The *Nomos* of the Earth

in the International Law of
the *Jus Publicum Europæum*

By Carl Schmitt

Translated, annotated, and introduced by G.L. Ulmen

This last major work by Carl Schmitt, one of the 20th century's foremost legal and political thinkers, is also one of his most ambitious, since it attempts a reconstruction of the history of international law. More historical than his earlier works, it is more accessible to scholars in a variety of related fields.

The Nomos of the Earth contextualizes that crucial part of European history that began with the discovery of the New World in the 15th century and ended with the collapse of the *jus publicum europæum* in the early 20th century.

As "the last conscious representative of the *jus publicum europæum*," Schmitt focuses on the pivotal role of Great Britain in sustaining the European order, and of the United States in challenging and ultimately displacing it. Because of its scope and breadth, *The Nomos of the Earth* also prefigures any new international order that will develop in the 21st century.
