

Contents

1	Rhetoric and Robotics	5
1.1	On the field of robotics	5
1.1.1	What is a <i>robot</i> ?	5
1.1.2	Through the history of moving machines	6
1.2	The technique of rhetoric	12
1.2.1	<i>Techne</i>	12
1.2.2	The analogy between rhetoric and mechanics	13
1.2.3	Why ancient rhetoric and robotics?	16
2	Movement, Perception and Language	17
2.1	Cognitive approach	18
2.1.1	Language and money	18
2.1.2	A glimpse into the role of movement in humans' perception of robots	18
2.1.3	Traces in natural language	21
2.2	Linguistic approach	25
2.2.1	<i>Telling</i> the world	25
2.2.2	An overview of the influence of language on cognition	26
2.2.3	The problem of ineffability, or <i>How movement resists linguis- tic coding</i>	27
2.2.4	The function of <i>enargeia</i> , or <i>How actions are made visible through language</i>	33
2.3	Discussion on Movement, Perception and Language	35
3	Lexical ambiguity resolution in robotics	37
3.1	Lexical ambiguity resolution	38
3.1.1	Lexical access during sentence comprehension (David Swin- ney, 1979)	38
3.1.2	Lexical ambiguity in the context of robotics	39
3.2	Robotics' wording	41
3.2.1	Robot dispositions: a series of <i>confused notions</i>	41
3.2.2	Robot actions : a sample of symbolic language (like in poetry)	42
3.2.3	Discussion on robot dispositions and actions, regarding lexical ambiguity resolution	47
3.3	Dealing with symbolic language and <i>confused notions</i>	48
3.3.1	Various common strategies	48
3.3.2	Among the rhetorical apparatus	52
3.3.3	<i>So what?</i>	53

4	Beyond the words: Rhetoric and Folk Epistemology	55
4.1	Rhetorical styles and Folk Epistemology	56
4.1.1	The notion of <i>style</i> and the field of <i>folk epistemology</i>	56
4.1.2	At one extreme of the spectrum: <i>sensationalism</i>	57
4.1.3	At the other extreme: <i>neutrality</i>	58
4.1.4	Consequences for robotics	60
4.2	Experimental rhetoric at the <i>Cité des Sciences et de l'Industrie</i> (Paris, France)	61
4.2.1	A gathering of roboticists and reporters	61
4.2.2	Conduct of the experiment	62
4.2.3	Conception	63
4.2.4	Results	65
5	Conclusion and Perspectives	75
5.1	Conclusion	75
5.2	Perspectives	79
5.2.1	Through the eyes of the roboticists	79
5.2.2	<i>Ekphrasis</i> of moving machines: the case of the robot Cheetah (MIT)	80
A	Profiles of the fictional candidates (exercise of <i>suasoria</i>)	83
A.1	Candidate 1: François Musia	83
A.2	Candidate 2: Juliette Langlois	84
A.3	Candidate 3: Patrick Schurk	85
A.4	Candidate 4: Marise Kudo	86
B	Productions: 3-minute speeches (exercise of <i>suasoria</i>)	89
B.1	Group 1: defenders of François Musia	89
B.2	Group 2: defenders of Juliette Langlois	91
B.3	Group 3: defenders of Patrick Schurk	92
B.4	Group 4: defenders of Marise Kudo	93
B.5	Additional comments	94
	Bibliography	97
