

Erratum

In the article "The Influence of Infant Facial Clues on Adoption Preferences" by Anthony Volk and Vernon L. Quinsey (*Human Nature* 13[4]:437–455, 2002), there is an error in Figure 2. The value for the Male happiness component score for Factor 2 should be 0.015. Corrected versions of Figures 2 and 3, as well as the actual component scores, can be viewed at the following website:
