

## ERRATUM

Newman, S. E. Speed of writing and printing. *Bulletin of the Psychonomic Society*, 1980, 16 (4), 283-286. Page 284, column 2, paragraph 2 (Results section), lines 8-15. The sentences should read as follows: Examination of the means showed that the writing mean was somewhat, although not significantly, higher than the lowercase mean, and that both were higher ( $p < .01$ ) than the mean for the uppercase condition. The mean for all three groups increased over trials, but the increase was greater for both printing conditions than for the writing condition.

## CUTANEOUS COMMUNICATION SYSTEMS AND DEVICES

Frank A. Geldard, *Editor*

Sixteen original papers presented at the Conference on Cutaneous Communication Systems and Devices jointly sponsored by the Advanced Research Projects Agency of the U.S. Department of Defense and the Office of Naval Research in April 1973—Frank A. Geldard Chairman.

## CONTENTS

- Some Stimulus Parameters of Tactile Numerousness Perception** *by Eugene C. Lechelt*
- Vibratory Adaptation** *by John F. Hahn*
- Vibrotactile Intensity Scaling at Several Body Sites** *by Ronald T. Verrillo*
- What Other Senses Can Tell Us About Cutaneous Communication** *by Benjamin W. White*
- Electrocutaneous Displays** *by Frank A. Saunders*
- The Cochlear Model in Skin Stimulation** *by Wolf D. Keidel*
- Temporal Relations in Cutaneous Stimulation** *by George A. Gescheider*
- Electrocutaneous Stimulation** *by Gary B. Rollman*
- Vibratory Masking** *by Richard D. Gilson*
- Some Experience with Flight-Related Electrocutaneous and Vibrotactile Displays**  
*by Thomas J. Triggs, William H. Levison, and Richard Sanneman*
- Rate Control in Man-Machine Systems** *by Joseph Hirsch*
- Psychophysical Invariances in Proprioception** *by Joseph C. Stevens*
- Pictorial and Abstract Cutaneous Displays** *by James C. Craig*
- Summary of Optacon-Related Cutaneous Experiments** *by James C. Bliss*
- Limited Field of View in Reading Lettershapes with the Fingers** *by John W. Hill*
- Current Prospects for Cutaneous Communication** *by Carl E. Sherrick*
