This special issue is dedicated to the proceedings of the *IPM Conference on Set Theory & Model Theory* that took place October 12–15, 2015 at the Institute for Studies in Theoretical Physics and Mathematics (IPM) in Tehran, Iran. The conference hosted 48 registered participants and provided a rich venue for scientific exchange and collaboration between prominent international researchers and Iranian scholars and students.

On behalf of all the participants, we are indebted to M.J.A. Larijani, Director of IPM, for his enthusiastic support of the conference. Hats off also to M. Rahpeyma and other indefatigable staff members at IPM for their logistical prowess. More information about the conference can be found below:

http://math.ipm.ac.ir/conferences/2015/set_model_conf/Program.html

We are grateful to the authors for their contributions, patience, and cooperation during the refereeing and revision process. Furthermore, we offer a special note of gratitude to all the referees for their invaluable expert advice.

Guest Editors

Ali Enayat (Gothenburg)

Massoud Pourmahdian (Tehran)

Ralf Schindler (Münster)
