers

Starsilence - in Astronist Occurrology, a requirement at some organised stargazing and starbathing, and especially starsleeping events whereby all attendees are told to keep as quiet as possible out of respect for others.

Derivatives

Starsilent

Starsleep - in Astronist Occurrology, an activity, often considered a form of Cosmic Devotion, involving someone, or a group of people sleeping outside, either in their garden, or in a public place for the purpose of stargazing and starbathing.

Derivatives

Starsleeping
Starslept
Starsleeper
Starsleepers

Starslumber - in Astronist Occurrology, another word for a starsleep.

Starspex - an official employed by The People's Constitutional Company of Jesse Millette who is specially enknnowledged and trained to advise governmental officials in a country of anything astronomically related, or the interactions between astronomical and cosmological organisations and a particular government.

Derivatives

Starspexes

Starspicy - relating to the interactions between astronomical and cosmological organisations, and the governance of a nation state, or the official academic study of this.

Derivatives

Starspicist
Starspicer
Starspication
Starspicial
Starspicially

Starspool - in Astronist Rendition, a cylindrical device on which tape is wound and star patterns, planets, galaxies, and other celestial entities are imprinted onto, usually for devotion, or as a child's ornamental toy.

Derivatives

Starspools

Starspot - in Astronist Occurrology, a specific area within a stargazing hotspot that is specifically renowned for its stargazing clarity and brightness.

Derivatives

Starspots

Starspring - in Astronist Occurrology, a period of time that occurs just after nightfall when the night sky darkens to the point at which the stars become visible and from then on until starfade, stargazing and other astronomy-related events and sessions can be commence.

Derivatives

Starsprings

Starspringing

Starsprung

Starstar - derived from the Hausa language and used in Hausa Nigerian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Starstars

Starstream - in Astronist Occurrology, relating to a photograph with stars positioned as if in an arch, especially above a building, or some other subject.

Derivatives

Starstreaming

Starstreamed

Starsurge - in Astronist Occurrology, the phenomena whereby a night that had previously been considered to be cloudy actually turns out to be a clear night sky, and typically encourages people to have private stargazing, starbathing, and starsleeping sessions.

Derivatives

Starsurged

Startrap - in Astronist Occurrology, a place that is especially suited for stargazing, starbathing, starsleeping, and other astronomical events due to the low levels of light pollution.

Derivatives

Startraps

Startryst - in Astronist Occurrology, an evening romantic date or rendezvous between two lovers either set inside an Astronist philosophical building, outside during a starry night, or a date that holds an astronomical theme, especially at the beginning of a relationship, or to celebrate an anniversary.

Derivatives

Startrysts

Starve - in an Astronist contextualisation, a large reduction in direct investment from The People's Constitutional Company of Jesse Millette towards a subsidiary, especially an unincorporated company, typically in reprimand for an unconstitutional operation.

Starwalk

- in Astronist Architecture, a type of narrow bridge stretching from one watchtower to another featuring a curved understructure, typically suspended over a deep chasm, and over which people walk to view the stars and is usually dotted on either side by telescopes.

- in Astronist Occurrology, a type of private, or organised walk taken at night for the purposes of reaching an area to stargaze.

Derivatives

Starwalks

Starwalking

Starwalker

Starwalkers

Starward

- in Astronist Occurrology, travelling towards a particular destination for the purposes of stargazing, or attending an astronomy-related event.
- in Astronist Philosophy, to focus one's ambitions and beliefs towards The Cosmos as part of cosmocentricity.

Derivatives

Starwards

Starwell - in Astronist Philosophy, an abundant of visible stars during a stargazing session.

Stasia - in Astronist Mystology, as well as in Astronist Genealogy, a female character of the Prophecies Era, whom is part of the Fourth Generation, as the seventh daughter of Julius and Euphemia, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Stasian

Statehood (Cosmos) - an Astronist Subject dealing with the nature of statehood on different planets, or celestial bodies, or between different governments and states, as well as the various requirements to attain statehood on a particular planet other than The Earth itself.

Derivatives

Cosmic Statehood

Statement - in an Astronist contextualisation, relating to any type of official speech, especially when describing the stance, or position of The People's Constitutional Company of Jesse Millette on a particular topic, and must always be constitutionally backed before being publicised.

State of Cosmos - in Astronist Philosophy, an appellation especially used within omnology relating to the instance in which different types of cosmoses are considered or applied, and the consequences of their implementations; essentially, the reality of a particular cosmos.

State Philosophy - a philosophy that is officially recognised by a government.

Stateside - in an Astronist contextualisation, relating to the specific operations of The People's Constitutional Company of Jesse Millette in the United States of America.

State-sponsored Astronism - a form of The Philosophy of Astronism that is directly and openly supported by the state, or a state-funded agency.

Statewide - in an Astronist contextualisation, relating to the operations of The People's Constitutional Company of Jesse Millette throughout a particular state within a country, especially relating to a state of the United States of America.

Station - in an Astronist contextualisation, relating to a broadcasting station owned by The People's Astronist Network.

Statuarium - in Astronist Architecture, a kind of sculpture, or statue that is so large and embedded into the front, or back of the Astronist building, that the public walk between the legs of the statue to enter or exit the building.

Derivatives

Statuariums

Statuary - the art or practice of designing and creating Astronist statues, statuettes, and figurines.

Statue - in an Astronist contextualisation, relating to Astronist statues, or Astronist styled statues.

Status - in an Astronist contextualisation, relating to the official constitutional position of a subsidiary of The People's Constitutional Company of Jesse Millette; either incorporated, or unincorporated.

Statutory Law (Cosmos) - an Astronist Subject dealing with the laws of statute of a government of a state of a particular planet other than The Earth.

Derivatives

Cosmic Statutory Law

Stavros - in Astronist Mystology, a male character of the Legends Era whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Stavrosian

Stavrosic

Stemphanitius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the fourth son and final offspring of Alexine and Gulgas, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Stemphanitian

-stel - in Astronist Onomatology, a suffix used for Astronist names, in reference to the stars of The Cosmos.

Stel- - in Astronist Onomatology, a prefix used for Astronist names, in reference to the stars of The Cosmos.

Stelecasa - derived from the Romanian language and used in Romanian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stelecase

Stellacasa - derived from the Corsican language and used in Corsican denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stellaricasi

Stella domum - derived from the Latin language and used in Vatican and Catholic-oriented denominations of The Philosophy of Astronism worldwide, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stella domibus

Stellara - in Astronist Philosophy, the main name given to the four day long Starlight Festival held in the northern hemisphere beginning on 20th December and ending on the 23rd December annually, another name for which is Northern Astrozy.

Derivatives

Stellaral

Stellar Arrangement - in structurology of Astronist Philosophy, the appellation relating to the particular way in which stars are arranged in The Cosmos, especially as a subject of devotional practice, and is characterised by two approaches; astrodispersion and astrocentration.

Stellar Collision - in Astronist Philosophy, an appellation for the process by a star collides and merges with another star, especially as derived to be an occurrence for cosmical devotion.

Stellarette - in Astronist Ornamentation, a motif in decorative art which, in most characteristic expression, resembles the fan-shaped tails of shooting stars.

Stellar Formation - a branch of formatology dealing with the study and philosophical contemplation of the nature, procedure, and circumstances of the formation of stars.

Stellarine - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of January.

Stellarium - in Astronist Architecture, a type of retractable roof of some Astronist buildings, similar to an openary, but distinct in that its positioning is best suited to view stars at night.

Derivatives

Stellariums

Stellar-oblivionic - in Astronist Philosophy, relating both to stars and black holes, especially their relationship and interaction.

Stellarological Purpose - in stellarology of Astronist Philosophy, the appellation for the notion that the relationship between oblivions and stars should be explored and questioned in order to gain a greater understanding of both of these cosmical entities.

Stellarology - in Astronist Philosophy, a discipline of study and a bridged discipline connecting heliology to obliology dealing with all contemplations relating to concepts, theories, and proclamations made about and between stars and black holes and the relationship and interconnection they share.

Derivatives

Stellarologist
Stellarologists
Stellarologic
Stellarological
Stellarologically

Stellarworks - in Astronist Ornamentation, the collective patterns, works, and ornaments, either wholly or partly inspired by stelliform, and typically characterised by stars, and the centrality of stars.

Stellate - in an Astronist contextualisation, any type of representation of Astronist characters, or symbols, in a radiating pattern like that of a star.

Derivatives

Stellated
Stellating
Stellatory
Stellation
Stellational

Stelodomo - derived from the Esperanto language and used in Esperanto denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stelojdomoj

Stereotism - in Astronist Philosophy, an alternative term for a stereotype.

Derivatives

Stereotisms

Stêrk - derived from the Kurdish language and used in Kurdish denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stêrhan

Sternhaus - derived from the German language and used in German denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Sternhäuser

Sterrenhuis - derived from the Dutch language and used in Dutch denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Sterrenhuizen

Ster verband - in Astronist Rendition, the name for the bracelet of Astronist philosophical adherence in Afrikaans, but is predominantly known as a starbond.

Steward - in an Astronist contextualisation, relating to the role of The People's Constitutional Company of Jesse Millette in protecting and supporting one of its subsidiaries, or one of its allies, especially when they are struggling through a hardship.

Stewardship - in an Astronist contextualisation, relating to one of the centralmost principles of The People's Astronist Fund.

Stimulationism - a school of thought in The Philosophy of Astronism which emphasises the importance of the mass enthusiasm and the vast development of philosophy in society, especially in education, business, and government.

Derivatives

Stimulationist

Stimulationistic

Stjärnhus - derived from the Swedish language and used in Swedish denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Stjerhûs - derived from the Western Frisian language and used in Frisian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stjerehuzen

Stjernehus - derived from the Danish and Norwegian language and used in the Danish and Norwegian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stjernehuse

Stjörnuhús - derived from the Icelandic language and used in Icelandic denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Stochastís - the most common demonym for a follower of The Philosophy of Astronism in the Greek language.

Derivatives

Stochastés

Stock - in an Astronist contextualisation, collectively relating to the stock and its worth on the Education Sector Index, better known as the EduSecIndex.

Stockage - in an Astronist contextualisation, an informal term for the inventory of the resources of a subsidiary of The People's Constitutional Company of Jesse Millette.

Stock Market - in an Astronist contextualisation, primarily relating to the Education Sector Index, better known as the EduSecIndex, under the full ownership of The People's Constitutional Company of Jesse Millette, but also may refer to the stock markets on which Astronist companies are present.

Stovyklavietė - derived from the Lithuanian language and used in Lithuanian denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Derivatives

Stendai

Stower - in Astronist Education, an individual whom is the drexel of multiple phrontisteries in a given region.

Derivatives

Stowership

Stowerage

Stowery - in Astronist Education, the office of a stower.

Derivatives

Stoweries

Str - in Astronist Philosophy, the philophon for the discipline of stratigraphy.

Stragging - in Astronist Civicology, relates to houses and persons situated outside the city boundary that are not part of a distinct suburb, but are still considered official citizens of that city.

Derivatives

Stragglers

Stratigraphy - a large discipline of study in Astronist Philosophy dealing with the ordering and relative positioning of the strata of different planetary bodies.

Derivatives

Stratigraphic

Stratigrapher

Stratigraphical

Stratigraphically

Stratony - a subdiscipline of introspectics of Astronist Philosophy dealing with the distribution, age, classification, and economic important of certain cosmic entities, as well as the history of the interactions between the celestial and other celestials.

Derivatives

Stratonistic
Stratonic
Stratonical
Stratonically
Stratonicity

Stremic - in Astronist Philosophy, relating to stellar streams.

Derivatives
Stremical
Stremically

Stremic Formation - a branch of formatology dealing with the formations of stellar streams from a purely philosophical perspective.

Strenuousity - in Astronist Philosophy, the state, or fact, or extent of strenuousness, especially the strenuousness of a philosophical concept to understand, or the physical strain to overcome an obstacle, typically in the context of cosmic exploration.

Derivatives
Strenuousities

-strom - in Astronist Onomatology, a suffix used for Astronist names.

-stron - in Astronist Onomatology, a suffix used for Astronist names.

Strong - in an Astronist contextualisation, describing the relations between The People's Constitutional Company of Jesse Millette, and an external entity.

Stronghold - a nation considered to be closely associated with, and its peoples strong believers of The Philosophy of Astronism.

Stru - in Astronist Philosophy, the philophon for the discipline of structurology.

Structuration - in Astronist Philosophy, any type of abstract structure, but most predominantly, that which the borner in a philosophical argumentation is responsible with providing the debate.

Structurity - in Astronist Philosophy, an instrument of study concerned with the structures and internal workings of either The Cosmos as well-ordered whole, or of the individual celestials existent within it.

Derivatives
Structurities

Structurology - a major discipline of study in Astronist Philosophy dealing with the general structures of celestial entities, and their consequential impacts on cosmogony.

Derivatives
Structurologist
Structurologic
Structurological
Structurologically

Studial - in Astronist Philosophy, relating to study itself, or the role of a student.

Studiments - known as The Studiments, the largely informal, and non-scholarly system by which people learn about The Philosophy of Astronism, and its many derivations and subject branches. Generally, studiers choose four or five subjects within Astronist Philosophy that they wish to focus on, and classes are often held within Astronist philosophical buildings to assist studiers with their learning. Without any minimum age, children can begin their studiments in specialised classes that teach of the most basic aspects of Astronist philosophy, astronomy, and other related Astronist topics.

Studium - in Astronist Philosophy, a distinct amount of eagerness and zeal to learn about all the concepts and disciplines of The Philosophy of Astronism, especially characteristic of a newfounder.

Sturden - in Astronist Architecture, a raised block of stone resembling the bottom half of a pyramid shape which is used to stand an orrery, or another astronomical instrument upon.

Derivatives

Sturdens

Stygius - in Astronist Mystology, as well as in Astronist Genealogy, a male character of the Prophecies Era, whom is part of the Fifth Generation, as the only offspring of Bethan and Raxatius, and whose most famous adventures are detailed in The Grand Chronicles of Astronist Mystology.

Derivatives

Stygian

Sub-branch - a subdivision of an element of The Philosophy of Astronism.

Sub-brand - in product categorisation, a secondary or subordinate brand within the umbrella of a larger philosophical brand, particularly referring to a denomination within a comprehensive form of Astronism in the context of Astronist Philosophy.

Subception - in Astronist Philosophy, the practice of thinking of a philosophical concept or theory without being stimulated by some experience, or physical event.

Derivatives

Subcept

Subceptor

Subcepting

Subcepted

Subceptional

Subceptive

Subceptively

Subchapter - a chapter within a chapter of a book.

Subclause - in an Astronist contextualisation, in Astronist constitutional terminology, relating to the part of a article, or congressional bill that is separate from the main body, and is typically something added after the main body had been written.

Subcollection - in Astronist Archiving, a collection within a collection, usually pertaining to a discipline within an inclusive discipline respectively.

Subdenomination - a subdivision of a denomination of The Philosophy of Astronism.

Derivatives

Subdenominations

Subdenominational

Subdenominationally

Subdiscipline - in Astronist Philosophy, a smaller discipline of The Philosophy of Astronism that isn't substantial enough and so it fits within a standard discipline.

Derivatives

Subdisciplines

Subdisciplinary

Sublimationism - also known as Sublimationist Philosophy, a school of thought in The Philosophy of Astronism which rotates all its ideas, theories, and concepts around the ultimate transformation of philosophy, and subsequently social order itself, into a purer and more utopian form, and considers philosophy, knowledge, and a distinct centrality on the wonderment of The Cosmos to be the components to achieve this goal.

Derivatives

Sublimationist

Sublimationistic

Sublimationist Philosophy - another term for Sublimationist Philosophy.

Submarinity - in Astronist Philosophy, the instance in which a civilisation is existent majoratively underwater.

Subment - in Equational Philosophy, as part of wider Astronist Philosophy, the term used for an equation.

Derivatives

Subments

Submented

Submentic

Submentical

Submentically

SubAstronistisation - the process of Astronistisation in a somewhat incomplete form.

SubAstronistisationism - the belief that subAstronistisation is the most efficient way to secure the entire process.

Submontane - relating to an Astronist philosophical building that is located at the foothills of a mountain, or a type of philosophical building that is most commonly found at the foothills of a mountain.

Derivatives

Submontanial

Submontanially

Subphilosophy

- in Astronist Philosophy, a distinct philosophical movement, or a national version of a philosophy, which associates and identifies itself with a Root Philosophy by traits, name, organisation, leadership, and doctrine, but may use alternatives terms to describe itself, or its philosophical system, or beliefs may differ due to the philosophy's modification for a specific audience.
- in Astronist Philosophy, a separate and distinct philosophy that has branched out from The Philosophy of Astronism, rather than from its own pure origination.

Derivatives

Subphilosophies

Subphilosophical

Subphilosophically

Subphilosophicality

Subrubral - in omnidoxicology, a rubral that does not designate a new discourse for the topic that it addresses remains within the auspices of the standard rubral of the discourse.

Derivatives

Subrubrals

Subschool - in Astronist Philosophy, the distinct schools of thought within larger schools, such as Quadology within Collectivism.

Subsectioning - the division of a Planetary Sector into smaller subsectors, typically for the easier location of planetary systems.

Subsentensation - in omnidoxicology, a shorter version of insentensation that is integrally connected to an actual insentensation, usually as part of a list and is characterised by the use of alphabetical letters in the subsentensation's indexa.

Derivatives

Subsentence

Subsentensations

Subsentensational

Subsequency - in Astronist Philosophy, that which follows some cosmic event or phenomena, especially as a multitude.

Derivatives

Subsequencies

Subsequencial

Subsequentially

Subsidence - the gradual in-sinking and collapse of a project, or business operation, especially when caused by an environmental cause.

Subsidiary - in an Astronist contextualisation, a company that is owned by The People's Constitutional Company of Jesse Millette.

Derivatives

Subsidiaries

Subsidised Philosophy - an Organised Philosophy that is openly subsidised by an organisation, Organised Religion, or a government.

Subsumptionism - in Astronist Philosophy, the belief orientation focused on the notion that a school of thought, denomination, concept, or theory should become subsumed into another of the same sort, and involves the advocacy of this, both theoretically and practically.

Derivatives

Subsumptionist

Subsimplionistic

Subtisation - in Astronist Philosophy, the practice of estimating the number of visible stars in the night sky as opposed to the practice of retination, considered to be inferior to retination in terms of devotion. Compare with retination.

Derivatives

Subtise

Subtised

Subtising

Subtisational

Subtitive

Subtively

Substance Principle - in omnology of Astronist Philosophy, the appellation for the theory that all that does constitute The Cosmos is all that shall form the consequences of The Cosmos's own gradual ultimatum.

Substantiate - in an Astronist contextualisation, in an Astronist constitutional dispute, the action of providing to support a congressional member's claims for an amendment, or an interpretational dispute.

Substratium - in Astronist Architecture, an underground network of passages and corridors which can be accessed from within the Astronist building under which they are located and can be used for various purposes, the most common of which is as a library.

Derivatives

Substratiums

Subsumptionism - a school of thought in The Philosophy of Astronism which focuses on the concept that the philosophy should be included and perhaps even absorbed into another philosophy, religion, or ideology.

Derivatives

Subsumptionist

Subsumptionistic

Subterrarium - in Astronist Architecture, in some Astronist buildings, a type of underground hall, or room which is glass roofed, and typically the public walk above, and may look down and see through into the room.

Derivatives

Subterrariums

Suburbanpeople - in Astronist Civicology, the type of staffage specifically depicted in the foreground of a suburban illustration.

Suburban Planning - the design, attribution, and subsequent construction of a suburban area.

Suburbia - in Astronist Civicology, the term given to describe the entirety of the suburban area of a city rather than just one suburb.

Subvention - in an Astronist contextualisation, a grant of funds made by a government for The People's Constitutional Company of Jesse Millette in general, or for one of its subsidiaries, funds, organisations, or charities.

Subversion of Philosophy - in orbanology of Astronist Philosophy, the appellation for the proclamation by the Astronist Tradition that philosophy has been undermined throughout the history of humanity with the pinnacle hallmark of this considered to be the professionalisation of philosophy in the effort of making it publicly obsolete.

Subworld - in Astronist Philosophy, particularly within the discipline of selenology, an alternative appellation for moons as inferior to planets.

Derivatives

Subworlds

Successor - in Astronist Ornamentation, especially relating to ornamental archives, the specific ornament, or ornamental style that is confirmed to be chronologically succeeding another.

Sudanese Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Republic of the Sudan.

Sungrazed

Superapplication - in Astronist Philosophy, a cosmoapplication that a greater amount of philosophical ideas to form.

Derivatives

Superapplicational

Superbeing - in Astronist Philosophy, a being of such size, power and extremity, it cannot be compared to anything else, either physically or mentally.

Superclusteral - in Astronist Philosophy, relating to superclusters as forming the filaments of The Metagalaxy.

Superclusteral Formation - a branch of formatology dealing with the formations of superclusters as part of Metagalactic Formation from a purely philosophical perspective.

Superclustering - in Astronist Philosophy, the process of contemplating and applied entities categorised as superclusters.

Derivatives

Superclusteringity

Supercosmic - in Astronist Philosophy, that which exists within The Cosmos, but is deemed to hold universal or divinical properties, the main example of which are the Supercosmical Elements of lightness and darkness.

Derivatives

Supercosmical

Supercosmical Elements - in Astronist Philosophy, the appellation for the two elements of lightness and darkness when considered collectively and in the context of when they are deemed to hold an essential role in existence, as well as holding universal or divinical attributes.

Superfinality - in Astronist Philosophy, as part of Finality Theory, a type of finality characterised by a general emphasis on The Divine from the Astronist Cosmology, or any other higher deity.

Derivatives

Superfinalities

Superfinalism

Superfinalist

Supergalaxy - in kosmetrics of Astronist Philosophy, a huge galaxy formed from the merging of two major galaxies.

Derivatives

Supergalactic

Supergalactical

Supergalaxies

Superhabitables - in Astronist Philosophy, the colloquial term for Superhabitable Planets.

Superhabitability - in Astronist Philosophy, the instance and quality in which a planet holds greater habitability for humans than The Earth itself.

Derivatives

Superhabitable

Superimposition - in Astronist Ornamentation, the technique of making one pattern seem as though it is overlapping another, especially when this creates a jutting effect.

Superiorise - in Astronist Philosophy, to conceptually raise something other something else in relation to importance.

Derivatives

Superiorised

Superiorising

Superiorisation

Superiorisational

Superioriser

Superlight - a form of light, referred to in Astronist Mystology, that is present in cosmic or celestial entities, such as a supernovae or pulsars, and has such brightness that it is unquantifiable.

Supermassives - in Astronist Philosophy, collectively relating to supermassive black holes in a more colloquial manner.

Derivatives

Supermassivity

SuperAstronistisation - the process of Astronistisation in an excessive or overwhelming form.

SuperAstronistisationism - the belief that superAstronistisation is the truest form of Astronistisation, and directly opposes subAstronistisationism.

Supernova Day - in The Grand Astronist Calendar, a day of commemoration and celebration dedicated to the specific wondermentation, adoration, and laudation of supernovae in The Cosmos, and is characterised by decorations of supernovas, and special lectures and education events at Astronist philosophical buildings that focus on the subject of supernovas. This always takes place on 40th Ellenine, which translates to the 12th May in the Gregorian calendar.

Supernovaetion - in Astronist Philosophy, especially used within Cosmic Alchemy, one of two variations of the cosmo-alchemic process of novaetion, specifically relating to supernovas.

Derivatives

Supernovaetional

Supernovaetionally

Supernovaic - in Astronist Philosophy, relating to a supernova, or supernova-like entities or phenomena.

Supernovine - part of The Standard Astronomical Calendar, the alternative name for the Gregorian month of August.

Superphilosophy - a philosophy, especially an Organised Philosophy, collected with its subphilosophies, and perhaps even its Sister Philosophies, to form a philosophy which spans across countries and continents, and whose adherents hold a sense of unity under the Root Philosophy.

Derivatives

Superphilosophies

Superpseudomillettarinisation - the generally regressive and strictly opposed belief that the more controlling and regimented the process of Astronistisation is, the more beneficial the process will be to society and peoples.

Derivatives

SuperpseudoAstronistisationism

Superspecialise - in Astronist Philosophy, the instance in which a philosopher is specialises into a subdiscipline from a standard discipline.

Derivatives

Superspecialisation

Superspecialising

Superspecialised

Superstition - in an Astronist contextualisation, specifically with regards to the EduSecIndex, the feeling held by traders when they believe a company on the index will soon fall in value, but is typically unfounded.

Superstructure

- in Astronist Philosophy, another term for The Metagalaxy, including the filaments of The Cosmos.
- in an Astronist contextualisation, relating to the overall operations, activities, networks, institutions, cultures, and philosophies of The People's Constitutional Company of Jesse Millette as viewed throughout the most wide of lenses.

Derivatives

Surmation - in Astronist Philosophy, the process during which a concept is formed.

Derivatives

Surmational

Surmationally

Surmountation - in Astronist Ornamentation, a type of ornamentation surmounted onto an ornamented pedestal.

Surname - in an Astronist contextualisation, relating to the surnames of Astronist characters, their usages in branding, and their appearances in literature, and documentations.

Sustainability, Constitutional - in an Astronist contextualisation, relating to the extent to which an action, project, bill, or another entity is perceived to first be accepted constitutionally, and secondly be able to withstand constitutionality examinations.

Sustainability, Corporate - in an Astronist contextualisation, relating to the extent to which a company and its operations are seen to be able to continue on their trajectory for the far future, or

may relate to the policies and principles of sustainability held by The People's Constitutional Company of Jesse Millette.

Sutābondo - in Astronist Rendition, the Japanese name for the bracelet of Astronist philosophical adherence predominantly known as a starbond.

Sutāhausu - derived from the Japanese language and used in Japanese denominations of The Philosophy of Astronism, any one of the Astronist philosophical buildings, especially a planetarium, literally translated as a starhouse.

Sùxiàng - in Mandarin Chinese, the term given for any statue created by The People's Constitutional Company of Jesse Millette, or inspired by Astronist characters, philosophies, or culture.

Swarm - in an Astronist contextualisation, specifically in terms of the EduSecIndex, wherein traders in the market fight to try and gain shares in a newly listed company on the index that is very highly sort after.

Swazi Astronism

- the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Kingdom of Swaziland.
- the denomination of The Philosophy of Astronism that is most widely followed in Swaziland, by the Swazi peoples.

Swedish Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Kingdom of Sweden.

Swiss Astronism - the representations, interpretations, implementations and applications of Astronism and Astronist dogma into cultures, peoples and philosophy in the Swiss Confederation.

Syncretic Astronism - the sampana of The Philosophy of Astronism most commonly associated with people of syncretic thought and ideas, and the viewpoint from and through which The Philosophy of Astronism is interpreted.

Synopsis - in an Astronist contextualisation, relating to brief summary and generalisation of the plot and narrative of a particular Astronist book.

Syèk - a follower of the Haitian denomination of The Philosophy of Astronism, known as Syèk'limyé'ism.

Derivatives

Syèks

Syèk'limyé'ism - also known as Haitian Astronism, also colloquially known as Syèkism, the denomination of The Philosophy of Astronism that is most predominantly followed in Haiti, and by the Haitian diaspora, especially those whom still share a strong affiliation with the nation of Haiti.

Derivatives

Syék'limyé'ist

Syèkism

Syèkist

Symbioticism - in Astronist Philosophy, relating to the occurrence of a symbioticity.

Symbioticity - in Astronist Philosophy, the instrument of study measuring the interactions between two or more physically proximate cosmical entities for mutual advantage, known as the symbiotic relationship.

Derivatives

Symbioticities

Symbolance - in Astronist Architecture, the display of the Astronism Symbol, especially atop an Astronist building, or atop a structure, or outbuilding.

Derivatives

Symbolances

Symbolical Propaganda - in Astronist Propaganda, the use of symbols in propaganda in order to derive a particular message to the audience, but not one of obviousness.

Symmetrisation - in Astronist Ornamentation, the addition of ornamentations and patterns to an existing ornament in the effort of making the original ornamentation symmetrical.

Sýmpan

in Astronist Ornamentation, specifically Astro-Greek Ornamentation, relates to the depiction of The Cosmos in ornaments, and the symbols, icons, and imageries associated with The Cosmos.

Symphonianism - in Astronist Philosophy, the belief that philosophy, philosophical organisations, and the state should ideally complement one another so as to share goals, to hold policies, and to conduct themselves in mutually enhancing and beneficial ways; essentially, the formation of a symbiotic relationship between philosophy and the state, a supporter of which is known as a symphonian.

Derivatives
